A letter was read from a certified midwife saying that since the Midwives Act came into force it had made, so far, very little difference in the practice of midwives. It was also stated in the letter that in the locality where the writer practised the untrained women still practised, and that with one exception the doctors did not approve of practising midwives, and informed prospective mothers that if the certified midwives summoned doctors in difficult cases the doctors would double their fees. It was further pointed out in the letter that the poor folk on 12s. a week were frightened that the certified midwife would send for a doctor, and so let them in for a bill for two guineas.

Mr. WARD COUSINS observed that cases had undoubtedly occurred in which certified midwives were compelled to pay the fees of the medical men summoned before they would assist the midwives in the cases. In his opinion the medical profession did not think that a doctor called into an emergency case of difficulty should expect to be paid by the midwife who called him in. If the fee of the doctor was paid by the patient the difficulty was solved, because no one would object to the doctor being paid in that manner. It was a serious question, involving the satisfactory carrying out of the Midwives Act.

The SECRETARY of the Board explained that the letter was an *ex-parte* statement that the doctors in a certain locality did not like the certified midwives practising, and managed to squeeze them out by saying to the prospective mothers that if they employed a certified midwife should she send for a doctor the fee would be two guineas. Naturally the women would consider whether it would be better to employ a doctor for one guinea rather than run the chance of having to pay two guineas.

Mr. WARD COUSINS said that in Cardiff and Liverpool the local supervising authorities had made arrangements for the payment of doctors in these cases. It was a critical question, because the members of the medical profession were required in every sense of the word to give assistance in these cases, and the Central Midwives Board ought to insist that some provision should be made by the local supervising authorities for the purpose.

Miss WILSON asked under what powers Liverpool and Cardiff arranged for the payment of medical men when called in.

The SECRETARY explained that the accounts of County Councils were subjected to the Local Government Board auditors, and such payments would be surcharged; but the boroughs were not in that position, for they elected their own auditors, whose reports need not be regarded by the boroughs. If rich and large boroughs chose to break the law it was their own matter.

Mr. WARD COUSINS said that the difficulty was felt in country places where practitioners had to travel sometimes many miles at night without receiving any fee.

Dr. PARKER YOUNG said it could not be expected that doctors were to be called up at any time day or night and then not be paid. Medical men were summoned in cases of difficulty, and after being put to great trouble and a great expenditure of time they received no fee, therefore he was not surprised that they said their fees would be a certain amount. The people to blame in the matter were those who framed the Midwives Act; it ought to be amended. He concluded by moving that the matter should be referred to the Standing Committee to consider and report what amendment of the Act was desirable.

Mr. Ward Cousins seconded the motion, which was carried.

Report on the April Examination.

The following report by the Secretary on the April examination was received.

Results of Individual Training Schools.

Examination April 3rd, 1906.

Training School.	Total.	Passed.	Failed.	Percentage of Failures.

A special meeting of the Central Midwives Board, under the provisions of the rules of procedure on the proposed removal of a name from the Roll of Midwives, was held on May 3rd at 6, Suffolk Street, Pall Mall, with Dr. F. H. Champneys in the chair.

Midwives Struck off the Roll.

The following charges alleged against the certified midwives Sarah Hine and Mary Ann Wallis were heard:

That when called to a confinement they did not take with them the appliances or antiseptics required by Rule E 2, and that they declined to undertake to provide themselves with them; that they did not keep or possess a register of cases as required by Rule E 19 (*a*); and that they declined to undertake to provide themselves with one.

The Board ordered the removal of the names of these two midwives from the Roll.

The following charges alleged against Mary Alice Jackson, a certified midwife, were heard:

That she was intoxicated while on duty at a confinement on December 4th, 1905; that while on duty as aforesaid she did not wear a dress of washable material as required by Rule E 1; that she did not take with her to a confinement the appliances or antiseptics required by Rule E 2; that she did not disinfect her hands and forearms on each occasion of touching the genital organs as required by Rule E 3; that she did not wash the patient's external parts with soap and water, and then swab them with an antiseptic solution as required by Rule E 7.

The Board ordered the removal of the name of Mary Alice Jackson from the Roll of Midwives.

The following charges alleged against Harriet Fields were heard:

That being in attendance at a confinement on November 12th, 1905, and subsequent days she did not take with her the appliances and antiseptics required by Rule E 2. That she did not possess such appliances or antiseptics, and had never used them. That before making the first internal examination she did not wash the patient's external parts with soap and water and then swab them with an antiseptic solution as required by Rule E 7. That she did not wash the patient after her confinement, thereby neglecting to give full directions for securing her comfort during the lying-in period, as required by Rule E 11. That the patient being ill and her progress unsatisfactory on the fifth day after confinement, she did not, until the seventh day, decline to attend alone or advise that a registered medical practitioner should be sent for, as required by Rule E 17. That she did not keep a register of cases or a record of sending for medical help, as required by Rule E 19.

The Board ordered the removal of the name of Harriet Fields from the Roll of Midwives.

The following charges alleged against Mary Ann Stead, a certified midwife, were heard:

That being in attendance at a confinement on October 30th, 1905, and subsequent days, she did not take with her the appliances or antiseptics required by Rule E 2. That she did not previously disinfect her hands and forearms on each occasion of touching the patient's genital organs, as required by Rule E 3. That before making the first internal examination she did not wash the patient's external parts with soap and water and then swab them with an antiseptic solution, as required by Rule E 7. That she did not wash the patient after her confinement, thereby neglecting to give full directions for securing her comfort during the lying-in period, as required by Rule E 11. That the patient being ill and her progress unsatisfactory, she did not decline to attend alone or advise that a registered medical practitioner should be sent for, as required by Rule E 17.

The Board ordered the removal of the name of Mary Ann Stead from the Roll of midwives.

The following charges alleged against Emma Jones, a certified midwife, were heard:

That being in attendance at a confinement on November 29th, 1905, and subsequently during the lying-in period, she was guilty of negligence and misconduct in the following respects: (*a*) that having attended to the patient on November 30th, she did not again visit her until 3 p.m. on December 2nd; (*b*) that at 3 p.m. on December 2nd she was found lying in the garden of the patient's house drunk and incapable; (*c*) that on December 3rd she was drunk when she arrived at the patient's house about 3.30 p.m.; (*d*) that on December 5th she was drunk when she arrived at the patient's house. That being in attendance at a confinement on January 13th, 1906, and subsequently during the lying-in period, she was guilty of misconduct in the following respect: that having undertaken to convey the body of the deceased infant to the churchyard for burial on January 16th, 1906, she was found sitting in a garden, drunk and incapable, with the corpse in a box by her side.

The Board ordered the removal of the name of Emma Jones from the Roll of midwives.

The following charges alleged against Emma Whittaker, a certified midwife, were heard:

That being in attendance at a confinement on January 28th 1906, and subsequently during the lying-in period, she was guilty of negligence in the following respects: (*a*) That she did not wear a dress of washable material, nor a washable apron, as required by Rule E 1. (*b*) That she did not take with her the appliances nor the antiseptics required by Rule E 2. (*c*) That she omitted to notice that a portion of the membranes belonging to the after-birth had not been expelled. (*d*) That on January 29th, the patient being ill and her progress unsatisfactory, she did not take her temperature, nor did she decline to attend alone, nor advise that a registered medical practitioner should be sent for, as required by Rule E 17. That she habitually practised as a midwife without possessing a washable dress (Rule E 1), or appliances and antiseptics (Rule E 2).

The Board ordered the removal of the name of Emma Whittaker from the Roll of midwives.

A Midwife Severely Censured.

The following three charges alleged against Elizabeth Pattillo, a certified midwife, were heard:

(1) That being in attendance at a confinement at No. 42.

Granville Road, Crumpsall, she failed to apply proper and sufficient ligatures to the umbilical cord, whereby haemorrhage ensued, causing the death of the new-born infant. (2) That the death of the child having occurred before the attendance of a registered medical practitioner, she failed to notify the same to the local supervising authority, as required by Rule E 18 (1). (3) That she did not keep a register of cases as required by Rule E 19 (1).

The Board found that charge No. 1 had not been proved, but that charges Nos. 2 and 3 had been proved, and ordered that the midwife Elizabeth Pattillo be severely censured in regard to the last two charges. The Board also directed that a report be furnished in three months' time as to whether the midwife was observing Rule E 18 (1) and Rule E 19 (1).

Rule as to the Calling in of Medical Men by Midwives.

In regard to the conditions in which medical help must be sent for by midwives the Board had submitted the following rule for the approval of the Privy Council:

> In all cases of abortion, of illness of the patient or child, or of any abnormality occurring during pregnancy, labour, or lying-in, a midwife must explain that the case is one in which she must advise that a registered medical practitioner be sent for, and must hand to the husband or the nearest relative or friend present the form of sending for medical help properly filled up and signed by her, in order that this may be immediately forwarded to the medical practitioner.

In a letter dated April 26th, 1906, the Privy Council suggested that the words "the attendance of a registered medical practitioner is required" would be preferable to the words in the rule "she must advise that a registered medical practitioner be sent for."

The Board therefore amended the rule in accordance with the suggestion of the Privy Council.

GRANTS FOR SCIENTIFIC RESEARCH.

THE Council of the British Medical Association desires to remind members of the profession engaged in researches for the advancement of medicine and the allied sciences that it is prepared to receive applications for grants in aid of such research. Applications for sums to be granted, which must reach this office not later than May 31st, must include details of the precise character and objects of the research which is proposed, and must be made on forms to be had of the General Secretary, at the office of the Association, 429, Strand, London.

Every recipient is required to furnish to the Science Committee, on or before May 31st following upon the allotment of the grant, a report (or, if the object of the grant be not then attained, an interim report to be renewed at the same date in each subsequent year until a final report can be furnished) containing: (*a*) A brief statement for the Report of the Science Committee, showing the results arrived at, or the stage which the inquiry has reached; (*b*) a general statement of the expenditure incurred, accompanied, so far as is possible, with vouchers; (*c*) and references to any Transactions, Journals, or other publications in which the results of the research have been printed.

The work of the Grantees shall be subject to inspection.

RESEARCH SCHOLARSHIPS.

The Council of the British Medical Association is prepared to receive applications for three Research Scholarships, each of the value of £150 per annum, tenable for one year, and subject to renewal by the Council, provided the whole term of office has not exceeded three years.

The scholarships exist for the encouragement of research in Anatomy, Physiology, Pathology, Bacteriology, State Medicine, Clinical Medicine, and Clinical Surgery.

The Scholars' work shall be subject to inspection.

Applications for Scholarships must be made on forms to be had of the General Secretary, and returned on or before May 31st.

ERNEST HART RESEARCH SCHOLARSHIP.

The Council of the British Medical Association is also prepared to receive applications for the Ernest Hart Memorial Scholarship of the value of £200 per annum, tenable for one year, but subject to renewal by the Council for another year. The Scholarship is for the study of some subject in the department of State Medicine.

N.B.—Applications for Scholarships and Grants should, as a rule, be accompanied by a recommendation from the head of the laboratory in which the applicant proposes to work, setting out the fitness of the candidate to conduct such work, and the probable value of the work to be undertaken. This is not intended, however, to prevent applications for Grants in aid of work which need not be performed in a recognized laboratory.

GUY ELLISTON, *General Secretary.*

429, Strand,
April, 1906.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

IN seventy-six of the largest English towns, including London, 8,793 births and 4,955 deaths were registered during the week ending Saturday last, May 5th. The annual rate of mortality in these towns, which had been 17.1, 17.3, and 16.7 per 1,000 in the three preceding weeks, further fell last week to 16.3 per 1,000. The rates in the several towns ranged from 7.2 in Hornsey, 7.3 in Willesden, 7.9 in King's Norton, 8.4 in Leyton, 8.5 in Bournemouth, 9.2 in East Ham, and 9.6 in Tottenham, to 20.9 in Birkenhead, 21.2 in Hanley, 21.7 in Norwich and in St. Helens, 22.2 in Oldham, and 27.1 in Liverpool. In London the rate of mortality was 16.0 per 1,000, while it averaged 16.5 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.6 per 1,000 in the seventy-six towns; in London this death-rate was equal to 1.5 per 1,000, while among the seventy-five other large towns the rates ranged upwards to 2.7 in Coventry and in Salford, 2.8 in Merthyr Tydfil, 3.0 in Burton-on-Trent and in Manchester, 3.6 in Burnley, 3.9 in Walthamstow, 4.2 in Liverpool, and 5.0 in Great Yarmouth. Measles caused a death-rate of 1.3 in Preston, 1.6 in Manchester and in Salford, 1.8 in Bury and in Bradford, 2.0 in Burnley, 2.1 in Walthamstow, 2.3 in Liverpool, and 4.0 in Great Yarmouth; scarlet fever of 1.1 in Leicester; diphtheria of 1.3 in Walthamstow; whooping-cough of 1.1 in Walsall, Leicester, Liverpool, and Swansea, 1.3 in Southampton and Reading, 1.4 in Sunderland, 2.0 in Burton-on-Trent and Coventry, 2.1 in Merthyr Tydfil, and 2.4 in Bootle. The mortality from enteric fever and from diarrhoea showed no marked excess in any of the large towns. No fatal case of small-pox was registered last week in any of the seventy-six towns, and no small-pox patients were admitted into the Metropolitan Asylums Hospitals. The number of scarlet-fever cases remaining under treatment in these hospitals and in the London Fever Hospital at the end of the week was 2,337, against 2,302, 2,225, and 2,240 at the end of the three preceding weeks; 357 new cases were admitted during the week, against 270, 288, and 314 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

DURING the week ending Saturday last, May 5th, 1,084 births and 618 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 19.1, 17.6, and 18.4 per 1,000 in the three preceding weeks, declined again to 18.0 per 1,000 last week, but was 1.7 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 10.8 in Paisley and 15.6 in Aberdeen to 20.6 in Dundee and 21.4 in Greenock. The death-rate from the principal infectious diseases averaged 2.0 per 1,000 in these towns, the highest rates being recorded in Dundee and Leith. The 311 deaths registered in Glasgow included 12 which were referred to measles, 6 to diphtheria, 10 to whooping-cough, 2 to "fever," and 4 to diarrhoea. Five fatal cases of measles, 2 of scarlet fever, 4 of whooping-cough, and 2 of diarrhoea were recorded in Edinburgh. Three deaths from measles, 2 from whooping-cough, and 5 from diarrhoea occurred in Dundee: 3 from whooping-cough in Aberdeen; and 2 from measles in Leith.

HEALTH OF IRISH TOWNS.

DURING the week ending Saturday, May 5th, 607 births and 442 deaths were registered in six of the principal Irish towns, as against 571 births and 394 deaths in the preceding period. The annual death-rate in these towns which had been 20.4, 17.3, and 21.8 per 1,000 in the three preceding weeks, rose to 22.7 per 1,000 in the week under notice, this figure being 6.4 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 17.5 in Waterford and 19.8 in Londonderry to 25.9 in Dublin and 26.0 in Belfast and Limerick. The zymotic death-rate in the same six Irish towns averaged 1.0 per 1,000, or 0.4 per 1,000 lower than during the preceding period, the highest figure—3.3—being recorded in Belfast, while no deaths under this heading were recorded in Cork, Limerick and Waterford.

ENGLISH URBAN MORTALITY IN THE FIRST QUARTER OF 1906.

[SPECIALLY REPORTED FOR THE BRITISH MEDICAL JOURNAL.]

THE vital statistics of the seventy-six large towns dealt with in the Registrar-General's weekly returns are summarized in the accompanying table. During the three months ending March last, 113,207 births were registered in these towns, equal to an annual rate of 28.7 per 1,000 of the population, estimated at 15,818,360 persons in the middle of the year; in the corresponding quarter of the three preceding years the rates were 30.1, 29.7, and 29.4 per 1,000. In London the birth-rate last quarter was 27.8 per 1,000, while it averaged 29.1 in the seventy-five other large towns, and ranged from 16.4 in Hastings, 16.7 in Hornsey, 17.4 in Bournemouth, 19.2 in Halifax, 20.8 in Bradford, 21.5 in Northampton, and 22.4 in Rochdale, to 34.4 in Sunderland, 34.5 in Smethwick and in St. Helens, 34.7 in Rotherham, 34.9 in Gateshead, 35.9 in Hanley, 36.5 in Merthyr Tydfil, and 39.5 in Rhondda.

During the quarter under notice 65,351 deaths were registered in these towns, equal to an annual rate of 16.6 per 1,000: in the three preceding first quarters the rates were 17.3, 18.7, and 17.2 per 1,000. In London the rate of mortality last quarter was 16.6 per 1,000, while among the seventy-five large provincial towns the rates ranged from 10.2 in Hornsey, 10.7 in King's Norton, 10.9 in East Ham, 11.1 in Walthamstow, 11.3 in Northampton, 11.6 in Willesden, and 11.8 in Leyton, to 19.1 in Sunderland, 19.3 in Middlesbrough and in Tynemouth, 19.6 in Warrington, 20.0 in Swansea, 20.1 in Merthyr Tydfil, 21.3 in Liverpool, and 22.5 in Preston.

The 65,351 deaths from all causes in the seventy-six towns last quarter included 5,444 which were referred to the principal infectious diseases: of these, 3 resulted from small-pox, 1,628 from measles, 537 from scarlet fever, 847 from diphtheria, 1,597 from whooping-cough, 266 from "fever" (principally enteric), and 566 from diarrhoea. The death-rate from these diseases, which had been 1.67, 1.60, and 1.39 per 1,000 in the corresponding quarters of the three preceding years, was 1.38 per 1,000 last quarter. In London the death-rate from these principal infectious diseases was 1.44 per 1,000, while it averaged 1.36 in the seventy-five other large towns, among which the rates ranged from 0.24 in Burton-on-Trent and in Wigan, 0.30 in Hastings, 0.39 in Ipswich, 0.46 in Grimsby, 0.50 in Walsall, 0.52 in Tynemouth and 0.54 in Bolton, to 2.01 in Plymouth and in Leicester, 2.06, West Bromwich, 2.14 in Leeds, 2.22 in Liverpool 2.34 in Blackburn, 2.60 in Bury, and 3.59 in Preston. The 1,628 deaths from measles were equal to an annual rate of 0.41 per 1,000; in London this rate was 0.58 per 1,000, while it averaged 0.34 in the seventy-five other large towns, and was highest in Tottenham, Wolverhampton, Bury, Blackburn, Preston, Leeds, and Newcastle-on-Tyne. The 537 fatal cases of scarlet fever corresponded to an annual rate of 0.14 per 1.000; in London the death-rate from this disease was only 0.11 per 1,000, while it averaged 0.15 in the seventy-five large provincial towns, among which scarlet fever was proportionally most fatal in East Ham, Hanley, Liverpool, Bootle, Oldham, Blackburn, Sheffield, and West Hartlepool. The 847 deaths from diphtheria were equal to an annual rate of 0.21 per 1,000; in London the diphtheria mortality was 0.17 per 1,000, while it averaged 0.24 in the seventy-five other large towns, and was greatest in West Ham, Derby, St. Helens, Hull, Middlesbrough, Stockton-on-Tees, and Merthyr Tydfil. The 1,597 fatal cases of whooping-cough corresponded to an annual death-rate of 0.41 per 1,000: in London this rate was 0.39 per 1,000: among the seventy-five large provincial towns whooping-cough was proportionally most fatal in Reading, Plymouth, Handsworth (Staffs), West Bromwich, Smethwick, Aston Manor, and Leicester. The 266 deaths referred to different forms of "fever" were equal to a rate of 0.07 per 1,000; in London the "fever" death-rate was only 0.04 per 1,000, while it averaged 0.08 per 1,000 in the seventy-five other large towns, and was highest in Northampton, Hanley, West Bromwich, Grimsby, Bolton, Salford, Preston, and Merthyr Tydfil. The 566 fatal cases of diarrhoea corresponded to an annual rate of 0.14 per 1.000: in London the rate was 0.15 per 1.000; among the seventy-five other large towns diarrhoea was proportionally most fatal in Great Yarmouth, Walsall, Rochdale, Burnley, Barrow-in-Furness, and Middlesbrough. Of the 3 fatal cases of small-pox registered in the seventy-six towns last quarter, 1 belonged to Plymouth, 1 to Bristol, and 1 to South Shields.

Infant mortality, measured by the proportion of deaths among children under one year of age to registered births, was equal to 128 per 1,000 last quarter, against 135, 145, and 127 in the corresponding periods of the three preceding years; in London the rate of infant mortality was 117 per 1.000, while it averaged 133 in the seventy-five other large towns, and ranged from 87 in Huddersfield, 88 in East Ham, 96 in Hornsey and in Willesden, 98 in Leyton, and 100 in Birkenhead, to 174 in Bournemouth, 176 in Nottingham, 179 in Walsall, 184 in Rhondda, 193 in Preston, and 202 in Leicester.

The causes of 764, or 1.2 per cent., of the deaths registered in the seventy-six large towns were not certified either by a registered medical practitioner or by a coroner. All the causes of death were duly certified in Croydon, West Ham, East Ham, Brighton, Southampton, Plymouth, Derby, Birkenhead, Oldham, Cardiff, and nine other smaller towns: while the largest proportions of uncertified deaths were registered in Burton-on-Trent, Liverpool, St. Helens, Warrington, Rotherham, South Shields, and Gateshead.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE.

Deputy-Inspector-General of Hospitals and Fleets John Tyndall has been awarded the Greenwich Hospital Pension of £50 a year in the vacancy caused by the death of Deputy-Inspector-General Thomas R. Warren. Deputy-Inspector-General Tyndall's commission as surgeon is dated March 2nd, 1871; he was promoted Staff-Surgeon on March 2nd, 1883, Fleet-Surgeon on May 8th, 1891, and retired with the rank of Deputy-Inspector-General on Oct. 22nd, 1899. Deputy-Inspector-General Tyndall served at the Royal Naval Hospital, Jamaica, 1876-9. He performed a notable service in voluntarily attending in the Military Hospital, Port Royal, 1878, during an outbreak of yellow fever. Here he contracted the disease, and narrowly escaped death (recommended for promotion). He was Senior Medical Officer in the Niger Expedition, 1883, and was mentioned in dispatches.

The following appointments have been made at the Admiralty: Francis J. L. P. McKenna, M.B., Surgeon, to the *Egmont*, additional for Malta Dockyard, vice Westcott; Edward P. G. Causton, B.A., Surgeon, to the *Britannia*, additional, for Dartmouth College; Reginald H. St. B. E. Hughes, Surgeon, and John J. H. Rooney, Surgeon, both to the *Victory*, additional, for disposal—all dated May 2nd.

Civil Practitioner Thomas J. O'Meara, M.B., is appointed Surgeon and Agent at Castletownsend, Union Hall, Ballyally, and Baltimore; and Civil Practitioner George W. Daunt, Surgeon and Agent at Mill Cove and Ross Bar, both May 5th.

THE LIFE GUARDS.

The appointment is gazetted of Captain Alfred Crichton Lupton, M.B., from the Royal Army Medical Corps, to be Surgeon-Captain in the 1st Life Guards, under date of May 5th, vice Surgeon-Major B. Pares (promoted). Captain Lupton's first appointment, as Lieutenant, is dated January 28th, 1898 and his captaincy January 28th, 1901. He saw active service in the South African war, 1899-1902, in the operations in the Orange River Colony, including the action at Wittebergen, and in the operations in Cape Colony south of the Orange River. He has the Queen's medal with four clasps.

ARMY MEDICAL STAFF.

Major Herbert John Martin Buist, D.S.O., M.B., B.Ch., Royal Army Medical Corps, to be a Deputy-Assistant Director-General, vice Major T. McCulloch, M.B., Royal Army Medical Corps, whose tenure of that appointment has expired (dated May 1st). Major Buist's commission as Surgeon-Captain is dated July 28th, 1891, and that as Major July 28th, 1903. He saw active service in the campaign on the North-West Frontier of India in 1897 with the Malakhand Field Force, being mentioned in dispatches (medal with two clasps).

ROYAL ARMY MEDICAL CORPS.

Colonel O. E. P. Lloyd, V.C., has been appointed Principal Medical Officer of the Jubbulpore and Jhansi Brigades.

Colonel R. H. Foreman has been appointed Principal Medical Officer of the Bombay Brigade.

Lieutenant-Colonel Octavius Todd, M.B., M.Ch., is promoted to be Colonel, vice Colonel B. Montgomerie Blennerhassett, C.M.G., retired April 4th. Lieutenant-Colonel Todd's commission as Major is dated March 6th, 1892, and that of Lieutenant-Colonel March 6th, 1900. Lieutenant-Colonel Todd served in the South African war in 1899-1900 as Principal Medical Officer of a Division, and also as that of the 14th General Hospital. He saw much of the fighting, being engaged in the Relief of Ladysmith, including the action at Vaal Kranz, the operations on the Tugela Heights (February 14th to 27th, 1900), and the action at Pieter's Hill. He also took part in the Natal operations of March to the beginning of June of the same year, including the action at Laing's Nek, as well as in those in the Transvaal. He was twice mentioned in dispatches, and has the Queen's medal with five clasps, and the King's medal with two clasps.

Lieutenant W. C. Nimmo has assumed medical charge of women and children, Marlborough lines, Aldershot.

Lieutenant-Colonel Francis Joseph Lambkin to be Colonel, under the provisions of Articles 36 and 356 of the Royal Warrant of March 19th, 1906 (dated May 9th). Lieutenant-Colonel Lambkin entered the service as Surgeon on July 30th, 1881, became Surgeon-Major on July 30th, 1893, and Lieutenant-Colonel on July 30th, 1901. He served in the South African war, 1899-1900, and was present at the battle of Colenso, the action at Spion Kop, the engagements of Vaal Krantz and Pieter's Hill, and at the relief of Ladysmith.

INDIAN MEDICAL SERVICE.

Major F. J. Crawford has been gazetted to act as Senior Medical Officer, General Hospital, Madras, in the room of Lieutenant-Colonel W. B. Browning, C.I.E., who is proceeding on leave.

The following officers have been appointed to the *personnel* of the Medical Division of the new Military Organization in India:

Principal Medical Officer—Sir T. J. Gallwey, K.C.M.G., C.B., A.M.S.

Secretaries to Surgeon-General (I.M.S.)—Major W. H. W. Elliot, D.S.O., I.M.S. (on leave); Major B. G. Seton, I.M.S. (officiating).

Secretary to Surgeon-General (R.A.M.C.)—Captain E. B. Knox, R.A.M.C. Assistant-Secretary to Surgeon-General—Assistant-Surgeon J. J. McDonald, M.D., I.S.M.D.

Sanitary Officer, Army Head Quarters—Captain H. E. M. Douglas, D.S.O., R.A.M.C.

INFANTRY (MILITIA).

Surgeon-Lieutenant-Colonel T. Carter, of the 4th Battalion Yorkshire Regiment, is retired, under the conditions of para. 55, Militia Regulations, with permission to retain his rank, and to wear the prescribed uniform, May 5th.

ARMY MEDICAL CORPS (MILITIA).

Surgeon-Captain Samuel M. Sloan, M.B., Army Medical Reserve of Officers (late Captain, Scottish Command, Glasgow Companies, R.A.M.C. (Volunteers) to be Captain, March 15th.

Supernumerary Lieutenant (Honorary Lieutenant in the Army) G. Lane to be Captain, remaining seconded, March 30th.

RIFLE (VOLUNTEERS).

Walter Fitzpatrick is gazetted to be Surgeon-Lieutenant in the 5th Volunteer Battalion Devonshire Regiment, under date April 28th.

Supernumerary Surgeon-Lieutenant-Colonel and Honorary Surgeon-Colonel W. D. Waterhouse, V.D., of the 4th Volunteer Battalion Royal Fusiliers, resigns the appointment of Brigade-Surgeon-Lieutenant-Colonel (Senior Medical Officer) 2nd London Volunteer Infantry Brigade, April 1st.

Surgeon-Major H. M. Ramsay resigns his commission in the 14th Middlesex (Inns of Court) Volunteer Rifle Corps, April 9th.

Surgeon-Lieutenant W. A. Malcolm, M.B., of the 21st Middlesex (Finsbury) Volunteer Rifle Corps, is appointed Surgeon-Captain.

Surgeon-Captain C. Boyd, of the 3rd Volunteer Battalion (Royal West Surrey Regiment), is granted the honorary rank of Surgeon-Major.

Surgeon-Captain C. A. O. Owens, M.D. (Brigade-Surgeon-Lieutenant-Colonel, Senior Medical Officer, Norfolk Volunteer Infantry Brigade), of the 4th Volunteer Battalion Norfolk Regiment, is promoted to be Surgeon-Major, August 1st, 1902.

Surgeon-Lieutenant-Colonel H. W. Roberts, V.D., of the 2nd Volunteer Battalion Queen's Own Royal West Kent Regiment, is granted the honorary rank of Surgeon-Colonel, April 28th.

Surgeon-Lieutenant B. Stracey, M.B., resigns his commission in the 1st Volunteer Battalion Leicestershire Regiment, April 28th.

Alexander B. Sloan, M.D., is appointed to the 4th Volunteer Battalion Scottish Rifles (Cameronians) as Surgeon-Lieutenant, April 28th.

The King has been graciously pleased to confer the Volunteer Officers' Decoration upon the undermentioned officers of the Volunteer Force:

In the Scottish Command (Artillery) Surgeon-Lieutenant-Colonel William R. Sewell, M.D., of the 1st Renfrew and Dumbarton Royal Garrison Artillery (Volunteers).

In the Southern Command (Artillery) Surgeon-Lieutenant George C. Searle, of the 1st Devonshire Royal Garrison Artillery (Volunteers).

In the Western Command (Rifles) Surgeon-Major James S. Wilson, M.D., of the 2nd Volunteer Battalion South Staffordshire Regiment, and Surgeon-Major and Honorary Surgeon-Lieutenant-Colonel W. H. Packer, M.D., of the 1st Volunteer Battalion King's (Shropshire Light Infantry).

The military rank of Surgeon-Lieutenant-Colonel Edward Cureton, V.D. (Honorary Surgeon-Colonel), is as now given, and not as stated in the Supplement on April 28th.

ROYAL ARMY MEDICAL CORPS (VOLUNTEERS).

James A. H. Aitken, M.B., of the Highland Light Infantry Bearer Company, to be Lieutenant, April 28th.

Captain J. N. Brown, M.D., of the 2nd London Bearer Company, is appointed Brigade Surgeon Lieutenant-Colonel whilst employed as Senior Medical Officer of the 2nd London Volunteer Infantry Brigade, April 1st.

George W. Craig, of the Worcester and Warwick Bearer Company, is gazetted Lieutenant, April 28th.

DE BOINVILLE, V. Chastel, M.B., Ch.B.Edin., Honorary Anaesthetist to the David Lewis Northern Hospital, Liverpool.

DICK, W., L.R.C.S., L.R.C.P., House-Surgeon to the Bradford Children's Hospital.

HARDING, C. H., M.R.C.S., L.R.C.P., District Medical Officer of the Whittlesey Union.

HARTFORD, A. H. B., L.R.C.P and S.Irel, Certifying Factory Surgeon for the Christchurch District, co. Hants.

HOWLETT, Bernard, M.R.C.S., L.R.C.P., Medical Officer and Public Vaccinator for the Parishes of Ham and Coombe of the Kingston Union.

JAMES, H. W., M.R.C.S., L.R.C.P., Resident Assistant Medical Officer to the Camberwell Parish Infirmary.

LIGHTFOOT, J. P., M.R.C.S., L.R.C.P., Medical Officer of Health of the Leyburn Rural District and Workhouse Medical Officer of the Leyburn Union.

LYS, Henry Grabham, M.D.Lond., M.R.C.P.Edin., Physician to the Royal Victoria Hospital, Bournemouth.

PRINGLE, A. M. N., M.B., C.M.Edin., Medical Officer of Health to the Ipswich Borough and Port.

RADCLIFFE, R. B., M.B., Ch.B., Fourth Resident Medical Officer to the Leeds Public Dispensary.

SHEEHAN, M., M.R.C.S., L.R.C.P., Certifying Factory Surgeon for the Mallow District, co. Cork.

STARK, J. Nigel, M.D., F.F.P.S.Glasg., Surgeon to the Glasgow Samaritan Hospital for Women, vice J. Stuart Nairne, F.R.C.S.E., resigned.

STEAVENSON, A. P., M.D.Edin., District Medical Officer of the Darlington Union.

STRAIN, Arthur C., M.B., Ch.B., Resident Physician, Chalmers Hospital, Edinburgh.

THOMAS, H. Mortimer, M.R.C.S., L.R.C.P., House-Surgeon to the Royal National Orthopaedic Hospital, vice Sidney Welham, M.R.C.S.Eng.

WAGGETT, Ernest, M.B., B.C.Cantab., Surgeon to the newly constituted Department for Diseases of the Throat, Ear and Nose at Charing Cross Hospital.

WILKINS, Eric M., M.B., M.R.C.S., Junior Assistant Medical Officer at Monsall Fever Hospital, Manchester.

LEEDS GENERAL INFIRMARY.—The following appointments have been made by the Faculty of the General Infirmary:

Resident Ophthalmic Officer: R. G. Dixon, M.B., Ch.B.Leeds.
Ophthalmic House-Surgeon: P. A. H. Radcliffe, M.B., Ch.B.Vict.
Resident Obstetric Officer: W. E. Brierley, M.B., Ch.B.Vict.
Resident at the Convalescent Homes: Alf. Gough, M.B., Ch.B. Leeds.
House-Physicians: A. L. Walker, M.B., Ch.B.Leeds, and R. A. Veale, B.A.Oxon.
House-Surgeon: W. Edmondson, M.R.C.S., L.R.C.P.

BIRTHS, MARRIAGES, AND DEATHS.

The charge for inserting announcements of Births, Marriages, and Deaths is 3s. 6d., which sum should be forwarded in post-office orders or stamps with the notice not later than Wednesday morning, in order to ensure insertion in the current issue.

BIRTHS.

HENDERSON.—On May 4th, at The Elms, Lasswade, the wife of John Henderson, M.B., C.M., of a daughter.

HOLMAN.—On Thursday, May 3rd, at Galeston, Eton Avenue, Hampstead, the wife of Frank Kay Holman, M.D., M.R.C.S., L.R.C.P., of a son.

WILSON.—On May 3rd, at 227, Oldfield Road, Salford, Manchester, to Mr. and Mrs. A. W. Wilson, M.B. a daughter.

DIARY FOR THE WEEK.

MONDAY.

MEDICAL SOCIETY OF LONDON, 11, Chandos Street, Cavendish Square. W.C., 8 p.m. General meeting, 8.30 p.m.—Papers: (1) Mr. W. H. Battle: Method of Operation for the Radical Cure of Femoral Hernia. (2) Mr. W. H. Curtis: A Successful Case of Appendicitic Abscess and Multiple Liver Abscess: Appendicectomy and Drainage.

TUESDAY.

PATHOLOGICAL SOCIETY OF LONDON, 20, Hanover Square, W., 8.30 p.m.— 1) Papers: Chorion-Epithelioma of Congenital Origin, by Drs. Victor Bonney (jointly with Dr. Schenk), J. Bernstein, Teacher (Glasgow), Williamson, Spilsbury, and Mr. Hicks. (2) Dr. J. Fawcett: Diphtheria of Oesophagus and Bronchi. Cards specimens will also be shown.

WEDNESDAY.

BRITISH BALNEOLOGICAL AND CLIMATOLOGICAL SOCIETY, 20, Hanover Square, W., 5 p.m., General meeting; 5.30 p.m., an address by Dr. Frederick T. Roberts, on Some General Comments on Balneology and Associated Methods; and on Spas.

FRIDAY.

SOCIETY FOR THE STUDY OF DISEASE IN CHILDREN, 11, Chandos Street, W., 5 30 p.m.—The Wightman Lecture, by Dr. Broca, of Paris, on Appendicitis in Childhood.

POST-GRADUATE COURSES AND LECTURES.

CENTRAL LONDON THROAT AND EAR HOSPITAL, Gray's Inn Road, W.C.—Wednesday, 5 p.m. Pathology.

CHARING CROSS HOSPITAL, 4 p.m.—Monday, Mental: Thursday, Medical.

HOSPITAL FOR SICK CHILDREN, Great Ormond Street, W.C., Thursday, 4 p.m —Congenital Heart Disease.

LONDON SCHOOL OF CLINICAL MEDICINE, Dreadnought Hospital, Greenwich.—The following are the arrangements for next week: Clinical Demonstrations: Monday, 2.30 p m., Medicine; 3.15 p.m., Surgery; 4 p.m., Throat and Ear. Tuesday, 2.30 p.m., Medicine; 3.15 p.m., Surgery; 4 p.m., Skin Diseases Wednesday, 2.30 p.m., Medicine; 3.15 p.m., Surgery: 4 p.m., Ophthalmology. Thursday, 2 30 p m., Medicine; 3.15 p m., Surgery; 4 p.m., Radiography. Friday, 2.30 p.m., Medicine; 3.15 p.m., Surgery. Out-patient Demonstrations, Medical, and Surgical, daily at 10 a.m. Ear and Throat, Mondays and Thursdays, at noon. Eye, Wednesdays and Saturdays, 11 a.m. Skin, Tuesdays and Fridays, at noon. Operations, 2.30 daily.

MEDICAL GRADUATES' COLLEGE AND POLYCLINIC, 22, Chenies Street, W.C.—The following clinical demonstrations have been arranged for next week at 4 p.m. each day:

Monday, Skin; Tuesday, Medical; Wednesday, Surgical: Thursday, Surgical; Friday, Ear. Lectures at 5 15 p.m. each day will be given as follows: Monday, (1) Appendicostomy, (2) Tuberculosis of the Caecum. Tuesday, Gastric Ulcer; Wednesday, Dementia Praecox; Thursday, Observations on Treatment.

NATIONAL HOSPITAL FOR THE PARALYSED AND EPILEPTIC, Queen Square, W.C.—Tuesday, 3.30 p.m. Cerebral Tumours. Friday, 3 30 p.m., Cerebral Surgery.

NORTH-EAST LONDON POST-GRADUATE COLLEGE, Tottenham Hospital, N.—The following clinical lectures have been arranged for next week at 4.30 p.m.: Tuesday, Lecture: Diagnosis and Treatment of Ringworm; Thursday, Lecture-demonstration: Electrical Treatment.

UNIVERSITY COLLEGE HOSPITAL, Gower Street, W.C.—Wednesday, 4 p.m., Clinical Lecture on Types of Pulmonary Tuberculosis from the Point of View of Treatment.

WEST LONDON HOSPITAL POST-GRADUATE COLLEGE, Hammersmith Road, London, W.—The following are the arrangements for next week: Monday, 10 a.m., Tropical Medicine; 12 noon, Practical Surgery; 5 p.m., The Examination of the Gastric Contents; Tuesday, 3 p.m., Demonstration in Medical Wards: 5 p.m., Intestinal Obstruction; Wednesday, 5 p.m.. Practical Medicine: Thursday, 10 a.m.. Tropical Medicine; 12 noon, Practical Surgery; 5 p.m., Practical Surgery: Friday, 5 p.m., Diagnosis of Appendicitis; Saturday, 2 p.m., Demonstration in Medical Wards.

COMMITTEE ON PUERPERAL MORBIDITY.

T the annual meeting of the Association at Leicester paper was read in the Section of Obstetrics and ynaecology by Professor Hastings Tweedy, Rotunda ospital, Dublin, on the High Range of Normal Tempe- ture and Pulse throughout the Puerperium.

Dr. Tweedy urged that success in obstetrical practice more accurately gauged by a low percentage of morbid ses than by any table of septic mortality. At present, wever, no definite agreement exists as to the physical dications of puerperal morbidity, and every maternity spital fixes its own arbitrary standard for statistical rposes, its cases being grouped accordingly as normal abnormal. He said that a clear insight into the effi- ency of our methods could only be gained by the loption of a common standard on which to base orbidity returns.

In order that statistics may be comparable they must compiled on a similar basis. In the discussion which llowed speakers agreed that a common standard was ost desirable, and a resolution was unanimously passed the Section:

> That it is desirable that a standard of morbidity be fixed fo use in maternity hospitals, and that the Council be requested to arrange for a Special Committee to inquire into the matter.

In accordance with this resolution a Special Committee is appointed consisting of members selected by the uncil and of Representatives nominated by their re- ective societies at the request of the Council, an effort us being made to obtain a Committee representing the ews of obstetricians throught the United Kingdom.

The Committee consisted of the following members: ofessor H. R. Spencer (London), Convener; Miss rrett Anderson, M.D., Honorary Secretary; Dr. R. C. ist (Dundee), Professor Byers (Belfast), Professor veedy (Dublin), Dr. Thomas Wilson (Birmingham), Dr. bert Boxall (London Obstetrical Society), Dr. J. W. llantyne (Edinburgh Obstetrical Society), Professor bert Jardine (Glasgow Obstetrical Society), Dr. W. E. Fothergill (North of England Obstetrical Society), Dr. Andrew J. Horne (Royal Academy of Medicine in Ireland).

REPORT.

THE Committee held two meetings, on January 26th and March 9th.

At the preliminary meeting, January 26th, information was received from maternity hospitals in England and abroad in regard to the standards of puerperal morbidity which they recognize. From the diversity of the replies it was obvious that efficient comparison of the statistics of these institutions would be practically impossible.

After careful consideration of the information at their disposal, the Committee decided to make practical trial of a criterion of morbidity which was incorporated in their interim report.

At the final meeting of the Committee, on March 9th, members submitted the results which they had obtained from the application of this criterion to series of cases in their own hospitals. As a result of the practical experience gained in this way the criterion of puerperal morbidity at first recommended by the Committee was considerably modified.

It was then resolved:

> That it is desirable that maternity hospitals should adopt a uniform standard of puerperal morbidity, so that doubtful cases should no longer be included in one set of statistics and excluded from another, as is the case at present. A criterion of morbidity, necessarily arbitrary, is therefore recommended in the hope that it may be adopted in British and colonial hospitals.

Recommendations.

The Committee accordingly beg to submit the recommendations embodied in the following six resolutions:

1. That irregularities in temperature occurring during the twenty-four hours following delivery should not be considered for statistical purposes.

2. That as the time puerperal patients remain in hospital varies in different institutions, statistical tables should be formed from the records up to the end of the eighth day after delivery.

3. That statistical records should relate only to patients delivered after the sixth lunar month of pregnancy.*

---

* It is recommended that cases delivered before the end of the sixth lunar month of pregnancy should be tabulated separately.

Hospital, Physician, etc., from which Reply Received.	What conditions throughout the puerperium do you regard as indicative of Morbidity?					In the Normal Puerperium are the Temperature and Pulse ever over 99° F. and 90 Beats per Minute respectively?	Do you ever discharge Patients with P. over 90 per Minute and T. over 99° F. on the Day of Departure?	Within what Limits of P. and T. do you regard the Puerperium as Normal?	Have you any Suggestions as to general adoption of a Standard for use in Maternity Hospitals to serve as an Index of Septic Morbidity?
	(*A*) Temperature.	Where and How Taken.	(*B*) Pulse.	(*C*) Lochia.	(*D*) Disturbances associated with Lactation.				
1 General Lying-in, York Road, S.E. 26 beds. Dr. Dakin	Above 99° F. for 12 hours	Mouth. M. and E. in normal, 4-hourly in abnormal cases	If over normal for some hours	Only if combined with other signs	—	Yes, temporarily	No	No limit. It depends on duration and various other circumstances	No. Everyone who is fit to be in charge of a lying-in hospital is capable of deciding this, and a standard is, in my opinion, useless.
2 Rotunda Hospital, Dublin. Over 1,900 deliveries yearly. Dr. Tweedy	Above 99° F. combined with P. over 90; recorded for 3 consecutive readings—*i.e.*, for 24 hours	Mouth. M. and E.	Over 90 for period of 24 hours	—	—	Yes, frequently for the first 24 hours after labour, and transitory rises may occur on other days	No; unless there is some complicating disease as phthisis, etc.	The high limit ranges are T. 99° F. and P. 90 per minute. We do not count the first 24 hours after delivery, and the morning and evening records must show consecutive abnormality for 3 records. This method of recording morbidity seems to us satisfactory.	
3 Glasgow Maternity Hospital. 44 beds. Dr. Robert Jardine	100° F. or over. Temperature and pulse must be considered together: of the two the pulse is the better index	Axilla. M. and E. in normal, 4-hourly in abnormal cases	90 or upwards. Much better guide than the T.	Fetid or scanty. Bacteriological examination final test	—	Not as a rule, but there are many exceptions	No	T. 100° F. and P. 90, but there are many exceptions to this	I do not think it is possible to adopt any standard of temperature and pulse-rate as an index of sepsis, as there are too many other causes of rises of temperature and pulse. The only accurate method will be by having bacteriological examination of the lochial discharge.
4 Clapham Maternity Hospital. 36 beds. Dr. Annie McCall	100° F. or over	Mouth. Twice daily in normal, 4-hourly in abnormal cases	P. 100 or more	—	—	Yes; excitement	No	T. 100° F., P. 100	No.
5 Large private practice, Madras. Mrs. Scharlieb, M.D.	100° F. or over	Mouth	—	—	Rise of T. associated with engorgement of the breasts not considered an indication of sepsis	Yes	—	—	—
6 Frauenklinik, Munich. 1,700 deliveries yearly. Dr. F. v. Winckel	37°–38° C.	Axilla and rectum. 2–6 daily	Over 80	—	—	No	No	P. 40–80. T. 37°–38° Celsius	—
7 Lying-in Hospital, Newcastle. 150 deliveries yearly. Dr. Ranken Lyle	100.8° F. or over	Mouth. M. and E.	Over 100	Foul-smelling	No disturbance of P. or T. with normal lactation	Yes, frequently; especially after termination of labour in 1-para when temp. may rise to 103° F. and fall to normal in a few hours	No	T. 100.8° Fahr. P. 100	Temperature 100.8° Fahr.
8 British Lying-in, London. 30 beds. Dr. J. S. Fairbairn	101° F. for 24 hours, or if it rises again to this level	Axilla. M. and E.	Over 100, for more than 24 hours	—	Scarcely ever occurs unless with abscess, etc.	Yes. Many causes of temporary rise of P. and T.	No.	T. up to 99° F. P. 80-90	Temp. and pulse are impossible as an index, as they are liable to sudden rises due to all sorts of minor causes. A temperature above 100° F. on two days would be almost enough. Pulse has too wide a personal equation. Offensive lochia would always be a sign of morbidity.
9 Battersea Branch of Clapham Maternity. 600 extern cases yearly. Dr. Margaret Joyce	100° F. or over	Mouth. Once daily unless abnormal	Over 100	Any offensive odour	Should be none	Yes. During first 24 hours T. often averages between 98°-100° F.	No.	T. 97.8°-100° F. P. 60-90	—
10 Dundee Royal Infirmary, Dundee. 14 beds. Dr. R. C. Buist	100.4° F.	Axilla. M. and E. except in special cases, when 4-hourly	100 and over	—	Yes	Yes	Three cases (in 100) had T. 99° on morning of discharge, and 9 had pulse 90 or more	T. 100.4 F. P. 100 per min.	—
11 Clinique Tarnier, Paris. 1,800 deliveries yearly. Professor Budin	37.5° C. and over	Axilla "pendant un temps assez long" M. and E., or oftener if indicated	—	—	Temporary rise of T. may occur with onset of lactation	Yes, occasionally	No.	Very difficult to determine because there are various conditions apart from sepsis which raise temperature above 37° C.	No. We base our statistics of morbidity primarily on the temperature.

12	Belfast Maternity, Belfast. 25 beds. Dr. J. Dobson Osborne	100.8° F.	Axilla. Twice daily if not above 100° F.: every hour if above 100° F.	90 or more	Foul-smelling or scanty. If suspicious a bacteriological examination is made	Rise of T. with engorgement of the breasts	Yes	No.	T. 97°-100.8° F. P. 60-90.	Bacteriological examination of the lochia is the only sure guide in a doubtful case, but a temperature over 100.8° F., and a pulse over 100 are suggestive.
13	Jessop Hospital for Women, Sheffield. Dr. John W. Martin	99.5° F. or over	Axilla. M. and E. in ordinary cases: 4-hourly in abnormal ones	—	—	Cracked nipples very common cause of temporary rise of T. 3rd or 4th day	Yes, but only temporarily due to excitement, anxiety, etc.	No	Temperature limit = 99.5° F.	—
14	Guy's Hospital, London. 8 maternity beds. Mr. J. H. Targett	100° F. or more, persisting for 24 hours	Mouth. 4-hourly	Increased pulse	—	—	Yes, temporarily, but not for more than 24 hours	No	—	Practically all our cases are examples of difficult labour or some complication. Hence we have no fixed standard as you suggest.
15	Liverpool Ladies' Charity and Lying-in Hospital. 15 beds, 2,000 out-patients. Dr. Alexander Stookes	100° F. or more for 24 hours	Axilla. Twice daily in normal cases, every 4 hours in abnormal	100 or more	—	All disturbances are reported as abnormal	Yes	No, unless there has been and is some extra-obstetrical disease	—	We consider a pulse and temperature above 100 beats and degrees, for 24 hours, morbid.
16	Frauenklinik, Wien. 3,000 deliveries yearly. Dr. Schauta	Over 100.4° F. (=33° C.)	Axilla. Twice daily	—	—	—	Yes	—	Up to 38° C.	No.
17	Clinique Baudelocque, Paris. Professor Pinard	37.5° C. A single rise is considered sufficient	Axilla. M. and E.	90 or more	—	—	No	No	—	No.
18	Johns Hopkins Hospital, Baltimore, U.S.A. 40 beds. Dr. Whitridge Williams	Above 100.2° F. (38° C.)	Mouth. Taken every 4 hours	Of no value unless associated with other symptoms	Of no value unless associated with other symptoms	Not considered unless uterine contents are sterile	Yes. If temperature be taken every 4 hours it rises above 99° in say, 75 per cent. of all cases	Patients are not discharged unless T. has been normal for several days	T. 98.4°-100.2° F. (37°-38° C.), P. more variable	I regard all cases as septic in which the temperature rises above 100.2° F. (38° C.), unless some other perfectly satisfactory explanation can be adduced. The pulse may be very variable. Many apparently normal women have pulse of 100 or more before labour sets in, and continue so throughout the puerperium without any sign of infection.
19	Hospital for Women, Leeds. 76 deliveries last year. Dr. E. O. Croft	Over 99° F., if for more than 24 hours	Axilla	P. 90	—	—	—	No.	T. 99° F.; P. 90	Do not think any very definite standard can be fixed. During 1905, 76 cases were delivered: of these, in 66 the temperature never rose above 99° F.; in 7 it rose for single short periods, not exceeding 24 hours during the puerperium, remaining under 99° F. at other times: in 3, 1 had acute rheumatism and 2 had eclampsia, and all had a temperature of 102° F. or more. The first 73 cases were clinically non-septic and practically normal.
20	University Maternity, Philadelphia. 50 beds. Dr. Barton C. Hirst	Over 100.5° F. for more than 48 hours	Mouth. Twice daily	P. 90 or more	—	—	Yes occasionally	Not unless there is some intercurrent affection like phthisis or pneumonia	T. 100.5° F. for less than 48 hours. P. below 90.	V. letter quoted in "abstract of table."
21	Boston Lying-in. 70 beds. Dr. Chas. M. Green	Over 99.5° F.	Mouth. Twice daily routine, every 4 hours in abnormal cases	P. 90 or more	—	—	Yes; nervous patients, constipation, etc.	No	T. 99.5° F., P. 80-90	I like our rule "to look for a cause for any temperature elevation above 99.5°F." Of course many causes other than sepsis may account for rise of temperature, but cases of mild sepsis which might otherwise become grave are thus discovered early.
22	Preston Retreat, Philadelphia, Pa. 50 beds. Dr. R. C. Norris	Over 38° C. (100.2° F.)	Mouth. Morning and evening routine, oftener in abnormal cases	P. 90 or more	Offensive or scanty when associated with rise of P. and T.	—	Yes: occasionally from non-septic conditions, as emotion, constipation	No	T. 38° C., P. 90, not lasting more than 24 hours	P. above 90, T. above 38°C. for more than 48 hours
23	St. Mary's Hospital, Manchester. 40 beds. Dr. W. E. Fothergill	Over 99°	Axilla. Routine morning and evening, oftener if abnormal	P. 100 or more for 24 hours	Not much importance attached to lochia	Ignored	Yes; often	With P. over 90, yes; with T. over 99°, never	No definite convention is in use in this hospital	No. Pulse is principal point.
24	Boston Lying-in Hospital. 42 beds. Dr. Franklin S. Newell	Over 99.5° F.	Mouth. Routine M. and E., every 4 hours if T. above 99.5°	P. 100 or more. P. variable, may reach 110 without sepsis in nervous patients	—	T. is frequently raised to 100° while lactation being established	Yes	No	T. 99.5° F. P. 60-100	Culture taken from fundus uteri in all doubtful cases.

	Hospital, Physician, etc., from which Reply Received.	What Conditions throughout the Puerperium do you regard as indicative of Morbidity?					In the Normal Puerperium are the Temperature and Pulse ever over 99° F. and 90 Beats per Minute respectively?	Do you ever discharge Patients with P. over 90 per Minute and T. over 99° F. on the Day of Departure?	Within what Limits of P. and T. do you regard the Puerperium as Normal?	Have you any Suggestions as to general adoption of a Standard for use in Maternity Hospitals to serve as an Index of Septic Morbidity?
		(*A*) Temperature.	Where and How Taken.	(*B*) Pulse.	(*C*) Lochia.	(*D*) Disturbances associated with Lactation.				
25	Sloane Maternity, New York. 126 beds. Dr. Edwin B. Cragin	Over 100.6° F.	Mouth. Every 4 hours	—	—	—	Yes	No	T. 100.6° F.	Would suggest 100.6° F. as highest temperature of normal puerperium.
26	New Zealand Hospital for Women and Children. 27 beds. Dr. Emma L. Call	Over 99.4° F.	Mouth. Morning and evening	P. over 80, if constant	—	Moderate rise of T. and P. may occur when breasts overdistended	Yes	No	T. 98-99.8° F. P. 68-88	It is highly desirable that such a standard of temperature and pulse should be recognized in maternity hospitals, and that all departures from it, unless due to some evident cause or very temporary in duration, should be regarded as indicative of some form of infection.
27	National Maternity Hospital, Dublin. 40 beds. Dr. A. J. Horne	Over 100° F., with corresponding pulse-rate	Axilla or mouth. Routine twice daily, oftener if abnormal	—	—	—	No	No	T. 98°–100° F. P. 60–100	No. Every case must be judged on its merits.
28	Royal Maternity and Simpson Memorial Hospital, Edinburgh. 40 beds Dr. J. W. Ballantyne	100° F. or more	Axilla generally: mouth if 4-hourly record taken. Twice daily, routine	—	Less important, except when bacteriological examination shows streptococci	—	Yes	No	Difficult to fix unless a period of time be allowed, then below 100° F. and 90 beats per min.	Desirable, but hardly practicable, no one factor being sufficient in itself.
29	Queen Charlotte's Hospital, London 88 beds. Dr. W. S. A. Griffith	Over 100° F.	Three times daily—8 a.m., 2 p.m., 8 p.m. Mouth	No special limit	—	—	—	No	T. 97°–99° F. P. 60–90 (not absolute)	No. The diagnosis of septic morbidity is usually easy enough to the unprejudiced observer.

4. That records of pulse and temperature should be taken twice a day in every case, the following precautions being observed:

(*a*) The temperature to be taken night and morning—if possible between the hours of 7 and 9 a.m. for the morning, and between the hours of 5 and 7 p.m. for the evening record.

(*b*) The temperature to be taken in the mouth.

(*c*) The thermometer to be left in the mouth for four minutes.

5. That the table of puerperal morbidity should include all fatal cases, and also all cases in which the temperature reaches 100° F. on any two of the bi-daily readings from the end of the first to the end of the eighth day after delivery.*

6. That all cases which according to this convention are "morbid" should be tabulated in statistics, the probable cause of the illness and its duration in days being given.

HERBERT SPENCER, M.D.,
Chairman of the Committee.

APPENDIX.

REPLIES FROM MATERNITY HOSPITALS.

A schedule of questions in regard to their standard of puerperal morbidity was sent to maternity hospitals in England, Scotland, Ireland, Canada, the United States, Germany, Austria, and France, as shown in the accompanying table, which embodies the 29 answers received.

The conclusions to be drawn from them may be summarized as follows:

The main criterion of septic morbidity was considered to be:

The temperature alone, by 15.
The pulse alone, by 3.
A combination of temperature and pulse, by several.
Bacteriological examination of the lochia, by 4.

In this connexion it may be noted that Schauta does not consider the pulse-rate a reliable guide and Whitridge Williams regards it as "of no value unless associated with other symptoms."

On the Continent the temperature in all cases was taken in the axilla, in British hospitals it was taken in the mouth in ten instances and in the axilla in nine, while in the United States mouth temperatures were recommended by every institution.

There was practically unanimous agreement that transitory rises of temperature and pulse-rate were liable to occur throughout the puerperium, especially during the twenty-four hours immediately following delivery, and that such rises were not necessarily an indication of sepsis.

Among institutions which took the temperature as the criterion, varying degrees of pyrexia were named as indicative of morbidity; the majority, however—twenty-three—considered that any temperature of 100° F. or more should be regarded as an indication of sepsis unless another perfectly satisfactory explanation could be adduced. Several of those included in the 23 were of opinion that a more exacting standard should be fixed, and that cases of morbidity would be missed by a standard of 100° F.; they proposed fixing the normal limit at 99° F. or 99.5° F.

In this connexion Whitridge Williams remarks that "if the temperature be taken every four hours it rises above 99° F. in, say, 75 per cent. of all cases." American hospitals tend to recommend a more elaborate criterion. Hirst of Philadelphia writes:

> At the present time we subject all doubtful cases to the following tests: A blood count for leucocytosis, a uterine culture to determine the bacteriological contents of the uterus, and a blood culture to determine the systemic infection. There is too large a percentage of error in uterine cultures in both directions to make it reliable. If any standard must be adopted to express definitely the record of a maternity hospital I should favour the following: The rise of temperature above 100.5° F. persisting for more than forty-eight hours should be regarded as indicative of infection, unless it can be clearly demonstrated to be due to some other cause. If the rule were adopted that all such cases should have a leucocyte count, uterine cultures, and blood cultures, a positive result might clearly determine which febrile cases are septic.

---

* Dr. Tweedy urged that the table should, in addition, include all cases where on three consecutive bi-daily readings the pulse-rate exceeded 90 per minute and the temperature 99° F., but the majority of the Committee were of opinion that the introduction of a double standard was not advisable at present.

Without such methods of precision, Dr. Hirst does ot think that reports from different maternities can be ompared with advantage.

The rate of involution of the uterus was regarded as omparatively unimportant in all the communications.

Opinion was divided as to whether a rise of temperature-ate and pulse-rate on the third day might be explained by ngorgement of the breasts apart from sepsis.

Meetings of Branches & Divisions.

[*The proceedings of the Divisions and Branches of the ssociation relating to Scientific and Clinical Medicine, hen reported by the Honorary Secretaries, are published in e body of the* JOURNAL.]

LANCASHIRE AND CHESHIRE BRANCH:
LIVERPOOL (NORTHERN) DIVISION.

N ordinary meeting of the Division was held at the edical Institution on April 9th, Dr. J. J. TISDALL esiding.

Confirmation of Minutes.—The minutes of the last dinary meeting were read and confirmed.

An Ethical Question.—The meeting received a report om the Executive (acting as the Ethical) Committee of a se of exhibition of a notice of an unprofessional character which action had been taken, resulting in the withawal of the offending notice. The Committee advised at the matter need not be pursued further, and this commendation was approved by the meeting.

Rules of the Central Midwives Board.—It was unaniously resolved—

> That this meeting recognizes the danger of allowing midwives to use drugs, except as disinfectants, and with this expression of opinion leaves the matter in the hands of the Medico-Political Committee.

Matters Referred to Divisions.—With regard to Contract actice (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, gust 5th, 1905) it was resolved unanimously—

> That the recommendations of the Medico-Political Committee be approved of.

With regard to the selection of Direct Representatives on e General Medical Council (see SUPPLEMENT, October 7th, 05) it was unanimously decided to make no nomination.

With respect to the suggested formation by Divisions of ctions for clinical and pathological work (see SUPPLENT, November 11th, 1905), it was unanimously solved:

> That as regards local requirements, these matters are already provided for.

With regard to the inquiry (1905-6) as to the present stem of Division and Branch finance, the meeting conlered a communication from the Organization Committee to Division and Branch finance, and instructed the cretary as to the reply which should be given.

In regard to hospital out-patient departments (see PPLEMENT, February 17th, 1906), it was resolved animously:

> That the following proposition of the Hospitals Committee be approved of—namely, that there should be no outpatient departments in hospitals except for consultations and casualties; that this opinion specially applies to hospitals whose staff are general practitioners.

Notices of Motion (see SUPPLEMENT, February 10th, 1906). By the Gateshead Division: Title "Doctor" unaniusly approved of; declaration unanimously approved By the Wandsworth Division: Alterations unaniusly disapproved of. See SUPPLEMENT, February 24th, 06:—By the Altrincham Division: Grants to Divisions animously disapproved of. By the Northamptonshire vision: Expenses of Representatives, resolved animously:

> hat this motion be approved of, such out-of-pocket expenses not to exceed half a guinea per day *plus* third-class travelling expenses.

SOUTHPORT DIVISION.

E annual meeting was held on May 11th at the Temance Institute, Dr. WALKER in the chair.

onfirmation of Minutes.—The minutes of the last nual meeting were read and confirmed.

lection of Officers.—The following officers were elected: *sident*, Dr. Ashworth; *Vice-President*, Dr. G. R. Anderson; *Secretary and Treasurer*, Dr. Harris; *Representative at Representative Meeting*, Dr. Baildon, and failing his ability to attend, Dr. Gill; *Representatives on Branch Council*, Drs. Harris and Walker; *Other Members of Executive Committee*, Drs. Brown, Gill, Mackay, and Sykes.

Report of Executive Committee.—The annual report of the Executive Committee was read.

It was resolved to add to the rules:

> 15. The quorum at all meetings of the Division shall be five.

Matters Referred to Divisions.—Matters referred to Divisions were then considered, and respecting the proposed application for a Royal Charter it was unanimously resolved:

> That this Division approves the application for a Charter, but does not approve of some of the objects for which it is sought—namely, those contained in Sections VI, VII, and VIII of Clause 2, providing for medical defence, medical agency, and providence and benevolence.

Respecting hospital out-patient departments, by a unanimous vote an affirmative answer was given to the question

> That there should be no out-patient department in hospitals except for consultations and casualties, and that this opinion specially applies to hospitals whose staff are general practitioners.

It was decided to vote against the motion of which notice has been given by the Altrincham Division regarding grants to Divisions, published in the SUPPLEMENT of February 24th. The notice of motion in the same SUPPLEMENT by the Northamptonshire Division, respecting expenses of Representatives, was considered and it was decided—

> That ten shillings and sixpence a day during the time of the Representative meeting should be paid to each Representative in addition to his railway fare.

The motion of the City Division advocating facilities for social intercourse at head office was approved. The questions appended to the Nurses' Registration Report in the SUPPLEMENT of March 3rd were considered and general approval given, but in approving of the separate registration of midwifery nurses it was resolved—

> That they should be fully trained and not registered after having had only three months' training at a lying-in hospital.

Further, Clause 13, respecting the licensing of nursing homes and institutions, was emphatically approved.

METROPOLITAN COUNTIES BRANCH:
CITY DIVISION.

A GENERAL meeting of this Division was held at Woodchester, Upper Clapton, N.E., on Thursday, May 3rd, Dr. J. W. HUNT, Chairman of the Division, presiding.

Nominations for Officers in the Branch.—It was unanimously resolved to nominate the following gentlemen for the offices mentioned: *President-elect*, Dr. F. de Havilland Hall; *Vice-Presidents*, Mr. Andrew Clark, Dr. Major Greenwood, Dr. Hooper May; *Treasurer*, Mr. Betham Robinson; *Honorary Secretary*, Dr. F. J. Smith.

Draft Royal Charter.—It was unanimously resolved—

> That the draft Charter be approved.

Selection of Candidates for General Medical Council.—It was unanimously resolved to instruct the Representatives at Representative Meetings to support the candidature of Dr. Langley Browne and Mr. Andrew Clark.

Notices of Motion for Representative Meeting.—Several of these were considered, and it was resolved to give certain instructions to the Representative.

LAMBETH DIVISION.

A MEETING was held at the Camberwell Infirmary on Thursday, May 3rd, at 4 p.m.

Vote of Congratulation.—A vote of congratulation was accorded to Mr. W. B. Taylor on his appointment as a Justice of the Peace.

Wandsworth Division.—It was resolved to invite the Wandsworth Division to the next meeting.

Paper.—Dr. F. C. LEWIS read an interesting paper on Artificial Immunity with especial reference to Opsonic Indices.

Visit to Infirmary.—Dr. KEATS showed members round the infirmary after the meeting.

NORTH LANCASHIRE AND SOUTH WESTMORLAND BRANCH:

LANCASTER DIVISION.

THE annual meeting of the Lancaster Division was held at Lancaster on Saturday, May 5th.

Election of Officers.—The following officers were elected for the ensuing year:—*Chairman:* G. R. Parker. *Vice-Chairman:* H. O. Lawport. *Secretary:* J. A. Gibson. *Representatives on Branch Council:* H. F. Oldham and J. A. Gibson. *Representative to Representative Meeting:* H. F. Oldham. *Committee:* W. Bradley, W. Hall, J. Harrison, and H. Graham Smith.

SOUTH-EASTERN BRANCH.

NORWOOD DIVISION.

A CLINICAL meeting was held on Thursday, April 12th, at the St. John's Hospital, Lewisham, Mr. H. C. BURTON, of Blackheath, in the chair.

Confirmation of Minutes.—The minutes of the last meeting were read and confirmed.

Special Meeting.—It was decided to hold a special meeting on Thursday, May 10th, at the Queen's Hotel, Upper Norwood, Dr. Henry Hetley of Upper Norwood in the chair, to discuss the Royal Charter.

Visit to Hospital.—After tea the wards and hospital generally were inspected, and many interesting cases were shown and discussed by the members present.

SOUTH-EASTERN OF IRELAND BRANCH.

THE annual meeting of this Branch was held at the Victoria Hotel, Kilkenny, at 12 o'clock on May 2nd. In the absence of the President, Dr. C. E. JAMES was voted to the chair.

Confirmation of Minutes.—The minutes of the last meeting were read, approved, and signed.

Letters of Apology.—Letters of apology from Dr. Wynne (President) and Dr. Quirke (Honorary Secretary), for inability to attend, were read.

Correspondence.—A letter from H. Bell, Superintendent of G.S. and W. Railway Company, was read, in which he declined to allow any reduction of fares for members travelling to Branch meetings. Marked "Read."—A letter from Messrs. Parkes, Davis, and Co., postponing their representative's visit to the meeting to exhibit pharmaceutical products, etc., to some future date, was read; also the following letter from Dr. T. Laffan, which was ordered to be inserted in the minutes:

Cashel, May 2nd, 1906.

Gentlemen,—I beg to thank you most warmly for your very kind resolution of sympathy on the death of my dear brother.—Truly yours, T. LAFFAN.

Annual Report.—The annual report of the Branch was received and approved and passed.

Election of Officers.—Owing either to the nominations of all officials by individual members or the Council having lapsed, a discussion ensued as to how this year nominations are to be made, and it was unanimously decided, under the circumstances, that the present meeting should nominate all officials for the ensuing year. It was proposed by Dr. T. LAFFAN, seconded by J. B. HACKETT:

> That the following officials be elected for the ensuing year: *President-elect*, Dr. J. V. Ryan (Carlow); *Representative for Representative Meeting*, Dr. T. Laffan (Cashel); *Representative on Council of Association*, Dr. D. Walshe (Graigue); *Honorary Secretary*, J. Quirke (Piltown); *Honorary Treasurer*, R. B. Carey (Borris); *Branch Council*, Chas. E. James, J. B. Hackett, H. Kidd, E. J. Farmer, G. J. Mackesy, W. R. Morris, and R. R. O'Brien. Last year's President-elect—W. J. Shee—becoming President.

—Carried unanimously.

Code of Ethical Rules.—The motion of the Honorary Secretary to adopt a code of ethical rules was adjourned owing to his absence, and it was proposed by Dr. T. LAFFAN, and seconded by W. J. SHEE:

> That the Honorary Secretary be directed to obtain from head quarters copies of the suggested code of ethical rules, and send one to each member of the Branch prior to next meeting.

—Carried unanimously.

Installation of New President.—Dr. James here vacated the chair, which was assumed by the incoming President, Dr. SHEE, who said he trusted the meetings during his year of office would be well attended; he requested the Honorary Secretary to draw attention to this desire in his report of this meeting to the JOURNAL.—This brought the meeting to a close.

Luncheon.—The members lunched together at the Victoria Hotel.

ULSTER BRANCH.

THE spring meeting of this Branch was held in the Harbour Office, Derry, on Saturday, May 5th. The PRESIDENT, Dr. Leonard Kidd (Enniskillen), occupied the chair.

Confirmation of Minutes.—The minutes of the previous meeting and of the special meeting *re* the Darnell case were read and confirmed.

Report of Council.—The report of Council was read by the HONORARY SECRETARY, Dr. Cecil Shaw. It stated that four new members had been elected—Drs. Ferran, Sydney Blakely, and W. J. Wilson (Belfast), and M. O. Wilson (Campsie, Omagh). The Council had resolved that in future the expenses of bringing patients to meetings of the Branch should be paid out of the Branch funds. The Council called the attention of all dispensary doctors to the circular lately issued by the Joint Committee on Poor Law, and urged on them the necessity of helping in the work of reform by carefully attending to the requests of that circular. Dr. Cooke (Derry) had reported to the Council an ethical question, which he had submitted to the Medical Secretary of the Association.

Visit to County Infirmary.—At the conclusion of the meeting a number of the members lunched together in the Northern Counties Hotel, and subsequently the Belfast members present were shown over the County Infirmary by several of the staff. They expressed themselves as greatly pleased with the excellent general arrangements, and specially with the operation theatre and rooms connected with it, which form a model group both for convenience of working and scientific thoroughness in aseptic precautions.

WEST SOMERSET BRANCH.

A SPECIAL meeting of this Branch was held at the Taunton and Somerset Hospital on May 8th, Dr. GORDON HENRY, President, in the chair.

Confirmation of Minutes.—The minutes of the spring meeting were read and signed.

Proposed Royal Charter.—The meeting having been called to consider the draft of the proposed Charter, Dr. MACDONALD, the Representative of the Branch, explained its provisions, which were discussed by those present, and in most cases unanimously agreed to. In conclusion the following resolution was passed by the meeting:

> That this meeting of the West Somerset Branch of the British Medical Association approves of the draft of the proposed Charter, and instructs its Representative to support the same when brought before the Representative Meeting, but hopes that the Association will in no way interfere with the work of the medical defence societies as at present existing.

Tea.—Tea was served after the meeting.

DR. H. W. KING, Honorary Secretary of the Chester Division, informs us that Dr. Robinson, of Runcorn, whose name was included last week among the executive officers of the Division, is unfortunately unable to take up the position.

LIBRARY OF THE BRITISH MEDICAL ASSOCIATION.

MEMBERS are reminded that the Library and Writing Rooms of the Association are fitted up for the accommodation of the members in commodious apartments, at the office of the Association, 429, Strand. The rooms are open from 10 a.m. to 5 p.m., except on Saturdays, when they close at 2 p.m. Members can have their letters addressed to them at the office.

MEMBERS ELECTED DURING THE MARCH QUARTER.

UNDER BY-LAWS 2 AND 3.

BY THE COUNCIL ON APRIL 18th, 1906.

BRANCH AND DIVISION MEETINGS TO BE HELD.

Aberdeen Branch.—Election of Member of Council.—Nominations are requested to be sent to Dr. J. F. Christie, Honorary Secretary, 7, Alford Place, Aberdeen, on or before June 2nd. Each candidate must be nominated by not less than three members.

Bath and Bristol Branch.—The annual meeting of the Branch will be held on Wednesday, May 30th, at the Medical Library, University College, Bristol, at 4.30 p.m. Names of candidates for Representatives of the Branch upon the Central Council must be sent to Dr. Newman Neild on or before May 25th. Candidates must be nominated by three members.—Newman Neild, M.B., W. M. Beaumont, Honorary Secretaries.

Bath and Bristol Branch: Trowbridge Division.—Notice is hereby given that the annual meeting of this Division will be held at the Town Hall, Trowbridge, on Wednesday, May 23rd, at 2.45 p.m. Business: To elect officers; consider communications from the Association *re* Charter, Contract Practice, etc., and any other business.—John Tubb-Thomas, The Halve, Trowbridge, Wilts, Honorary Secretary.

Birmingham Branch.—The annual meeting of the Birmingham Branch will be held at the Medical Institute on Thursday, June 14th, at 3.30 p.m., and nominations for offices should reach the Honorary Secretary not later than May 23rd.—T. Sydney Short, Honorary Secretary, 85, Edmund Street, Birmingham.

Border Counties Branch: North Cumberland Division.—The annual general meeting of the Division will be held at the County Hotel, Carlisle, on Friday, May 25th, at 3.30 p.m. It is proposed to hold a discussion on "The Relation of Medical Men to their Patients."—Norman MacLaren, Carlisle, Honorary Secretary.

Border Counties Branch and North Lancashire and South Westmorland Branch.—In accordance with By-law 24 notice is hereby given that nominations for the office of Representative of the above Branches on the Central Council of the Association must be received by me, duly signed by not less than three members of the Association, not later than May 28th.—Francis R. Hill, M.B., 62, Warwick Road, Carlisle.

Cambridge and Huntingdon Branch.—The annual meeting of the Branch will be held at Peterborough on Thursday, June 14th. Any member having communications to make should apply to the Honorary Secretary, F. E. Apthorpe Webb, Grafton House, Cambridge.

Cambridge and Huntingdon Branch.—Notice of Election of a Member of Council.—Nominations for a Member of the Council, which must be signed by three members of the Branch, should be sent to the Honorary Secretary on or before Saturday, June 2nd.—F. E. Apthorpe Webb, Grafton House, Cambridge, Honorary Secretary.

Dorset and West Hants Branch.—The annual meeting will be held at the Mont Dore Hotel, Bournemouth, on Thursday, May 24th. An agenda will be sent in due course. Members having cases to show or papers or other communications should give notice to the Honorary Secretary before May 16th. Candidates for election must send in applications signed by two members before May 16th.—C. H. W. Parkinson Honorary Secretary, Wimborne.

Dorset and West Hants and West Somerset Branches—Election of a Representative of these Branches on the Central Council.—The nomination of candidates for the ensuing year must be made (in accordance with By-law 24) and sent in writing on or before May 21st to C. H. W. Parkinson, Honorary Secretary of Dorset and West Hants Branch, Wimborne; or Dr. W. B. Winckworth, Honorary Secretary of West Somerset Branch, Taunton.

Dundee Branch.—The annual meeting of this Branch will be held in the Students' Union, Dundee, on Friday, June 8th, at 4 o'clock. Business: Election of office bearers. Proposed adoption of the "Bradford Rules," etc.—R. C. Buist and A. P. Low, Honorary Secretaries.

East Anglian Branch.—Notice is hereby given that nominations of two members for the office of Representative on the Central Council of the Association, each signed by not less than three members, must reach me not later than May 21st.—B. H. Nicholson, M.B., East Lodge, Colchester, General Secretary of Branch.

East York and North Lincoln Branch.—The annual meeting will be held at the Grimsby and District Hospital on Thursday, June 7th, at 4.30 p.m., and will be followed by the annual dinner.—E. M. Hainworth, Honorary Secretary, Hull.

Edinburgh and Fife (Combined) Branches.—Nominations for two Members of Council will be received by Dr. Logan Turner, 23, Walker Street, Edinburgh, on or before June 2nd. Nominations must be signed by two members.—Norman Walker, Honorary Secretary.

Glasgow and West of Scotland Branch.—Election of Representatives on Central Council. In accordance with By-law 24, nominations, each signed by three members of the Branch, must reach the Honorary Secretary on or before Monday, June 4th.—Dr. James H. Nicoll, 4, Woodside Place, Glasgow, Honorary Secretary.

Lancashire and Cheshire Branch: Leigh Division.—The annual meeting of this Division will be held at the Cooperative Offices, Ellesmere Street, on Thursday, May 31st, at 8.30 p.m.—Michael J. Halton, Honorary Secretary.

Lancashire and Cheshire Branch: Liverpool (Northern) Division.—The annual meeting of the members of this Division will be held at the Medical Institution, 114, Mount Pleasant, on Wednesday, May 23rd, at 4 p.m. Agenda: Election of officers. Election of Representative on Branch Council. Election of Executive Committee. Election of Representative in Representative Meeting. To receive the annual report of the Executive Committee. To consider and, if approved of, confirm the recommendations of the Executive Committee with reference to matters referred to Divisions: (1) Proposed application for Royal Charter (see Supplement to the British Medical Journal, March 24th, 1906). (2) Notices of motion (see Supplements, March 3rd and 31st, April 21st and 28th, 1906). Any other business.—A. W. German, Honorary Secretary.

Lancashire and Cheshire Branch: Manchester (South) Division.—The annual general meeting of the above Division will be held on Friday, May 25th, in the Schoolroom of the Holy Innocents' Church, Fallowfield, at 4.15 p.m. Agenda: Election of officers for the next year; annual report of the Executive Committee; annual report of the Honorary Treasurer. Dr. Arthur T. Helme has consented to give an address on the Working of the Association.—Percy McDougall, Honorary Secretary of the Division, Fallowfield.

Metropolitan Counties Branch: City Division.—The annual meeting will be held on Thursday, May 24th, at 4 p.m., at the Great Eastern Hotel, Liverpool Street, E.C. Agenda: (1) Minutes. (2) Letters. (3) Questions. (4) Report of Executive Committee. (5) Election of officers. (6) Further consideration of notices of motion for Representative Meeting (see Supplement to the British Medical Journal for April 28th). The first annual dinner will be held at the Gaiety Restaurant, Strand, W.C., at 7 p.m. on Thursday, June 7th. Tickets, 7s. 6d. each (exclusive of wine), to be obtained of J. Beddow, Esq., Rossendale, 89, Cazenove Road, Stamford Hill, N.E.—E. W. Goodall, Eastern Hospital, Homerton, N.E., Honorary Secretary.

Metropolitan Counties Branch: Marylebone Division.—The annual meeting of the Division will be held at the Rooms of the Royal Medical and Chirurgical Society, 20, Hanover Square, W., on Tuesday, May 29th, at 5 p.m. Agenda: (1) Minutes. (2) To elect officers, namely—Chairman, Vice-Chairman, Honorary Secretary, and Treasurer. (3) To elect Representatives of the Division on the Branch Council. (4) To elect the Representative of the Division at Representative Meetings of the Association. (5) To receive the annual report of the Executive Committee. (6) To consider other business if necessary.

A general meeting of the Division will be held at the Rooms of the Medical Society, 11, Chandos Street, W., on Tuesday, May 22nd, at 5 p.m. Agenda: (1) Minutes. (2) Correspondence. (3) To receive the report of the representatives appointed to attend a meeting of representatives from the other Divisions of the Metropolitan Counties Branch to discuss the nomination of candidates for the Council of the Association. (4) To consider the following questions submitted by the Medico-Political Committee:—(*a*) Does the Division approve in general of the method of registration for nurses proposed by the Select Committee of the House of Commons? (*b*) Does the Division approve of the separate registration of midwifery nurses? (see Supplement to the British Medical Journal, March 3rd, 1906). (5) To consider the following notices of motion referred to the Division: C. 4. 5; K. 15. 16, 17, 18, 19, 20, 21, 22. 25; M. 27, 28, 29, 30, 31, 32, 33, 34, 37, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59. The terms of these notices of motion will be found in the Supplement for May 5th, 1906, and cannot be further stated here. Members of the Division are therefore requested to bring this Supplement to the meeting, and if any member requires another copy of this Supplement he should apply to the Medical Secretary at the offices of the Association. If any member wishes to bring forward a proposition with regard to any of the notices of motion mentioned in the Supplement for May 5th other than those which have already been dealt with by this Division, and which are accordingly omitted from the above list, the Medical Honorary Secretary of the Division will be very obliged if he will kindly give notice of such intention before the meeting, so that the business may be facilitated, as probably the Division will think fit to give their Representative a free hand with respect to certain of the motions referred to.—Dr. Comyns Berkeley, Wimpole Street, Cavendish Square, W., Honorary Secretary and Treasurer.

Metropolitan Counties Branch: St. Pancras and Islington Division.—The annual meeting will be held on Friday, May 25th, at 4 p.m., at the Islington Infirmary, Highgate Hill. Business: Election of officers; annual report and financial statement; to consider registration of nurses; the election of Representatives on the General Medical Council, and the business to be brought before the Annual Representative Meeting of the Association.—Wm. Wynn Westcott, Honorary Secretary.

Metropolitan Counties Branch: Tottenham Division.—The annual meeting of the Division will be held at the Tottenham Hospital on Friday, May 25th, at 4 p.m. Agenda: (1) To instruct Representative. (2) To elect officers for next year.—Fred. Tresilian, White Lodge, Enfield, Honorary Secretary.

Metropolitan Counties Branch: Wandsworth Division.—The annual meeting will take place, preceding the annual dinner to be held in the Banqueting Hall, Battersea Town Hall, on Friday, May 25th, at 7 p.m. Invitations to attend have been issued and accepted by the M.P.'s for Wandsworth and Clapham; the Mayors of Battersea, Wandsworth and Wimbledon; the late candidates for Parliament in the Battersea, Clapham, Wandsworth, and Wimbledon areas; local members of the L.C.C. and S.C.C.; the Chairman, Wandsworth Guardians; the Chairman, Central Council; the President of the Branch; the Director-General A.M.S.; the Chairman, Organization Committee; and several others. The Committee hope the members of the Division will attend in large numbers and bring their medical friends. Tickets, 7s. 6d. each.—A. J. Swallow, Honorary Secretary Dinner Committee, 61, South Side, Clapham Common.

Midland Branch.—Annual Meeting. *Preliminary Notice:* The annual meeting of this Branch will be held at the County Hospital, Lincoln, on Thursday, June 7th, at 2.15. A meeting of the Council will be held at 1.45. The President-Elect, Mr. Mansell Sympson, will be "at home" to the members from 4 to 6. The annual dinner will be held at the White Hart Hotel at 6 p.m.—Astley V. Clarke, M.D., 37, London Road, Leicester, Honorary Secretary and Treasurer.

Midland Branch: Boston and Spalding Division.—The annual meeting will be held on Tuesday, May 22nd, at 12.30 p.m., at the Red Lion Hotel, Strait Bargate, when it is hoped members will endeavour to be present. Agenda: (1) Annual report. (2) Election of officers. (3) Any other business. Luncheon will be provided after the meeting; tickets, exclusive of wine, 3s. 6d. each. Members taking luncheon will please notify their intention before Saturday, May 19th.—A. E. Wilson, Boston, Honorary Secretary.

Midland Branch: Leicester Division.—The annual meeting of the Division will be held on Wednesday, May 30th, at 4 p.m., at the Infirmary, Leicester. Business: (1) To nominate a Vice-President of the Branch for 1906-7. (2) To elect the officers of the Division. (3) To elect Representatives on the Branch Council. (4) To elect the Executive Committee of the Division. (5) To elect a Representative at the Representative Meeting of the Association. (6) To receive a report of the work of the Division. (7) To discuss matters referred to the Division in the Supplement to the British Medical Journal. (8) Any other business.—Robert Sevestre and Wilfred E. Gibbons, Honorary Secretaries, Leicester.

North of England Branch.—Election of Representatives on the Central Council.—Notice is hereby given that nominations of two Representatives for the North of England Branch, each signed by not less than three members, must reach me not later than May 21st.—Alfred Cox, Cotfield House, Gateshead, Honorary Secretary.

North Wales Branch.—Nominations of a member of the Central Council to represent this Branch for the ensuing year must be made in accordance with By-law 24, and sent to me in writing on or before May 31st.—H. Jones Roberts, Honorary Secretary, Pen-y-groes.

North Wales Branch: Denbigh and Fleet Division.—The annual meeting of the Division will be on Friday, May 25th, at the Wrexham Infirmary.—E. D. Evans, Honorary Secretary.

North Wales Branch: North Carnarvonshire and Anglesea Division.—The annual meeting of this Division will be held at the British Hotel, Bangor, on Wednesday, May 30th, for the election of officers, Representatives, etc., and other business. Members having papers to read or cases to show will please notify the honorary secretary on or before May 19th.—H. Jones Roberts, Pen-y-groes, Honorary Secretary.

North Wales Branch: South Carnarvon and Merioneth Division.—The annual meeting of this Division will be held at the Gorsygedol Hotel, Barmouth, on Thursday, May 31st. Members having papers to read or cases to show will please communicate with the Honorary Secretary on or before May 23rd.—H. Gladstone Jones, Honorary Secretary.

South-Eastern Branch.—The annual meeting of this Branch will be held at Norwood on Wednesday, June 27th, Dr. Hetley, President-elect, in the chair. The following will be the agenda: (1) To elect the officers of the Branch. (This will be done by voting papers sent to each member of the Branch. Nominations by three members for the offices of President-elect, Vice-Presidents, and Secretary may be sent to the Honorary Secretary on or before May 21st.) (2) To receive the annual report of the Branch. (3) To transact any business that may be transacted by an ordinary meeting. N.B.—Three members to represent the Branch on the Central Council will also be elected by voting papers. Nominations for these posts, each of three members in writing, should be sent to the Secretary of the Branch on or before May 21st.—H. M. Stewart, Dyffryn, 123, Thurlow Park Road, Dulwich, Honorary Secretary.

SOUTH-EASTERN OF IRELAND BRANCH.—An ordinary meeting and meeting of the Council will be held at the Town Hall, Clonmel, on June 6th, at 11 o'clock. Agenda: (1) Minutes. (2) To appoint an Ethical Committee for Branch. (3) Investigate ethical case. (2 and 3 by Branch Council only.)—J. QUIRKE, Piltown, co. Kilkenny, Honorary Secretary.

SOUTH MIDLAND BRANCH: NORTHAMPTONSHIRE DIVISION.—A meeting of this Division will take place in the Library, General Hospital, Northampton, on Tuesday, May 22nd.—Dr. HICHENS, 45, Sheep Street, Northampton, Honorary Secretary.

SOUTH WALES AND MONMOUTHSHIRE BRANCH: SOUTH-WEST WALES DIVISION.—The annual meeting of the Division will be held at the Stepney Hotel, Llanelly, on Wednesday, May 30th, at 2.30 p.m. A meeting of the Ethical Committee will be held at 2 o'clock Professor Kocher, of Bern, will address the Cardiff Medical Society on Graves's disease, in the Y.M.C.A. Lecture Hall on Friday, May 25th, at 3.30 p.m. By the kind invitation of the Cardiff Medical Society, members of the South-West Wales Division can be present. Agenda: (1) Minutes of last meeting. (2) Election of officers—Chairman, Vice-Chairman, Secretary, three Representatives of the Division on Branch Council, Ordinary Members of Executive and Ethical Committees, and Representative of the Division for Annual Representative Meeting in London. (3) Annual report of Executive Committee. (4) Report *re* medical officer of Aberystwyth Workhouse. (5) To consider the business of Annual Representative Meeting. (6) To consider proposed Charter for the Association. (7) Other business. Papers: Mr. D. J. Williams: Notes on Four Cases of Suppurating Ovarian Cyst. Dr. R. G. Price: Quacks and Quackery; with special reference to Carmarthenshire. Dr. Owen Williams will show 2 cases of Exophthalmic Goître in Men. The Honorary Secretary of the South Wales Branch Contract Practice Committee wishes to remind members of the urgent importance of securing a wide support for the Contract Practice Fund, concerning which a circular was recently issued. Those who have not yet contributed are asked to do so as soon as possible, so that the list of contributors can be completed and circulated. Contributions should be sent to Dr. E. J. Maclean, 12, Park Place, Cardiff.—J. EDGAR P. DAVIES, Castle Hill, Llanelly, Honorary Secretary.

SOUTH WALES AND MONMOUTHSHIRE BRANCH.—Election of Representatives on Central Council.—Nominations in writing, signed by three members of the Branch, must be sent in on or before May 24th to Dr. FRANK G. THOMAS, 68, Walter Road, Swansea.

SOUTH-WESTERN BRANCH.—The sixty-seventh annual meeting will be held on June 14th at the Royal Devon and Exeter Hospital, Exeter, at 3 p.m., when Mr. G. Jackson will resign the chair to Mr. E. J. Domville, who will deliver his inaugural address. The report of the Branch Council and annual financial statement for the year 1905-6 will be presented to the meeting, and the officers of the Branch will be elected for the year 1906-7. Luncheon, by kind invitation of the President-Elect, will take place from 12.30 p.m. to 2.30 p.m. at Northernhay House. The annual dinner will be held at 7 p.m. at the London (Pople's) Hotel. Tickets (exclusive of wine) 6s. each, which can be had from Dr. Solly, 40, Southernhay, the Honorary Treasurer of the Dinner Committee. Arrangements have been made for members who desire it to play either golf or croquet, and to visit the Cathedral, Chapter House, Library, Guildhall, etc.; and by the Exeter members, members are invited to a Garden Party to be held by permission of the Lord Bishop of Exeter and Mrs. Robertson at the Palace from 4.30 to 6 p.m. Members wishing to play golf are requested to send their names to Dr. Raglan Thomas, 13, West Southernhay, Exeter; and for croquet to Mr. A. C. Roper, The Shrubbery, Exeter, before June 10th. Members who attend the Garden Party are invited to bring their wives or lady friends, limited to two. It is particularly requested that members requiring dinner tickets send their names with P.O. for 6s. to Dr. Solly, 40, Southernhay, Exeter, before June 10th. Members wishing to be accommodated with bed and breakfast are invited to send their names to Dr. Miller, 14, East Southernhay, Exeter, who will endeavour to arrange matters. The Honorary Secretary takes this opportunity of informing members that he does not desire to offer himself for re-election.—G. YOUNG EALES, Torquay, Honorary Secretary.

SOUTH-WESTERN BRANCH.—The nomination of candidates for the office of elective members of Council (Branch Representatives on the Central Council of the Association) for the ensuing year must be made by three electors, and in writing, on or before May 19th, to the Honorary Secretary of the Branch, Mr. G. YOUNG EALES, 1, Matlock Terrace, Torquay.

ULSTER AND CONNAUGHT BRANCHES.—The annual meeting will be held on Thursday, June 21st, when the following officers will be elected:—President, Secretary, Treasurer, two Members of the Central Council to represent the Ulster and Connaught Branches, and a member of the Irish Committee (who shall not be resident in Belfast). Nominations for these posts must be sent to the Honorary Secretary not later than Saturday, June 2nd, signed by two members in the case of each except for Members of Central Council, in which case the nomination must be signed by three members. Members having business or scientific communications to make to the meeting will please send the Honorary Secretary notice of the same not later than June 12th.—CECIL E. SHAW, Honorary Secretary, Belfast.

YORKSHIRE BRANCH.—The annual meeting of this Branch will be held at the Eye and Ear Hospital, Bradford, on Wednesday, June 13th. In accordance with By-law 24 notice is hereby given that nominations for Representatives on the Council of the Association must be received by me, in writing, duly signed by three members of the Branch, on or before May 19th.—ADOLPH BRONNER, M.D., 33, Manor Row, Bradford, Honorary Secretary.

NOTICE OF CHANGES OF BOUNDARIES OF DIVISIONS AND BRANCHES.

THE following changes have been made in accordance with the regulations of the Association, and take effect from the date of publication of this notice:

1. That the boundary of the Barnstaple Division be extended to include Shebbear, formerly included in the Devonport Division.
2. That the boundary of the West Bromwich Division be extended to include Oldbury and Langley, formerly included in the Dudley Division.

GRANTS FOR SCIENTIFIC RESEARCH.

THE Council of the British Medical Association desires to remind members of the profession engaged in researches for the advancement of medicine and the allied sciences that it is prepared to receive applications for grants in aid of such research. Applications for sums to be granted, which must reach this office not later than May 31st, must include details of the precise character and objects of the research which is proposed, and must be made on forms to be had of the General Secretary, at the office of the Association, 429, Strand, London.

Every recipient is required to furnish to the Science Committee, on or before May 31st following upon the allotment of the grant, a report (or, if the object of the grant be not then attained, an interim report to be renewed at the same date in each subsequent year until a final report can be furnished) containing: (*a*) A brief statement for the Report of the Science Committee, showing the results arrived at, or the stage which the inquiry has reached; (*b*) a general statement of the expenditure incurred, accompanied, so far as is possible, with vouchers; (*c*) and references to any Transactions, Journals, or other publications in which the results of the research have been printed.

The work of the Grantees shall be subject to inspection.

RESEARCH SCHOLARSHIPS.

The Council of the British Medical Association is prepared to receive applications for three Research Scholarships, each of the value of £150 per annum, tenable for one year, and subject to renewal by the Council, provided the whole term of office has not exceeded three years.

The scholarships exist for the encouragement of research in Anatomy, Physiology, Pathology, Bacteriology, State Medicine, Clinical Medicine, and Clinical Surgery.

The Scholars' work shall be subject to inspection.

Applications for Scholarships must be made on forms to be had of the General Secretary, and returned on or before May 31st.

ERNEST HART RESEARCH SCHOLARSHIP.

The Council of the British Medical Association is also prepared to receive applications for the Ernest Hart Memorial Scholarship of the value of £200 per annum tenable for one year, but subject to renewal by the Council for another year. The Scholarship is for the study of some subject in the department of State Medicine.

N.B.—Applications for Scholarships and Grants should, as a rule, be accompanied by a recommendation from the head of the laboratory in which the applicant proposes to work, setting out the fitness of the candidate to conduct such work, and the probable value of the work to be undertaken. This is not intended, however, to prevent applications for Grants in aid of work which need not be performed in a recognized laboratory.

GUY ELLISTON, *General Secretary.*

429, Strand,
April, 1906.

ABUSE OF MEDICAL CHARITIES IN NOTTINGHAM.

A LARGE and representative meeting of the profession in Nottingham and the neighbouring district, convened by the Nottingham Medico-Chirurgical Society and Nottingham Division of the Midland Branch of the British Medical Association, was held on May 9th, under the presidency of Mr. T. J. DABELL, when the following resolutions were brought forward, discussed, and carried unanimously.

The first, proposed by Dr. W. TIBBLES, and seconded by Dr. W. B. RANSOM, was to the following effect:

> That abuse exists; and that this meeting invites the Governors of the respective charities in Nottingham to consider what steps can be taken to prevent it.

The PRESIDENT pointed out that if the meeting had the result of directing the funds subscribed by the charitable into what were more eligible channels, it would not only safeguard the medical profession, but do a service to the cause of charity generally.

Dr. W. TIBBLES, in moving the resolution, attributed the increasing abuse of hospitals to (1) indiscriminate distribution of letters of recommendation; (2) the increasing desire for pleasure and luxury amongst the masses, necessitating economies in other directions, such as medical attendance; and (3) the expansion of the hospitals themselves, the increase of their staffs, and the creation of new and additional institutions. The number of patients treated at the various charities in Nottingham had increased from 24,668 in 1885 to 45,147 in 1904, the latter figure being about 20 per cent. of the entire population of Nottingham. Thus, at the same rate of increase the numbers would be actually doubled in twenty-two years, while the increase of population did not exceed 25 per cent. Until some system of inquiry was established neither the governors nor any one else would have any means of determining the social status and financial position of the vast majority of those who were treated by them. Many striking examples were then given of abuse of the charities; at one institution the poorer patients said they felt ashamed to sit alongside the very respectable persons who waited their turn for treatment. Others drove up in cabs, which were kept waiting while the patient attended his medical adviser and then returned to his home or employment. In some cases tradespeople gave away to their customers recommendations to the various charities as an inducement to the purchase of their goods.

Dr. W. B. RANSOM, in seconding the resolution, traced the various steps of a similar movement on the part of the profession in Nottingham eight years ago, which unfortunately achieved nothing. The agitation had then dropped, with the understanding that an inquiry officer would be appointed as soon as the out-patient department at the General Hospital had been rebuilt and remodelled. This understanding had never been carried out, although the alterations then contemplated had since been completed.

Dr. J. A. WARING laid stress on the fact that many persons were ignorant of the fact that hospitals were intended for free treatment, and came there fully meaning to pay something.

Drs. G. B. WRAY, W. HUNTER, J. S. BOLTON, and T. W. KELLY having spoken, the motion was put and adopted.

The second resolution, proposed by the PRESIDENT and seconded by Dr. LEWIS W. MARSHALL, was also carried unanimously; it was,

> That this meeting begs to suggest that some system of inquiry be made into the financial status of *every person* presenting himself or herself for treament, in order to ascertain if they are suitable recipients of medical charity.
>
> The meeting desires also to express the opinion that the present system of recommendations is of doubtful value and should be modified.

This resolution was spoken to by Mr. R. C. CHICKEN, and Drs. W. B. RANSOM, J. F. BLURTON, W. HUNTER, and J. A. WARING.

Vital Statistics.

THE REGISTRAR-GENERAL'S QUARTERLY RETURN.

THE Registrar-General has just issued his return relating to the births and deaths in the first quarter of this year, and to the marriages in the fourth quarter of 1905. The marriage-rate during that period was equal to 16.7 per 1,000 of the population, and was 0.8 per 1,000 below the average rate in the corresponding periods of the ten preceding years.

The births registered in England and Wales during the quarter ending March last numbered 237,396, and were equal to an annual rate of 27.9 per 1,000 of the population, estimated by the Registrar-General to be 34,547,016 persons in the middle of the year. In the first quarters of the ten preceding years the birth-rate averaged 29.1 per 1,000; the rate in the quarter under notice was lower than that recorded in the corresponding period of any preceding year. Among the several counties the birth-rates last quarter ranged from 21.8 in Sussex, 22.0 in Cornwall, 22.7 in Berkshire and in Somerset, 22.9 in Carnarvonshire, and 23.0 in Northamptonshire, to 31.4 in Northumberland, 31.5 in Carmarthenshire, 32.2 in Staffordshire, 35.2 in Glamorganshire, 35.4 in Durham, and 37.1 in Monmouthshire. In seventy-six of the largest English towns, including London, the birth-rate last quarter averaged 28.7 per 1,000, being 0.8 per 1,000 in excess of the general English birth-rate. In London the rate was 27.8 per 1,000, while it averaged 29 1 in the seventy-five other large towns, and ranged from 16.4 in Hastings, 16.7 in Hornsey, 17.4 in Bournemouth, and 19.2 in Halifax, to 36.0 in Middlesbrough, 36 2 in Stockton-on-Tees, 36.5 in Merthyr Tydfil, and 39.5 in Rhondda.

The births registered in England and Wales during the quarter under notice exceeded the deaths by 96,934; this represents the natural increase of the population during that period. From returns issued by the Board of Trade it appears that 98,955 passengers left the United Kingdom for places outside Europe during the three months under notice. These 98,955 persons included 39,775 who were stated to be English, 9,534 Scottish, 5,438 Irish, and 42,055 of foreign origin, while the nationality of 2,153 others was not distinguished. Compared with the numbers in the first quarter of the previous year, the proportion of English passengers showed an increase of 17.8 per cent., that of Scottish an increase of 52.3 per cent., and that of Irish a decrease of 38.0 per cent.

During the first quarter of the year the deaths of 140,462 persons were registered, equal to an annual rate of 16.5 per 1,000 persons living; this rate was 2.2 per 1,000 below the average rate for the first quarters of the ten preceding years. The lowest county death-rates last quarter were 13.6 in Middlesex, 13.7 in Northamptonshire, 13 9 in Essex, 14.5 in Kent, 14.6 in Buckinghamshire, and 14.7 in Surrey; and the highest rates were 17.8 in Warwickshire and in Durham, 17.9 in Cumberland, 18.2 in the North Riding of Yorkshire, 18.4 in Monmouthshire, and 18.6 in Denbighshire. In seventy-six of the largest English towns, with an aggregate population of nearly sixteen millions, the mean rate of mortality was 16.6 per 1,000, which was also the death-rate in London; among the large provincial towns the rate ranged from 10.2 in Hornsey, 10.7 in King's Norton, 10.9 in East Ham, 11.1 in Walthamstow, 11.3 in Northampton, 11.6 in Willesden and 11.8 in Leyton, to 19.6 in Warrington, 20.0 in Swansea, 20.1 in Merthyr Tydfil, 21.3 in Liverpool, and 22.5 in Preston.

The 140,462 deaths from all causes in England and Wales last quarter included 9,321 which were referred to the principal infectious diseases; of these, 2,736 were attributed to whooping cough, 2,283 to measles, 1,669 to diphtheria, 1,126 to diarrhoea, 934 to scarlet fever, 570 to "fever" (principally enteric), and 3 to small-pox. The mortality last quarter from each of these diseases was below the average. The three deaths from small-pox belonged to Bristol, Plymouth, and South Shields respectively.

The rate of infant mortality, measured by the proportion of deaths among children under 1 year of age to registered births, was equal to 126 per 1,000, against an average rate of 139 in the corresponding periods of the ten preceding years. In the several counties the rates of infant mortality ranged from 92 in Oxfordshire, 97 in Middlesex, 98 in Wiltshire, 101 in Essex, 102 in Cornwall, and 103 in Buckinghamshire, to 149 in Monmouthshire, 150 in Glamorganshire, 154 in Nottinghamshire, 160 in Carnarvonshire, 162 in Leicestershire, and 176 in Denbighshire. In the seventy-six large towns the mean rate was 128 per 1,000; in London the proportion was equal to 117 per 1,000, while it averaged 133 in the seventy-five other large towns, and ranged from 87 in Huddersfield, 88 in East Ham, 96 in Willesden and in Hornsey, and 98 in Leyton, to 176 in Nottingham, 179 in Walsall, 184 in Rhondda, 193 in Preston, and 202 in Leicester.

The mortality in England and Wales during the three months under notice, among persons aged from 1 to 60 years, was equal to an annual rate of 8.0 per 1,000 of the population estimated to be living at this group of ages, and was 1.3 per 1,000 below the mean rate in the ten preceding first quarters. In the seventy-six large towns the death-rate at this group of ages averaged 8.6 per 1,000; in London this death-rate was 8.8 per 1,000, while among the large provincial towns the rates ranged from 4.4 in King's Norton, 5.2 in Handsworth (Staffs.), 5.3 in Leyton and in Northampton, and 5.5 in Willesden, to 10.5 in Warrington, 10.6 in Sunderland, 10.9 in Merthyr Tdyfil, 11.7 in Preston, and 12.1 in Liverpool.

Among persons aged 60 years and upwards the death-rate last quarter was equal to 78.1 per 1,000 of the estimated population at this age-period, being 5.9 per 1,000 below the average. In the seventy-six large towns the death-rate at this age-group averaged 80.9 per 1,000; in London the rate was 79.6 per 1,000; while among the other large towns the lowest rates were 62.8 in King's Norton, 63.4 in Northampton, 63.7 in Walthamstow, and 64.6 in Hastings and in Grimsby; and the highest rates were 100.1 in Middlesbrough, 101.1 in Warrington, 101.8 in St. Helens, 102.1 in Hanley, and 102.3 in Preston.

The mean temperature of the air last quarter was slightly above the average in all parts of the country except the North-West. The rainfall measured in London amounted to 6.7 in. during the quarter, being 35 per cent. in excess of the average amount. The aggregate duration of bright sunshine in London during the quarter was 219 hours, or fifty-three hours in excess of the average, but less than one-fourth of the possible duration.

HEALTH OF ENGLISH TOWNS.

In seventy-six of the largest English towns, including London, 8,676 births and 4,698 deaths were registered during the week ending Saturday last, May 12th. The annual rate of mortality in these towns, which had been 17.3, 16.7, and 16.3 per 1 000 in the three preceding weeks, further fell last week to 15.5 per 1.000. The rates in the several towns ranged from 6.5 in King's Norton, 6.7 in Northampton, 6.9 in Walthamstow, 7.2 in Hornsey, 7.4 in Handsworth (Staffs.), and 9 4 in Willesden and in York, to 20.3 in Plymouth and in Warrington, 20 5 in Liverpool and in Salford, 21 0 in Bradford, 21.3 in Bury and in Rotherham, and 23.1 in Barrow-in-Furness. In London the rate of mortality was 15.6 per 1.000, while it averaged 15.4 per 1.000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.6 per 1,000 in the seventy-six towns; in London also this death-rate was equal to 1.6 per 1,000, while among the seventy-five large provincial towns the rates ranged upwards to 2 7 in Coventry and in Leeds, 3 1 in Manchester and in Salford, 3 4 in Liverpool and in Bradford, 5.0 in Great Yarmouth, and 6.6 in Burnley. Measles caused a death-rate of 1.1 in Bristol and in Salford, 1.3 in Walthamstow, 1.6 in Newcastle-on-Tyne, 1.7 in Manchester, 2.1 in Liverpool, 2 3 in Bradford, 5.0 in Great Yarmouth, and 6.1 in Burnley; scarlet fever of 1.2 in Sheffield, and 1.7 in Rotherham; diphtheria of 1.3 in Derby; and whooping-cough of 1.6 in Bootle and in Huddersfield, 2.0 in Coventry, and 2.3 in Warrington. The mortality from enteric fever and from diarrhoea showed no marked excess in any of the large towns. No fatal case of small-pox was registered last week in any of the seventy-six towns, and no small-pox patients were admitted into the Metropolitan Asylums Hospitals during the week. The number of scarlet-fever patients remaining under treatment in these hospitals and in the London Fever Hospital, which had been 2.225, 2,240, and 2.337 at the end of the three preceding weeks, had further risen to 2.378 at the end of last week: 338 new cases were admitted during the week, against 288, 314, and 357 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

During the week ending Saturday last, May 12th, 998 births and 645 leaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 17.6, 18.4, and 18.0 per 1.000 in the three preceding weeks, further increased to 18.8 per 1,000 last week, and was 3.3 per 1,000 above the mean rate during he same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 13.2 in Paisley and 16.5 in Aberdeen to 20.2 in Dundee and 22.7 in Perth. The death-rate from the principal infectious diseases averaged 2.0 per 1.000 in these towns, the highest rates being recorded in Edinburgh and Leith. The 318 deaths registered in Glasgow included 9 which were referred to measles, to diphtheria, 12 to whooping-cough, and 9 to diarrhoea. Eight atal cases of measles, 2 of scarlet fever, 2 of diphtheria, and 2 of vhooping-cough were recorded in Edinburgh. Six deaths from measles occurred in Leith, and 3 in Dundee; and 2 from diarrhoea in Paisley.

HEALTH OF IRISH TOWNS.

During the week ending Saturday, May 12th, 642 births and 405 deaths were registered in six of the principal Irish towns, as against 607 births and 442 deaths in the preceding period. The annual deathate in these towns, which had been 17.3, 21 8, and 22.7 per 1,000 in he three preceding weeks, rose to 23.5 per 1,000 in the week under otice, this figure being 8.0 per 1,000 higher than the mean annual rate 1 the seventy-six English towns for the corresponding period. The gures ranged from 15.6 in Waterford and 21.7 in Dublin to 24.0 in ork and 32.8 in Limerick. The zymotic death-rate in the same six rish towns averaged 1.2 per 1,000, or 0.2 per 1,000 higher than during he preceding period, the highest figure—2.5—being recorded in ondonderry, while no deaths under this heading were recorded 1 Waterford.

South West Wales Division, *South Wales and Monmouthshire Branch*, Annual Meeting, Stepney Hotel, Llanelly, 2.30 p.m.; Ethical Committee, 2 p.m.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

The British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the British Medical Journal is supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the British Medical Journal for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429, Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

THE SEVENTY-FOURTH ANNUAL MEETING
OF THE
British Medical Association,
TORONTO, CANADA, AUGUST 21st to 25th, 1906.

President:
GEORGE COOPER FRANKLIN, F.R.C.S.Eng., Surgeon, Leicester Infirmary, Leicester.

President-elect:
RICHARD ANDREWS REEVE, B.A., M.D., LL.D., Dean of the Faculty of Medicine, University of Toronto.

Chairman of Representative Meetings:
Sir VICTOR HORSLEY, F.R.C.S., F.R.S., Surgeon, University College Hospital; and Surgeon, National Hospital for Paralysed and Epileptic.

Chairman of Council:
HENRY WM. LANGLEY BROWNE, M.D., Ch.B., F.R.C.S.E., Consulting Surgeon, West Bromwich District Hospital.

Treasurer:
HY. RADCLIFFE CROCKER, M.D., F.R.C.P., Physician Skin Department, University College Hospital, London.

PROGRAMME OF BUSINESS.

An Address in Medicine will be delivered by Sir JAMES BARR, M.D., F.R.C.P., F.R.S.E.

An Address in Surgery will be delivered by Sir VICTOR HORSLEY, M.B., F.R.C.S., F.R.S.

An Address in Obstetrics will be delivered by WALTER SPENCER ANDERSON GRIFFITH, M.D., F.R.C.P.

THE SECTIONS.

There will be 13 Sections as shown in the subjoined list; they will meet on Tuesday, Wednesday, Thursday and Friday, August 21st, 22nd, 23rd and 24th, from 9.30 a.m. to 12.30 p.m.

The President, Vice-Presidents, and Secretaries of each Section constitute a Committee of Reference for that Section.

Papers read are the property of the British Medical Association, and cannot be published elsewhere than in the BRITISH MEDICAL JOURNAL *without special permission.*

No paper must exceed 15 minutes in reading, and no subsequent speech 10 minutes.

It is requested that copies of any papers offered in any of the Sections should be supplied to one of the Honorary Secretaries of the Section not later than May 15th, accompanied by a short abstract, in order that such abstract may be printed and circulated before the meeting.

Anatomy.

President: Professor Arthur Robinson, M.D., Birmingham.

Vice-Presidents: Professor Alexander Primrose, M.B., C.M., Toronto; David Edward Mundell, B.A., M.D., C.M., Kingston; Donald Armour, F.R.C.S., London.

Honorary Secretaries: Charles Buckingham Shuttleworth, M.D., C.M., F.R.C.S., 45, Bloor Street E., Toronto; Gawn Shaw Cleland, M.B., M.D., C.M., 730, Queen Street E., Toronto; J. Herbert Sanders, M.D., 1a, Palace Gardens Mansions, W.

Dermatology.

President: Norman Walker, M.D., Edinburgh.

Vice-Presidents: Graham Chambers, M.B., Toronto; Harry B. Anderson, M.D., C.M., Toronto; Arthur John Hall, M.D., Sheffield; Ernest Solly, M.B., Harrogate.

Honorary Secretaries: David King Smith, M.B., 311, Jarvis Street, Toronto; Donald Macgillivray, M.B., 12, Carlton Street, Toronto; John Campbell Rankin, M.B., 38, University Road, Belfast.

Laryngology and Otology.

President: J. Dundas Grant, M.D., London.

Vice-Presidents: George R. McDonagh, M.B., L.R.C.P., Toronto; Herbert Stanley Birkett, M.D., C.M., Montreal; John Macintyre, M.B., Glasgow; Hugh Edward Jones, M.R.C.S., Liverpool.

Honorary Secretaries: David James Gibb Wishart, B.A., M.D., C.M., L.R.C.P., 47, Grosvenor Street, Toronto; Geoffrey Boyd, B.A., M.B., 167, Bloor Street, Toronto; Adam Brown Kelly, M.D., 26, Blythswood Square, Glasgow.

Medicine.

President: Sir Thomas Barlow, Bart., K.C.V.O., M.D., London.

Vice-Presidents: Professor Alexander McPhedran, M.B., Toronto; Professor James Stewart, M.D., C.M., Montreal; Alexander Napier, M.D., Glasgow; William Calwell, M.D., Belfast.

Honorary Secretaries: Robert Dawson Rudolph, M.D., M.R.C.P., 396, Bloor Street W., Toronto; John Taylor Fotheringham, B.A., M.B., M.D., C.M., 36, Carlton Street, Toronto; Robert Hutchison, M.D., 22, Queen Anne Street, London, W.

The following subjects have been selected for discussion:

Tuesday, August 21st.—On Blood Pressure in Relation to Disease. The subject will be treated under the following headings: (*a*) Physiological Introduction, by Dr. Percy M. Dawson (Baltimore). (*b*) Clinical Methods of Investigating Blood Pressure, by Dr. G. A. Gibson (Edinburgh). (*c*) Pathology and Therapeutics of Morbid Blood Pressure, by Sir Wm. Broadbent. (*d*) The Relation of Blood Pressure to Arterial Sclerosis, by Professor Clifford Allbutt. The following will also take part: Dr. Mackenzie (Burnley), Sir James Barr, Dr. Theodore Janeway (New York), Dr. Rudolf (Toronto), and others.

Wednesday, August 22nd.—A joint discussion with the Physiology Section on Over-nutrition and Under-nutrition, with special reference to Proteid Metabolism, to be opened by Professor Chittenden (Yale).

Thursday, August 23rd.—Papers on Heart Block, by Dr. Mackenzie (Burnley), Dr. G. A. Gibson, Dr. Erlanger, Professor Osler, and others.

Friday, August 24th.—Papers.

Obstetrics and Gynaecology.

President: A. H. Freeland Barbour, M.D., Edinburgh.

Vice-Presidents: Professor James Algernon Temple, M.D., C.M., Toronto; Professor Adam H. Wright, B.A., M.B., Toronto; Professor William Gardner, M.D., Montreal; T. Arthur Helme, M.D., Manchester.

Honorary Secretaries: Frederick Fenton, M.D., C.M., 75, Bloor Street E., Toronto; Kennedy Crawford McIlwraith, M.B., 54, Avenue Road, Toronto; Cuthbert Lockyer, M.D., 117a, Harley Street, London, W.

It has been arranged that on August 21st, 22nd, and 23rd the first part of the meeting be devoted to a discussion on the following subjects:

Tuesday, August 21st.—Hyperemesis Gravidarum.

Wednesday, August 22nd.—The Changes in Uterine Fibroids after the Menopause, with Special Reference to Operation.

Thursday, August 23rd.—The Appendix Vermiformis in Relation to Pelvic Inflammation.

Friday, August 24th.—Papers, etc.

Dr. J. C. Cameron, of Montreal, will introduce the discussion on August 21st; Dr. Charles A. L. Reid will probably introduce that on August 22nd; and Dr. T. Arthur Helme will introduce that on August 23rd.

Ophthalmology.

President: Robert Marcus Gunn, F.R.C.S., London.

Vice-Presidents: George Herbert Burnham, M.D., F.R.C.S.E., Toronto; John W. Stirling, M.D., Montreal; Joseph Nelson, M.D., Belfast; Arnold Lawson, F.R.C.S., London.

Honorary Secretaries: James Metcalf MacCallum, B.A., M.D., C.M., Toronto; Duncan Neil McLennan, M.D., C.M., 126, Bloor Street W., Toronto; Frank P. S. Cresswell, F.R.C.S., B.Sc., 24, Windsor Place, Cardiff.

The subjects which have been chosen for discussion are:

Tuesday, August 21st.—Rare Forms of Choroiditis. To be opened by Mr. J. B. Lawford (London). The following will also take part: Dr. Hill Griffith (Manchester), Dr. H. Knapp (New York), and Dr. C. Bull (New York).

Wednesday, August 22nd.—Sympathetic Ophthalmia. To be opened by Dr. G. H. Burnham (Toronto). The following will also take part: Mr. Arnold Lawson (London) and Dr. J. W. Stirling (Montreal).

Thursday, August 23rd.—Affections of the Lachrymal Passages. To be opened by Dr. Desjardines (Montreal). The following will take part in the discussion: Dr. Risley (Philadelphia) and Dr. Theobald (Baltimore).

Friday, August 24th.—Visual Tests for Public Services. (*a*) Marine and Railroad Services. To be opened by Dr. T. H. Bickerton (Liverpool). Dr. Williams, jun. (Boston), Dr. Thompson, sen. (Philadelphia), and Dr. Aliport (Chicago) will also take part. (*b*) Military Services. To be opened by Mr. Arnold Lawson (London).

Paediatrics.

President: George Alexander Sutherland, M.D., London.

Vice-Presidents: Henry T. Machell, M.D., L.R.C.P., Toronto; Allan M. Baines, M.B., Toronto; Otto Jackson Kauffmann, M.D., Birmingham; H. Betham Robinson, M.S., London.

Honorary Secretaries: Edward Stanley Ryerson, M.D., C.M., 261, College Street, Toronto; Joseph S. A. Graham, M.B., 102, College Street, Toronto; Ralph Vincent, M.D., 1, Harley Street, London, W.

The Section will meet on Tuesday, Wednesday, Thursday, and Friday (August 21st, 22nd, 23rd, and 24th), at 9.30 a.m., adjourning at 12.30 p.m. each day.

The following preliminary arrangements have been made:

A discussion on Congenital Pyloric Stenosis. The medical aspects of the subject will be introduced by Dr. Edmund Cautley (London), and the surgical aspects will be introduced by Mr. Harold J. Stiles (Edinburgh).

A discussion on Pneumococcal Infection. The medical aspects of the subject will be introduced by Dr. Henry Ashby (Manchester).

It is hoped that a Clinical Demonstration of interesting cases in one of the Toronto hospitals may be arranged.

Pathology and Bacteriology.

President: Professor J. G. Adami, M.D., F.R.S., Montreal.

Vice-Presidents: Professor John J. Mackenzie, B.A., M.B., Toronto; Professor Walter Thomas Connell, M.D., C.M., Kingston; Ingersoll Olmsted, M.D., Hamilton; Professor Robert Fraser Calder Leith, M.B., Birmingham.

Honorary Secretaries: Gideon Silverthorn, M.B., M.D., C.M., 266, College Street, Toronto; Harold C. Parsons, B.A., M.D., C.M., 72, Bloor Street W., Toronto; Frank

George Bushnell, M.D., Sussex County Hospital, Brighton.

The following preliminary arrangements have been made:

Tuesday.—On Nuclear Pathology and Physiology, to be opened by Professor Adami and Dr. McCallum, and followed by Dr. Gustav Mann (Oxford), Professor E. Wace Carlier (Birmingham), Professor A. S. F. Grünbaum (Leeds), and Dr. H. E. Roaf (Liverpool).

Wednesday.—Etiology and Life-history of Malignant New Growths. To be opened by Professor H. R. Gaylord (Buffalo); Professor Clowes (Buffalo) and Drs. Buxton and Beebie (New York). Professor G. Sims Woodhead (Cambridge), Professor A. S. F. Grünbaum (Leeds), Dr. Robert Muir (Glasgow) and others are expected to take part in the discussion.

Thursday.—The Forms of Arterio-sclerosis, their Classification and Experimental Production. To be opened by Professor W. H. Welch (Johns Hopkins University, Baltimore), Dr. Klotz (Montreal), and Dr. J. J. MacKenzie Toronto); and followed by Professor L. Aschoff (Freiburg), Professor Leith (Birmingham), Professor Clifford Allbutt Cambridge), Professor W. Osler (Oxford), Professor Adami Montreal), Dr. Pearce (Albany), and Dr. Robert Muir Glasgow).

Friday.—Papers upon Pathogenic Protozoa: by Dr. F. W. Mott (London), Acute and Chronic Changes in the Nervous System produced by Trypanosoma Infections; Professor F. E. Novy (Ann Arbor), On the Nature of Spirochaetes and he Prevention and Cure of Relapsing Fever, with lantern demonstrations; and Dr. J. Ballah (Montreal), On the Life History and Cultivations of Certain Pathogenic Protozoa.

Arrangements will be made for the exhibition in the Pathological Museum of specimens illustrating the work f the section. Members wishing to exhibit material or photographs should communicate with Dr. N. E. Abbott, McGill Medical College, Montreal.

Those who propose taking part in the discussions are requested to send in their papers, accompanied by a short bstract, to the Honorary Secretaries not later than May 5th, in order that the abstracts may be printed and irculated before the meeting. Papers from members in he United Kingdom and Europe should be sent to Dr. Bushnell, and those from members in the Dominion of anada or the United States of America, etc., to Dr. ilverthorn or Dr. Parsons.

PHYSIOLOGY.

President: Professor Wm. Dobinson Halliburton, M.D., F.R.S., London.

Vice-Presidents: Professor Archibald B. Macallum, .A., M.B., F.R.S., Toronto; Professor Wesley Mills, .A., M.D., Montreal; Professor Charles Scott Sherrington, M.D., F.R.S., Liverpool.

Honorary Secretaries: Herbert E. Roaf, M.D., The Biohemical Department, The University, Liverpool; Gustav Mann, M.D., 25, Beechcroft Road, Oxford.

A large number of prominent American physiologists ave accepted invitations to attend, and British physiogists will thus have the opportunity of making the ersonal acquaintance of their American colleagues. veral French physiologists have also signified their tention to be present, and it is hoped that other reigners may also accept the invitations sent to em.

A joint discussion on the Rôle of the Nucleus in utrition with the Section of Pathology has been arranged, d another joint discussion with the Section of Medicine ll also take place, the subject being Over-nutrition and nder-nutrition, with special relation to Proteid Metalism in Health and Disease. This will be opened by ofessor Chittenden.

PSYCHOLOGY.

President: Wm. Julius Mickle, M.D., London.

Vice-Presidents: Nelson Henry Beemer, M.D., Toronto; Harles Kirk Clarke, M.D., Toronto; Reginald LangN-Down, M.B., London.

Honorary Secretaries: Alfred Thomas Hobbs, M.D., elph, Ontario; Goldwin Howland, B.A., M.B., 540, padina Avenue, Toronto; John Turner, M.B., Essex unty Asylum, Brentwood.

The following subjects have been selected for special discussion in the Section of Psychology:

General Paralysis.
Epilepsy.
Dementia Praecox.
Psychology and Medicine.

STATE MEDICINE.

President: Frederick Montizambert, I.S.O., F.R.C.S.E., D.C.L., M.D., Ottawa.

Vice-Presidents: E. P. Lachapelle, M.D., Laval University, Montreal; Charles Sheard, M.D., Toronto; Peter Henderson Bryce, B.A., M.B., Ottawa; Joseph Groves, M.B., Isle of Wight.

Honorary Secretaries: Joseph D. Page, M.D., Quebec; F. G. E. Pearson, M.D., Brantford, Ontario; Edward Sergeant, L.R.C.P., County Offices, Preston; Arthur A. Mussen, M.D., Municipal Offices, Liverpool.

The following special subjects have been suggested for discussion:

Protection and Control of Milk Supply.
Prevention of Tuberculosis.
Training and Supervision of Midwives.
Notification of Phthisis.
Provision and Administration of Isolation Hospitals.
Isolation Hospitals and "Return" Cases.
Medical Inspection of Children attending Elementary Schools.
Quarantine and Inspection of Shipping.
Medical Examination of Immigrants.
Supply of "Water Gas" and Dangers of Carbon Monoxide Poisoning.

SURGERY.

President: Sir Hector Clare Cameron, M.D., Professor of Clinical Surgery, Glasgow.

Vice-Presidents: Fred. Le M. Grasett, M.B., C.M., F.R.C.S.E., Toronto; Francis J. Shepherd, M.D., C.M., LL.D., F.R.C.S.E., Montreal; Alfred B. Atherton, B.A., M.D., LL.D., Frederickton, N.B.; Tecumseth Kingsley Holmes, M.D., Chatham, Ontario.

Honorary Secretaries: Harry A. Beatty, M.B., 207, Simcoe Street, Toronto; Frederick William Marlow, M.D., C.M., F.R.C.S., 699, Spadina Avenue, Toronto; Sinclair White, F.R.C.S., Ranmoor, Sheffield.

Arrangements have been made for special discussions on the following subjects:

The Surgical Treatment of Ascites Secondary to Chronic Hepatitis.
Prostatectomy.
Duodenal Ulcer.
Peritonitis.

THERAPEUTICS.

President: Donald MacAlister, M.D., Cambridge.

Vice-Presidents: John Lorenzo Davison, B.A., M.D., C.M., Toronto; Alexander D. Blackader, B.A., M.D., Montreal; Sir Alan Reeve Manby, M.V.O., M.D., East Rudham; Professor J. Rose Bradford, M.D., F.R.S., London.

Hon. Secretaries: Velyien E. Henderson, M.A., M.B., University of Toronto; Charles Potter Lusk, M.D., C.M., 99, Bloor Street W., Toronto; E. R. Morton, M.D., 22, Queen Anne Street, London, W.

The following subjects have been selected for discussion:

Tuesday, August 21st.—The Kidney, its Pharmacology and Therapeutics.

Wednesday, August 22nd.—Serumtherapy.

Thursday, August 23rd.—Joint Session with the Section of Medicine on the subject of Heart-block.

Friday, August 24th.—The Place of Materia Medica and Therapeutics in the Medical Curriculum.

The Secretaries will be glad to receive specimens, drawings, tracings, or preparations for exhibition during the session.

HONORARY LOCAL SECRETARIES.

Frederic Newton Gisborne Starr, M.B., Medical Building, Toronto.

Professor John Joseph Mackenzie, B.A., M.B., Medical Building, Toronto.

David James Gibb Wishart, B.A., M.D., L.R.C.P., Medical Building, Toronto.

COMMITTEE PATHOLOGICAL MUSEUM.

Professor John Joseph Mackenzie, B.A., M.B., Toronto, *Chairman.*
Maude Abbott, B.A., M.D., Montreal, *Secretary.*
Professor Gordon Bell, M.D., Winnipeg.
Professor W. T. Connell, M.D., Kingston.
Andrew Robertson Gordon, M.B., Toronto.
J. A. McGregor, M.D., London, Ontario.
Wm. Herbert Pepler, M.D., C.M., L.R.C.P.Lond., Toronto.
Samuel Cummings, M.B., Toronto.
Edward Stanley Ryerson, M.D., C.M., Toronto.
Henry Seaton Hutchison, M.B., Toronto.

EXHIBITION COMMITTEE.

Chairman: Dr. Arthur Jukes Johnson, Toronto.
Secretaries: Dr. T. D. Archibald, Toronto; Dr. W. A. Young, Toronto.

HONORARY LOCAL TREASURER.

Professor J. W. Ross, Toronto.

TORONTO ARRANGEMENTS COMMITTEE.

Dr. Geo. A. Bingham, 68, Isabella Street, Toronto.
Dr. C. J. C. O. Hastings, 258, Wellesley Street, Toronto.
Dr. A. A. Macdonald, 341, Bloor Street West, Toronto.
Professor J. J. Mackenzie, Medical Laboratories, Toronto.
Dr. Alex. McPhedran, 151, Bloor Street West, Toronto.
Dr. R. B. Nevitt, 46, Bloor Street West, Toronto.
Dr. R. A. Reeve, *President-elect*, 48, Bloor Street E., Toronto.
Dr. F. N. G. Starr, 112, College Street, Toronto.
Dr. J. Algernon Temple, 333, Bloor Street W., Toronto.
Dr. D. J. Gibb Wishart, 47, Grosvenor Street, Toronto.

PROGRAMME OF PROCEEDINGS.

Tuesday, August 21st, 1906.

9.30—12.30 a.m.—Meetings of Sections.

Saturday, August 25th.

Excursions to the Niagara Power Company's plant, through the courtesy of Sir Henry M. Pellatt.
Excursion to Muskoka.
Excursion to Lambton, through the courtesy of the President, Mr. Austin.

Atlantic Ocean Passage.

The price of first-class accommodation by the principal Atlantic steamship lines varies according to the position of the cabin and the number of occupants. The accommodation available for the passage westward during August and September is usually engaged a long time ahead, and it will be desirable that intending travellers should communicate with one of the passenger agents or with the company selected as early as possible. The owners, while declining to make any reduction to members of the British Medical Association below the minimum price of first-class fare, have promised where possible to provide berths or cabins of a higher category than the fare charged would ordinarily command, and this should be mentioned in making the application.

Messrs. Stockwell and Co., 8 and 10, Beak Street, Regent Street, London, W., in addition to arranging tours with first-class accommodation all the way, are forming special parties to travel second class from London or Liverpool to Montreal and back by certain steamers sailing to Canada. The accommodation in some instances is on the upper deck, and, in fact, the best in the boat. Circular tickets are issued by this firm to such parties from London or Liverpool to Toronto, and the price charged includes first class for the railway journey from Montreal to Toronto and back. The return fare under these conditions is from £18 6s. 6d. upwards.

Special Fares in Canada.

The following notice has been issued by the Eastern Canadian Passenger Association, enumerating the special rates granted to members attending the annual meeting of the British Medical Association at Toronto, both for the journey to and from Toronto and for side trips and excursions. The following is a list of the railway and steamship companies comprised in the Eastern Canadian Passenger Association:

Algoma Central and Hudson Bay Railway.
Bay of Quinte Railway.
Boston and Maine Rail Road.
Canadian Pacific Railway.
Central Ontario Railway.
Central Vermont Railway.
Grand Trunk Railway System.
Great Northern Railway of Canada.
Huntsville, Lake of Bays, and Lake Simcoe Navigation Company.
Kingston and Pembroke Railway.
Muskoka Lakes Navigation and Hotel Company.
New York Central and Hudson River Rail Road.
Niagara Navigation Company.
Northern Navigation Company.
Ontario and Quebec Navigation Company.
Oxford Mountain Railway.
Ottawa and New York Railway.
Ottawa River Navigation Company.
Pembroke Navigation Company.
Père Marquette, C. H. and D. System.
Quebec Central Railway.
Quebec Railway Light and Power Company.
Quebec Southern Railway.
Richelieu and Ontario Navigation Company.
Rideau Lakes Navigation Company.
Rutland Railroad.
Temiscouata Railway.
Temiskamming and Northern Ontario Railway.
Toronto, Hamilton, and Buffalo Railway.
Trent Valley Navigation Company.
Dominion Atlantic Railway.
Intercolonial Railway.

Regulations of the Eastern Canadian Passenger Association for the Annual Meeting of the British Medical Association at Toronto.

1. *Fares, Going Dates, and Limits.*—(*a*) Domestic Business, Certificate Plan Arrangements; free return regardless of number in attendance. Passengers going rail, returning Richelieu and Ontario Navigation Company, or vice versa, rate to be one and one-half fare.

(*b*) *European Business.*—On presentation of certificate, to be prepared and signed by the Secretary of the Eastern Canadian Passenger Association, and countersigned by the Secretary of the Canadian Committee or the Secretary of the British Medical Association, one-way tickets to be issued at one-half lowest one-way first-class rail fare; round trip tickets at lowest one-way first-class rail between all points in Canada. Rates to the Pacific Coast subject to concurrence of Transcontinental Passenger Associaton. Steamship lines to advise Secretary what, if any, additional arbitraries* are required.

Dates of Sail, July 1st to September 30th, 1906, inclusive. Final return date, September 30th, 1906.

2. *Extension of Time Limit.*—On deposit with joint agent of Standard Convention, certificates issued from points in the Maritime Provinces, points west of Port Arthur and from points in the United States, on or before August 28th, 1906, and on payment of fee of $1 00 at time of deposit, an extension of time until September 30th to be granted. Joint agency to be conducted in the name of G. H. Webster, Secretary, Eastern Canadian Passenger Association, will be kept open from August 21st to September 15th, 1906.

3. *Side Trips.*—(*a*) Side trip tickets to be sold from Toronto

---

* By arbitraries is to be understood additional charges for berths, meals, etc.

to delegates from the Maritime Provinces, from points west of Port Arthur, and from the United States, on presentation of validated certificate or deposit receipt, at lowest one-way first-class fare for the round trip to all points in Canada.

Dates of sail, August 23rd to September 1st, 1906, inclusive; return limit, September 30th, 1906.

(*b*) Side trip tickets also to be sold to delegates from Ontario and Quebec to stations west of and including Sudbury, and east of and including Montreal, on presentation of validated certificate or deposit receipt, at lowest one-way first-class fare for the round trip. It being understood also that the arrangements authorized for the extension of time limit from points in the Maritime Provinces, from points west of Port Arthur and from points in the United States will also apply for delegates from Ontario and Quebec.

Usual additional arbitraries via Upper Lake steamships to apply; namely, going lake, returning same, $8.50 additional to be collected. Going lake, returning rail, or going rail, returning lake, $4.25 additional to be collected. Also usual arbitraries via St. Lawrence route, for delegates desiring to return by steamer, on presentation of tickets to purser, namely, $6.50 Toronto to Montreal; $3.50 Kingston to Montreal.

Via Northern Navigation Company on lines where meals and berth are not included, the rail rate will apply; on lines where meals and berth are included, rate to be single fare plus meal and berth arbitrary.

Annesley Hall	... Victoria College Women's Residence ..	Rates not fixed

The University Dining Hall will be open and meals served daily.

There will be no difficulty about accommodation for visitors to Toronto during the meeting. In addition to the numerous hotels shown in the accompanying table, the local Executive Committee have made special arrangements for placing college rooms at the disposal of members.

College Rooms.

At Queen's Hall (University College Women's Residence) there will be accommodation for 48.

At Annesley Hall (Victoria Women's Residence) there are 65 rooms.

Mr. John Ross Robertson, Chairman of the Board of the Hospital for Sick Children, will place at the disposal of the Lodgings Committee 100 rooms in the new Nurses' Residence, not yet occupied, which he has recently presented to the hospital.

Note.—Accommodation for over 30,000 visitors can be found in the number of good boarding-houses all over the city, at $1.00 per day, or $4.00 and $6.00 per week.

Hints for Travellers.

Clothing.

For the Atlantic voyage a warm suit, warm underclothing, an overcoat and wraps will be required, and they may prove useful also on the lakes or on the mountains, but the British traveller is likely to find Canada in August warm (the average temperature for Toronto in August is said to be 66° F.) and the United States something more than warm. As there will be dinners and evening receptions, as well as afternoon parties, dress appropriate to these occasions must be taken, but the high silk hat of European capitals will be out of place. There is a difficulty about getting boots cleaned in Canada; at Toronto during the meeting a "shoe-shine colony" will be established in the grounds for the convenience of members, but it will be well to take a box of shoe-polish for use in other places.

Meetings of Branches & Divisions.

[*The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the* Journal.]

BATH AND BRISTOL BRANCH:

Bristol Division.

The annual meeting of the Bristol Division was held on Thursday, May 17th.

Proposed Royal Charter.—The following resolution was passed:

> The Division is in favour of the proposed application for a Royal Charter, but it does not thereby commit itself to the approval of the exercise of all the powers proposed to be taken under it.

Annual Representative Meeting.—Dr. George Parker, Pembroke Road, Clifton, Bristol, was appointed Representative of the Division to the Annual Representative Meeting.

BORDER COUNTIES BRANCH:

Scottish Division.

The annual general meeting of this Division was held in the Dumfries and Galloway Royal Infirmary on Tuesday, May 8th.

Election of Officers.—The following officers were elected for the ensuing year:—*Chairman:* Dr. Clarke (Dumfries). *Vice-Chairman:* Dr. Murdoch (Annan). *Members of Committee:* Dr. Robertson (Penpont); Dr. Anderson (Stranraer); Dr. Bell (Lockerbie); Dr. Robson (Maxwelltown). *Members of Branch Council:* Dr. Logan (Ecclefechan); Dr. Clarke (Dumfries). *Honorary Secretary:* Dr. G. R. Livingston. *Representative at Annual Meeting:* Dr. Maxwell Ross (Dumfries).

Address.—Dr. Gulland (Edinburgh) gave an address on blood examination in private practice.

Dinner.—The members afterwards dined together at the Station Hotel.

LANCASHIRE AND CHESHIRE BRANCH:

MANCHESTER (NORTH) DIVISION.

THE annual meeting of this Division was held on Thursday, May 17th, Dr. BODDY in the chair.

Proposed Royal Charter.—The following resolution was adopted:

> That this Division approves of the Royal Charter, provided that the estimated expenses are not exceeded to any material extent.

State Registration of Nurses.—The following resolution was passed:

> That this Division approves generally of the scheme suggested for the State registration of nurses; and that on the question of the separate registration of midwifery nurses the Representative be instructed to vote at his own discretion.

New Rules.—The following new rules were proposed and adopted subject to consent:

(*a*) That the Chairman, Secretary, and Representative be *ex-officio* members of all Division Committees.
(*b*) That Rule 6 be altered, leaving out the second part.

Election of Officers.—The following were elected as officers for the ensuing year:—*Chairman:* Dr. Boddy. *Vice-Chairman:* Dr. Hargreaves. *Secretary and Treasurer:* Dr. McGowan. *Representative to Annual Representative Meeting:* Dr. Broadbent. *Representatives to Branch Council:* Dr. Broadbent and Dr. Frazer.

Direct Representatives on General Medical Council.—The following resolution was adopted:

> That this Division supports the following two gentlemen as candidates for election as Direct Representatives, the third vote being left to the discretion of the Division's Representative: Dr. G. H. Broadbent and Dr. G. Jackson.

MIDLAND BRANCH:

LINCOLN DIVISION.

THE annual meeting of the Lincoln Division was held in the Guildhall, Lincoln, on Friday, May 18th.

Election of Officers.—The following officers for the ensuing year were elected:—*Vice-President of Midland Branch:* Dr. Farrar (Gainsborough). *Chairman of Division:* Dr. Mansel Sympson (Lincoln). *Vice-Chairman of Division:* Dr. Jagger (Lincoln). *Secretary and Treasurer:* Dr. Chater (Lincoln). *Representative for Representative Meeting:* Dr. Genney (Lincoln). *Representative on Branch Council:* Dr. C. Harrison (Lincoln). *To form Divisional Council:* Dr. W. H. B. Brook (Lincoln), Dr. J. C. Ellis (Metheringham), Dr. Levinson (Gainsborough).

Associate Member.—Dr. Howes (Horncastle) was elected an Associate Member.

Contract Medical Practice.—The Contract Practice Report and Report on Provident Dispensaries and Public Medical Services (see SUPPLEMENTS of JOURNALS of July 22nd and August 5th, 1905) were considered, and the report was approved *nem. con.*

Co-ordination of Scientific Work.—No resolution was proposed, it being suggested that it was a subject that rather concerned bigger centres with medical schools, etc.

Hospital Out-patient Departments.—Question on p. 54 of SUPPLEMENT of February 17th, 1906, was read and its contents approved *nem. con.*

State Registration of Nurses.—The questions on p. 79 of SUPPLEMENT of March 3rd, 1906, were put. The first was assented to *nem. con.*, and the second dissented from *nem. con.*

Proposed Royal Charter.—The application for a Charter was approved *nem. con.*

PERTH BRANCH.

A SPECIAL meeting was held in the Perth Infirmary on Friday, April 20th, Dr. MCEWEN, Vice-President, in the chair.

Apologies.—Apologies were intimated from Drs. Paton, Liddell, and R. C. Buist.

Election of Branch Council.—A proposal to elect the Council of the Branch in June, in order to be in time for the *Year Book*, was approved on the motion of Dr. STEWART, seconded by Dr. URQUHART, that the present Council having only been in office so short a time should be re-elected.

Proposed Royal Charter.—After discussion on the proposed application for a Royal Charter, Dr. URQUHART moved, and Dr. STEWART seconded, that it be remitted to the Central Council.

Division and Branch Finance.—With regard to the inquiry as to the present system of Division and Branch Finance, suggestions from the Branch were made, and a report sent to the General Secretary of the Association.

City and County Infirmary, Perth.—Dr. URQUHART made a general statement in regard to the infirmary and the coming removal of infectious diseases from it to the Town Fever Hospital, and requested consideration of the medical requirements of the locality in connexion with hospital administration. Various matters were discussed, including, Is there any abuse of the charity? whether maternity or children's wards were required, or whether accommodation could be secured for advanced cases of phthisis.—The Secretary was instructed to send the recommendations of the Branch to be brought before the notice of the Directors.

The late Dr. Thom.—The Secretary was instructed, on the motion of Dr. URQUHART, seconded by Dr. MCEWEN, to minute the following letter from the widow of the late Dr. Thom (Crieff):

> April, 1906.
>
> DEAR DR. TAYLOR,—I regret, owing to absence from home, having been unable till now to acknowledge your kind note and the extract of minute of the Perthshire Branch of the British Medical Association. On behalf of my children and myself, may I ask you to convey to the members of the Association our heartfelt thanks for their kind sympathy for us in our sad loss, and also for the many kind and friendly feelings of regard for my dear husband so touchingly expressed in this extract of minute, which we shall always treasure?
>
> Believe me,
> Yours very truly,
> Edinburgh. HELEN THOM.

Meeting of Council.—At a meeting of Council held after the meeting (Dr. MCEWEN in the chair), Dr. MCEWEN proposed that meetings be held at hours most convenient to country members, and Dr. HUME seconded. This was agreed to where possible.

SOUTH WALES AND MONMOUTHSHIRE BRANCH:

CARDIFF DIVISION.

THE annual meeting of this Division was held at the Cardiff Infirmary, on Thursday, May 17th, at 3.15 p.m.

Election of Officers.—The following were elected officers for the ensuing year: *Chairman*, Dr. D. R. Paterson; *Vice-Chairman*, Dr. W. B. Crawford Treasure; *Secretaries*, Drs. Ewen J. Maclean and R. Russell Thomas; *Representatives of the Division on the Branch Council*, Drs. J. Tatham Thompson, J. Powell, E. E. Brierley, E. Williams, W. Kirkby; *Executive Committee*, Dr. Charles T. Vachell, Messrs. J. Lynn Thomas, William Martin, William Sheen. Dr. J. Tatham Thompson was elected the Representative of the Division in the Representative Meetings of the Association.

Report of Executive Committee.—The annual report of the Executive Committee was received and adopted.

Annual Representative Meeting.—The agenda of the Annual Representative Meeting was considered in detail with respect to the various items and the Divisional Representative was instructed in accordance therewith.

Vote of Thanks to Retiring Chairman.—The meeting concluded with a hearty vote of thanks to the retiring Chairman, Dr. Charles Vachell, for the very efficient manner in which he had discharged his duties during his year of office.

LIBRARY OF THE BRITISH MEDICAL ASSOCIATION.

MEMBERS are reminded that the Library and Writing Rooms of the Association are fitted up for the accommodation of the members in commodious apartments, at the office of the Association, 429, Strand. The rooms are open from 10 a.m. to 5 p.m., except on Saturdays, when they close at 2 p.m. Members can have their letters addressed to them at the office.

☛ *To ensure the insertion of notices in this column, they must be received at the Central Offices of the Association not later than the first post on Tuesday.*

Association Notices.

1906 ANNUAL GENERAL MEETING.

The Annual General Meeting of the British Medical Association will be held in the Caxton Hall, Caxton Street, Victoria Street, London, S.W., on Tuesday, July 24th at 10 o'clock in the forenoon.

ANNUAL REPRESENTATIVE MEETING.

The Annual Representative Meeting will take place in the Caxton Hall, Caxton Street, Victoria Street, London, S.W., on Tuesday, July 24th, immediately after the Annual General Meeting, which will be held at 10 o'clock in the forenoon; on Wednesday, July 25th, at 10 a.m.; on Thursday, July 26th, at 10 a.m. if required also on Friday, July 27th, at 10 a.m. if required.

BY ORDER OF THE COUNCIL,
GUY ELLISTON, *General Secretary.*

BRANCH AND DIVISION MEETINGS TO BE HELD.

ABERDEEN BRANCH.—Election of Member of Council.—Nominations are requested to be sent to Dr. J. F. Christie, Honorary Secretary, 7, Alford Place, Aberdeen, on or before June 2nd. Each candidate must be nominated by not less than three members.

BATH AND BRISTOL BRANCH.—The annual meeting of this Branch will be held on Wednesday, May 30th, at the Medical Library, University College, Bristol, at 4.30 p.m., when Dr. J. Michell Clarke will resign the chair to Dr. D. S. Davies, President-elect, who will deliver the presidential address. The business of the meeting will be to receive the report of the Council and the annual financial statement, to elect the officers of the Branch, to receive the report of the election of members of Council and of the Representatives of Divisions, to transact the necessary business, and to consider such subjects connected with the interest of the Branch and of the profession as may be brought before it. The Secretaries will be obliged if members will send them notice of any alteration in their diplomas or addresses. N.B.—Members who have not paid their subscriptions are requested to do so immediately to the General Secretary of the Association, 429, Strand, W.C. The dinner will be held at the Clifton Down Hotel, at 7 p.m. Dinner tickets, 7s. 6d. each. The wines will be served at moderate charges. N.B.—The Bristol Secretary particularly requests that members will inform him by Monday, May 28th, whether it is their intention to be present at the dinner. The Secretary cannot undertake to provide places for members at the dinner without notice beforehand.—NEWMAN NEILD, Honorary Secretary of the Bristol District, Clifton, Bristol; W. M. BEAUMONT, Honorary Secretary of the Bath District, Bath.

BIRMINGHAM BRANCH.—The annual meeting of the Birmingham Branch will be held at the Medical Institute on Thursday, June 14th, at 3.30 p.m.—T. SYDNEY SHORT, Honorary Secretary, 85, Edmund Street, Birmingham.

BORDER COUNTIES BRANCH.—The annual meeting has been tentatively fixed for June 22nd, at the County Hotel, Carlisle. —F. R. HILL, Honorary Secretary.

BORDER COUNTIES BRANCH AND NORTH LANCASHIRE AND SOUTH WESTMORLAND BRANCH.—In accordance with By-law 24 notice is hereby given that nominations for the office of Representative of the above Branches on the Central Council of the Association must be received by me, duly signed by not less than three members of the Association, not later than May 28th. —FRANCIS R. HILL, M.B., 62, Warwick Road, Carlisle.

CAMBRIDGE AND HUNTINGDON BRANCH.—The annual meeting of the Branch will be held at Peterborough on Thursday, June 14th. Any member having communications to make should apply to the Honorary Secretary, F. E. APTHORPE WEBB, Grafton House, Cambridge.

CAMBRIDGE AND HUNTINGDON BRANCH.—Notice of Election of a Member of Council.—Nominations for a Member of the Council, which must be signed by three members of the Branch, should be sent to the Honorary Secretary on or before Saturday, June 2nd.—F. E. APTHORPE WEBB, Grafton House, Cambridge, Honorary Secretary.

DUNDEE BRANCH.—The annual meeting of this Branch will be held in the Students' Union, Dundee, on Friday, June 8th, at 4 o'clock. Business: Election of office bearers. Proposed adoption of the "Bradford Rules," etc.—R. C. BUIST and A. P. LOW, Honorary Secretaries.

EAST ANGLIAN BRANCH: SOUTH ESSEX DIVISION.—The next meeting will be held at the Victoria Hospital, Southend-on-Sea, on Tuesday, May 29th, at 4 p.m. Business: (1) Minutes of meeting of May 1st, 1906; (2) cases; (3) matters referred to Divisions; (4) election of Executive Committee for ensuing year.—W. CARDY BLUCK, Honorary Secretary, Southend-on-Sea.

EAST ANGLIAN BRANCH: WEST NORFOLK DIVISION.—The Annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. GARDINER, King's Lynn, Honorary Secretary.

EAST YORK AND NORTH LINCOLN BRANCH.—The annual meeting will be held at the Grimsby and District Hospital on Thursday, June 7th, at 4.30 p.m., and will be followed by the annual dinner.—E. M. HAINWORTH, Honorary Secretary, Hull.

EDINBURGH AND FIFE (COMBINED) BRANCHES.—Nominations for two Members of Council will be received by Dr. Logan Turner, 23, Walker Street, Edinburgh, on or before June 2nd. Nominations must be signed by two members.—NORMAN WALKER, Honorary Secretary.

GLASGOW AND WEST OF SCOTLAND BRANCH.—Election of Representatives on Central Council. In accordance with By-law 24, nominations, each signed by three members of the Branch, must reach the Honorary Secretary on or before Monday, June 4th.—Dr. JAMES H. NICOLL, 4, Woodside Place, Glasgow, Honorary Secretary.

LANCASHIRE AND CHESHIRE BRANCH: BIRKENHEAD DIVISION.—A meeting of the members of this Division will be held on Tuesday, May 29th, at the Birkenhead Medical Society's rooms, 14, Hamilton Square (first floor), at 4 p.m. Agenda: (1) Minutes of last meeting. (2) Annual report. (3) Elect officers, etc., of Division, also the Representatives to Annual Representative Meeting and on Branch Council. (4) Consideration of matters referred to Divisions: (*a*) Hospital out-patient departments (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, February 17th). (*b*) Proposed application for Royal Charter (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, March 24th). (*c*) Registration of nurses (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, March 3rd). (5) Agenda for Annual Representative Meeting (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, May 5th). (6) Other business.—J. H. FARDON, Honorary Secretary, 59, Grange Mount, Birkenhead.

LANCASHIRE AND CHESHIRE BRANCH: LEIGH DIVISION.—The annual meeting of this Division will be held at 8.30 p.m. in the Co-operative Rooms, Ellesmere Street, on Thursday, May 31st. Agenda: (1) Minutes. (2) Election of officers. (3) Annual report. (4) To consider the business of the Annual Representative Meeting. (5) Fix date of annual cycle run. (6) Cases. (7) Any other business.—MICHAEL J. HALTON, Honorary Secretary.

Metropolitan Counties Branch: Lambeth Division.—The annual general meeting will be held at Bethlem Royal Hospital on Thursday, May 31st, at 4 p.m. A paper will be read by G. H. Savage, M.D., F.R.C.P., on "The Natural History of Delusions." If time permits, there will be a demonstration of cases by the staff of the hospital.—W. H. B. Stoddart, Honorary Divisional Secretary.

Metropolitan Counties Branch: Marylebone Division.—The annual meeting of the Division will be held at the Rooms of the Royal Medical and Chirurgical Society, 20, Hanover Square, W., on Tuesday, May 29th, at 5 p.m. Agenda: (1) Minutes. (2) To elect officers, namely—Chairman, Vice-Chairman, Honorary Secretary, and Treasurer. (3) To elect Representatives of the Division on the Branch Council. (4) To elect the Representative of the Division at Representative Meetings of the Association. (5) To receive the annual report of the Executive Committee. (6) To consider other business if necessary.—Comyns Berkeley, Wimpole Street, Honorary Secretary.

Metropolitan Counties Branch: St. Pancras and Islington Division.—The annual meeting will be held on Friday, May 25th, at 4 p.m., at the Islington Infirmary, Highgate Hill. Business: Election of officers; annual report and financial statement; to consider registration of nurses; the election of Representatives on the General Medical Council, and the business to be brought before the Annual Representative Meeting of the Association.—Wm. Wynn Westcott, Honorary Secretary.

Metropolitan Counties Branch: Tottenham Division.—The annual meeting of the Division will be held at the Tottenham Hospital on Friday, May 25th, at 4 p.m. Agenda: (1) To instruct Representative. (2) To elect officers for next year.—Fred. Tresilian, White Lodge, Enfield, Honorary Secretary.

Metropolitan Counties Branch: Wandsworth Division.—The annual meeting will be held on Friday, May 25th, at the Battersea Town Hall (entrance in Theatre Street) at 6.30 p.m. prompt. (1) Minutes. (2) Correspondence. (3) Questions. (4) Report of scrutineers (Drs. H. R. Ker and C. J. Martin) as to result of voting for representatives for Putney and Wimbledon on Executive Committee for 1906-7. N.B.—The other officers and members of Committee elected for 1906-7 are as follows: Chairman, Llewellyn Williams, L.R.C.S.; Vice-Chairman, Malcolm Mackintosh, M.D.; Chairman-elect, Gilbert Richardson, M.R.C.P.; Honorary Secretary and Treasurer, E. Rowland Fothergill, M.B.; Honorary Assistant Secretaries, D. R. Powell Evans, M.R.C.S., Chas. J. Martin, M.B., Allan J. Swallow, M.B.; Representatives on the Metropolitan Branch Council, M. G. Biggs, M.D., Geo. Walker, M.R.C.S.; ordinary members of Committee, (Balham) Hugh R. Ker, F.R.C.S., (Battersea) W. G. Gyton, M.R.C.S., (Clapham) F. Stocks, M.R.C.S., (Tooting) H. T. Barron, M.D., (Wandsworth) E. J. Pritchard, M.R.C.S.. (5) Election of Representative at Representatives' Meetings, 1906-7. (6) Election of deputy to Representative at Representatives' meetings. (7) Election of Ethical Committee (three seats); the Chairman and Honorary Secretary are *ex officio* members. (8) Election of Hospital Committee (four seats); the Chairman and Honorary Secretary are *ex officio* members. (9) Election of four members of Science Committee; this Committee, according to rule, is to consist of the Chairman-elect, one Honorary Assistant Secretary, three members elected by the Executive Committee, and four elected by the Division. (10) To receive the annual report of the Executive Committee. (11) Other business. There will be an exhibition of drugs, preparations, etc., by Messrs. Parke, Davis, and Co. The annual dinner will be held afterwards at 7.30 p.m.—E. Rowland Fothergill, Honorary Secretary, Southfields, S.W.

The annual dinner will be held in the Banqueting Hall, Battersea Town Hall, on Friday, May 25th, at 7 p.m. Invitations to attend have been issued and accepted by the M.P.'s for Wandsworth and Clapham; the Mayors of Battersea, Wandsworth and Wimbledon; the late candidates for Parliament in the Battersea, Clapham, Wandsworth, and Wimbledon areas; local members of the L.C.C. and S.C.C.; the Chairman, Wandsworth Guardians; the Chairman, Central Council; the President of the Branch; the Director-General A.M.S.; the Chairman, Organization Committee; and several others. The Committee hope the members of the Division will attend in large numbers and bring their medical friends. Tickets, 7s. 6d. each. —A. J. Swallow, Honorary Secretary Dinner Committee, 61, South Side, Clapham Common.

Midland Branch.—The annual meeting of this Branch will be held at the County Hospital, Lincoln, on Thursday, June 7th, at 2.15. Agenda: Minutes. Report of Council. Election of two Representatives of Branch on General Council (the only nominations received are Dr. Pope and Dr. Carline, who will therefore be elected). Election of Branch officers. Election of Honorary Secretary of the Branch (Dr. Astley Clarke does not seek re-election). Election of President-elect for 1907-8. Suggested re-combination of Divisions in Lincolnshire. Any other business. Address by the new President. The President and Mrs. Mansel Sympson will be "at home" to the members of the Branch in the Castle grounds from 4 to 6 p.m. Luncheon: The President will be glad to entertain members to lunch at his house, Deloraine Court, James Street, from 1 to 2 p.m. The annual dinner will be held at the White Hart Hotel at 6 p.m. Tickets, 7s. 6d. each, exclusive of wine. Members desiring to dine are requested to notify the fact to Dr. E. Mansel Sympson, Lincoln, before Monday, June 4th.—Astley V. Clarke, M.D., Honorary Secretary and Treasurer.

Midland Branch: Leicester Division.—The annual meeting of the Division will be held on Wednesday, May 30th, at 4 p.m., at the Infirmary, Leicester. Business: (1) To nominate a Vice-President of the Branch for 1906-7. (2) To elect the officers of the Division. (3) To elect Representatives on the Branch Council. (4) To elect the Executive Committee of the Division. (5) To elect a Representative at the Representative Meeting of the Association. (6) To receive a report of the work of the Division. (7) To discuss matters referred to the Division in the Supplement to the British Medical Journal. (8) Any other business.—Robert Sevestre and Wilfred E. Gibbons, Honorary Secretaries, Leicester.

North Wales Branch.—Nominations of a member of the Central Council to represent this Branch for the ensuing year must be made in accordance with By-law 24, and sent to me in writing on or before May 31st.—H. Jones Roberts, Honorary Secretary, Pen-y-groes.

North Wales Branch: North Carnarvonshire and Anglesea Division.—The annual meeting of this Division will be held at the British Hotel, Bangor, on Wednesday, May 30th, for the election of officers, Representatives, etc., and other business.—H. Jones Roberts, Pen-y-groes, Honorary Secretary.

North Wales Branch: South Carnarvon and Merioneth Division.—The annual meeting of this Division will be held at the Gorsygedol Hotel, Barmouth, on Thursday, May 31st.—H. Gladstone Jones, Honorary Secretary.

Perthshire Branch.—The summer meeting of the Branch will be held in the Clubhouse, Moncreiffe Island, at 3.15 prompt, on Friday, June 1st. Business: (1) Read minutes. (2) Confirm re-election of Council till June, 1907. (3) Appointment of Branch Representative to annual meeting. (4) Any other business. After the above meeting the usual golf match will take place against Dundee.—William A. Taylor, Alexander Trotter, Joint Honorary Secretaries.

South-Eastern Branch.—The sixty-second annual meeting will be held at the Crystal Palace on Wednesday, June 27th, at 2.15 p.m. Dr. Hetley (President-elect) kindly invites members to lunch at the Crystal Palace from 1 to 2 p.m. Agenda: In addition to the business of an ordinary meeting: (1) To receive the report of the election of new officers, who shall thereupon take office. (2) To receive the report of the Council on the affairs of the Branch and the annual financial statement. After the meeting, entertainments will be provided in the Crystal Palace, and expeditions will be arranged to the Norwood Cottage Hospital, the Norwood Sanatorium for the Treatment of Alcohol and Drug Inebriety, and the Dulwich Gallery. Dinner at the Crystal Palace at 6.15 p.m. (for 6.30 p.m.); charge 7s. Wine will be provided by local members. Those who propose to be present at lunch or dinner are requested to signify their intention to Dr. Prangley, 197, Anerley Road, S.E., not later than Saturday, June 23rd.—H. M. Stewart, Honorary Secretary.

South-Eastern Branch: Canterbury and Faversham Division.—The annual meeting of this Division will be held in the Library of the Canterbury Hospital on June 7th, at 3 p.m., Dr. T. Whitehead Reid presiding. Agenda: (1) Minutes. (2) Time, place, and Chairman of next meeting. (3) Election of officers for ensuing year. (4) Other business. At 4 o'clock members and friends will be driven to the Cathedral, the Dean of Canterbury having kindly consented to show them over it, after which a visit will be paid to the Canterbury Waterworks, where the various processes will be explained. Dinner will be served at the County Hotel at 6.15 p.m., charge 5s. Members who intend to be present at the dinner are requested to send a notification, not later than June 6th, to A. R. Henchley, Honorary Secretary and Treasurer, Canterbury.

A combined meeting of the Isle of Thanet, Canterbury, and Faversham Divisions will be held in the Hospital Library at

Canterbury on June 7th, at 2.45 p.m., for the purpose of electing a Representative of the above Divisions for the annual meeting of Representatives.—HUGH M. RAVEN, Honorary Secretary, Isle of Thanet Division, Broadstairs.

SOUTH-EASTERN BRANCH: NORWOOD DIVISION.—The annual meeting of the Division will take place at the Art Club, Blackheath, on Thursday, June 14th, at 4 p.m., Ralph Gooding, M.D., of Blackheath, in the chair. Dinner at 6 p.m.; charge 7s., exclusive of wine. Agenda: (1) Minutes of last meeting. (2) To decide where the next meeting shall be held, and to nominate a member of the Division to take the chair thereat. (3) To elect officers, the Representatives of the Division on the Branch Council, and ordinary members of Executive Committee. (4) To elect the Representative of the Division in Representative meetings of the Association. (5) To receive the annual report of the Executive Committee. (6) To consider business of Annual Representative Meeting. (7) To consider existing rules and discuss whether any alterations are necessary. (8) Any other business. The following papers will be read: Dr. C. R. Box, Bronchiectasis in Children (with lantern slides); W. Arbuthnot Lane, M.S., Defective Intestinal Drainage; Dr. Walter W. H. Tate, Indications for the Surgical Treatment of Uterine Fibroids. Exhibition of instruments, etc., by Messrs. Burroughs and Wellcome and Messrs. Arnold and Son. Members desirous of exhibiting specimens or reading notes of cases are invited to communicate at once with the Honorary Secretary. All members of the South-Eastern Branch are invited to attend and to introduce professional friends, but will be unable to vote on Divisional questions. The Art Club is at the end of Bennett Park, three minutes from Blackheath Station, S.E.R. The Honorary Secretary would be much obliged if members would kindly inform him by postcard, to reach him by the first post on Tuesday before the meeting, whether they intend, if possible, to be present at the meeting, and if likely to remain to dinner.—HENRY J. PRANGLEY, Honorary Secretary, ARTHUR W. SOPER, Assistant Honorary Secretary, Anerley.

SOUTH-EASTERN OF IRELAND BRANCH.—An ordinary meeting and meeting of the Council will be held at the Town Hall, Clonmel, on June 6th, at 11 o'clock. Agenda: (1) Minutes. (2) To appoint an Ethical Committee for Branch. (3) Investigate ethical case. (2 and 3 by Branch Council only.)—J. QUIRKE, Piltown, co. Kilkenny, Honorary Secretary.

SOUTH MIDLAND BRANCH: BEDFORDSHIRE AND HERTFORDSHIRE DIVISION.—The annual meeting of this Division will be held at the Bedford County Hospital on Friday, June 8th, at 2.45 p.m. Agenda: (1) The minutes of the last annual meeting. (2) The annual report of the Executive Committee. (3) The election of officers for the ensuing year. (4) Letters and communications and any other business. (5) W. Hale White, M.D., Physician to Guy's Hospital, will read a paper on "Some Common Cases of Haematemesis which are frequently misunderstood."—H. SAVORY, Honorary Secretary, Bedford.

SOUTH WALES AND MONMOUTHSHIRE BRANCH: SOUTH-WEST WALES DIVISION.—The annual meeting of the Division will be held at the Stepney Hotel, Llanelly, on Wednesday, May 30th, at 2.30 p.m. A meeting of the Ethical Committee will be held at 2 o'clock. Agenda: (1) Minutes of last meeting. (2) Election of officers—Chairman, Vice-Chairman, Secretary, three Representatives of the Division on Branch Council, Ordinary Members of Executive and Ethical Committees, and Representative of the Division for Annual Representative Meeting in London. (3) Annual report of Executive Committee. (4) Report *re* medical officer of Aberystwyth Workhouse. (5) To consider the business of Annual Representative Meeting. (6) To consider proposed Charter for the Association. (7) Other business. Papers: Mr. D. J. Williams: Notes on Four Cases of Suppurating Ovarian Cyst. Dr. R. G. Price: Quacks and Quackery; with special reference to Carmarthenshire. Dr. Owen Williams will show 2 cases of Exophthalmic Goître in Men. The Honorary Secretary of the South Wales Branch Contract Practice Committee wishes to remind members of the urgent importance of securing a wide support for the Contract Practice Fund, concerning which a circular was recently issued. Those who have not yet contributed are asked to do so as soon as possible, so that the list of contributors can be completed and circulated. Contributions should be sent to Dr. E. J. Maclean, 12, Park Place, Cardiff.—J. EDGAR P. DAVIES, Castle Hill, Llanelly, Honorary Secretary.

SOUTH-WESTERN BRANCH.—The sixty-seventh annual meeting will be held on June 14th at the Royal Devon and Exeter Hospital, Exeter, at 3 p.m., when Mr. G. Jackson will resign the chair to Mr. E. J. Domville, who will deliver his inaugural address. The report of the Branch Council and annual financial statement for the year 1905-6 will be presented to the meeting, and the officers of the Branch will be elected for the year 1906-7. Luncheon, by kind invitation of the President-Elect, will take place from 12.30 p.m. to 2.30 p.m. at Northernhay House. The annual dinner will be held at 7 p.m. at the London (Pople's) Hotel. Tickets (exclusive of wine) 6s. each, which can be had from Dr. Solly, 40, Southernhay, the Honorary Treasurer of the Dinner Committee. Arrangements have been made for members who desire it to play either golf or croquet, and to visit the Cathedral, Chapter House, Library, Guildhall, etc.; and by the Exeter members, members are invited to a Garden Party to be held by permission of the Lord Bishop of Exeter and Mrs. Robertson at the Palace from 4.30 to 6 p.m. Members wishing to play golf are requested to send their names to Dr. Raglan Thomas, 13, West Southernhay, Exeter; and for croquet to Mr. A. C. Roper, The Shrubbery, Exeter, before June 10th. Members who attend the Garden Party are invited to bring their wives or lady friends, limited to two. It is particularly requested that members requiring dinner tickets send their names with P.O. for 6s. to Dr. Solly, 40, Southernhay, Exeter, before June 10th. Members wishing to be accommodated with bed and breakfast are invited to send their names to Dr. Miller, 14, East Southernhay, Exeter, who will endeavour to arrange matters. The Honorary Secretary takes this opportunity of informing members that he does not desire to offer himself for re-election.—G. YOUNG EALES, Torquay, Honorary Secretary.

ULSTER AND CONNAUGHT BRANCHES.—The annual meeting will be held on Thursday, June 21st, when the following officers will be elected:—President, Secretary, Treasurer, two Members of the Central Council to represent the Ulster and Connaught Branches, and a member of the Irish Committee (who shall not be resident in Belfast). Nominations for these posts must be sent to the Honorary Secretary not later than Saturday, June 2nd, signed by two members in the case of each except for Members of Central Council, in which case the nomination must be signed by three members. Members having business or scientific communications to make to the meeting will please send the Honorary Secretary notice of the same not later than June 12th.—CECIL E. SHAW, Honorary Secretary, Belfast.

YORKSHIRE BRANCH.—The annual meeting of this Branch will be held at the Eye and Ear Hospital, Bradford, on Wednesday, June 13th.—ADOLPH BRONNER, M.D., 33, Manor Row, Bradford, Honorary Secretary.

GRANTS FOR SCIENTIFIC RESEARCH.

THE Council of the British Medical Association desires to remind members of the profession engaged in researches for the advancement of medicine and the allied sciences that it is prepared to receive applications for grants in aid of such research. Applications for sums to be granted, which must reach this office not later than May 31st, must include details of the precise character and objects of the research which is proposed, and must be made on forms to be had of the General Secretary, at the office of the Association, 429, Strand, London.

Every recipient is required to furnish to the Science Committee, on or before May 31st following upon the allotment of the grant, a report (or, if the object of the grant be not then attained, an interim report to be renewed at the same date in each subsequent year until a final report can be furnished) containing: (*a*) A brief statement for the Report of the Science Committee, showing the results arrived at, or the stage which the inquiry has reached; (*b*) a general statement of the expenditure incurred, accompanied, so far as is possible, with vouchers; (*c*) and references to any Transactions, Journals, or other publications in which the results of the research have been printed.

The work of the Grantees shall be subject to inspection.

RESEARCH SCHOLARSHIPS.

The Council of the British Medical Association is prepared to receive applications for three Research Scholarships, each of the value of £150 per annum, tenable for one year, and subject to renewal by the Council, provided the whole term of office has not exceeded three years.

The scholarships exist for the encouragement of research in Anatomy, Physiology, Pathology, Bacteriology, State Medicine, Clinical Medicine, and Clinical Surgery.

The Scholars' work shall be subject to inspection.

Applications for Scholarships must be made on forms to be had of the General Secretary, and returned on or before May 31st.

ERNEST HART RESEARCH SCHOLARSHIP.

The Council of the British Medical Association is also prepared to receive applications for the Ernest Hart Memorial Scholarship of the value of £200 per annum, tenable for one year, but subject to renewal by the Council for another year. The Scholarship is for the study of some subject in the department of State Medicine.

N.B.—Applications for Scholarships and Grants should, as a rule, be accompanied by a recommendation from the head of the laboratory in which the applicant proposes to work, setting out the fitness of the candidate to conduct such work, and the probable value of the work to be undertaken. This is not intended, however, to prevent applications for Grants in aid of work which need not be performed in a recognized laboratory.

GUY ELLISTON, *General Secretary.*

429, Strand,
April, 1906.

GENERAL COUNCIL
OF
MEDICAL EDUCATION AND REGISTRATION.

SUMMER SESSION 1906.

PRESIDENT'S ADDRESS.

AT the opening of the summer session of the General Medical Council on Tuesday, May 22nd, the President, Dr. DONALD MACALISTER, delivered the following address:

Direct Representative of Ireland.

GENTLEMEN,—One change only has occurred in our membership since the last session, though I understand that other changes are imminent. Sir William Thomson, who for ten years had filled an honoured place in the Council as Direct Representative for Ireland, ceased to hold office on February 28th. An election was accordingly held, in pursuance of the Medical Act, 1886, and under the regulations made by the Privy Council, during the month of January. The candidates nominated were Sir William Thomson and Dr. Leonard Kidd, of Enniskillen. As the result of the first scrutiny of the votes the Branch Council for Ireland found that the number of voting papers whose validity was regarded as doubtful exceeded the difference between the numbers of apparently valid votes recorded for the two candidates respectively. The Branch Council was thus unable, without further inquiry, to certify to me, as returning officer, the result of the election. In the circumstances I thought it proper to suggest that a recount should be made, with the aid, if necessary, of a legal assessor. The suggestion was adopted, and in the end Dr. Leonard Kidd was certified to be duly elected. In your name I bid him welcome to the Council as the representative of the registered medical practitioners of Ireland.

But we cannot part with Sir William Thomson without expressing our appreciation of the valuable service which since 1896 he has rendered to the Council, to the profession, and to the State. His courtesy, his independence of view, his impressive speech, and his zeal for the interest of his professional brethren in Ireland, will long be remembered by all with whom he was here associated. I am glad to have his assurance that he has recovered from the illness which disabled him during the election, and that his experience of the fortunes of war, acquired in other and sterner fields, now stands him in good stead.

Reciprocity with Canada.

In November I called your attention to the probability that some of the Canadian provinces might, in pursuance of the amending Medical Act of 1905, make application for the extension to them of the privileges of medical reciprocity with the United Kingdom. The first to seek admission is the province of Nova Scotia. His Majesty the King has been satisfied that the provincial laws afford an equitable basis for the grant of reciprocal privileges, and accordingly on May 11th an Order in Council was made applying Part II of the Medical Act, 1886, to that part of the Dominion of Canada. I have already forwarded a request, through the Secretary of State for the Colonies, for particulars of the conditions, as to study and examinations, under which medical diplomas are granted in Nova Scotia. These particulars will in due course be laid before you, in order that you may satisfy yourselves regarding the sufficiency of the qualifications, and give directions for their registration in the *Colonial List.*

In my own opinion it is highly desirable, in the interest of the Dominion itself no less than in that of the Empire at large, that closer professional relations should be established between the mother-country and her daughter-states beyond the seas. From recent minutes of the Executive Committee it will be seen that legislation for the better control of medical practice, and for the effective recognition of our own registrable qualifications, is making constant advances in the several Crown Colonies of the Empire. It will, I am sure, be welcome to the Council should the rest of the Canadian Provinces see fit to follow the example of Nova Scotia, and so enable us to unite all the self-governing Colonies with ourselves in one bond of mutual recognition and mutual privilege. I have accepted an official invitation to visit Canada during the summer, and I hope to have the opportunity of conferring on the question of medical reciprocity with some of the authorities there, who desire further explanations of its scope and purport. It will be gratifying if the result is to accelerate the movement which, by the action of the Maritime Province, has now auspiciously begun.

Reciprocity with Japan.

By an Order of His Majesty in Council, dated December 11th, the Medical Act of 1886 was applied to the Empire of Japan. Full details respecting the prolonged course of preparatory and professional study and examinations required for the medical degrees of the Imperial University have now been obtained through the Foreign Office. I have prepared for the use of the Executive Committee and of the Council a memorandum on the subject, in which these details are set forth. You will probably be of opinion that the conditions for University graduation in Japan are amply sufficient to guarantee the efficiency of its Bachelors and Doctors of Medicine. Complete information regarding the other avenues to medical qualification in that country is not yet to hand; but so far as our information goes, it shows that our Japanese Allies have provided wisely and fully for the education of their practitioners in the science and art of Western Medicine. Let me add that this information does much to explain the unparalleled efficiency and success of their military medical service in the recent war. It is not too much to say that the surgeons and sanitary officers of the Japanese forces have proved themselves capable of teaching many wholesome practical lessons to the nations of the West.

The Policlinic at Rome.

You will permit me to mention, before leaving the subject of international relations, a recent personal experience of my own. Last month I was invited, as your President, and as deputy for the Vice-Chancellor of the University of Cambridge, to be present in Rome at the ceremonial opening of the magnificent group of clinical schools and laboratories known as the Policlinico, and at the festival then held in honour of Professor Guido Baccelli, its founder and Director. Having been also accredited by the Lord President of the Privy Council, I was received in Rome as the representative of this country, and with other foreign delegates had the honour of delivering in the Capitol, before His Majesty King Victor Emmanuel and his Ministers, an address of congratulation to Professor Baccelli and to the University of Rome. As the Council is aware, Italy alone of European nations has entered into an agreement of reciprocity with us in respect of medical registration. His Majesty was pleased to note the fact with satisfaction, and graciously offered me a special welcome on that account. During the subsequent proceedings, the close professional relations between Italy and the United Kingdom were frequently referred to, and always with cordial expressions of goodwill. It was impossible to resist the impression that the Council, by recognizing for registration the medical degrees of the Italian universities, had made an important contribution to the traditional comity existing between the two nations.

The Quatercentenary of the University of Aberdeen.

In September next the University of Aberdeen celebrates its four-hundredth anniversary, and I have been favoured, as President of the Council, with an invitation to take part in the ceremonies. On the occasion of the four hundred and fiftieth anniversary of the University of Glasgow, the Council forwarded its congratulations and good wishes to that University (*Minutes*, 1901, p. 210). Should this precedent be followed, I shall be glad to receive your instructions for the preparation and presentation of a suitable address to the ancient University of Aberdeen.

Sight-Testing Opticians.

The Lord President has forwarded for our consideration a petition for a charter of incorporation, submitted to the Privy Council by the British Optical Association, and a copy of a Bill entitled "The Sight-Testing Opticians Bill," now before the House of Lords. Both documents propose that powers and privileges shall be conferred on certain persons, who are not qualified medical practitioners, in relation to the diagnosis and treatment of ocular defects. As the proposals touch closely the practice of ophthalmic medicine and surgery they will doubtless receive your careful scrutiny. At my request, a confidential memorandum has been prepared on the subject as an aid to your consideration, and you will probably find it a useful summary of the facts which have to be kept in mind.

Rules of the Midwives Board.

The Privy Council has also sent to the Council, for this purpose represented by the English Branch, a draft of the revised rules framed by the Midwives Board. Many important modifications have been made in the rules, as the result of the experience gained by the Board since 1903. Under the Midwives Act, 1902, the Branch Council is entitled to make representations on the revised text as on the original, and these must be considered by the Privy Council before the rules are approved as valid.

Medical Degrees of the University of Wales.

A draft of the supplemental charter which is being sought from His Majesty in Council by the University of Wales was before the Executive Committee in February. The Charter, if granted, will empower that University to establish a Faculty of Medicine and Surgery, and to grant degrees and diplomas in the Faculty. I have ascertained that the intention of the University authorities is to require that candidates for medical degrees shall have studied in one of the colleges of the University as matriculated students for not less than three years of the whole medical course, and that they shall have graduated in Arts or Science before graduating in Medicine or Surgery. The Executive Committee were of opinion that no objection should be raised to the grant of the Charter, but they pointed out that the degrees conferred in virtue of its powers would not be registrable qualifications, in the absence of an Act of Parliament amending the Medical Acts in that sense.

Enlargement of Council Chamber.

If precedents are followed such an Act will contain a clause empowering the University of Wales to appoint an additional member of this Council. The addition will bring our number up to thirty-five. As the Council Chamber is even now inconveniently crowded its extension becomes an urgent necessity. The Office Site Committee, acting on the powers entrusted to it, has completed an arrangement whereby the Council may at once resume possession of the reserved portion of our Hanover Square site. In view of the commencement of building operations there the Committee has thought it opportune to obtain plans and estimates for the enlargement during the summer of our present chamber. These the Committee will submit to you during the session. We may therefore hope that in November we shall be able to meet in greater comfort and convenience than is now possible.

Finance.

Fortunately the expense of the improvement, which I think is inevitable, will fall upon us at a time when we can bear it without difficulty. The accounts of the past year are already in your possession, and I am happy to say that for the first time since 1895 they show a surplus of income over expenditure. The amount of the surplus is £907; it is due partly to an increase of income, but in greater part to a decrease of expenditure, due to the expedition with which the Council carried through the business of its two sessions in 1905. Owing to the election of Direct Representatives in the current year an exceptional charge of considerable amount will have to be met by the Branch Councils, and it is therefore incumbent on us to persevere in our course of economy in so far as it is compatible with the full and efficient discharge of our statutory duties.

Reports.

One method by which our sittings may be kept within convenient limits has been in active operation during the present year. I refer to the careful preliminary consideration by the standing and special Committees of important subjects remitted to them. Digests, memoranda, and draft reports have been prepared and circulated in good time to members, who have thus had the opportunity of coming to a conclusion on the questions raised, and of offering reasoned recommendations to the Council concerning them. To the Chairmen of Committees and to the Council's officials our grateful acknowledgements are due for much preparatory work of this kind.

Reports by the Education and Examination Committees, and by the Practical Midwifery Committee, have been drawn up on this plan, and will be submitted to you at the present meeting.

It would, in my opinion, conduce to the value of our discussions in full Council were they in most cases confined to questions of principle, on which, of course, the decision of the Council must be clear and authoritative; questions of detail might then be left to the Committees to work out at leisure. Power to deal with details has already been given to the Pharmacopoeia, Education, and Students' Registration Committees, and in view of the great increase in the size of the Council within recent years, it is worth considering whether the practice might not with advantage be extended. It would also facilitate the arrangements of the Committee meetings if, so far as is practicable, the membership of each standing Committee were independent of the others. I commend the suggestion to the Branch Councils, with whom rests the duty of nominating standing Committees.

The Executive Committee also will present reports on certain points affecting your Standing Orders. Regarding the practice and constitution of the Penal Cases Committee, Dr. Finlay has given notice of an important motion. If I am in order in alluding to the subject from the Chair, I would say that in my opinion the full Committee of nine, with the Solicitor and Legal Assessor, who are always present, is unnecessarily large for the purpose in view. As a matter of practical experience, the Statutory Dental Committee of five, with the same legal assistance, is found to be sufficient and efficient, though it has to act not only as a committee of advice with reference to penal cases, but also as a court of first instance for ascertaining the facts. I see no disadvantage, and some substantial advantage, in reducing the Penal Cases Committee to five members, two from England, one from Scotland, and one from Ireland, with the President. If this were done, the objection felt by your legal advisers and by the Executive Committee to the mere recission of Chapter IX, 5 (ii) of the Standing Orders would be removed; and our practice under the Medical Acts would be assimilated to our practice under the Dentists Act.

Practice by Companies.

Under instructions from the Companies Bill Committee, I have had prepared two drafts, one of a "Prohibition of Medical Practice by Companies Bill," the other of a "Dental Companies (Restriction of Practice) Bill." In their preparation I have had the active co-operation of your legal advisers, and the friendly help, always willingly and cordially given, of Mr. Muir Mackenzie. Sir John Batty Tuke and other members of Parliament, in both Houses, have also afforded me the advantage of their practical experience and counsel as to the best method of presenting the Bills to Parliament. It will be enough here to say that the Bills are now ready, and that there is reason to hope that they may be introduced during the present session.

Disciplinary Cases.

Some of the disciplinary cases with which you will have to deal, and which present certain features of novelty in detail, will serve to bring home to the members of the Council the gravity of the situation arising from the unrestricted exercise of the skilled professions by joint-stock companies. The Council within the sphere of its jurisdiction can do something, the ordinary law of conspiracy or of fraud can do something more, to place obstacles in the way of flagrant abuse of the Companies Acts. But, as our experience accumulates, it becomes ever plainer that a change in the law is the only means whereby the public interest can be effectively safeguarded against the ingenious evasions that are possible under the existing law of corporate irresponsibility.

BRITISH MEDICAL ASSOCIATION LIBRARY.

List of Books, etc., Presented.

Presented by the AUTHORS:
- Ewart, W. Typhoid Fever (Empty Bowel Treatment). 1905.
- Horsley, Sir Victor. The Boyle Lecture, 1905. On the Cerebellum.
- Kelynack, T. N. The Alcohol Problem in its Biological Aspect. 1906.
- Lane, W. A. The Operative Treatment of Fractures. 1905.
- Manson, Sir Patrick. Lectures on Tropical Diseases. The Lane Lectures. 1905.
- Maylard, A. E. Abdominal Pain. 1905.

Presented by the ADMIRALTY:
- Statistical Report of the Health of the Navy. 1904.

Presented by ROBERT BIRCH, Esq., M.R.C.S., Newbury:
- Adélon. Physiologie de l'Homme, 1-4. 1829.
- Andral. Anatomie pathologique, 1-2. 1829.
- Bichat. Recherches physiologiques sur la Vie et la Mort. 1829.
- Cazenave. Maladie du Cuir Chevelu. 1850.
- Helvetius, Oeuvres de, 1-2. 1827.
- Rayer. Maladies de la Peau. 1827.
- Roche et Sanson. Pathologie Médico-Chirurgicale. 5 vols. 1828.
- Rostan. Corps de Médecine Clinique, 1, 2, 3. 1830.

Presented by Dr. LANGLEY BROWNE, West Bromwich:
- Congrès International Médical des Accidents du Travail. Compte rendu. Liége, 1905.

Presented by H. M. CHIEF INSPECTOR OF FACTORIES:
- Report for the Year 1904.

Presented by the DIRECTOR-GENERAL OF THE ARMY MEDICAL SERVICES:
- Final Report on the Treatment of Venereal Diseases and Scabies in the Army. 1906.

Presented by the EDITORS:
- The Guyoscope. New series. 1-4.

Presented by J. B. LAWFORD, Esq., F.R.C.S.:
- Archives of Ophthalmology. Vols. 17, 18, 19, 21. To complete series.

Presented by the MEDICAL OFFICER OF THE LOCAL GOVERNMENT Board:
- Report by Dr. Buchanan with regard to the Meat of Pigs Affected with Tuberculosis. 1906.
- ——— Dr. Klein on a New Plague Prophylactic. 1906.

Vital Statistics.

EPIDEMIC MORTALITY IN LONDON.

THE accompanying diagram shows the prevalence of the principal epidemic diseases during the first, or winter, quarter of the year. The fluctuations of each disease and its relative fatality compared with that in the corresponding periods of recent years can thus be readily seen.

Small-pox.—No fatal case of small-pox was registered in London last quarter. Thirteen small-pox patients were admitted into the Metropolitan Asylums Hospitals during last quarter, against 4 and none in the two preceding quarters, and 10 cases remained under treatment at the end of March last.

Measles.—The deaths from measles, which had been 551, 257, and 552 in the three preceding quarters, further rose to 684 last quarter, and were 66 in excess of the corrected average number in the corresponding quarters of the four preceding years. Among the various metropolitan boroughs this disease was proportionally most fatal in Hammersmith, Islington, Finsbury, Southwark, Camberwell, and Deptford.

Scarlet Fever.—The fatal cases of this disease, which had been 119, 126, and 170 in the three preceding quarters, fell again to 129 last quarter, but were 10 above the corrected average number. Scarlet fever showed the highest proportional mortality last quarter in St. Pancras, the City of London, Bethnal Green, Poplar, Southwark, and Deptford. The number of scarlet fever cases in the Metropolitan Asylums Hospitals, which had been 2,444, 3,567 and 3,410 at the end of the three preceding quarters, had further declined to 2,353 at the end of last quarter; 3,515 new cases were admitted during the quarter, against 3,778, 5,139, and 5,553 in the three preceding quarters.

Diphtheria.—The deaths referred to diphtheria in London, which had been 121, 111, and 159 in the three preceding quarters, further rose to 197 last quarter, but were 51 below the average number in the corresponding periods of the four preceding years. Among the various metropolitan boroughs this disease was proportionally most fatal in Hammersmith, Chelsea, Finsbury, Stepney, Bermondsey, and Greenwich. The number of diphtheria patients in the Metropolitan Asylums Hospitals, which had been 715, 730, and 701 at the end of the three preceding quarters, had risen again to 924 at the end of last quarter; 1,515 new cases were admitted during the quarter, against 1,219, 1,341, and 1.395 in the three preceding quarters.

Whooping-cough.—The fatal cases of this disease, which had been 530, 260, and 281 in the three preceding quarters, rose last quarter to 458, but were 113 below the corrected average number in the first quarters of the four preceding years. The greatest proportional mortality from this disease occurred in Shoreditch, Bethnal Green, Stepney, Poplar, Deptford, and Greenwich.

"*Fever.*"—Under this heading are included deaths from typhus, from enteric fever, and from ill-defined pyrexia. The deaths referred to these different forms of "fever," which had been 51, 78, and 66 in the three preceding quarters, further declined last quarter to 45, and were 34 below the corrected average number. During the quarter under notice no deaths were attributed either to typhus or to ill-defined pyrexia. Among the various metropolitan boroughs enteric fever was proportionately most fatal in Paddington, Fulham, Finsbury, Stepney, Poplar, Deptford, and Woolwich. The Metropolitan Asylums Hospitals contained 65 enteric fever patients at the end of last quarter, against 78, 143, and 78 at the end of the three preceding quarters; 166 new cases were admitted during the quarter, against 156, 264, and 238 in the three preceding quarters.

Diarrhoea.—The 174 deaths from diarrhoea in London last quarter were 32 below the corrected average for the corresponding periods of the four preceding years. This disease showed the highest proportional mortality in Hammersmith, Chelsea, Shoreditch, Stepney, Poplar, Bermondsey, and Battersea.

In conclusion it may be stated that the 1.687 deaths in London attributed to these principal epidemic diseases during the quarter ending March last were more than 17 per cent. below the corrected average number in the corresponding periods of the four preceding years. The lowest death-rates from these diseases were recorded last quarter in Paddington, City of Westminster, Hampstead, Hackney, Holborn, and Woolwich; and the highest rates in Hammersmith, Finsbury, Shoreditch, Stepney, Camberwell, Deptford, and Greenwich.

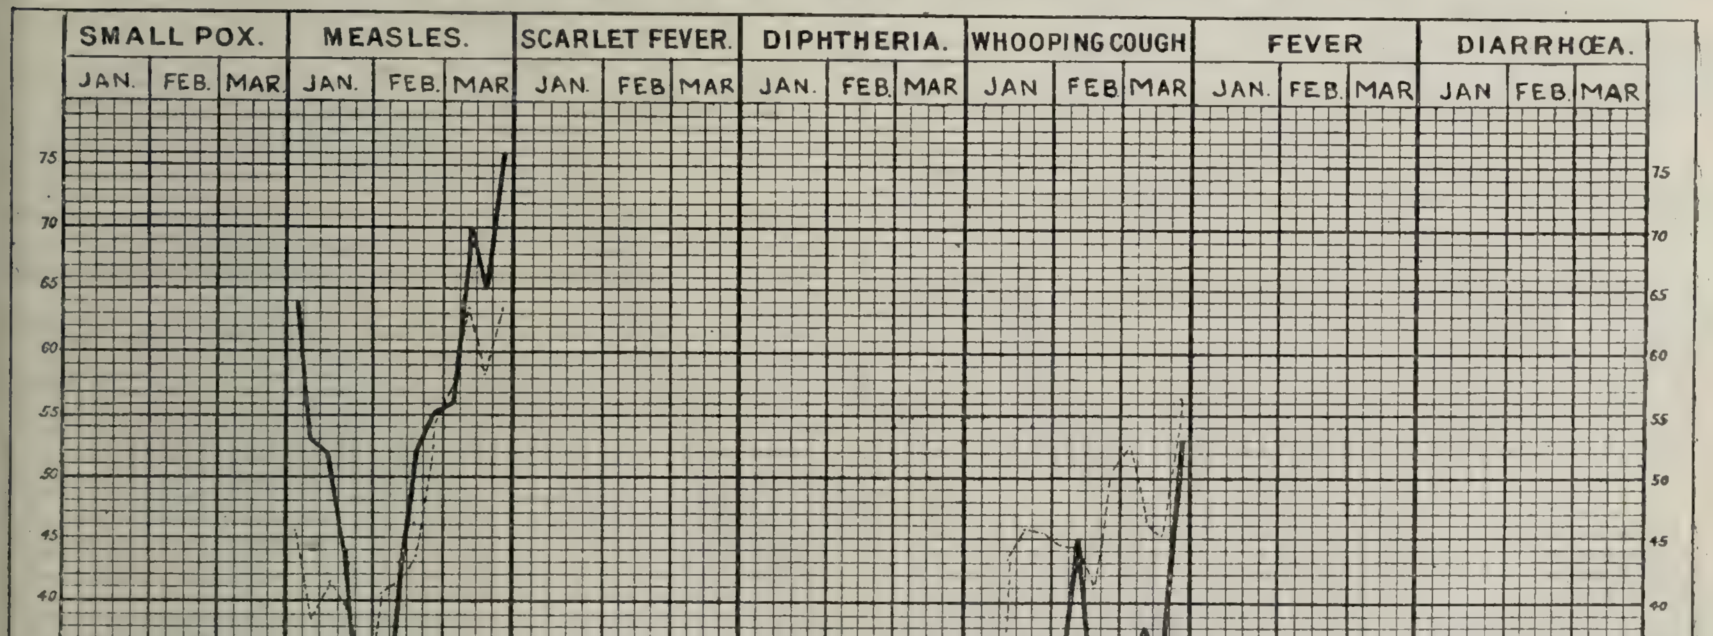
HEALTH OF ENGLISH TOWNS.

IN seventy-six of the largest English towns, including London, 8,671 births and 4,391 deaths were registered during the week ending Saturday last, May 19th. The annual rate of mortality in these towns, which had been 16.7, 16.3, and 15.5 per 1.000 in the three preceding weeks, further fell last week to 14.5 per 1,000. The rates in the several towns ranged from 4.2 in Hornsey, 7.9 in Leyton, 8.3 in Leicester, 8.5 in Rotherham and in West Hartlepool, and 8.6 in Walthamstow, to 20.5 in Liverpool and in Bootle, 20.8 in Great Yarmouth, 20.9 in Rochdale, 22.0 in Hanley, and 22 2 in Tynemouth. In London the rate of mortality was 14.0 per 1.000, while it averaged 14.7 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.4 per 1,000 in the seventy-six towns; in London this death-rate was equal to 1 3 per 1,000 while among the seventy-five other large towns the rates ranged upwards to 2.3 in St. Helen's, 2.4 in Hanley and in Bootle, 2.5 in Aston Manor and in Manchester, 2 7 in Birkenhead and in Salford, and 3.9 in Liverpool. Measles caused a death-rate of 1.1 in Bradford, 1.2 in Manchester, 1.3 in Walthamstow, 1.5 in Leeds, 1.7 in Liverpool, and 2.5 in Salford; whooping-cough of 1.1 in Walsall, 1.4 in Croydon, in Coventry, and in Newport (Mon.), 1.6 in Liverpool, 1.8 in Birkenhead, and 1.9 in Aston Manor; and diarrhoea of 1.1 in St. Helen's. The mortality from scarlet fever, from diphtheria, and from enteric fever showed no marked excess in any of the large towns. No fatal case of small-pox was registered last week in any of the seventy-six towns; 2 small-pox patients were admitted during the week into the Metropolitan Asylums Hospitals, and remained under treatment on Saturday last, the 19th inst. The number of scarlet fever cases remaining under treatment in these hospitals and in the London Fever Hospital, which had been 2,240, 2,337, and 2,378 at the end of the three preceding weeks, had risen again to 2,396 at the end of last week: 301 new cases were admitted during the week, against 314, 357, and 338 in the three preceding weeks.

HEALTH OF IRISH TOWNS.

DURING the week ending Saturday, May 19th, 520 births and 381 deaths were registered in six of the principal Irish towns, as against 642 births and 405 deaths in the preceding period. The annual death-rate in these towns, which had been 21.8, 22.7, and 23.5 per 1,000 in the preceding weeks, fell to 23.1 per 1,000 in the week under notice, this figure being 8.6 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures

DEATHS FROM EPIDEMIC DISEASES IN LONDON DURING THE FIRST QUARTER OF 1906.



NOTE.—The black lines show the *recorded* number of deaths from each disease during each week of the quarter. The dotted lines show the *average* number of deaths in the corresponding weeks of the four preceding years, 1902–5.

ranged from 16.4 in Waterford and 20.4 in Belfast to 24.1 in Londonderry and 31.2 in Limerick. The zymotic death-rate in the same six Irish towns averaged 0.8 per 1,000, or 0.4 per 1,000 lower than during the preceding period, the highest figure—2.5—being recorded in Londonderry, while no deaths under this heading were registered in Cork, Waterford, and Limerick.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE.

THE following appointments have been made at the Admiralty:—**WALTER G. AXFORD**, Fleet Surgeon, to the *Prince of Wales*, on recommissioning, May 29th; **JEROME BARRY**, M.D., Fleet Surgeon, to the *Centurion*, on recommissioning, May 29th; **MONTAGU H. KNAPP**, Staff Surgeon, and **ERNEST D. RUTHERFORD**, M.B., Surgeon, to the *Venus*, on recommissioning, May 29th; **GEORGE T. BISHOP**, Staff Surgeon, to the *Emerald*, additional, for Haulbowline Dockyard, May 25th; **JAMES D. S. MILNE**, M.B., Staff Surgeon, to the *Scylla*, undated; **RICHARD F. CLARK**, Staff Surgeon, to Haslar Hospital, June 1st; **ALEXANDER C. W. NEWPORT**, Surgeon, to the *Gladiator*, on recommissioning, May 29th; **HUGH L. NORRIS**, Surgeon, to the *Sappho*, undated; **WILLIAM E. GRIBBELL**, Surgeon, to Haslar Hospital, June 7th; **WALTER J. BEARBLOCK**, Fleet Surgeon, to the *Challenger*, May 17th, and on recommissioning, undated; **ROBERT HILL**, M.V.O., Fleet Surgeon, to Malta Hospital, May 17th; **RICHARD W. STANISTREET**, Staff Surgeon, to the *Doris*, on recommissioning, June 9th; **ARTHUR E. KELSEY**, M.B., Staff Surgeon, to the *Trafalgar*, May 17th; **CHARLES A. G. PHIPPS**, Surgeon, to the *Challenger*, additional, May 17th, and on recommissioning, undated; **ALAN G. EASTMENT**, Surgeon, to the *Cadmus*, additional, May 17th, and on recommissioning, undated; **ROBERT L. DICKINSON**, Surgeon, to the *Clio*, additional, May 17th, and on recommissioning, undated; **NORMAN H. MUMMERY**, Surgeon, to the *Latona*, on recommissioning, undated; **WALTER G. EDWARDS**, Surgeon, to the *Kinsha*, on recommissioning, undated; **HORATIO S. R. SPARROW**, Fleet Surgeon, to the Royal Marines, Plymouth, May 19th; **ALFRED M. PAGE**, Fleet Surgeon, to the *Cambridge*, May 19th; **PERCIVAL M. MAY**, Staff Surgeon, to the *President*, additional, for three months' hospital course, May 17th; **EVELYN R. TOWNSEND**, Surgeon, to the *Victory*, additional, to be lent to Haslar Hospital, May 22nd; **NORMAN S. MEIKLEJOHN**, Surgeon, to the *Widgeon*, May 21st; **HENRY S. TURNER**, Surgeon, to the *Snipe*, May 21st; **PERCY M. RIVAZ**, M.B., Surgeon, to the *Teal*, May 21st; **AUGUSTUS J. LAURIE**, Surgeon, to the *Glory*, May 21st; **WILLIAM N. BLATCHFORD**, Surgeon, to the *Cambridge*, May 21st.

ROYAL NAVAL VOLUNTEER RESERVE.

M. **THOMAS GUTHRIE** has been appointed a Surgeon in the Royal Naval Volunteer Reserve, and attached to the Mersey Division, May 11th.

ARMY MEDICAL STAFF.

SURGEON-GENERAL **T. J. GALLWEY**, K.C.M.G., C.B., M.D., Principal Medical Officer, India, has been selected to succeed Surgeon-General W. H. McNamara, C.B., C.M.G., M.D., as Principal Medical Officer, Aldershot Army Corps.

ROYAL ARMY MEDICAL CORPS.

LIEUTENANT **L. BOUSFIELD**, M.B., is seconded for service with the Egyptian army, April 30th.

Captain **R. SELBY**, M.B., at present serving in India, has been appointed a Specialist in Dermatology in the 7th (Meerut) Division.

EXCHANGE.

The charge for inserting notices respecting Exchanges in the Army Medical Department is 3s. 6d., which should be forwarded in stamps or post office order with the notice, not later than Wednesday morning, in order to ensure insertion in the current issue.

CAPTAIN R.A.M.C., six years' service, due home, tour expired from India beginning of trooping season, desires exchange with Captain I.M.S. For terms, etc., apply to Indophile, care of Messrs. King, King, and Co., Bombay.

Required exchange to England at once, with an officer recently returned from foreign service, by Major, R.A.M.C., serving in the Eastern Command, India, whose tour expires in October, 1907. Write "Nemo," care of Messrs. Holt and Co., 3, Whitehall Place, S.W.

INDIAN MEDICAL SERVICE.

MAJORS **P. HEHIR**, M.D., **L. J. PISANI**, **W. R. EDWARDS**, M.D., C.M.G., **C. MACTAGGART**, M.B., **G. J. H. BELL**, M.B., **J. T. DALY**, M.B., **H. FOOKS**, **E. HUDSON**, **A. W. DAWSON**, M.D., and **W. H. B. ROBINSON**, of the Bengal Establishment, are promoted to be Lieutenant-Colonels, from April 1st. They entered as Surgeons, April 1st, 1886, and were made Surgeon-Captains, April 1st, 1898. Their war records are as follow: Lieutenant-Colonel Hehir—Burmese Expedition, 1886-7 (medal with clasp). Lieutenant-Colonel Pisani—Hazara Expedition, 1888, including the action at Kottai (medal with clasp). Lieutenant-Colonel Edwards—South African war, 1899-1900 (mentioned in dispatches, Queen's medal with five clasps, and appointed C.M.G.). Lieutenant-Colonel Bell—Lushai Expedition, 1889; Burmese Expedition, 1887-9 (medal with clasp). Lieutenant-Colonel Daly—China war, 1900 (medal). Lieutenant-Colonel Fooks—Chin-Lushai Expedition, 1889-90 (medal with clasp); Zhob Valley Expedition, 1890; Manipur Expedition, 1891 (clasp); China war, 1900 (medal). Lieutenant-Colonel Hudson—Chin-Lushai Expedition, 1889-90 (mentioned in dispatches, medal with clasp). Lieutenant-Colonel Dawson—Chin-Lushai Expedition, 1889-90 (medal with clasp); Hazara Expedition, 1891 (clasp); Chitral Relief Force, 1895 (medal with clasp); Tirah Expeditionary Force, 1897-8, including the action of Dargai, the capture of the Sampagha and Arhanga Passes, etc. (two clasps). Lieutenant-Colonel Robinson—Burmese Expedition, 1885-9 (mentioned in dispatches, medal with two clasps); Waziristan Expedition, 1894-5 (clasp); Chitral Relief Force, 1895 (medal with clasp); Tirah Expeditionary Force, 1897-8 (two clasps).

Captains **G. LAMB**, M.D., **H. BURDEN**, and **C. H. BOWLE-EVANS** (Bengal Establishment) are promoted to be Majors from July 29th, 1905. Their first commissions bear date January 29th, 1894. Major Lamb was in the Waziristan Expedition, 1894-5 (medal with clasp). Major Burden was with the Chitral Relief Force in 1895 (medal with clasp), and in the campaign on the North-West Frontier of India in 1897-8 (clasp). Major Bowle-Evans served with the Waziristan Expedition in 1894-5 (medal with clasp); with the Chitral Relief Force in 1895 (medal with clasp); with the Tochi Force in the campaigns on the North-West Frontier of India in 1897-8 (clasp); and in China in 1900 (medal).

Captains **J. FISHER**, M.B., D.S.O., **E. S. PECK**, M.B., **S. A. HARRISS**, M.B., **E. C. MACLEOD**, **C. THOMSON**, M.B., **D. W. SUTHERLAND**, M.D., and **W. SELBY**, D.S.O., also of the Bengal Establishment, are likewise promoted to be Majors, from January 29th, 1906. The first commissions of Majors Fisher, Peck, Harris, MacLeod, and Thomson are dated January 29th, 1894; those of Majors Sutherland and Selby, July 28th, 1894. The following are their war records: Major Fisher: Campaign on the North-West Frontier of India in 1897-8; with the Malakand Field Force (twice mentioned in dispatches, medal with two clasps, and appointed D.S.O.). Major Harriss: China war, 1900 (medal). Major Sutherland: Chitral Relief Force, 1895 (mentioned in dispatches, medal with clasp). Major Selby: Chitral Relief Force, 1895 (medal with clasp); North-West Frontier of India Campaign, 1897-8 (two clasps); and with the Tirah Expeditionary Force in 1897-8, including the actions of Chagra Kotal, Dargai, capture of the Sampagha and Arhanga Passes, etc. (mentioned in dispatches, appointed D.S.O., and clasp).

IMPERIAL YEOMANRY.

SURGEON-CAPTAIN **J. R. HARPER**, Royal North Devon (Hussars), to be Surgeon-Major, May 19th.

ROYAL ARMY MEDICAL CORPS (VOLUNTEERS).

THE Christian names of Lieutenant **ALEXANDER WEATHERHEAD FRENCH**, South Yorkshire Bearer Company, are as now stated, and not as announced in the *London Gazette* of December 2nd, 1904.

ROYAL GARRISON ARTILLERY (VOLUNTEERS).

SURGEON-LIEUTENANT-COLONEL **J. P. MASSINGHAM**, 1st Shropshire and Staffordshire, is granted the honorary rank of Surgeon-Colonel, May 19th.

ROYAL ENGINEERS (VOLUNTEERS).

JOHN HOBBS, to be Surgeon-Lieutenant in the 1st London Regiment, May 7th.

VOLUNTEER RIFLES.

HENRY A. LEEBODY, M.B., to be Surgeon-Lieutenant in the Queen's Rifle Volunteer Brigade, the Royal Scots (Lothian Regiment), May 19th.

GEORGE E. ST. C. STOCKWELL, M.D., to be Surgeon-Lieutenant in the 3rd Volunteer Battalion the Prince of Wales's Own (West Yorkshire Regiment), May 19th.

Supernumerary Surgeon-Lieutenant-Colonel **A. NAPIER**, M.D. (Brigade Surgeon-Lieutenant-Colonel, Senior Medical Officer, Scottish Rifle Volunteer Infantry Brigade), is granted the honorary rank of Surgeon-Colonel, May 19th. He resigns his commission from the same date, retaining his rank and uniform.

Surgeon-Lieutenant **N. J. SINCLAIR**, M.B., 2nd (Angus) Volunteer Battalion the Black Watch (Royal Highlanders), resigns his commission, May 19th.

Surgeon-Captain **G. R. SWINHOE**, 2nd Volunteer Battalion the Duke of Edinburgh's (Wiltshire Regiment), to be Surgeon-Major, May 19th.

ARMOUR, Donald, M.B.Tor., M.R.C.P.Lond., F.R.C.S.Eng., Assistant Surgeon to the National Hospital for the Paralysed and Epileptic.

COOMBS, Carey, M.D., B.S.Lond., Demonstrator of Pathology, University College, Bristol.

DE GRUCHY, A. Nicolle, M.B., Ch.B.Edin., Medical Officer, Southern Nigeria.

DONALD, David, L.R.C.P., L.R.C.S.Edin., L.F.P.and S.Glasg., Honorary Medical Officer to the Aldershot Hospital.

FRESHWATER, J. H. D., M.B., B.C.Camb., House-Physician, Essex and Colchester Hospital.

HALL, Arthur, M.A., M.D.Cantab, F.R.C.P., Visiting Physician, Sheffield Union Hospital.

HARDING, C. H., M.R.C.S., L.R.C.P., District Medical Officer of the Whittlesea Union.

HODGSON, H., M.B., B.S.Lond., District Medical Officer of the Alresford Union.

HOWLETT, B., M.R.C.S., L.R.C.P., District Medical Officer of the Kingston Union.

JACKSON, D. N., M.B., D.S.Durh., District Medical Officer of the Hexham Union.

JONES, H. GLADSTONE, L.S.A.Lond., Medical Officer and Public Vaccinator for the Criccieth District of the Pwllheli Union.

LYNCH, D., M.D., M.Ch.R.U.I., Certifying Factory Surgeon for the Slievereagh District, co. Cork.

MURDOCH, W. Hughes, M.D., Public Vaccinator for the Southern District, Parish of Liverpool.

MURRAY, J., M.B., C.M.Glasg., District Medical Officer of the Rhayader Union.

RICHMOND, B. A., M.B., B.S.Lond., District Medical Officer of the Bermondsey Parish.

ROE, William Francis, L.and L.M.R.C.P.I., L.and L.M.R.C.S.I., Clinical Assistant at the Royal Hospital for Diseases of the Chest, City Road.

STEAVENSON, A. P., M.D.Edin., District Medical Officer of the Darlington Union.

STEEN, Robert Hunter, M.D.Lond., Demonstrator in Psychological Medicine, King's College.

STRATFORD, Howard M., M.R.C.S., House-Surgeon, Essex and Colchester Hospital.

TURTLE, G. de B., M.D., B.S.Durh., M.R.C.S.Eng., L.R.C.P.Lond., Obstetric Registrar and Tutor to King's College Hospital.

WATSON, J. K., M.D.Edin., District Medical Officer of the Chertsey Union.

WILKINSON, George, B.A., M.B.Cantab., F.R.C.S., Visiting Surgeon, Sheffield Union Hospital.

WILTSHIRE, H. W., M.A.Cantab., M.R.C.S.Eng., L.R.C.P.Lond., Sambrooke Medical Registrar to King's College Hospital.

BIRTHS, MARRIAGES, AND DEATHS.

The charge for inserting announcements of Births, Marriages, and Deaths is 3s. 6d., which sum should be forwarded in post-office orders or stamps with the notice not later than Wednesday morning, in order to ensure insertion in the current issue.

BIRTHS.

CAMPBELL.—On May 19th, the wife of Dr. P. E. Campbell, Medical Superintendent, Caterham Asylum, of a daughter.

LACKIE.—At 1, Randolph Crescent, Edinburgh, on May 21st, the wife of J. Lamond Lackie, M.D., F.R.C.P.E., of a daughter.

DIARY FOR THE WEEK.

MONDAY.

ROYAL INSTITUTE OF PUBLIC HEALTH, Large Lecture Theatre, King's College, W.C., 5 p.m.—Second Harben Lecture, by Professor E. Metchnikoff: The Hygiene of the Intestinal Tract.

TUESDAY.

PATHOLOGICAL SOCIETY OF LONDON, 20, Hanover Square, W., 8.30 p.m.—Papers:—Dr. F. W. Mott: On the Changes in the Nervous System in Trypanosome Infections. Dr. F. Parkes-Weber: Symmetrical Adenomata of the Suprarenal Glands, with Atheroma of Aorta. Mr. F. Hobday: Abnormalities in Cases of Retained Testicle in the Horse.

WEDNESDAY.

ROYAL INSTITUTE OF PUBLIC HEALTH, Large Lecture Theatre, King's College, W.C., 5 p.m.—Third Harben Lecture, by Professor E. Metchnikoff: Syphilis.

POST-GRADUATE COURSES AND LECTURES.

CENTRAL LONDON THROAT AND EAR HOSPITAL, Gray's Inn Road, W.C.—Wednesday, 5 p.m., Nasal Accessory Sinuses.

CHARING CROSS HOSPITAL. 4 p.m.—Monday, Ophthalmology; Thursday, Medical.

HOSPITAL FOR SICK CHILDREN, Great Ormond Street, W.C., Thursday, 4 p.m.—Operations in Infancy.

LONDON SCHOOL OF CLINICAL MEDICINE, Dreadnought Hospital, Greenwich.—The following are the arrangements for next week: Clinical Demonstrations; Monday, 2.30 p.m., Medicine; 3.15 p.m., Surgery; 4 p.m., Throat and Ear. Tuesday, 2.30 p.m., Medicine; 3.15 p.m., Surgery; 4 p.m., Skin Diseases. Wednesday, 2.30 p.m., Medicine; 3.15 p.m., Surgery; 4 p.m., Ophthalmology. Thursday, 2.30 p.m., Medicine; 3.15 p.m., Surgery; 4 p.m., Radiography. Friday, 2.30 p.m., Medicine; 3.15 p.m., Surgery. Out-patient Demonstrations, Medical and Surgical, daily at 10 a.m. Ear and Throat, Mondays and Thursdays, at noon. Eye, Wednesdays and Saturdays, 11 a.m. Skin, Tuesdays and Fridays, at noon. Operations, 2.30 daily.

MEDICAL GRADUATES' COLLEGE AND POLYCLINIC, 22, Chenies Street, W.C.—The following clinical demonstrations have been arranged for next week at 4 p.m. each day: Monday, Skin; Tuesday, Medical; Wednesday, Surgical; Thursday, Surgical; Friday, Eye. Lectures at 5.15 p.m. each day will be given as follows: Monday, Functional Hemiplegia; Tuesday, On Some Practical Aspects of Blood Pressure Gauging; Wednesday, Hoarseness: its Clinical Significance, Diagnosis, and Treatment; Thursday, Some Points in the Surgery of the Peripheral Nerves.

NATIONAL HOSPITAL FOR THE PARALYSED AND EPILEPTIC, Queen Square, W.C.—Tuesday, 3.30 p.m., Clinical Lecture; Friday, 3.30 p.m., Myasthenia Gravis.

NORTH-EAST LONDON POST-GRADUATE COLLEGE, Tottenham Hospital, N.—The following are the arrangements for next week, each day at 4.30 p.m.: Tuesday, Lecture on New Growths of the Intestinal Tract and their Treatment; Thursday, Lecture-Demonstration on the Administration of Anaesthetics.

WEST LONDON HOSPITAL POST-GRADUATE COLLEGE, Hammersmith Road, London, W.—The following are the arrangements for next week: Daily, 10 a.m., Medical and Surgical Wards; 11 a.m., Operations in Out-patient Department; 2 p.m., Medical and Surgical Clinics; 2.30 p.m., Operations. Monday, 10 a.m., Tropical Medicine; 12 noon, Pathological Demonstration; Practical Surgery; 3 p.m., Demonstration in Medical Wards; Tuesday, 10.30 a.m., Gynaecology; 2.30 p.m., Skin Diseases, Throat, Nose, and Ear Department; 5 p.m., Ankylostomiasis; Wednesday, 10 a.m., Throat, Nose, and Ear Operations, Diseases of Children; 12 noon, Medicine; 5 p.m., Practical Medicine, Thursday, 10 a.m., Tropical Medicine; 12 noon, Practical Surgery; 4 p.m., Demonstration in Surgical Wards; 5 p.m., Practical Surgery; Friday, 10 a.m., Anaesthetics; 10.30 a.m., Gynaecological Operations; 2.30 p.m., Skin Diseases; Saturday, 10 a.m., Operations on Throat, Nose, and Ear; 12 noon, Medicine.

BOOKS, ETC., RECEIVED.

Canterbury and Faversham Division, *South-Eastern Branch*, Annual Meeting, Canterbury Hospital, 3 p.m.; Dinner, County Hotel, 6.15 p.m. City Division, *Metropolitan Counties Branch*, First Annual Dinner, Gaiety Restaurant, Strand, 7 p.m. East York and North Lincoln Branch, Annual Meeting, Grimsby and District Hospital, 4.30 p.m.; followed by Annual Dinner. Isle of Thanet Division, *South-Eastern Branch*, Combined Meeting with Canterbury and Faversham Divisions, Hospital Library, Canterbury, 2.45 p.m. Midland Branch, Annual Meeting, County Hospital, Lincoln, 2.15 p.m. Dinner, White Hart Hotel, 6 p.m.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

The British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the British Medical Journal is supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the British Medical Journal for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429, Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

GENERAL COUNCIL
OF
MEDICAL EDUCATION AND REGISTRATION.

SUMMER SESSION 1906.

REPORT OF PROCEEDINGS.

Tuesday, May 22nd, 1906.

Dr. DONALD MACALISTER, President, in the Chair.

PRESIDENT'S ADDRESS.

THE PRESIDENT delivered the address, published in the SUPPLEMENT of May 26th, 1906, p. 286, and a vote of thanks was unanimously adopted.

BUSINESS COMMITTEE.

On a motion to reappoint the Business Committee, the PRESIDENT, owing to his numerous engagements in connexion with the Council, expressed his desire to cease to be a member of the Committee, and nominated Dr. Norman Moore to be Chairman. It was then agreed to reappoint the Business Committee, with Dr. Norman Moore as Chairman.

DENTAL BUSINESS.

The Executive Committee presented a report on the dental business transacted since the last meeting of the Council. The report, which was entered on the minutes, stated that the Committee learn with satisfaction that Sir John Tuke was prepared to introduce into the House of Commons the Bills already approved by the Council relating to the practice of medicine and of dentistry by limited companies, and requesting the President, in consultation with the legal advisers of the Council, to confer with Sir John Tuke as to any amendments which might be necessary, and on behalf of the Council to agree to the same. The Committee also reported that it had received from the Colonial Office a copy of a dispatch from the Governor of Hong Kong enclosing the draft of an ordinance to regulate the qualifications and to provide for the registration of dentists in the Colony, and had expressed its satisfaction that provision is made therein for the prevention under penalties of dental practice by unqualified persons and by joint-stock companies.

UNIVERSITY OF GLASGOW: DEGREE IN PUBLIC HEALTH.

The Executive Committee reported that with regard to the following resolution, passed by the General Council on December 2nd, 1905:

> That the Executive Committee be authorized, if it be satisfied that the Regulations of the University of Glasgow are in agreement with the Council's Rules for Diplomas in Public Health, to recognize for the purpose of registration the newly-instituted Degree of B.Sc. in Public Health of the University of Glasgow,

the following communication was subsequently received:

The University, Glasgow,
January 26th, 1906.

Dear Sir,—With reference to your letter of the 7th ultimo, addressed to the Registrar, regarding the recognition for purposes of registration by the General Medical Council of the Degree of B.Sc. in Public Health of this University, I have to intimate to you that the Glasgow University Court have now approved an additional Regulation drawn up by the Senate with the view of bringing the University Regulations for the Degree into harmony with the Rules of the Council for Diplomas in Public Health. The Regulation is in the following terms:

"A period of not less than twelve months shall have elapsed between the attainment of a registrable qualification in medicine, surgery, and midwifery, and the admission of the candidate to any examination or any part thereof for the degree of B.Sc. in Public Health."

I may add that this rule will henceforth be printed in our Calendar and other publications.

I hope to learn from you in due course the decision of your Executive Committee.

Yours faithfully,
WILLIAM STEWART,
Clerk of Senate.

The Registrar,
General Medical Council Office.

After consideration the Executive Committee passed the following resolution:

> That in virtue of the authority conferred on the Executive Committee by the General Medical Council the Committee now instruct the Registrars to accept for registration as an additional qualification the degree of B.Sc. in Public Health of the University of Glasgow.

Mr. BROWN inquired whether degrees already issued would be registered, or whether the recognition would only take effect from January 1st, 1907.

Sir T. MCCALL ANDERSON said that the University of Glasgow had with pleasure harmonized its arrangements with the views of the General Medical Council, but, as a matter of fact, there never had been a degree of the kind conferred upon any person who had not been registered for more than one year.

RESULTS OF EXAMINATIONS.

A number of returns relating to various examinations were then laid on the table.

The following tables represent an analysis of the returns made to the General Medical Council of all examinations for the Services since the date of its last summer session—namely one for the Indian Medical Service, one for the Royal Navy, and two for the Royal Army Medical Corps:

TABLE I.

Showing the Extent of the Competition for each Service.

Services.	No. of Candidates.	No. of Vacancies.	Proportion of Candidates to Vacancies.
Royal Naval Medical Service	23	9	5 to 2
Royal Army Medical Corps...	111	80	5 to 4
Indian Medical Service ...	44	23	5 to 3
Total or average ...	178	112	5 to 3

TABLE II.

Showing whence the Candidates received their Qualifications.

Licensing Body.	Number of Candidates.	Proportion of Entire Number.
English Colleges and Universities ..	68	38.1 per cent.
Scottish .. ,, ..	47	26.4 ,,
Irish .. ,, ...	61	34 2 ,,
Colonial ., ,, ..	0	0 0 ,,
Mixed	2	1.1 ..
Total or average	178	——

TABLE III.

Showing the Proportion of Commissions Gained by the Candidates of each Country.

Country.	Number of Commissions Won.	Proportion of all Commissions Offered.
England	52	46.4 per cent.
Scotland	27	24.1 ,,
Ireland	33	29.5 ,,
Colonies	0	—

In reply to Dr. BRUCE, the CHAIRMAN said that there was a standing instruction that these returns should from time to time be reported upon by the Examination Committee.

PENAL CASES COMMITTEE.

The Executive Committee reported that with reference to the following resolution passed by the Council on December 2nd, 1905:

> That it be referred to the Executive Committee, in consultation with the legal advisers of the Council, to consider and report to the next meeting of the Council whether the Standing Orders affecting the Penal Cases Committee should not be amended by the omission of Subsection ii, Chapter IX, p. 19, or, alternatively, whether any change should be made in the constitution of the said Committee,

it had received the following opinion from the Council's solicitor:

> I do not advise that any alteration should be made in the Standing Orders with regard to the summoning of the Penal Cases Committee. It seems to me eminently convenient that where there is no business of serious importance, and where, in addition, the cases do not apply to Ireland or Scotland, the President should have a discretion not to summon members from those parts of the United Kingdom. I have come to this conclusion after reading Dr. Finlay's memorandum.

The REGISTRAR then read the following resolution which had been adopted by the Executive Committee:

> That, in accordance with the legal opinion obtained, the Committee recommended to the General Council that no alteration should be made in the Standing Orders, Chapter IX, Subsection ii.

Dr. FINLAY objected to the suggestion in the Solicitor's opinion as to the discretion of the President. He moved:

> (1) That Clause ii of Chapter IX, Section 5, of the Standing Orders—namely, "The President shall be empowered not to summon the Scottish or the Irish Members of the Committee, as the case may be, unless any complaint forwarded from Scotland or from Ireland has been presented for consideration"—be rescinded.

He agreed that a smaller Committee might be more effective and satisfactory, and would be a saving of expense to the Council; and should be quite willing to see the members of the Committee taken from the English branches resident in London. This would be a still greater saving of expense; and he had a motion on the programme that the Committee should be reduced from eight to four.

Sir VICTOR HORSLEY, in seconding the first part of the motion, said that the Penal Cases Committee was an extremely responsible Committee, and he therefore thought that members from all parts of the United Kingdom ought to be summoned. The reduction in the number of the Committee was a different question.

Sir CHRISTOPHER NIXON strongly supported the resolution. He did not see how the fact of a particular offence having occurred in Ireland should in any way involve the mode of procedure adopted by the Penal Cases Committee in dealing with it. All the cases had an equal interest to the members representing Scotland, England, and Ireland. It seemed to him an extraordinary distinction that because a case occurred in England the only persons considered competent to deal with it should be the English members of the Penal Cases Committee.

The PRESIDENT thought as the Committee was one with which he was very conversant, it might be desirable that he should make a statement. He took Dr. Finlay's notice of motion as containing two parts, not necessarily to be taken together. If the first part only had to be considered then the proper course would have been to move the rejection of the recommendations of the Committee. That, however, Dr. Finlay had not done; taking the two parts together was not a direct negative to the Committee's recommendation; it would, in fact, remove the difficulties of the Executive Committee in acceding to his suggestion. Whenever there had been any case raising questions of principle it had been his practice to summon all the members of the Penal Cases Committee, whether the case arose in Scotland or Ireland or not. The Standing Order did not forbid the President to summon Scottish or Irish members; it merely gave him a discretion. That was a responsibility the President would not take unless he were sure no harm would be done by it. He thought the members of the Council would agree that a Committee of eleven was too big for the work, and also that the members of the Committee were at a certain disadvantage in the unbiassed consideration of cases when they came before the Council by the fact that they then had to sift the evidence then brought forward. That was, perhaps, inevitable, and he thought it would be better that the number of members who had more or less made up their minds before the case came to the Council should be reduced as far as possible; he suggested the statutory analogy of the Dentists Committee, which consisted of five members. That Committee was very businesslike and very efficient, and no difficulty had arisen from its smallness. He believed a great advantage would result from a similar reduction in the number of the Penal Cases Committee.

Dr. NORMAN MOORE thought that was an illustration of the objection some felt to the existence of a Penal Cases Committee. The responsibility ought to rest with the President, and with him alone. It was not just that a man should be tried by a body of judges some of whom must necessarily have already made up their minds on the case. The President was amply sufficient to decide whether a man ought to appear before the Council or not: that was the true solution of the difficulty, but as it was clear that a very large Penal Cases Committee added to the wrongs of the judicial proceedings of the Council, he was in favour of the reduction.

The PRESIDENT desired to press on the Council the desirability of a Penal Cases Committee. He was quite prepared to take to the full all the responsibility that properly fell to him; but the Committee was advisory, not executive.

Mr. BROWN suggested that all penal cases should be referred in the first instance to the Branch Council.

Dr. LINDSAY STEVEN inquired if the ultimate decision whether a case should be brought before the Council or not rested with the President, and the President alone.

The PRESIDENT replied that the responsibility rested with him, and him alone; but he always acted on the advice of the Committee.

Dr. LINDSAY STEVEN thought that ought to remove Dr. Norman Moore's objection.

The PRESIDENT put the first part of Dr. Finlay's resolution, which was carried.

Dr. FINLAY then moved that the number of the members of the Penal Cases Committee be reduced from eight to four.

Sir THOMAS MYLES seconded.

The PRESIDENT having observed that, with the President, the Committee would then consist of five, this was agreed to.

On the motion of Dr. FINLAY, seconded by Sir CHRISTOPHER NIXON, it was agreed that the Penal Cases Committee should consist of two members from the English Branch Council, and one each from Scotland and Ireland.

Sir JOHN MOORE thought there should be a quorum of at least three.

The PRESIDENT said that two lawyers whose advice guided the Committee to a large extent were always present at its meetings, so that practically seven persons decided the questions brought before it. He did not think a quorum was called for.

Dr. NORMAN MOORE moved, Dr. FINLAY seconded, and it was agreed, that the Executive Committee be instructed to redraft the Standing Orders in accordance with the instructions of the Council.

Sir JOHN MOORE still thought a numerical majority should be possible on the Committee.

Sir VICTOR HORSLEY supported this view, and it was agreed that the quorum of the Penal Cases Committee should be three, including the President.

RECIPROCITY WITH JAPAN.

The following report of the Executive Committee in regard to the present position of the question of the application of Part II of the Medical Act, 1886, to the Empire of Japan, was received and entered on the minutes:

REPORT.

The Executive Committee report to the Council that Part II of the Medical Act, 1886, having been applied to the Empire of Japan by an Order of His Majesty in Council, dated December 11th, 1905, the Committee have carefully examined the Imperial Ordinance for the founding of Imperial Universities in Japan, dated March 1st, 1886, and the Regulations for Degrees in Medicine and Surgery made thereunder and at present in force. The Committee are assured that Candidates for Degrees in Medicine are required to pursue a course of literary and professional study extending over fourteen years, including successive courses at a Grammar School, a Middle School, and a Preparatory Science School or College. In the latter the preliminary scientific subjects (Chemistry, Physics, etc.) are studied before the student enters on the four years' course at the College of Medicine. The Committee have satisfied themselves that the Regulations provide a sufficient guarantee for the possession by Graduates in Medicine of the Imperial University of the requisite knowledge and skill for the efficient practice of Medicine, Surgery, and Midwifery, and they accordingly recommend—

(1) That the degrees of Bachelor (*Igakushi*) and Doctor (*Igaku Hakushi*) of Medicine of the Imperial University of Japan be recognized by the Council as entitling to registration in the Foreign List of the *Medical Register*.

(2) That with reference to applications from Japanese Medical Graduates for registration in the Foreign List, the Registrar be instructed to require the applicant to produce—

(*a*) Satisfactory evidence of identity;
(*b*) Satisfactory evidence of good character;
(*c*) Satisfactory evidence that he is by the law of Japan entitled to practise Medicine, Surgery, and Midwifery in that country;
(*d*) The diploma of Bachelor or Doctor of Medicine of the Japanese Imperial University:
(*e*) Satisfactory evidence in relation to the circumstances (1), (2), (3), set forth in Section 12 of the *Medical Act*, 1886;
(*f*) Officially-attested translations of such Japanese documents as are produced under any of the foregoing heads.

DONALD MACALISTER,
May 21st, 1906. *President.*

The PRESIDENT, in proposing that the report should be adopted, said the Committee had entrusted him with the duty of obtaining information as to the conditions of medical qualifications in Japan. It appeared that there were a number of kinds of qualifications, some local, some provincial, and some Imperial. The Council had to deal only with the qualification of a university character available over the whole Empire. With regard to the others the information was not complete. As to the degrees of the Imperial University of Japan, it appeared from the information contained in the memorandum that the course of educating medical students in Japan was long and thorough. It extended over fourteen years. A medical student had to begin in a certain kind of school—a grammar school—and pass through all its stages with success before he was allowed to take the next stage. He then had to pass through a high school, and then again he had to obtain a satisfactory leaving certificate, which showed that he was fit for the following stages. He had from two to three years at a science college where the preliminary sciences were taught, and there the student must obtain proper certificates equivalent to the Bachelorship of Science before he was allowed to enter the Medical College of the Imperial University. In that college the course began with anatomy and physiology. The final examination was, not only in extent but also in minuteness, at least equal to any in this country. It covered a very large number of special branches, and, judging by the particular results obtained by those who had obtained the degree of Bachelor of Medicine after so long a course, no one could come to any other conclusion than that it was a very thorough and satisfactory course. For the degree of Doctor of Medicine there was a higher course of study for three years, and he could then submit himself to an advanced examination. There were about 1,300 Bachelors and Doctors of Medicine in Japan at the present time, and he had reason to believe that the vast proportion of them served in the army during the last war, and that the graduates of the Imperial University were among the most distinguished of those who contributed to the success of the medical department in the war. The Council was satisfied that the degree of Doctor or Bachelor was a sufficient guarantee for the good practice of medicine; he ventured to hope that it would accept the report of the Executive Committee and adopt it.

Mr. MORRIS complained that the report had only been placed in his hands that morning, and he had not had the opportunity of reading it thoroughly. He thought the adoption of the report might be deferred, although he was quite sure the Council would eventually adopt it.

The PRESIDENT pointed out it was the report of the Executive Committee that they were dealing with, and they had either to approve of it or not, and after some further discussion put it from the chair that the report be adopted, and this was agreed to.

The Council then went into *camera*, and adjourned without any further public sitting.

Wednesday, May 23rd, 1906.

Dr. DONALD MACALISTER, President, in the Chair.

DISCIPLINARY CASES.

THE Council proceeded to the further consideration of the case of William Harding Crowther, registered as of 15, Bloomfield Road, Ealing, London, W., L.S.A.Lond., 1876, L.F.P.S.G., 1880, which had been adjourned from November 29th, 1905.

Mr. Lushington was present as Legal Assessor, and Mr. Winterbotham as Solicitor, to the Council. Dr. Hugh Woods represented the London and Counties Medical Protection Society, the complainants. Mrs. Crowther represented her husband, who was not present.

The PRESIDENT stated that at the close of the deliberations of the Council on the last occasion Mr. Crowther was "required to furnish at once a medical certificate in regard to his state of health." That certificate was received either the same day or the next, and satisfactorily showed the inability of Mr. Crowther to attend.

Mr. WINTERBOTHAM read the charge against Mr. Crowther, which was as follows:

> That you have systematically sought to attract patients by means of a series of advertisements in the *People* newspaper of an Institution for Stricture, etc., at 8A, Guilford Street, Gray's Inn Road, of which you are the Surgeon, and which is carried on for your private gain.

At the conclusion of the deliberations of the Council on the case on November 29th, 1905, the PRESIDENT announced the decision of the Council as follows:

> The Council have carefully considered the facts alleged against Mr. William Harding Crowther in the Notice of Inquiry, and have found that they have been proved to their satisfaction; but they have adjourned the further consideration of the case until the next session, in order that Mr. Crowther may have an opportunity of appearing before the Council and giving an account of his conduct in the interval. Meanwhile Mr. Crowther will be required to furnish at once a medical certificate in regard to his state of health.

He stated that Mr. Crowther had been served with formal notice that the further consideration would take place on that day. He had also received a letter from Mrs. Crowther, enclosing a medical certificate and a testimonial.

In answer to the PRESIDENT, Dr. HUGH WOODS stated that he had no fresh facts or evidence to lay before the Council.

A letter written by Mrs. Crowther on behalf of her husband was read, from which it appeared that he had been sent into the country in the hope of improving his health. She enclosed a medical certificate showing he was not able to attend. He had now retired from practice. He had been in the profession thirty years, and had never had a stain upon his character. He had no intention of breaking the rules or by-laws of the Council, and apologized for having done so.

In answer to the PRESIDENT, Mrs. Crowther said that her husband had been much agitated about this inquiry, that he had no sleep on the previous night, and was quite prostrate. It was out of no want of courtesy to the Council that he was not present.

After some discussion, strangers were ordered to withdraw. On their readmission

The PRESIDENT announced the decision of the Council as follows:

> Mrs. Crowther, I have to inform you that the Council have given careful consideration to this case, and that they have decided not to direct the Registrar to erase from the *Medical Register* the name of Mr. William Harding Crowther.

The consideration of the case of Hamlet Lloyd Davies, registered as of 2, Crofton Street, Great Western Street, Rusholme, Manchester, M.B., M.S.Edin., 1874, was next proceeded with.

The PRESIDENT stated that he was informed that the complainant, who had been represented by Dr. Bateman, did not propose to appear, and he was also informed that Mr. Davies was not present.

Mr. Lushington appeared as Legal Assessor and Mr. Winterbotham as Solicitor to the Council.

Mr. WINTERBOTHAM read the charge against Mr. Davies as follows:

> That you have accepted and continued to hold the appointment of paid Medical Officer to the Rusholme and District Provident Dispensary, an association which systematically practises canvassing for the purpose of procuring patients.

At the conclusion of the deliberation of the Council on the case on November 30th, 1905, the PRESIDENT addressed Mr. Davies as follows:

> Mr. Davies, the Council have deliberated very carefully on your case, and they have come to the conclusion that the facts alleged against you in the notice of inquiry have been proved to the satisfaction of the Council.
>
> The Council feel it their duty to express their sense of the gravity of the facts which have been proved against you; but in order to give you an opportunity seriously to reconsider your position in relation to the Rusholme and District Provident Dispensary, thay have adjourned the further consideration of the charge until the next session, when you will have to appear and satisfy the Council as to your conduct in the interval.

Mr. WINTERBOTHAM said that due notice of the adjournment had been given, and he had formal proof of the service. He had received a letter from Mr. Davies, dated May 15th, in which he stated that he had resigned the post of medical officer to the dispensary in question.

Strangers were directed to withdraw. On their readmission, it was stated that the case was adjourned to Saturday, May 26th.

The Council then proceeded with the consideration of the case of John Bate Bawden, registered as of Mountain View, Blaenavon, Mon., M.B., M.S., 1884, M.D.(1886)Edin., who has been summoned to appear before the Council to answer the following charge, as formulated by the Council's Solicitor.

> That you accepted and held, until after you had received notice of the present complaint, the appointment of paid medical officer of the Blaenavon Tradespeople's Doctor's Fund, an association which systematically practises canvassing for the purpose of procuring patients.

Mr. Lushington appeared as Legal Assessor and Mr. Winterbotham as Solicitor to the Council.

Dr. Avarne and Dr. Skrimshire were the complainants, and Dr. Bawden appeared in person.

The PRESIDENT called upon Dr. Skrimshire to state the case for the complainants.

Dr. SKRIMSHIRE wanted to explain why Dr. Avarne and he appeared in person in support of the statutory declarations they had made, and why they at the eleventh hour, as it were, became complainants in this case. Up to May 12th they were simply informants. They had gathered information and evidence, and they understood that the Council would undertake an investigation of the conditions and circumstances on proper evidence being tendered, and that, if it was found sufficient, the Council would act upon its warning notice of December, 1905. It, however, became known to them that that course would not be followed, and they very reluctantly stepped into the breach rather than have the matter postponed for another six months. What they had done they had done on principle, and all their efforts had been for the honour of the profession. Their desire was to approach the consideration of the case without animus, and with as little self-interest as possible. The commencement of the matter dated back to quite three months before Dr. Bawden arrived on the scene. In December, 1905, a Committee of the Tradespeople's Doctor's Fund in Blaenavon approached Dr. Avarne and himself and submitted their rules for inspection, stating that they had called upon and received 180 signatures in favour of the scheme. Knowing that the Committee had systematically canvassed most of the tradesmen and the larger part of the private residents, and had represented, without their consent, that one or other of them would be appointed surgeon, they both in turn refused the position. Dr. Bawden was appointed to the position, and arrived on January 29th, 1906. Directly after his appointment an active canvass took place, and the name of Dr. Bawden as "our new doctor" was freely mentioned, and several of the patients who had so far refused to join were again called upon for their contributions. Dr. Bawden's name and address was printed on the rules and contribution cards. On February 13th, a friendly letter of warning was sent to Dr. Bawden by the Secretary of the Monmouthshire Division of the British Medical Association, and on February 23rd a notice warning him of his position was sent to him by the Secretary of the Medical Defence Union. Neither of these communications were acknowledged. Then the statutory declarations obtained were sent to the Council. The next week Dr. Bawden, who was said to have severed his connexion with the fund, commenced a personal canvass, and issued letter cards, three of which he produced. The fund had been dissolved, but Dr. Bawden's conduct since that event showed that he had been endeavouring to make use for the future of the introduction given him by the advertising agency with which he had been associated.

Dr. AVARNE read his statutory declaration. He identified a letter card which was sent to a patient of his who was canvassed but never belonged to the Fund and who refused to have anything to do with it. This card stated: "In consequence of certain spiteful complaints that have been made to the General Medical Council Dr. Bawden had had to sever his connexion with the Blaenavon Tradespeople's Doctor's Fund. He has undertaken to attend the patients as usual, but payments must be made to him personally, and he will be glad to receive the same this week at his residence, No. 1, Park Street, Blaenavon, May 9th, 1906."

In cross-examination by Dr. BAWDEN, he stated that it was not the fact that a patient had told him that Dr. Bawden had said he would not attend him without his (Dr. Avarne's) consent. It was not the fact that the patient had not been seen by him for four days.

In answer to Mr. LUSHINGTON, the witness said that the card in question was in Dr. Bawden's handwriting, and this Dr. Bawden admitted.

Dr. SKRIMSHIRE was then called as a witness, and in answer to the PRESIDENT, said he did not desire to read his statutory declaration, as it was embodied in his statement. A similar postcard to the one above set forth was shown to the witness, and he said the card was addressed to a patient of his, who gave it to him.

Dr. SKRIMSHIRE then read the statutory declaration of John Jones of April 20th, 1906, from which it appeared that he had been solicited to become a member of the Fund, and he had been invited to a meeting of the Fund.

The PRESIDENT then referred to other statutory declarations and exhibits thereto, and, in answer to the PRESIDENT, Dr. BAWDEN said he did not desire to challenge the declarations or the exhibits.

Dr. BAWDEN, in opening his case, said he was pleased to know that, in regard to the members of the Council, there was an utter absence of animus. He would have brought witnesses to corroborate what he was going to say, but he had not the means. He denied that canvassing had taken place in any way, and he had distinctly warned the Committee of the Society of what the consequences might be if it were permitted. He assured the Council that he had no desire to act unprofessionally, or to oppose the wishes of the Council, and he had done everything in his power to remove any cause of complaint.

Cross-examined by Dr. AVARNE: On February 14th he was warned by Dr. Greer, Hon. Secretary of the Cardiff Division of the British Medical Association, of the position of affairs, and also by Dr. Bateman, of the Medical Defence Union, but took no notice of either.

By Sir VICTOR HORSLEY: He had no warning, and saw no notice in the BRITISH MEDICAL JOURNAL or any other medical paper before taking the appointment.

Other questions having been put to the accused, strangers were directed to withdraw. On readmission,

The PRESIDENT, addressing Dr. Bawden, said: It is my duty to inform you that the Council, after careful consideration, have come to the following decision:

> That the facts alleged against you in the notice of inquiry have been proved to the satisfaction of the Council; that the Council judges you to have been guilty of infamous conduct in a professional respect, and directs the Registrar to erase from the *Medical Register* the name of John Bate Bawden.

Strangers were then ordered to withdraw, the PRESIDENT stating that the Council would go into *camera* for the remainder of the sitting to consider business connected with penal cases.

Thursday, May 24th, 1906.

DR. DONALD MACALISTER, President, in the Chair.

DENTAL DISCIPLINARY CASES.

THE Council had before it a series of complaints against persons registered on the *Dentists' Register*. All the cases had been fully investigated by the Dental Committee, and the findings of that Committee were final as to the facts. The question for the Council was to decide what action it should take on the facts as found. The complainants in all the cases were the British Dental Association, and Mr. R. W. Turner (instructed by Messrs. Bowman and Curtis-Hayward) appeared for that Association. Mr. Lushington appeared as Legal Assessor and Mr. Winterbotham as Solicitor to the Council.

The Council first proceeded to the consideration, adjourned from December 1st, 1905, of the facts proved against John Jones Atwood, Thomas Rose Smart, Walter Bennett, Montague Alex Levason, and Daniel Shea, whose names all appear on the *Dentists' Register* as "in practice before July 22nd, 1878," and who were connected with the company of Guy White and Co., Limited. At the conclusion of the proceedings on December 1st, 1905, the President announced ***seriatim*** that in the cases of John Jones Atwood, Thomas Rose Smart, Walter Bennett, Montague Alex Levason, and Daniel Shea the further consideration of the charge against them had been postponed until the next session of the Council, of which due notice would be given them, and at which they would be expected to be present.

Four of the parties summoned appeared, but Thomas Rose Smart did not appear.

The further facts and evidence having been considered and dealt with by the Dental Committee, the Committee found that the following facts were established by the evidence:

The said J. J. Atwood, T. R. Smart, W. Bennett, M. A. Levason, and D. Shea have all severed their connexion with G. Guy White and Co., Limited, the company their association with which was the subject-matter of the complaint, and none of them has since had any connexion with this or with any other similar company.

In answer to the President, Mr. SHEA said he had nothing to add to what had been said before.

Mr. R. W. TURNER stated that from inquiries made, the complainants were perfectly satisfied of the severance of these persons from the company.

Strangers and the parties were directed to withdraw. On their readmission, the PRESIDENT announced the judgement of the Council as follows:

The Council, having further considered the charge proved against John Jones Atwood (or Thomas Rose Smart, or Walter Bennett, or Montague Alex Levason, or Daniel Shea), and the reports of the Dental Committee thereon, does not judge you guilty of infamous or disgraceful conduct in a professional respect.

The next case was that of Mr. George Charles Smith, who at the commencement of the proceedings did not appear personally or by counsel.

The Dental Committee had found that the following facts were established by the evidence, or by the admissions of the accused practitioner:

The accused practitioner is on the *Dentists' Register* as in practice before July 22nd, 1878, and his address in the *Register* is 153, High Street, Lewisham, London, S.E.

Mr. Smith has been in practice as a dentist at Lewisham for the last twenty-one years, and claims to have the largest practice in South London.

Mr. Smith recently entered into an arrangement with a Mr. Farkasch for the purpose of extending his practice by a system of canvassing by paid canvassers organized and superintended by Mr. Farkasch. The canvassers distributed documents from house to house containing order forms for signature addressed to Mr. Smith, with schedule of charges for dental operations and for supplying artificial teeth, and subsequently called to solicit signatures to these order forms and to receive deposits in respect thereof. The canvassers on these visits examined the mouths of persons who permitted them and advised them as to their requirements and gave estimates of cost. From twelve to twenty persons were employed to canvass for Mr. Smith's dental practice. Mr. Farkasch is not a qualified dentist, but he carries on a dental practice under the name of the "Hygienic Institute" at Glasgow and elsewhere by a similar system of canvassing, and carries on the practice by unqualified assistants. For the purpose of organizing the system of canvassing on behalf of Mr. Smith, Mr. Farkasch opened an office at 142, High Street, Lewisham, opposite Mr. Smith's surgery, and Mr. Smith's name appears on this door as well as on Mr. Smith's surgery. Mr. Smith employs unqualified assistants at 153, High Street aforesaid, who are in the habit of conducting dental operations on patients at Mr. Smith's surgery, and extract teeth at the private residence of patients who have signed orders in the form above mentioned.

Mr. Smith states that he does not wish to defend his right to remain on the ***Register.***

In answer to the President, Mr. R. W. TURNER said that the British Dental Association regarded this as a very bad case. The man was employing unqualified canvassers, and he had also been guilty of covering. It seemed to be a case in which the individual desire should be gratified, and that his name should not be allowed to remain on the *Register*.

Strangers and the parties were directed to withdraw. On their readmission:

The PRESIDENT, addressing Mr. George Charles Smith (who was now present), said: I have to inform you that the Council has given careful consideration to the report of the Dental Committee on your case, and have decided as follows:

In the facts found in the report of the Dental Committee it has been proved that you have been guilty of conduct which is infamous or disgraceful in a professional respect, and the Council directs the Registrar to erase from the *Dentists' Register* the name of George Charles Smith.

The Council next proceeded to the consideration of the charge against William MacGregor Veitch, L.D.S., R.C.S. Eng., and Mr. Thomas Wafer Byrne, L.D.S., R.C.S.Eng., L.D.S., F.P.S.Glasg., both of whom were present. The Dental Committee had found that the following facts were established by the evidence:

1. The practitioners complained of are on the *Dental Register* with the qualifications above set forth—Mr. Veitch at 112, Prince's Road, Liverpool, and Mr. Byrne at 2, Prince's Road, Liverpool.

2. Mr. Veitch and Mr. Byrne respectively carried on practice as dentists in their own names at their registered addresses, but they also carried on a dentist's practice under the name of Entwistle Bros., Ltd., at 218A, London Road, Liverpool, and also at Seacombe. They were the only two directors and Mr. Veitch was the Secretary of the Company, and with nominal exceptions they held the whole of the shares.

3. Mr. Veitch and Mr. Byrne purchased the goodwill of this business from the representatives of deceased dentists of that name, who had carried on a dental practice for many years previously. The company employed an expert advertiser of the name of Kelly, who had complete control of the advertising department. The company issued advertisements and circulars of an objectionable character, and containing claims of superiority over other practitioners.

4. The company employed an unregistered assistant named James Kermode Goldsmith, who attended patients and performed dental operations at 218A, London Road, aforesaid. Mr. Goldsmith was registered as a dental student in July, 1894, and had passed all his examinations except the final examination. and had gone through a course of practical dentistry at the Dental Hospital. Mr. Veitch or Mr. Byrne attended daily at the premises in London Road, with which they were in telephonic communication, and they superintended or performed the more serious operations. Their instructions to Mr. Goldsmith were to do the mechanical work of an unqualified assistant, but Mr. Goldsmith did not, as he admitted, in practice follow these instructions, but performed dental operations under gas administered by himself and on his own responsibility.

5. Both Mr. Veitch and Mr. Byrne retired from the directorship and parted with their shares in the company on April 2nd, 1906. The complaint against them was made on April 27th. and they were asked by the Registrar for an explanation on April 30th. In reply to the complaint and when under examination they expressed their unqualified regret for their mistaken conduct, and contended that the advertisements were directed against unqualified competitors.

The PRESIDENT, addressing Mr. Veitch and Mr. Byrne pointed out that, if they desired it, they could address the Council, but the accuracy of the facts contained in the report must be taken as established.

Mr. VEITCH regretted the absence of his counsel, who was not able to be present, because he felt sure his counsel would have been able to present the facts which had been found in such a way as to show that throughout their transactions with the company had been straightforward and honourable, and the Council would have been impressed with their innocence of having transgressed to such an extent against professional conduct as to come within the category of infamous or disgraceful. They extremely regretted having done what they did, and wished to point out that they had now severed all connexion with the company. Their private practices, which were kept apart from the company, had been carried on with the strictest regard to professional etiquette, and he submitted under the circumstances that they should not be subjected to the severe penalty of having their names erased from the *Register*.

In answer to the PRESIDENT, Mr. BYRNE said he had nothing to add to what Mr. Veitch had said. He took no objection to the facts as found.

Mr. TURNER submitted that this was a very serious matter, for on the facts found, it appeared that they, in competition with other unqualified persons, took over a business which they were employed to carry on for a person who was himself an unqualified competitor, and they left it entirely to this person to decide whether or not they should be called in to assist; this business was carried on under an advertisement sanctioned by the company of which these two gentlemen were directors, which stated that they made a special feature of their ability to rectify mistakes by inefficient practitioners. They had not expressed their regret to the Council, or given an undertaking to the Council as to the future.

Dr. SAUNDBY pointed out that the report stated that Mr. Veitch and Mr. Byrne retired from the directorship and parted with their shares in the company on April 2nd, 1906. They must have parted with those shares to somebody; who was it?

The PRESIDENT stated that the question had been directly put to the two persons charged, but the answer given was not satisfactory.

Strangers and the parties were directed to withdraw. On their readmission:

The PRESIDENT (addressing Mr. Veitch individually) said:

> The Council has given long and careful consideration to your case, and, on the facts found in the report of the Dental Committee, it has been found that you have been guilty of conduct which is infamous or disgraceful in a professional respect, and the Council directs the Registrar to erase from the *Dentists' Register* the name of William MacGregor Veitch.

Mr. VEITCH: I can give an undertaking if the Council wish.

The PRESIDENT then made a like statement to Mr. Thomas Wafer Byrne.

The next case was a charge against Isidore Clifford, Ruby Edmund Clifford, Walter Clifford, and Stanley Clifford, in regard to whom the Dental Committee had found the following facts:

> The practitioners complained of are all on the *Dentists' Register* as at 20, Grosvenor Street, London, W., and as in practice before July 22nd, 1878. [Mr. Isidore Clifford was also registered as L.D.S., R.C.S.Eng. (1887).]
>
> All the accused practitioners joined in forming and are the principal shareholders and the only directors of a limited company named the American Dental Institute, Limited, incorporated under the Companies Acts for the purpose (*inter alia*) of promoting the adoption of advanced American and other scientific methods of Dental Surgery, which company carries on dental practice at divers addresses in London, Manchester, and Liverpool.
>
> That in such practice the company employs unregistered assistants (namely, Mr. Skrimshire, Mr. Robertson, Mr. McCormick, Mr. Kennedy, Mr. McDermid, and Mr. Storey, all using the title of doctor) to attend patients, and perform dental operations upon them.
>
> That the company systematically advertises extensively by pamphlets of an objectionable character and containing claims of superiority over other practitioners and depreciation of them. The accused practitioners by their counsel also did not dispute the accuracy of an article in the *Review of Reviews* which sets out at great length within quotation marks an interview with one of the directors of the company, containing scandalous and highly objectionable remarks with regard to English dentists and dentistry.
>
> The accused practitioners by their counsel undertook that the company (of which they are practically the whole of the shareholders) should be dissolved; that neither they nor the company would employ any persons contrary to the resolution of Council of November 24th, 1892, and further that they and the company would discontinue all advertisements of every kind.

The respondents were represented by Mr. C. M. Warmington, K.C., and Mr. T. L. Wilkinson, instructed by Messrs. Frank Richardson and Sadlers.

The PRESIDENT inquired of Mr. Warmington if he desired to address the Council as to the judgement it might pass on the facts, the facts as found by the Dental Committee being conclusive.

Mr. WARMINGTON replied that the respondents through him desired to express their profound regret that they had been guilty, as had been found by the Council, of offences of professional misconduct; it was far from their wish to reflect upon their fellow practitioners, and they felt deeply the disgrace that it should have been thought they intended, by anything that had been said, especially in the *Review of Reviews*, to make odious charges (for they were odious charges) against members of their profession. They wished to give an undertaking to do the utmost in their power to make amends for their misconduct. They desired through him to express their intention henceforth to obey the rules of professional conduct which had been laid down by the Council for the good of the profession. He could not say more, but left the matter in the hands of the Council.

Mr. TURNER thought Mr. Warmington would desire to add that his clients entirely withdrew the allegation they had made, besides expressing their regret.

Mr. WARMINGTON assented.

Mr. TURNER pointed out that this again was a very serious case, and one of the leading examples of advertising in the kingdom. He was therefore glad that, when these gentlemen came under the influence of their learned counsel, they had adopted the course they had, and not endeavoured to fight the case. The advertisement stated one thing, the actual practice being entirely different; the public were thereby deceived, and were entitled to protection.

Strangers and the parties were directed to withdraw. On their readmission,

The PRESIDENT, addressing the four respondents by name, said:

> The Council has deliberated carefully on your case, and on the facts found in the report of the Dental Committee it has been proved that you have been guilty of conduct which is infamous or disgraceful in a professional respect, and the Council directs the Registrar to erase from the *Dentists' Register* the names of Isidore Clifford, Ruby Edmund Clifford, Walter Clifford, and Stanley Clifford.

SIGHT-TESTING OPTICIANS BILL.

The Council received from the Executive Committee a recommendation to adopt the following resolution in regard to a communication from the British Optical Association and in regard to the Sight-testing Opticians Bill:

> That the Lord President of the Privy Council be informed that the Council have carefully considered the petition and the Bill submitted to them, and are of opinion that it would be dangerous in the public interest to confer the privileges and powers contemplated therein on persons other than those duly qualified in ophthalmic medicine and surgery; that the Council trust that the sanction of Parliament and of the Privy Council will be withheld from these proposals, and submit the accompanying memorandum, which has been approved by the Council, as setting forth the grounds on which their objections are based.

Dr. NORMAN MOORE moved the adoption of the resolution.

Sir VICTOR HORSLEY suggested that as the resolution contained two separate propositions a full stop should be inserted after the word "proposals."

The PRESIDENT thought that was convenient, and Dr. NORMAN MOORE was willing to accept the suggestion.

Dr. McVAIL suggested that the word "ophthalmic" should be omitted from the resolution.

Dr. NORMAN MOORE said he was about to mention that obvious point. He thought it was quite clear that it was very important something should be done in this matter. The body which had been endeavouring to obtain this power had been putting out feelers in a variety of directions.

Sir VICTOR HORSLEY said that although he was not a member of the Executive Committee, he would second the resolution down to the word "proposals." The position did not require any long explanation. There was a Bill before Parliament, and this was the first occasion on which the Government had sought from the medical profession any expression of opinion, and naturally the Council welcomed the opportunity of expressing its opinion that the Bill went further than the circumstances warranted, and that it contained such powers as would enable persons who were wholly unqualified to examine eyes under all circumstances. It was quite true there were reservations made, but they were inadequate. He thought the Council ought to express its knowledge of the fact that these persons had been advertising as unqualified ophthalmic practitioners for a long time.

The President said that Sir Victor Horsley had rightly referred to the fact that through the Privy Council the document had been sent to the Council for its opinion. It might be remembered that some years ago the Council had reason to complain that sometimes matters affecting the medical profession were dealt with by Government offices without reference to the Council. In response to a request from the Council, the authorities had agreed that the Council should have an opportunity of seeing at an early stage any document that seemed to touch the medical profession. He had to acknowledge, on behalf of the Council, the courtesy of the various offices and the various Secretaries of State who had cordially given the Council the present opportunity of considering this document. The President then put the following resolution:

> That the Lord President of the Privy Council be informed that the Council have carefully considered the petition and the Bill submitted to them, and are of opinion that it would be dangerous in the public interest to confer the privileges and powers contemplated therein on persons other than those duly qualified in medicine and surgery, and that the Council trust that the sanction of Parliament and of the Privy Council will be withheld from these proposals.

The resolution was put to the Council and carried unanimously.

Dr. Pye-Smith moved:

> That the accompanying memorandum, subject to such amendments as may be approved, be transmitted to the Lord President of the Privy Council as setting forth the grounds on which the objections of the Council are based.

This was seconded by Mr. Morris, and a discussion ensued.

Professor Saundby, who had been concerned in fighting the Bill on behalf of the medical profession for several years, criticized the memorandum, as originally drafted, in certain respects, and mentioned that the Spectacle-makers' Company once gave an undertaking to the British Medical Association that they would not allow their diplomates or fellows to advertise improperly, but when subsequently appealed to they refused to take any action in this direction. As regards the title "optician," he thought that the Council should not try to take away from opticians the trade title which they had enjoyed for a considerable length of time, and on this ground he objected to the first paragraph in the memorandum, and called attention to the danger of the use of mydriatic drugs, which were indispensable if the opticians were to do all that they claimed to be able to do.

Sir Victor Horsley mentioned that he also had been engaged in the preparation of similar documents, and thought that these persons were, as Dr. Saundby had said, entitled to the use of the word "optician," and that the Council ought not to quarrel with their use of that title; that they sought to improve their knowledge of optics was a laudable intention, and he thought that in approaching the Legislature this should be acknowledged. He drew attention to two memorandums that had been published, one by the Royal College of Surgeons of England, and a second by the Medico-Political Committee of the British Medical Association. These documents brought out all the points which he would like to see embodied in the memorandum; he thought that the history of ophthalmology given in the memorandum was most important, and should go to the Privy Council. He thought the memorandum was very valuable from that point of view, but it should be supplemented by some special reference to the position of opticians by drawing attention to the fact of the inability of their carrying out what they purported to do, because of the impossibility of allowing them to use mydriatics. He therefore suggested that the memorandum should be added to in the way Dr. Saundby and he had suggested.

Mr. Arthur Thomson made some criticisms on the wording of the memorandum, which he thought might be improved from the point of view of accuracy.

After some discussion, the President stated that the document before the Council need not be the final memorandum, and if Sir Victor Horsley and Dr. Saundby would submit to the Council a statement of the supplemental points which they thought ought to be made, they could be embodied and sent up afterwards.

It was further suggested that the Council would be perfectly satisfied to leave the matter in the hands of the President to draft and prepare the Memorandum, and it was arranged that he should confer with Sir Victor Horsley and Dr. Saundby in order to amend it in the sense they suggested.

The memorandum, the text of which follows, is the amended form finally adopted, and entered on the minutes of the Council at its meeting on Monday, May 28th.

MEMORANDUM
ON
THE PETITION OF THE "BRITISH OPTICAL ASSOCIATION" FOR THE GRANT OF A CHARTER,
AND ON THE BILL NOW BEFORE PARLIAMENT
"TO REGULATE THE PRACTICE OF SIGHT-TESTING OPTICIANS AS REGARDS THE TESTING OF SIGHT."

Submitted by the President to the General Medical Council, and approved by the Council on May 26th, 1906.

The following statement sets forth the grounds on which the General Medical Council bases its objections to the proposals contained in the Petition and in the Bill laid before the Council by direction of the Lord President. The Lord President has already been informed that, in the Council's opinion, it would be dangerous to the public were the proposed powers and privileges conferred on persons other than those duly qualified in medicine and surgery.

An "optician" is defined by Johnson to be "one skilled in optics"—that is, in a branch of science which can be understood or cultivated only by the aid of considerable proficiency in mathematics. In this sense, at least, the word is inapplicable either to the great majority of those who follow the simple handicraft of a spectacle-maker or to the great majority of those who deal in the wares which spectacle-makers produce.

The fifth clause of the petition sets forth that "the trade or profession of a practical optician *includes and always has included* the practice of the science of measuring the refraction of the eye and the adaptation of lenses for aiding defective sight which forms a most important part of the practical optician's duty and requires special knowledge and training for rendering proficient those who profess to adapt lenses for aiding defective sight." The whole of this statement, and especially the words in italics, are devoid of any real foundation. The statement and the claim it implies are contradicted by the facts of history.

Until early in the second half of the nineteenth century, the nature, the extent, and the causes of the differences in the refraction of the eye were wholly unknown, the means of measuring them were non-existent, no standard of normal vision had been adopted, or even suggested, and no "sight-testing" was possible. It was known that the majority of people became unable to read small print with comfort at 50 years of age or earlier, and that their power to do so might usually be restored by convex spectacles. Such persons were said to have "aged sight," or to be "presbyopic," but no one understood the mechanism by which young eyes were "accommodated" or adjusted for near vision, and so no one understood the nature of the defect by which this power of adjustment was lost. The loss was ascribed, in books on optics, to an imaginary "flattening" of the front surface of the eye. Manufacturers supplied retail dealers with convex spectacles distinguished by "numbers," roughly corresponding with their focal lengths in inches; and it was a matter of common trade and popular knowledge that a presbyope of about 50 would require (say) number 36. This would be given to him to "try," and, if he did not like it, he would "try" weaker and stronger powers until he obtained what he could see with. In some shops his "number" would be approximately found by an "optometer"—that is to say, an instrument something like a shoemaker's measure, with a fixed lens and a sliding object of vision moving upon a graduated scale. The only part taken by the spectacle-seller was, as a rule, to caution his customer against selecting glasses which were "too strong," a caution which was based upon an entire misapprehension of the facts connected with a common form of eye disease.

It was also known, at the time referred to, that a certain proportion of people with good sight for near objects, were unable to see distant objects clearly. Such people were said to be "short-sighted," and their defect was explained by an imaginary excess of convexity either of the front surface of the eye or of its internal lens. It was customary to give them concave glasses which, in the words of the late Mr. White Cooper in 1853, would enable them "to distinguish the outline of objects distinctly at about forty or forty-five feet." Nothing was laid down with regard to the magnitude of the objects which were to be so distinguished; there was no "standard of vision," no scientific testing, and no knowledge of the ordinary cause of the condition.

Soon after 1850 the whole subject of the defects of vision was investigated for the first time by a succession of medical men possessing an adequate knowledge of optics and of physiology, and was placed by them upon an entirely new foundation. Helmholtz, by his invention of the ophthalmoscope in 1851, acquired the power of inspecting the interior of the living eye, which had never before been revealed to view, and of tracing the course of light through its refracting media. By his invention of the ophthalmometer in 1853 he acquired the power of measuring the curvatures of the eye surface and of the internal lens, a power which led to the discovery of the mechanism by which the eye is adjusted for vision at different distances, and hence to an explanation of the cause of "presbyopia." Donders, by the application of these and other inventions, showed that the eyeball as a whole is liable to depart from correct proportion in two opposite directions, that short sight is usually due to its elongation, that this elongation is liable to increase and to pass almost imperceptibly into disease, and that, when increasing, it must be dealt with not only by the most careful and scientific employment of spectacles, but also by limitation of use and by various medical and surgical means. After examining with the ophthalmoscope the interiors of 2,500 short-sighted eyes, he laid down the general proposition that "a short-sighted eye is not a sound eye," a proposition which subsequent experience has abundantly confirmed. He discovered, what had never before been suspected, that a large number of people have eyes which are too small, too short from front to back, a structural condition the reverse of that which produces short sight, and which is the ordinary cause of squint, and of various painful and troublesome disabilities, which had been previously known and regarded as incurable, but many of which he found to admit of complete relief by the careful adjustment of glasses. Thomas Young, in 1801, had discovered in his own eyes a difference of refraction in different meridians, and caused special cylindrical glasses to be ground for the correction of his defect. Airy, in 1826, independently repeated this experience, and Whewell suggested for the condition the name "astigmatism." Neither Young nor Airy regarded astigmatism as other than a curious personal malformation, and it remained practically unknown to spectacle sellers. Donders, working on the lines laid down by Young, discovered it to be of frequent occurrence, framed precise rules for its detection and estimation, and showed how to determine the strength and position of the cylindrical glasses required for its correction. The cases calling for such glasses have since been found to amount to about 14 per cent. of all the patients coming under the cognizance of an ophthalmic surgeon, but the condition had never received the smallest attention from "opticians." Donders also established a standard of normal vision, and showed how departures from this standard could be numerically stated, so that for the first time he rendered accurate "sight testing" possible. Every imperfection of vision is now expressed in figures as a fraction of the normal; whereas, in 1850, one of the surgeons to Moorfields Hospital could say nothing more precise, in describing the result of a case which had been under his treatment, than that "the patient could see well enough to drive a cart along four miles of bad road to fetch coal." Donders finally accomplished a work which might not unfairly have been expected from "opticians." He reconstructed the scale of lenses, and substituted the metre for the inch as the unit of measurement for visual refraction. By this reform he greatly simplified calculations, and his metric scale is now in use throughout the civilized world.

The researches of Donders were made known in outline in England in 1862, in a little book* written by the late Mr. Soelberg Wells, then Ophthalmic Surgeon to the Middlesex Hospital, and more completely in 1864, by the publication by a medical society of an English translation of the original papers in which they were described. The work which the great Dutch surgeon commenced has been continued by many successors in England, on the Continent, and in America. Better methods of investigation have been introduced, instruments have been multiplied and perfected, erroneous conclusions have been corrected, treatment has been improved, and a systematic literature of the subject has been brought into existence; but this progress has been due to medical men. Any information regarding the subject which non-medical opticians may now possess has been gained by studying medical writings, and in no other manner. It must be remembered, moreover, that, if a non-medical optician should improve or discover anything, he would be likely to regard the improvement or discovery as something to be patented or otherwise used for his personal advantage, and not, as is the practice of the medical profession, to be at once disclosed for the general benefit of mankind.

The admission by the petitioners in Clause 7 that, "where defective vision is due to other than optical conditions it should be treated by a duly qualified medical practitioner," is fatal to the rest of their contention; not only because, as a matter of fact, optical defects and diseased conditions constantly overlap and complicate each other, but also because the former cannot be certainly recognized or the latter certainly excluded by any but a medical practitioner.

In order that certain errors of refraction may be accurately measured, it is often necessary to produce temporary paralysis of the accommodation muscles by the careful use of atropine or some other poisonous drug. To entrust the employment of these poisons to opticians would be to endanger the public safety. Yet without their use it is impossible to fulfil "the function of dealing with the improvement of human vision so far as optical aids are necessary and applicable," which function the petitioners propose to assume.

On the other hand, defects of vision that can to some extent be counteracted by the use of spectacles are often associated with diseases of the eye, which cannot be detected or treated by the means at the optician's disposal. Weakness or error of sight is, moreover, in many cases but the initial symptom of grave disease affecting the nervous system or the body in general. Failure on the part of the optician to recognize such local or general disease would inevitably result from his lack of medical and surgical knowledge; and the consequences of his failure might be disastrous to those who, in ignorance of his limitations, had placed their trust in his powers of "sight testing."

The foregoing considerations apply equally to the Bill and the Petition, both of which are demands for exclusive privileges to be conferred upon persons who have no sort of claim to them, and who would be likely to use them to the prejudice of the public. A desire on the part of makers and sellers of spectacles to know all that can be learnt about the applications of their merchandize is laudable, and for this purpose the writings of medical men are freely open to them. But privileges which would hinder the village watchmaker from keeping a selection of "spectacles to suit all sights," or even from styling himself "watchmaker and optician," would be inconvenient to large sections of the population. The knowledge necessary to distinguish purely "optical" defects of the eye, if such there be, from conditions bordering upon or passing into disease can only be attained by a complete medical education; and the grant of "sight-testing" diplomas to persons who are not medically educated, and who, as we already see abundantly, would be likely to seek to use them as instruments of trade advertisement, could hardly fail to lead to disastrous results. The persons so furnished with diplomas would in many cases, to use the words of Donders, be "rendered rash by ignorance," and would be certain to transgress the wholly unpractical limitations laid down in the petition and in the Bill; while the public would be deceived by the grant of legal privileges, and would be likely to believe that those possessing them were really conversant with ophthalmology.

It remains to mention that an argument in support of the Bill has been founded upon the supposed analogy furnished by the Pharmacy Acts; but this argument will not bear investigation. The pharmacist deals with a great range and variety of raw materials and of preparations, many of which in unskilful hands would be extremely dangerous to life. The "optician" deals only with lenses, few in number, simple in construction, and harmless in themselves. His shop contains no sources of peril against which the public may rightly ask to be protected. Moreover, in regard to bodily infirmities, the pharmacist's duty is limited to the supply of preparations asked for by customers, or to the accurate dispensing of the prescriptions of qualified medical practitioners. He exceeds his duty when he himself undertakes to diagnose and to prescribe for even the simpler departures from health. The optician has at present the analogous functions of making and selling the mechanical and optical appliances which the purchaser may seek or the ophthalmic surgeon may prescribe. To confer on him the privilege of himself prescribing for and treating patients suffering from disorders of the eye would be to sanction the creation of an inferior and purely commercial order of medical practitioners, exempted from the training and the disciplinary restraints which the Medical Acts impose.

---

* The title of the book is, *On Long, Short, and Weak Sight, and their Treatment by the Scientific Use of Spectacles.* Here the word "scientific" first makes its appearance in relation to the use of spectacles.

ASSUMPTION OF TITLES BY COMPANIES.

The Council then considered the following letter from the President of the Pharmaceutical Society.

> 26, Brechin Place,
> South Kensington,
> May 22nd, 1906.
>
> Dear Dr. MacAlister,—I am writing as President of the Pharmaceutical Society of Great Britain, to draw the attention of the General Medical Council to the amendment which was recently carried in the House of Lords on the Poisons and Pharmacy Bill, to the effect that a company or body corporate, composed of unqualified persons, may use the title of chemist, provided they employ a person who is qualified under the Pharmacy Acts.
>
> This decision, if allowed to become law, may have far-reaching results, not only to chemists, but also to dentists, medical men, and others where a personal qualification is required by law.
>
> I hope the General Medical Council may see fit to exert their great influence to protest against such a new departure, and I have the honour to invite that Council to take such steps as they deem necessary to impress upon the Government and the Houses of Parliament the danger to the public, and the injustice to qualified persons, of such proposed legislation.
>
> I am,
> Yours very faithfully,
> R. A. ROBINSON,
> President of the Pharmaceutical Society
> of Great Britain.

Dr. NORMAN MOORE moved, Sir THOMAS MYLES seconded, and it was agreed that this letter should be received and entered on the minutes.

Mr. TOMES moved—

> That the President be requested to inform the Lord President of the Privy Council that, in the opinion of this Council, the principle involved in the Poisons and Pharmacy Bill, as amended in the House of Lords, whereby corporate bodies are permitted to assume professional titles, which, in the case of individuals, cannot legally be assumed by any but those who are personally qualified by training, examination, and registration, is fraught with danger to the public, inasmuch as it tends to impair the safeguards provided by the Medical, Dentists, and Pharmacy Acts.

He said that the Government had introduced into the House of Lords a Poisons and Pharmacy Bill which was partly designed to carry into effect the recommendations of a departmental committee which had been sitting on the sale of poisons. It embodied also some clauses introduced at the instance, he believed, of the Pharmaceutical Society, who wished to have the opportunity of getting some amendment of the Act, particularly of regulating company practice; and the Bill originally contained a clause rendering companies liable, just as though they were individuals, to the prohibitory clauses of the Pharmacy Acts, which prohibited unqualified persons using the titles conferred after examination and registration upon pharmaceutical chemists, or chemists and druggists. In the House of Lords an amendment was carried, the effect of which was to give a legal right or legal authority to a company to make use of the title of pharmaceutical chemists or chemists and druggists, as long as it employed at each of its places of business a qualified and registered pharmaceutical chemist. Now the company might have a fancy title, or the title of the company might be the name of a man so long as he appended the word "Limited" to it; in any case it was a complete abrogation of the restriction of the title implying qualification to the person who possessed it. The tone of the debate rendered it rather important that the Council should make some representation on the subject, because the advocates of the Bill and their opponents did not seem to realize the effect of what they were doing. The idea that these Acts, which put prohibitions in the way of using titles, were of no service to the public, but only of service as a protection to the holders thereof, was put forward even by the advocates of the Bill. That was an extremely serious misconception. The restrictions were no doubt beneficial to the holders of the titles, but they were beneficial to the public in a much greater degree. He therefore thought that the Council should represent to the Privy Council that there were aspects of the question which seemed to have dropped out of sight.

Sir VICTOR HORSLEY suggested that after the words "danger to the public" should be added: "by enabling unqualified persons to carry on medical, dental, and pharmacy work, inasmuch as it tends," etc.

The PRESIDENT did not think the Bill did that.

Sir VICTOR HORSLEY replied that then the whole of the resolution was not right.

Sir JOHN W. MOORE seconded the resolution. There were some very serious provisions in the Bill which had not been alluded to. One was that it would enable others than those hitherto qualified by law to sell poisons, and in all parts of the United Kingdom, because the Bill, as an after thought, had been extended to Ireland. The duty of making representations as to what should be deemed poisons under the Sale of Poisons (Ireland) Act had been entrusted by the State to the Royal College of Physicians of Ireland, of which he was the representative. The Bill seemed absolutely to supersede that power; to entrust the duty of licensing people to sell poisons to local authorities all over the country would be most dangerous.

The PRESIDENT thought that Sir Victor Horsley's point could be met by saying, "inasmuch as it tends to impair the safeguards against unqualified practice provided by."

Sir VICTOR HORSLEY agreed, and added that it ought not to be forgotten that in the House of Lords this all-important provision was left out on the strength of representations made by Lord St. Aldwyn, whose argument was based obviously on the notorious case, since all the points he referred to applied to the Boots Company. The Council must express its opinion in perfectly clear and unequivocal language. He had great pleasure in supporting the resolution.

Dr. SAUNDBY did not feel altogether satisfied that pharmacy should be bracketed with medicine and dentistry in this connexion. He did not agree with the view that a chemist's business might not fairly be carried on as a purely commercial affair provided there was a duly-qualified man in charge. A chemist's business was remunerative to the people who found the capital. That was quite different to a profession carried on without any capital in that sense. All that was necessary in the case of pharmaceutical chemists was to take care that those who actually carried on the business were properly qualified, and that there was no evasion of the Pharmacy Act.

The PRESIDENT remarked that at present no individual could call himself a pharmaceutical chemist or a chemist and druggist unless he had passed the examinations, and been properly registered as such; if he did, he was liable to punishment. As amended, not as introduced, the Bill enabled a company of unregistered, unqualified, untrained persons to assume those titles, and exempted them entirely from all punishment. Therefore, if the Bill were to pass in its present form, the titles which were forbidden to individuals might be assumed by companies.

After some fuller discussion, the PRESIDENT called on the Legal Assessor, Mr. LUSHINGTON, who suggested that the resolution should stand down to the words "professional titles, which," and then run "titles no member or director or person carrying on the business of such company need be personally qualified by training, examination, and registration to assume, is fraught with obvious and extreme danger to the public."

Mr. TOMES expressed his willingness to accept these words.

The PRESIDENT then (the Council having given leave to substitute these words for those in Mr. Tomes's resolution) put the resolution as follows, and it was carried unanimously:

> That the President be requested to inform the Lord President of the Privy Council that, in the opinion of this Council, the principle involved in the Poisons and Pharmacy Bill, as amended in the House of Lords, whereby corporate bodies are permitted to assume professional titles, which titles no member or director of such company need be personally qualified by training, examination and registration to assume, is fraught with obvious and extreme danger to the public.

The Society of Apothecaries of London.

Sir Hugh Beevor moved, Mr. Morris seconded, and it was agreed:

> That Mr. Edward Percy Paton, F.R.C.S.Eng., M.D.Univ. Lond., be appointed Assistant Examiner in Surgery to the Apothecaries' Society of London for a period of four years, vice Mr. Steward, who retires by rotation.

The Apothecaries' Hall, Dublin.

Dr. Adye-Curran moved:

> That in consideration of the heavy expense entailed on the Apothecaries' Hall, Dublin, by the appointment of the Surgical Examiners for London and Edinburgh respectively, the Council resolve that at the next vacancy these Examiners be appointed from amongst the profession practising in Dublin.

He reminded the Council that some years ago an inspection was ordered by the Council of the Apothecaries' Hall, which he had the honour to represent, and fault was found by the inspectors with the manner in which the examination was conducted, and he had no hesitation in admitting that at that time the examination was not up to date or strictly in accordance with modern ideas. Immediately on receipt of that report, however, the Hall put into practice every suggestion made by this Council; so much so, that he was happy now to be in a position to state that every subsequent one had been most satisfactory; every examination, without exception, had been inspected, and in the report on the January examination Sir Henry Howes stated that he saw no necessity for an inspector to attend the April examination. This state of affairs was no doubt a source of satisfaction to all parties; but what he was most concerned about at present was the fact that, although other bodies had been inspected and unfavourably reported upon, they nevertheless had been granted an interval of repose wherein to make good their shortcomings, but in the case of their Cinderella sister the inspection had been made perennial, or, he might more correctly say, permanent, and this in spite of recommendations of the Executive Committee. This state of affairs, which was without precedent or parallel in the annals of the General Medical Council, had done incalculable injury to the Hall in scaring away candidates; he confidently appealed to their love of justice and fair play no longer to enforce it. Yet a still further penalty had, unwittingly or otherwise, been imposed on the body he represented. No doubt many members of the Council were aware that the report in question had had the further effect of dissolving the conjoint examinations between the Royal College of Surgeons and the Apothecaries' Hall of Ireland, and, as a consequence, to the appointment by the Council of surgical examiners, at a remuneration of £5 a day and travelling allowances. The expenditure thus imposed on the Hall came to over £100 a year, as one of the examiners came from London and the other from Edinburgh. He did not wish to be taken as finding any fault with the gentlemen in question—on the contrary they had always conducted their examinations with the greatest courtesy. The Apothecaries' Hall had paid this penalty for a considerable number of years, without murmur, and he thought the Council would agree that in all fairness the time had come when this heavy and unnecessary expense might be removed, and that what had hitherto been regarded by the profession in Ireland as an unmerited slight be rectified by the appointment of these examiners from amongst the very distinguished members of the profession in Ireland.

Sir Thomas Myles supported the resolution. The difficulty about the appointment of examiners arose not from any embargo being laid by the Council upon the appointment of examiners, but from the fact that after the hostile and severe criticism by this Council of the system of examinations conducted by the Apothecaries' Hall it was practically ordered that no Fellow of the College should offer himself as a candidate for examinership. That embargo was now removed, and the examinations as conducted by the Apothecaries' Hall for many years past had been all that could be desired.

The President asked what the resolution meant. It used the words "in future." There was no examiner at present.

Dr. Adye-Curran said he meant the next examination.

Sir Thomas Myles said it was intended to refer to the next vacancy.

Dr. McVail suggested that the motion was entirely out of order; but the President replied that the motion was in order.

Dr. McVail said the resolution could not become a law of the Council, and was not binding upon it. He did not think that anybody would dream of electing an examiner outside Dublin at great cost to the Apothecaries' Society. He was entirely in favour of the resolution, but thought it wholly unnecessary.

The President remarked that when a vacancy did occur the representative of the Apothecaries' Company could nominate any surgeon of repute as examiner.

After some further discussion, Dr. Adye-Curran said that under these circumstances he would withdraw the resolution.

Sir John William Moore, before the resolution was withdrawn, wished to say that Dr. Adye-Curran's principal object, he took it, in moving the resolution, was to save expense to the Apothecaries' Hall; but he hoped the Council would not permit any examiner representing it and performing the very responsible duty of inspector as well as examiner in surgery to receive a less honorarium than had been paid up to the present. Therefore he did not think that whether a man in Dublin or Edinburgh was appointed could make any difference except so far as travelling expenses were concerned.

The Council having given leave for the motion to be withdrawn, Dr. Adye-Curran said he would withdraw it, having satisfied himself that his object had been attained.

Examinations for the Services.

Sir Heron Watson moved:

> That a report from the Examination Committee on the returns as to examinations for entrance to the Navy, Army, and Indian Medical Services received by the General Council on May 22nd, 1906, be received and entered on the minutes.

Dr. Norman Moore seconded, and this was agreed to.

Mr. Brown thought the Examination Committee ought to be thanked for the very exhaustive report, and moved that a copy of the report be sent to each licensing body.

Dr. Bruce seconded.

Mr. Thomson objected, because it was no part of the Council's business.

On the resolution being put, the President declared it lost.

Quatercentenary of the University of Aberdeen.

Sir Thomas Fraser called the attention of the Council to the fact that the University of Aberdeen was about to hold the celebration of its 400th anniversary. He proposed:

> That the President and Treasurers of the Council be requested to arrange for the preparation and transmission of a suitable address of congratulation to the University of Aberdeen on the celebration in September next of its 400th anniversary.

This was seconded by Sir Patrick Heron Watson and carried unanimously.

Strangers were then requested to withdraw, in order that a certain matter might be considered, and the Council subsequently adjourned.

Friday, May 25th, 1906.

Dr. Donald MacAlister, President, in the Chair.

Disciplinary Cases.

The Council proceeded to deal with the case of Alexander Lane, registered as of Saville Chambers, Newcastle-on-Tyne, M.R.C.S.Eng. 1880, L.S.A.Lond. 1880, F.R.C.S.I. 1893, M.D.Durh. 1899. Mr. Lushington appeared as Legal Assessor and Mr. Winterbotham as Solicitor to the Council. The complainants were the Medical Defence Union, represented by Dr. Bateman. Mr. Lane was represented by Mr. F. W. Hill, solicitor, Fenchurch Street, London.

Mr. Hill said he supposed that the *locus standi* of Dr. Bateman was well recognized now by the Council, and that he was entitled to represent the Medical Defence Union, and to conduct the case before the Council.

The President replied that the Medical Defence Union were the complainants, and Dr. Bateman was their officer.

Mr. Winterbotham read the charge, which was as follows:

That you sold to Mr. Ellis Pearson a medical practice at Bideford which was not a genuine, bona-fide saleable goodwill and practice, but was a practice fraudulently built up by you for the purpose of sale.

Documents and evidence as furnished by the Council's solicitor were before the Council.

Dr. Bateman said that the case rested solely upon the verdict in the action of Pearson *v.* Lane, and on the judgement in the Divisional Court on appeal. It was for the Council to say whether upon the verdict an order should be made to erase Mr. Lane's name from the *Register* for having been guilty of professional misconduct. He was quite prepared to go into the circumstances which led up to the verdict. He should like the ruling of the Council on the matter.

Mr. Hill was equally prepared to deal with the case either *ab initio* or simply on the findings of the jury, provided he might deal with the judge's summing-up to the jury.

The President stated that Mr. Lushington advised that the inquiry should start from the later part of the trial, and refer to the judge's direction to the jury and the verdict.

Dr. Bateman then called Mr. Ellis Pearson, who said that he was F.R.C.S. and L.R.C.P.Edin. He commenced an action in October, 1905, against Mr. Lane, formerly of Bideford, Devon. He was present when the trial took place at Exeter, and the jury found that the sale of the practice by Mr. Lane to Mr. Pearson was not a genuine bona-fide sale of a goodwill and practice; that the practice was built up for sale, and assessed the damages for the plaintiff at £200. Two days after the trial Mr. Lane made an assignment for the benefit of his creditors. The charge of fraud was never withdrawn by witness or his counsel at the trial.

Cross-examined by Mr. Hill: He was present in Court when Mr. Justice Lawrence summed up, but he did not consider that a transcript of the whole of that summing-up should have been presented to the Council in support of his complaint. He had supplied a part of it. Neither did he consider it necessary to include in his documents the report made by the Official Receiver who examined into the circumstances of Mr. Lane's bankruptcy.

In reply to Dr. Bateman, he said he was advised by his solicitor what documents he should furnish.

This closed the case for the complainants.

Mr. Hill then tendered Mr. Lane as a witness but did not ask him any questions.

In answer to Dr. Bateman, the Witness said he could not say what he had paid in reference to the damages and the costs. He was ruined over the case, and had no chance of paying. In reply to Mr. Hill, he said that an offer was made on his behalf to Mr. Pearson, after the verdict, that Mr. Pearson should be paid, in addition to retaining the practice, £200, and that he should be allowed to collect certain book debts which were not included in the purchase. This offer was refused. In reply to Mr. Lushington, he said his memory was rather hazy and he could not recollect whether it occurred to him immediately after the trial at Exeter to take steps to appeal, or why it was not until a month afterwards that he took such steps, and then, failing in that application, he never went further into the matter. His father put the matter in another solicitor's hands; that was all he knew.

Mr. Hill then addressed the Council on behalf of Mr. Lane. He said there were three points for the Council to consider: First, what was the real effect of the finding of the jury when all the circumstances surrounding it were considered; secondly, whether the effect of the verdict really amounted to infamous conduct on the part of Mr. Lane; and, thirdly, if the Council thought his conduct was "infamous," whether it amounted to infamous conduct in his professional capacity. Mr. Lane, however, did not desire him to rely on the third point; he did not wish to raise any technical or legal quibble, but he wished to contest the matter in its broad sense upon the question of whether, when all the circumstances were considered, he had been guilty of infamous conduct or not. Mr. Hill then read Mr. Justice Lawrence's summing-up to the jury at the trial, and contended that this showed that the learned judge entertained a different view to that expressed by the jury. The penalty involved in the complaint was a terrible one, because if the decision of the Council was adverse to Mr. Lane it was the end of his professional career; but he ventured to think in a case of this kind the Council would hesitate long before describing such conduct as infamous in a professional respect, because to so hold would be stretching the section of the Act far further than the legislature ever intended. The documents he had read showed that there was nothing in Mr. Lane's conduct which could be characterized as infamous conduct whether in a professional or any other respect, although it was not a wise thing for him to do.

Dr. Bateman, in reply, said the charge undoubtedly was one of infamous conduct in a professional respect, and it was based upon the verdict in the action of Pearson *v.* Lane, and also on the decision of the judges in the High Court. The jury found, first, that it was not a bona-fide genuine sale of the goodwill of the practice, and secondly, the practice was built up for sale; and by their verdict they practically found that fraud had been committed, and the decision of the judges in the Divisional Court confirmed that.

Strangers were directed to withdraw. On readmission, the President, addressing Mr. Lane, said that after careful consideration the Council had passed the following resolution:

That the facts alleged against you in the notice of inquiry had not been proved to the satisfaction of the Council.

The Council then proceeded to the consideration of the case of James Brander, registered as of 44, Lead Side, Northfield, Aberdeen, M.B., M.S., 1876, Univ. Aberd., who had been summoned to appear before the Council on the following charge, but was not present.

That you were on February 15th, 1906, convicted of the following crime or offence at Aberdeen Police Court—namely, of drunkenness and riotous behaviour.

The Solicitor read the notice of inquiry and the certificate of conviction, and stated that notices of other convictions of a similar character had been received to the number of fourteen. He then read a letter which had been received from the accused, in which he said:

That I have made mistakes in my life I do not deny, and accordingly deserve reprimand. With regard to the charge of drunkenness, I may state that I have been a temperate man all my life, although at times I may have stepped over the border. . . . I regret that neither physically nor financially am I in a position to face this charge, otherwise it would have been more satisfactory.

The President, in reply to Professor Finlay, said no notice of conviction had been received by the Council previous to that mentioned in the charge, to which fact he proposed to call the attention of the Home Secretary.

Strangers were directed to withdraw. On readmission, The President announced the decision of the Council as follows:

That James Brander having been proved to have been convicted of a crime or offence, the Registrar be directed to erase his name from the *Medical Register*.

The Council then adjourned.

Saturday, May 26th, 1906.

Dr. Donald MacAlister, President, in the Chair.

Poisons and Pharmacy Bill.

The President, in reply to Mr. Tomes, said he had sent the following letter to the Privy Council:

May 24th, 1906.

The Council to-day considered the enclosed letter from the President of the Pharmaceutical Society, and ordered it to be received and entered on the minutes. After careful consideration of the points raised in the letter, the following resolution was agreed to *nem. con.*:

> "That the President be requested to inform the Lord President of the Privy Council that, in the opinion of the Council, the principle involved in the Poisons and Pharmacy Bill, as amended in the House of Lords, whereby corporate bodies are permitted to assume professional titles, which titles no member or director of such company need be personally qualified by training, examination, and registration to assume, is fraught with obvious and extreme danger to the public."

I may add that the feeling of the Council in the matter was that, if the principle above referred to were once sanctioned by Parliament in a particular case, it would tend seriously to impair the safeguards against unqualified practice which in the public interest has been provided by the Medical and Dentists Acts.

Disciplinary Case.

The Council then proceeded to the consideration of the facts proved on November 30th, 1905, against Hamlet Lloyd Davies, registered as of 2, Crofton Street, Great Western Street, Rusholme, Manchester, M.B., Mast. Surg. 1874, Univ. Edin., who had been summoned to appear before the Council to answer the following charge as formulated by the Council's Solicitor:

> That you have accepted and continued to hold the appointment of paid Medical Officer to the Rusholme and District Provident Dispensary, an association which systematically practises canvassing for the purpose of procuring patients.

At the conclusion of the deliberation of the Council on the case on November 30th, 1905, the President addressed Mr. Davies as follows:

> Mr. Davies, the Council have deliberated very carefully on your case, and they have come to the conclusion that the facts alleged against you in the notice of inquiry have been proved to the satisfaction of the Council.
>
> The Council feel it their duty to express their sense of the gravity of the facts which have been proved against you; but in order to give you an opportunity seriously to reconsider your position in relation to the Rusholme and District Provident Dispensary, they have adjourned the further consideration of the charge until the next session, when you will have to appear and satisfy the Council as to your conduct in the interval.

Mr. Lushington appeared as Legal Assessor and Mr. Winterbotham as Solicitor to the Council.

The Solicitor explained the facts to the Council, and said a letter had been received from Dr. Bateman, who supported the charge in November last on behalf of the Medical Defence Union, stating that he had no further evidence to bring before the Council.

Mr. Davies, in reply to the President, said he had resigned the appointment to the Rusholme and District Provident Dispensary. Although he believed it was still going on, he had no connexion with it.

Strangers were directed to withdraw; on readmission,

The President, addressing Mr. Davies, said:

> The Council having given you an opportunity to seriously reconsider your position, and having heard the evidence as to your conduct in the interval, does not judge you guilty of infamous conduct in a professional respect, and does not direct the Registrar to erase your name from the *Medical Register*.

Restoration of Name.

The Council then considered *in camerâ* a report from the Executive Committee in regard to an application for the restoration of a name after erasure under Section 29 of the Medical Act (1858).

Strangers were directed to withdraw; on readmission,

The President announced that the Council had directed the Registrar to restore to the *Medical Register* the name of William Patrick Kirwan, L.R.C.P. and L.R.C.S.Edin.

Report on the Cycle of Inspections of the Final Examinations.

Sir Patrick Heron Watson moved, Mr. Young seconded, and it was resolved:

> That the report from the Examination Committee on the whole cycle of visitations and inspections be received and entered in the minutes, subject to such amendments as the Council may approve.

Sir Patrick Heron Watson said there were no recommendations in the report; it simply contained a series of opinions which the Committee submitted to the Council for adoption. He formally moved the adoption of the report.

Dr. Caton seconded.

The President pointed out that if the motion were adopted the opinions expressed in the report would be those of the Council. It contained matter as to which there might well be a difference of opinion, as, for instance, paragraph 10, and suggested that it be moved paragraph by paragraph.

After some discussion this suggestion was adopted. The report as finally adopted is as follows:

REPORT BY THE EXAMINATION COMMITTEE

On the recently-completed Cycle of Inspections of the Final Examinations of all the Qualifying Bodies mentioned in Schedule A of the Medical Act, 1858.

1. Within the past five years the final examinations of all the qualifying bodies* have been inspected; and all of them, either on a first or a second inspection, have been pronounced by the inspectors to be "sufficient" within the meaning of the Medical Act of 1886. The Examination Committee of the Medical Council adopted the conclusions of the inspectors, and the Medical Council adopted the reports of the Examination Committee, and thus the Council has pronounced officially that all the final examinations so inspected are "sufficient."

2. A review of the inspectors' reports shows considerable diversity in the methods of conducting the examinations and in the standard of knowledge required. Some examinations are just "sufficient," others are certainly more than sufficient, and a few are considerably above a mere pass mark. As all the inspectors' reports are in the hands of all the Examining Boards, this Committee refrains from classifying into grades the different examinations, but undoubtedly some do no more than attain to a bare sufficiency. Many of the candidates who pass at some of the Boards would apparently be rejected at others.

3. The criticisms of the inspectors on the examination of each Board have been fully considered by each Board, and although there has been in some instances considerable reluctance in admitting justification for the inspectors' animadversions, the probable result will be that when the next inspection takes place the inspectors' reports will have led to substantial improvement.

4. The Council's recommendation that two examiners should conduct the examination in any stage of it is frequently disregarded. It is true that no rejection takes place unless by the consent of two examiners, but it is far from certain that in all cases where pass-marks have been given by one examiner a colleague would have concurred. No two examiners can have quite the same mental appreciation of a candidate's answers in such subjects as medicine and surgery; therefore, the concurrence of at least two examiners should be required equally to pass or reject. The Committee is of opinion that this recommendation of the Council should be urged by the Council on all the Qualifying Boards.

5. In the written examinations some Boards do not carry out the Council's recommendation that half an hour should be allowed on an average for the answer to each written question. In the opinion of the Committee this rule should be rigidly enforced.

6. The Committee is of opinion that in regard to medicine and surgery every examination should be so devised as to show the candidate's acquaintance with pathological processes in either the written or the oral parts of the examination. The inspectors call attention to the circumstance that at some Boards no evidence of knowledge of ophthalmology was required.

7. The clinical examinations are conducted in hospital wards by all the Boards except two; at these two Boards patients are brought to the examination rooms. Generally the clinical examinations have been conducted satisfactorily both in medicine and surgery. In one instance on a first inspection the examination was reported as having been unduly hurried; at the second inspection ample time was allowed. In another instance the presence of strangers in the wards was stated to have interfered with the work; on a further visit the inspector was satisfied with the examination.

8. The examinations in practical surgery were generally satisfactory, although it was remarked that at some Boards the display of instruments and apparatus might have been more comprehensive. All the Boards require skin markings of operation incisions on the living subject.

9. As regards examination in operative surgery on the subject, some Boards exact this from every candidate, others from selected candidates only, and some Boards do not require it at all. One inspector commends such examination, another reprobates it and urges that the time might be more usefully employed. This Committee is of opinion that examination in operative surgery on the subject is a valuable test of the candidate's knowledge of surgical anatomy and of his manipulative skill,

---

* The number of qualifying bodies has been added to since the inspection was determined on by the foundation of new universities in Liverpool, Leeds, and Sheffield. The Victoria University, at the time of the inspection of its final examination, included as constituent colleges the several colleges at Manchester, Liverpool, and Leeds.

and the Committee believes that by having such examination in prospect the student will devote more time and attention to practical surgical procedure than if no such test be in front of him.

10. Some Boards are without special examiners in medical jurisprudence and hygiene and do not set a special paper on these subjects, but leave it to the examiners in medicine, surgery, and midwifery to ascertain as they may think fit the student's acquaintance with these subjects. This Committee is of opinion that these important departments should have special examiners.

11. Each of the three Irish Boards conduct a well-devised and searching practical examination in ophthalmology. Only one British Board has such an examination. The Irish example deserves to be commended and followed.

12. Two Boards only have instituted a special practical examination in mental disease at an asylum.

13. At some of the Boards certain of the examiners take part in all the stages of the examination in medicine or surgery—the written, the clinical, the practical, and the oral—thus ensuring that each candidate has been by at least one examiner followed from beginning to end of the examination on the subject. At other Boards no such procedure is provided, and seldom, if ever, does any one examiner see the written, the clinical, and the oral of any candidate throughout.

14. Some Boards require a candidate to enter for all the subjects of the final examinations at one time. Other Boards allow of entry for one of the subjects at a time. Where the latter practice is adopted, and where a Board that requires entry for all subjects at once gives credit for one or two subjects when there has been failure in the other subject or subjects, this Committee is of opinion that at least 10 per cent. more than a mere pass-mark of 50 per cent. should be exacted.

15. One Board separates the systematic examination in medicine and surgery from the clinical examination by an interval of some months—the clinical being the final or pass examination. There is much to be said in favour of this arrangement, as the student in the interval may devote himself entirely to clinical and practical work.

16. One Board allows a candidate to receive pass-marks for the systematic or the clinical examination in surgery independently of each other. He must enter for both, but may pass in systematic surgery and not in clinical surgery, and vice versa, and be only examined at a future time in the branch in which he failed. This Committee is of opinion that a pass-mark should not be allowed in clinical work if there has been failure in the systematic examination.

17. The Examination Committee commends the method of regarding systematic medicine and surgery respectively as separate subjects from clinical medicine and surgery, and is of opinion that failure in clinical medicine or surgery should not be compensated by excellence in the systematic branches.

18. At one Board no curriculum of study has yet been prescribed. The Medical Act of 1858 requires sufficiency of "study" as well as of examination.

This Committee makes no observations on the examination in midwifery, as a Special Committee of the Medical Council is at present considering all that pertains to the teaching of practical midwifery.

PATRICK HERON WATSON,
Chairman of Examination Committee.

May, 1906.

On paragraph 6 Mr. JACKSON moved to add after the word "ophthalmology" the words "otology and laryngology," as, in his opinion, it was a matter of serious importance that medical men of the present and future time should have some knowledge of these subjects.

Dr. KIDD seconded.

After some discussion the amendment was put and declared lost.

On paragraph 10 being adopted, the PRESIDENT expressed the opinion that it was very important not to require special examiners, because they could not then take part in any other part of the examination.

Dr. MCVAIL was of opinion that there should be attached to every Examining Board a person who knew hygiene thoroughly.

Sir THOMAS FRASER agreed with Dr. McVail, as it was not fair to a candidate to have an examiner who was not fully acquainted with the subject.

Dr. SAUNDBY said that the Council's object should be not to put up an additional barrier to the ordinary student getting on to the *Register*, but to see that they were sufficiently educated in medicine, surgery, and midwifery. The ordinary qualifying examination should be kept as simple as possible, and therefore the Council ought not at the present time to propose that there should be special examiners or special examinations in these subjects.

Dr. MACKAY, to bring the matter to an issue, proposed:

> That this Committee is of opinion that special questions should be set in these important departments.

He ventured to think they would not get the subjects examined upon at all except by special examiners.

Sir JOHN MOORE seconded.

Dr. LINDSAY STEVEN supported the amendment. In his opinion no examination in Forensic Medicine or Hygiene could be considered satisfactory unless it was conducted by men who had devoted most of their time to the subjects.

Sir CHRISTOPHER NIXON considered medical jurisprudence an important subject in medical education, and he had always been taught that hygiene was an essential part of medicine; therefore he could not understand a body like the General Medical Council trying to minimize the value of hygiene; it ought to try and increase it.

Dr. NORMAN MOORE said the duties of a medical officer of health were totally different to those of an ordinary practitioner. It would be better to leave the examining bodies to choose their own way with regard to the subjects.

Dr. BRUCE supported the amendment as it was the correct inference from the previous recommendations of the Council.

Sir T. MYLES supported the recommendation. In his opinion the amendment was a serious departure from it, and was not logical.

Mr. TOMES agreed with Sir T. Myles; in order to be logical there must be two examiners in the subjects.

The amendment was then put and declared lost.

Dr. NORMAN MOORE then moved:

> That all candidates should be examined in these subjects.

Mr. JACKSON seconded.

The amendment was lost.

Sir JOHN WILLIAMS moved that the last sentence of the paragraph be omitted.

Dr. NORMAN MOORE seconded the amendment, which was lost.

Dr. NORMAN MOORE suggested that if the Council was going to make a deliberate addition to the burden of intending practitioners, it ought to be done after full discussion. He moved that the whole of Clause 10 be omitted.

Sir JOHN WILLIAMS seconded.

The amendment was lost.

The motion was then put and carried.

At the request of Dr. BRUCE the names and numbers were taken down, when 20 voted for, 12 against; 1 did not vote, and 1 was absent.

Paragraphs 11, 12, 13, and 14 were agreed to.

Paragraph 15 was, at the instance of Sir VICTOR HORSLEY, amended and approved, as was also Paragraph 16.

Paragraph 17 was amended to read as printed above.

Sir PATRICK HERON WATSON moved, and Dr. CATON seconded, the adoption of Paragraph 18.

Dr. LINDSAY STEVEN moved that the last clause, "The Medical Act of 1858 requires sufficiency of 'study' as well as of examination," be omitted. To insert that clause was to express an adverse opinion by a side wind, and if the Committee could not express it openly it had better be omitted altogether.

Sir VICTOR HORSLEY seconded. It seemed to him the side wind was almost a gale.

Sir HUGH BEEVOR asked whether, having brought the matter to the notice of the Council, it could not be withdrawn.

Dr. MCVAIL said the Committee would be willing to withdraw the last clause.

This was agreed to and the paragraph as amended approved.

The last paragraph was also approved.

Mr. Morris moved, Sir T. Myles seconded, and it was resolved:

> That a copy of the Examination Committee's report as amended be sent to each of the licensing bodies for its information.

The Fifth Year.

Dr. Bruce moved:

> That it be remitted to the Education Committee to consider how far Recommendation V of the General Medical Council—namely, "that the fifth year should be devoted to clinical work at one or more public hospitals or dispensaries, British or foreign, recognized by any of the medical authorities mentioned in Schedule (A) of the Medical Act (1858), provided that of this year six months may be passed as a pupil to a registered practitioner possessing such opportunities of imparting practical knowledge as shall be satisfactory to the medical authorities"—is at present being given effect to, and if the Committee sees fit to recommend to the Council such changes in the said resolution as would be likely more effectually to secure the object aimed at by the Council in 1890.

He feared it was notorious that, although the resolution of the General Medical Council required that the fifth year should be given up to clinical work, as a matter of fact this rule in most cases was almost nugatory. It was, so to speak, merely a pious opinion, with the result that the practical side of the future doctor's training was forced into the background and the theoretical unduly exalted. The only cure yet suggested by reformers was to add another year to the present course of purely professional studies by putting certain ancillary studies outside the curriculum, and in this way to gain the additional time necessary for the work. While heartily approving such a change, he feared it would not help matters much; the same system of overlapping would almost certainly continue. To get at the root of the difficulty, the proper plan was not to postpone clinical work until the student had learnt the principles, but to start off immediately with practice, and to wed practice and principles together. Send the student straight, if not to the bedside, certainly to the out-patient's department; place him under tutorial care, teach him to observe for himself, and, as soon as possible, make him put his own hand to what was to be his life's work. Those who had taken the trouble to think on the best form of medical education looked back to the old apprenticeship system with, in many respects, feelings of regret. He ventured to suggest that the nearest solution of the problem of the best method of medical education was to secure to the student the advantages of the older system while retaining those of the newer and, he confessed, better, but, in spite of careful examination, far from faultless method. It may be said that as a Council they had refrained from laying down the precise times and the right course of medical studies, but they had declared for a final year of clinical work. It was their duty, if they had made a mistake, to retrace their steps, to abandon that undesirable position by declaring for early, steady, and continuous practical training of the student during his whole course. The opportunity for practical work under the supervision of a practitioner qualified for the duty had, so far as he knew, never once been taken advantage of, and it was never likely to be; the sooner such a recommendation disappeared from the list the better.

Sir T. McCall Anderson seconded.

Dr. Mackay was sure the Education Committee would be glad if this were remitted to them for consideration. It was unnecessary to discuss it in detail.

The resolution was then put and agreed to.

Report of the Pharmacopoeia Committee.

On the motion of Dr. Norman Moore, seconded by Dr. Lindsay Steven, the following report of the Pharmacopoeia Committee was received and entered in the minutes:

> From November 21st, 1905, to May 19th, 1906, the number of copies of the *British Pharmacopoeia* (1898) sold by the publishers was 516. The total number of copies sold in the year was 1,150. Up to the present date 37,584 copies of the *Pharmacopoeia* and 4,410 copies of the *Indian and Colonial Addendum* have been sold. The stock of the *Pharmacopoeia* remaining on hand now consists of 2,447 copies, with 1,954 copies of the *Addendum*. No new impression will therefore be necessary for some time to come.
>
> The Secretary of State for the Colonies has forwarded to the Committee a number of useful suggestions for the revision of the *Pharmacopoeia* from the Joint Committee of the Medical and Pharmaceutical Societies of Victoria, and also a report from New Zealand on the same subject. Other suggestions bearing on pharmacopoeial unification have been received from Holland. The new *Pharmacopoeias* of the Netherlands and of the Austrian Empire have been received. Each adopts the conclusions as to potent drugs and preparations arrived at by the Brussels Conference of 1902. These conclusions have now been finally embodied in an International Agreement, entered into between the British Government and the authorities of the other Powers.
>
> The Chairman of the Committee of Reference in Pharmacy nominated by the two Pharmaceutical Societies of the United Kingdom states that subcommittees for various branches of investigation have been formed and are at work. Reports on the progress made may be expected before the next meeting of the Council.

Election of Committees.

On the motion of Dr. Norman Moore, seconded by Mr. Morris, the following nominations by the Branch Councils were agreed to:

Examination Committee.

English Branch Council: Dr. Pye-Smith, Mr. Young, Dr. Caton.

Scottish Branch Council: Sir P. Heron Watson, Dr. Finlay, Dr. McVail.

Irish Branch Council: Sir Thomas Myles, Dr. Little, Sir John Wm. Moore.

Education Committee.

English Branch Council: Dr. Norman Moore, Sir G. Philipson, Sir J. Williams.

Scottish Branch Council: Dr. Mackay, Sir John Tuke, Sir T. McCall Anderson.

Irish Branch Council: Dr. Little, Sir C. Nixon, Sir John William Moore.

Public Health Committee.

English Branch Council: Dr. Cocking, Mr. Power, Mr. Jackson.

Scottish Branch Council: Dr. Bruce, Dr. Lindsay Steven, Dr. McVail.

Irish Branch Council: Sir John Wm. Moore, Sir Thomas Myles, Dr. Bennett.

Pharmacopoeia Committee.

English Branch Council: The President (Chairman), Dr. Norman Moore, Sir G. Philipson, Dr. Caton, Dr. Barrs.

Scottish Branch Council: Sir Thomas Fraser, Dr. McVail.

Irish Branch Council: Sir John Wm. Moore, Dr. Little.

Finance Committee.

Dr. Pye-Smith (Chairman), Mr. Tomes, Sir Patrick Heron Watson, Dr. Bennett.

Dental Committee.

The President (Chairman), Mr. Morris, Mr. Tomes, Sir Patrick Heron Watson, Sir Thomas Myles.

The Council then adjourned.

Monday, May 28th, 1906.

Dr. Donald MacAlister, President, in the Chair.

The minutes of Saturday's meeting were read and confirmed.

The British Medical Association and the Election of Direct Representatives.

Mr. Brown called attention to the scheme adopted by the British Medical Association in regard to the nomination and election of Direct Representatives to the Council, and asked the President whether the pledge exacted by the Association was not calculated to encroach on the privileges of the Council.

The President stated that Mr. Brown had given him notice of the question, and he had written his answer, which was as follows: "The general question whether a certain action is calculated to encroach on the privileges of the Council is one which the President cannot determine; it is a question for the Council itself. Having regard, however, to the observations of the Lords Justices in Allinson's appeal, I think it proper to state that in my opinion a member of the Council pledged to follow the directions of an association, or belonging to an association giving such directions, would be precluded from taking any part in judicial inquiries before the Council in which, as informants or otherwise, the association was concerned." He asked the Council to consent to this answer being put on the minutes.

PUPILAGE.

Mr. BROWN moved to refer the following notice of motion to the Education Committee for consideration and report to the Council:

> That a period of pupilage of not less than twelve months with a registered medical practitioner officially recognized for the purpose of one of the licensing bodies should be regarded as equivalent to a period of six months of the ordinary medical curriculum.

A resolution which had been passed on this subject in the year 1890, with the very best intention of meeting the demand that pupilage with a medical practitioner in ordinary general practice should be recognized as a part of a candidate's medical curriculum, had, as a matter of fact, been a dead letter because no candidate had ever asked any of the corporations to have six months' training or work with a medical practitioner recognized as part of his curriculum.

Mr. JACKSON seconded.

Mr. MORRIS thought something might have been said for the proposal if it had been that the last six months of the five years' curriculum should be spent in this way, but the five years' curriculum, as things were at present, was a pure fiction. The medical curriculum had never been more than four years, and the action of the Council had been not to extend it to five years but to reduce it to three and a half years; to permit six months of that time to be spent away from centres of medical education would be a very deplorable step.

Sir T. MYLES said that as far as Ireland was concerned there was a five years' curriculum. If the proposal was to substitute twelve months' pupilage for six months' hospital study he would oppose it most strenuously.

Dr. LINDSAY STEVEN did not think that pupilage with a private practitioner would ever come into use, and he doubted whether there was any registered practitioner who would apply for recognition to the licensing bodies for this purpose.

The PRESIDENT pointed out that the matter had already been referred to the Education Committee; the new point was the substitution of twelve months for six months.

Mr. BROWN assented. He was sure there were many practitioners who could give really valuable training to students by initiating them into the art of prescribing and dispensing.

The motion was lost.

SIGHT-TESTING OPTICIANS.

The PRESIDENT announced that the Memorandum transmitted by the Council to the Lord President of the Privy Council with regard to the petition of the British Optical Association would be entered on the minutes (see p. 300).

THE SOCIETY OF APOTHECARIES OF LONDON.

On the motion of Sir HUGH BEEVOR, seconded by Sir JOHN WILLIAMS, the following draft Bill, promoted by the Society of Apothecaries of London, was referred to the Council by the Executive Committee, and was received and entered on the minutes.

An Act to vary the Diploma or Title of Licentiates of the Society of Apothecaries of London.

Whereas since the 30th day of June, 1887, every person applying to the Society of Apothecaries of London for its licence to practise as an apothecary has been required to pass a qualifying examination in medicine, surgery, and midwifery duly held by the said Society of Apothecaries with the assistance of examiners appointed by the General Council of Medical Education and Registration of the United Kingdom (hereinafter referred to as the General Council) in accordance with the provisions of the Medical Act, 1886, which came into operation on the date aforesaid.

And whereas the diploma or title of "Licentiate of the Society of Apothecaries, London," has heretofore been inserted in the *Register* kept under the Medical Acts (hereinafter referred to as the *Medical Register*) as the qualification of a registered medical practitioner holding the said licence of the said Society of Apothecaries.

And whereas it is desirable that the terms of the diploma or title granted by the said Society of Apothecaries to its licentiates who have passed such qualifying examination as aforesaid shall clearly indicate that it is a qualification in both medicine and surgery.

Be it therefore enacted, etc.

This Act may be cited as the "Apothecaries Act, 1906."

It shall be lawful for the said Society of Apothecaries to grant to every person who has since the 30th day of June, 1887, passed or shall hereafter pass a qualifying examination in medicine, surgery, and midwifery duly held by the said Society of Apothecaries in combination with another medical corporation or a university, or with the assistance of examiners appointed by the General Council in accordance with the requirements of the Medical Act, 1886, the diploma or title of "Licentiate in Medicine and Surgery of the Society of Apothecaries, London."

The said diploma or title of "Licentiate in Medicine and Surgery of the Society of Apothecaries, London," shall be deemed to be added to the qualifications in Schedule (A) to the Medical Act, 1858, and every person possessed of such diploma or title shall be entitled to have the same entered in the *Medical Register* as his or her qualification or additional qualification for registration under the Medical Acts.

Sir HUGH BEEVOR moved:

> That this Council has no objection to the statutory definition (that is, in an Act of Parliament) of the registrable title L.S.A., whereby "Surgery" as well as "Medicine" shall be connoted.

It was a matter of propriety as well as courtesy that the Society should bring this draft Bill before the Council. It was more particularly the case owing to the large share the Council had in determining the examinations. He thought also the large number of signatures to the petition rendered the motion one which it would be proper and courteous for the Council to consider.

Dr. ADYE-CURRAN asked Sir Hugh Beevor to make his Bill applicable to Ireland; and

Sir CHARLES NIXON expressed the hope that the Council would see its way to treat the Apothecaries' Hall, Dublin, in the same way.

The PRESIDENT pointed out that it was stated by the Executive Committee, with the concurrence of the Council, that the Registrar was obliged to insert "Lic. of the Society of Apoth." in the *Register*. The Society had taken the only step open to it. The only other point was that "surgery" was now one of the ordinary subjects of the examination of the Society of Apothecaries. Formerly it could examine in medicine and midwifery; the Council could have no objection to the word "surgery" appearing in the title, as surgery was required for the actual qualification.

Sir JOHN WILLIAM MOORE thought that the word "midwifery" should be included.

Dr. NORMAN MOORE agreed with Sir John William Moore that as the Act provided that every practitioner must be qualified in the three subjects, midwifery should be included.

Sir HUGH BEEVOR said the Society had no difficulties as to midwifery.

The resolution was then put and agreed to.

SCRUTINY OF VOTING.

Sir VICTOR HORSLEY moved that, instead of the old practice being followed, two scrutineers should be appointed to count the votes on the elections of the Executive Committee and Penal Cases Committee in the room, and that they should report to the President.

Sir T. MCCALL ANDERSON seconded, and the motion was carried by 14 to 13. The PRESIDENT nominated Dr. Cocking and Dr. Kidd to act as scrutineers.

VISITATION AND INSPECTION OF EXAMINATIONS.

The Council then proceeded to the consideration postponed from December 1st, 1905, of the proposed standing orders relating to the visitation and inspection of qualifying examinations.

The PRESIDENT stated that the Standing Orders were revised by the Executive Committee, and were submitted to the Council in December last. Dr. McVail had sent in various suggestions, and Dr. Finlay various amendments. Dr. McVail's suggestions were not in the form of strict amendments. He had had a conversation with Dr. McVail, and he had formulated his principle into certain amendments.

Dr. MCVAIL moved, and Dr. BRUCE seconded, that the discussion of these regulations should take place *in camerâ.*

Sir VICTOR HORSLEY hoped the Council would not agree to this, as the matter was one of public importance.

Dr. NORMAN MOORE agreed.

Dr. MCVAIL said that as his proposition was opposed, he would give way. His first point was that there should be complete separation between visitation and inspection. Under the Act of 1896, he believed, the Council could not direct inspection to be combined with the visitation. The inspector must be appointed under the Act of 1886. Under the Act of 1858 the Council might appoint visitors. Under the Act of 1886 the inspector must report to the Council, and it must return his report with observations, and send the report to the Privy Council. Under the Act of 1858 the visitors might or might not report to the Council, and when the report came up the Council might either adopt it or decline to adopt it. The two matters were entirely separate. The Council was not precluded from sending a visitor who might be present at the inspection at the same time as the inspector, but the visitor must have no communication with the inspector as to his work. Another point in which he thought the Standing Orders should be altered was that hitherto the inspection had been intermittent, and this was not contemplated by the Act. Intermittency of inspection of any single examination might be as the Council might determine, but the whole reading of the second subsection of Section 3 implied practical continuity of inspection on the part of the Council. The Act intended these examinations to be inspected whenever the Council thought fit, but the Council was not entitled to think fit that a single inspection of one examination in ten years was sufficient. It should be the duty of the Examination Committee to advise the Council as to when the inspection should take place. Another point arose in connexion with Subsection 4 of Section 3, which did not mean that the Council was not to overpay its inspectors; it meant that the Council was not to underpay its inspectors. Therefore, his view was that the inspectors should be paid according to the work required of them by the Council on the advice of the Examination Committee. A further point was that hitherto the Council had published the reports. He held that under the Act they had no copyright in these reports. It was not for the Council to publish them or to sell them. He held that the right of the Council was exhausted when it received the report and sent it to the Privy Council. He felt that these reports should be confidential for discussion by the Council and for the consideration of the Privy Council. An inspector whose report was confidential would in all probability deal with the matter in a different way to that if he knew it was to be published. The next point was as to the qualifying examination. He thought it should include any examination held by a qualifying body in any subject or subjects in the medical curriculum.

The PRESIDENT said that if Dr. McVail's amendments were carried they would be instructions to the Executive Committee to draw up Standing Orders in accordance with them. The Council was not called upon to go into the minute wording of the Standing Orders because the instructions he thought were clear enough. It was for Dr. McVail to propose his amendments one by one, and the Council could either accept them or reject them. He added that as Dr. McVail had given several legal opinions upon the interpretation of the Acts he should like to call the attention of the Council to the fact that legal opinions had been obtained from the legal advisers on many of the points; these opinions were to be found on pages 238 and 246 of the Minutes of 1903.

Dr. McVAIL then proposed

> That the Standing Orders as submitted by the Executive Committee be recast so as to embody the following provisions: (1) That the existing system of cycles of inspection and visitation at intervals be discontinued.

Sir CHRISTOPHER NIXON seconded.

Dr. McVAIL said in reply to Mr. Thomson that the amendment meant that the visitation and inspection were not to be at intervals but were to go on continuously.

Dr. NORMAN MOORE thought that the whole point was that the proposal would enable the Council better to secure and maintain a proper standard of efficiency.

The PRESIDENT suggested that the words "and visitation" be left out.

Sir VICTOR HORSLEY hoped the Council would pass that without further discussion.

The amendment was then put and adopted.

Dr. McVAIL moved, Dr. FINLAY seconded, and it was resolved:

> That inspection and visitation be dealt with under distinct and separate rules.

Dr. McVAIL moved and Sir VICTOR HORSLEY seconded:

> That standing inspectors be appointed, who shall conduct inspections where and when required by the Council, on the advice of the Examination Committee.

Mr. THOMSON suggested the insertion after the word "inspectors" of the words "of the qualifying examinations."

Dr. NORMAN MOORE thought it would be a mistake to retain the inspectors permanently; they should be appointed for a definite purpose.

The PRESIDENT thought it would be better to move it in two sections.

Dr. McVAIL, with the assent of Sir VICTOR HORSLEY, reworded the amendment as follows:

> That inspectors be appointed for definite periods, who shall conduct inspections of the Qualifying Examinations where and when required,

and this was adopted.

Dr. McVAIL moved, Sir JOHN MOORE seconded, and it was resolved:

> That it shall be the duty of the Examination Committee to advise the Council as to the time and place of inspection.

Dr. McVAIL moved, and Dr. MACKAY seconded:

> That the reports of inspectors be henceforth not published in the Minutes, except by express direction of the Council in any particular case.

Dr. NORMAN MOORE thought it would be a great mistake to adopt this. The more publicity that was given to the Council's proceedings the more useful they were likely to be to the public.

Sir CHRISTOPHER NIXON said that the Council was bound to lay the views of the inspectors before the profession.

Dr. BRUCE observed that there was a further objection; he would not like to decide which report should be published and which not.

The amendment, by leave of the Council, was withdrawn.

Dr. McVAIL moved, and Sir VICTOR HORLLEY seconded,

> That the term "Qualifying Examination" include any examination held by a Qualifying Body in any subject or subjects of the medical curriculum.

The PRESIDENT pointed out that the Act of Parliament already contained a definition, and the Council must not by a definition of its own go behind it; nothing but confusion would arise if a technical term were used in a non-technical sense.

Mr. THOMSON thought the Council were trying to do something which implied control, not only over strictly professional education, but the cultural education, and many would resent such control.

Dr. SAUNDBY suggested that the matter should be postponed until a legal opinion had been obtained as to what was meant by surgery, medicine, and midwifery.

The PRESIDENT observed that the legal opinion had already been obtained, and was on the minutes.

After some further discussion, Dr. McVAIL, with the leave of the Council, withdrew the amendment.

ELECTION OF COMMITTEES.

The PRESIDENT announced the result of elections as follows:

EXECUTIVE COMMITTEE.

English Branch Council: Dr. Pye-Smith, Mr. Young, Sir Hugh Beevor.

Scottish Branch Council: Sir John Batty Tuke, Dr. McVail.

Irish Branch Council: Sir Christopher Nixon, Sir John Wm. Moore.

PENAL CASES COMMITTEE.

Dr. Saundby, Mr. Tomes, Dr. Finlay, and Sir Christopher Nixon.

INSPECTION OF EXAMINATIONS.

Dr. FINLAY moved, Sir VICTOR HORSLEY seconded, and it was resolved:

> That in Standing Order (5) instead of the words "one or more inspectors" the following should be substituted, namely, "three inspectors, one for medicine, one for surgery, and one for midwifery."

Dr. FINLAY moved:

> That in Standing Order (7) instead of the words "two (hundred)" the word "one" be substituted.

Dr. SAUNDBY suggested that it should be remitted to the Executive Committee to determine the remuneration of inspectors.

Dr. McVail said that the remuneration should be according to the work done by the inspectors.

Mr. Tomes said that it would be better to adopt Dr. Saundby's suggestion, and this was agreed to:

On the motion of Dr. McVail, seconded by Dr. Finlay, it was resolved:

> That it be remitted to the Executive Committee to redraft the Standing Orders accordingly.

Proposed Election of Direct Representatives by Ballot.

Sir Victor Horsley moved:

> That the Executive Committee be instructed to approach the Privy Council, and to secure such alteration in the Regulations 8 and 10 of the Schedule of Instructions to Voters under Section 8 of the Medical Act, 1886, as will provide for the adoption of the principles of voting by ballot in lieu of the existing open system of election of Direct Representatives.

He was anxious before leaving the Council to do his share towards improving the method of electing Direct Representatives. Under existing circumstances, the constituency in England was so enormous that secret voting, as compared with open voting, had not the same importance as it had in Scotland and Ireland. They were all agreed that the ballot or secret voting was greatly to be recommended in the place of open voting. Secret voting was the method *par excellence* for electing Direct Representatives, and he could not see what possible objection there could be to adopting that principle.

Dr. Bruce seconded the resolution—not that it affected him personally, but he felt on general principles the same protection should be given to every voter as in parliamentary elections.

The President said he had made inquiries in regard to the matter, and he understood that the Privy Council, considering personal attendance to be practically impossible, adopted the method of voting papers as the best alternative.

Dr. Kidd said the election was carried out under regulations laid down by the Privy Council, and might be framed so as to meet the case. At present there was nothing to prevent personation, nor any attempt to define residence.

Dr. Norman Moore asked for instances of personation or for other reasons for adopting the ballot. Members of the universities made no objection to voting by papers in a public manner.

Sir T. Myles assured Dr. Norman Moore that open voting was an ever-present menace to the personal freedom of the voter. In Ireland personal feeling ran high. It would be quite possible to frame regulations by which the voter could be protected.

Dr. Saundby observed that there were two reasons for the motion. One was that personation might occur and the other that intimidation was practised, which constituted a ground for calling the attention of the Privy Council to the matter so that it might be remedied.

The President thought it would be a very strong thing to say that evidence had been brought before the Council of personation and intimidation; it was desirable to proceed cautiously.

Mr. George Brown said that it was possible that intimidation had taken place, and it should be guarded against as much as possible.

Sir Victor Horsley, in reply, said that the resolution was merely to refer the matter to the Executive Committee. He believed that when the matter was looked into in accordance with the terms of the resolution, it would be found to be simple, and one which might well be carried to the Privy Council. Replying to the President, he said that the Executive Committee would have power to inquire. If it found the proposition impracticable it would report accordingly to the next meeting of the Council.

The motion was then put and agreed to.

Practical Midwifery.

On the motion of Sir John Williams, seconded by Mr. George Jackson, the following report was received, entered on the minutes, and directed to be circulated amongst the licensing and teaching bodies for their observations:

REPORT
BY THE
STUDENTS' PRACTICAL MIDWIFERY COMMITTEE
ON THE
Operation of the Rules Regarding the Midwifery Practice Required of Candidates for Medical Qualifications.

Members.

Sir John Williams, *Chairman;* The President (*ex officio*), Mr. Jackson, Mr. Young, Dr. McVail, Dr. Caton, Sir Christopher Nixon, Dr. Barrs.

The Committee reports under a resolution passed by the Council on May 27th, 1905, which is as follows,

> That a Committee of the Council be appointed to inquire into the operation of the rules regarding the midwifery practice required of candidates for medical qualifications. (Minutes, Vol. XLII, p. 87.)

This covers a wider field than any reference previously made to any Committee appointed to inquire into the teaching of practical midwifery. The reference to the Committee which reported to the Council on November 29th, 1895, had special regard to attendance by the student on cases of labour under the supervision of a registered medical practitioner, and was limited to that one point.

The reference to the present Committee covers the whole teaching of practical midwifery.

With the object of obtaining information upon the subject, the following letter, signed by the President, together with the questions appended thereto, was forwarded to the licensing bodies which include teaching institutions, and to other teaching institutions which are recognized by the licensing bodies for subjects other than those of the first year's course:

General Council of Medical Education
and Registration of the United Kingdom,
299, Oxford Street, London, W.,
August 2nd, 1905.

Sir,—At the last session of this Council a Committee was appointed to inquire into the operation of the rules regarding the midwifery practice required of candidates for medical qualifications, and in connexion with this inquiry I have to ask in the name of the Council that you will be good enough to assist the Committee, which is collecting information as to the present position of midwifery teaching, by answering the following questions, so far as they relate to your School.

Yours faithfully,
(Signed) Donald MacAlister,
President.

QUESTIONS.

1. At what period of the curriculum is the student allowed to attend his cases of labour?
2. What parts of his general medical education must he have completed?
3. What special preparation is given him previous to his attendance on his cases?
4. Are students required to attend clinical instruction in a lying-in hospital or obstetric wards? If so, how long is the student required to attend?
5. What is the midwifery teaching staff at your school, and what amount of instruction do the members of it severally give?
6. What are the regulations of your school respecting attendance on cases of labour? Must the student attend them in your maternity department, or may he attend them elsewhere?
7. How many cases of labour must the student have attended under adequate supervision before he is allowed to attend by himself alone?
8. How many cases is the student required to conduct personally? At how many conducted by others must he be present?
9. What is the average number of cases attended by each student in your school?
10. What proportion of your students "attend for three months the indoor practice of a lying-in hospital" as an alternative to not less than twenty cases of labour?
11. Who signs the Student's Certificate of Attendance on cases of labour, and on what evidence?
12. What are your arrangements for the student attending cases of labour:
    (*a*) Where does he reside during the time of his attendance on cases?
    (*b*) Does he attend the cases alone or in the presence of and under the personal supervision of
        (α) The obstetric physician;
        (β) The obstetric resident;
        (γ) A midwife?

(c) What instruction is given

(α) During the progress of the labour;

(β) During the puerperal period; and by whom is it given?

13. What are your rules respecting the student's action in abnormal cases?

14. Under what circumstances must the student send for help, and to whom?

This letter was sent to thirty-eight teaching institutions. Answers have been received from thirty-seven.

SUMMARY OF THE ANSWERS.

Three of the institutions have no school of practical midwifery, and their students obtain their practice elsewhere. Several of the other schools have no maternity, and their students take out their midwifery practice in lying-in hospitals or elsewhere.

From thirty-two institutions more or less full answers have been received. These contain a mass of information, which may be summarized as follows:

1. The period of the curriculum at which the Student is allowed to attend cases of labour varies in different schools, for

He is allowed to attend in his third year in	16
He is allowed to attend in his fourth year in	15
At any time, but usually at the end of the third year, in ...	1

2. He will already have completed

Anatomy and physiology in	8
Anatomy and physiology and lectures on materia medica in	1
Anatomy and physiology and lectures on midwifery in ...	14
Anatomy and physiology, lectures on medicine, surgery, midwifery, and part of hospital work in	2
Anatomy and physiology, pathology, surgery, and first course of medicine in	1
Anatomy and physiology, clerking and dressing in ...	5
Anatomy and physiology, first year's hospital work, and lectures on medicine in	1

3. With regard to the special preparation of the student previous to his attendance on cases, there are

Lectures on midwifery in	6
Lectures on midwifery and tutorial classes in	20
He is required to attend one to six cases under adequate supervision (which appears to mean in the presence of the obstetric resident or other responsible officer) in ...	21
To pass a preliminary examination in midwifery in ...	3

The six institutions, which provide systematic lectures on midwifery only, possess no maternities, and their students take their midwifery practice in lying-in hospitals or maternities in the neighbourhood.

4. It is obligatory on the student to attend the practice of a lying-in hospital for three or six months in 6

It is not obligatory in 26

In one of the twenty-six, however, most of the students attend a lying-in hospital.

5. It is difficult to summarize the information furnished respecting the staffs of the various schools and the duties of their several members.

In Scotland none of the teaching institutions possess hospitals or maternities, and the students obtain their clinical teaching and practical experience in the hospitals of the town in which the school is situated. In towns in which there are several medical schools, the infirmaries, dispensaries, and lying-in hospitals appear to be used in common by the students of all the schools. A similar practice seems to prevail in Ireland and in the provincial towns of England, while in London each school has its own outdoor maternity.

There is one professor of or lecturer on midwifery in every school, with the exception of that of the Irish Conjoint Board.

There is one professor, with or without assistants, in ...	9
There are two physicians (one being lecturer or professor) in	16
There are three physicians (one being lecturer or professor) in	1
There are four physicians (one being lecturer or professor) in	2
There are eight physicians (one being lecturer or professor) in	2
There are twelve physicians (one being lecturer or professor) in	1

Among the four physicians at one school, the eight physicians at another, and the twelve at a third, are included the medical officers of the lying-in hospital.

In five schools the professor has one or two assistants. Tutorial classes, conducted by one of the physicians, a professor's assistant, tutor, or demonstrator, are held in twenty-one. In ten these classes are conducted by one of the physicians; in three by the assistant to the professor; and in five by the tutor, demonstrator, or obstetric resident. The main work of the obstetric resident, however, is to accompany the student to his early cases, to attend difficult or abnormal cases, and generally to superintend the work of the maternity.

The length of the period during which the classes are held varies from three months to one academic year, and their meetings from one to three a week.

Clinical lectures are also given, but the replies do not enable the Committee to state in every case whether they are on subjects in midwifery or on subjects in gynaecology.

6. Six schools require their students to attend the practice of a lying-in hospital for a period of three or six months.

Eight require them to attend their cases in the maternity of the school, while nineteen permit them to take their cases elsewhere.

7. With regard to the number of cases the student is required to attend under adequate supervision, before he is allowed to attend cases alone, it appears that in

Two	the number of cases	required is	6.
Five	,,	,,	5.
Five	,,	,,	3.
One	,,	,,	2.
One	,,	,,	a few.
Seven	,,	,,	1.

In one school he may attend alone from the first, and in two schools there is no rule.

8. The student is required to conduct personally 20 cases at least in 19

Three of these require in addition 5 to 10 cases conducted under supervision.

10 conducted personally and 10 under supervision in ...	1
12 conducted personally in	3
9 conducted personally and 3 by house-surgeon in ...	1
9 conducted in	1
6 at least conducted personally, not less than 12 in all, in...	1
No fixed number in	2

9. The average number of cases attended by each student may be stated thus:

Between	20 and 40	cases	in 16	schools.
,,	20 and 60	,,	1	,,
,,	40 and 60	,,	4	,,
,,	20 and 200	,,	1	,,
,,	12 and 16	,,	7	,,

10. In eleven schools none of the students attend for three months the indoor practice of a lying-in hospital "as an alternative to 20 cases of labour"; and of those in ten others practically none do so. About 50 per cent. of the students in one school take the alternative; about 6 or 7 per cent. of those in another attend the indoor practice of a lying-in hospital for three weeks; and about 15 per cent. of those in a third attend for one month—most of them in addition to attendance on 20 cases.

All or almost all the students of six schools take three months in a lying-in hospital.

11. The certificate of attendance on cases is signed by an officer of the school or hospital generally appointed or authorized to do so. He may be the obstetric physician, house-surgeon, resident obstetric officer, midwife, secretary, dean of faculty, warden, demonstrator of midwifery, medical superintendent, or the whole visiting staff.

The certificate is signed on the evidence of the hospital register, record, medical staff, personal voucher of clinical clerk, obstetric resident, signed letters of the maternity officer in personal charge of students, student's report on cases which he has "seen," or examination after six months' work in hospital.

12. During the period of his attendance on cases of labour

(a) The student resides—

In the hospital in	12	institutions.
In quarters provided in... ...	6	,,
In lodgings near or within a radius of a mile from the hospital in ...	11	,,

(b) In twelve institutions the student attends his cases under supervision—

That of the obstetric physician in	2	institutions.
That of the obstetric resident in	4	,,
That of the obstetric resident, qualified midwife, nurse, or midwife nurse in	3	,,

In three he attends or may attend all his cases alone.

In lying-in hospitals the student is always under the supervision of the matron, resident medical officer, or physician, and is placed in favourable circumstances to receive bedside instruction in the progress of labour and of the puerperium.

The replies received respecting the instruction given in outdoor maternities during labour and the puerperium are sufficient to indicate that it is at the best of a meagre character.

13 and 14. In all outdoor maternities the rule is, broadly, to send for the obstetric resident in every case which presents any abnormality. In several answers particular abnormal conditions are mentioned, in the presence of which the student is required to summon the obstetric physician or resident, such as when the student is in doubt as to the nature of the presentation, or is unable to make it out, abnormal presentation, protracted labour, retention of the placenta, accident, such as haemorrhage before or after delivery, convulsions, exhaustion; when during the puerperal period the mother or child is not doing well; or when the pulse beats are 100 per minute or the temperature 101° F.

Such is a summary of the answers received in reply to the questions sent to the schools.

OBSERVATIONS BY THE COMMITTEE.

On reviewing the facts your Committee find that:

(1) In eight schools the student is allowed to attend

cases of labour after he has passed the examination in anatomy and physiology.

(2) In one after having in addition attended lectures on materia medica.

(3) In fourteen after having attended systematic lectures on midwifery.

That is, the students of twenty-three schools are allowed to attend cases of labour before they have acquired any knowledge whatever of medicine and surgery.

In nineteen schools the student may attend his cases in the school maternity or elsewhere; in eight he must attend them in the school maternity with this amount of supervision—that he is accompanied by the resident obstetric to his first case or first few cases, and has directions to summon the resident when he thinks that necessary.

The average number of cases attended by each student is in excess of that required by the Council in twenty-two schools, while it is below the Council's minimum in seven.

The evidence upon which the certificate of attendance is signed would be satisfactory, were it in all cases based on definite records of cases attended, and not on personal belief or recollection.

The nature of the supervision exercised over the student may be gathered from the fact that in twenty-one institutions, after he has attended from 1 to 6 cases with a medical officer, he attends the rest alone. Twelve of the institutions reply that he attends under personal supervision, so that the words "personal supervision" in this connexion mean no more than that the student must send for the responsible officer when he thinks it necessary in accordance with the rules of the institution.

With regard to the instruction given during the progress of labour and the puerperium, full instruction is or may be given within the walls of a lying-in hospital; but in outdoor maternities this is not possible, inasmuch as the student attends the great majority of his cases alone. Moreover, the fact that the cases are scattered over an area whose radius is a mile or more makes it impracticable for the resident officer or physician to visit them so as to give personal instruction upon them to the student in attendance. Consequently the instruction in this respect given is of a very meagre character.

Conclusions.

Your Committee have come to the conclusion that the rule of the Council—that is, that the student should attend the indoor practice of a lying-in hospital or be present at not less than twenty labours, at least five of which shall be conducted throughout under the direct supervision of a registered practitioner—is not complied with by the majority of the schools.

It seems obvious that even if the course of study recommended were in itself sufficient, since its requirements are not complied with, there is no evidence to show that persons obtaining qualifications possess the required knowledge and skill for the efficient practice of midwifery.

Your Committee are of opinion that no student should be allowed to attend cases of labour until:

1. He has filled the posts of clinical clerk and surgical dresser;
2. Has attended a course of lectures on midwifery, surgery, and medicine; and
3. Has given undivided attendance upon the indoor practice of a lying-in hospital or the lying-in wards of a general hospital for at least one month, and has therein been properly instructed in the conduct of cases of labour.

It appears to your Committee that by such means alone can the normal progress of labour, the use of antiseptics in midwifery, the course of the puerperium, and the care of the mother and child, be properly and practically taught, and the safety of lying-in women and newborn infants be ensured.

Recommendations.

The Committee accordingly recommend:

1. That the following be substituted for the existing Recommendations of the Council in regard to instruction in midwifery:

"That every student should be required to have conducted not less than twenty cases of labour, subject to the following conditions:

"(*a*) Before the student is allowed to conduct the above-mentioned twenty cases of labour he should be required to have held the office of clinical medical clerk and of surgical dresser; to have attended a course of lectures in medicine, surgery, and midwifery; to have during one month given undivided attendance upon the indoor practice of a lying-in hospital or the lying-in wards of a general hospital; and to have therein attended cases of labour under the direct supervision of a medical officer of the hospital. He should further be required to produce a certificate from the authorities of the hospital showing that he is competent to undertake the conduct of ordinary cases.

"(*b*) No certificate that the student has conducted the above-mentioned twenty cases of labour should be accepted unless it is given by a member of the staff of a lying-in hospital or of the maternity charity of a general hospital."

2. That copies of this report and of the resolution of the Council thereupon be sent to all licensing bodies and medical schools in the United Kingdom.

Report of the Education Committee.

Dr. Mackay (Chairman) moved the adoption and approval of a report of the Education Committee. The relation of chemistry, physics, and biology to the curriculum was not, he said, a new question; it had been discussed over and over again since the five years' curriculum was adopted. It was premature to speak of the effect of the new regulations until the Council was in a position to ascertain what improvement had taken place by renewed inspection, and, therefore, the Committee asked that the matter might be left over. With regard to the length of the curriculum, there was no subject more important, and he ventured to suggest that by an alteration in arrangement of the subject very much time could be saved, namely, by taking the first year's anatomy along with the other sciences so as to enable it to be settled by the end of the second year, which would meet the grievances of many teachers.

Dr. Norman Moore, in seconding, agreed that the whole subject of the curriculum deserved the most thorough and prolonged consideration, in view of the great variety of changes in study which had taken place.

The motion was agreed to.

Report of Finance Committee.

At the instance of the Treasurers (Dr. Pye-Smith and Mr. Tomes) a report of the Finance Committee on income and expenditure, and embodying a comparison with former years, was received, entered on the minutes, and approved.

Report of the Students' Registration Committee.

On the motion of Sir Hugh Beevor (Chairman) seconded by Sir John Batty Tuke, a report of the Students' Registration Committee on exceptional cases, and recommending that the Hull Municipal Technical School (Day Classes) be added to the list of recognized institutions approved by the Council, was received and entered on the minutes.

Increase in the Number of Direct Representatives.

Mr. George Brown moved:

> That representations be made to the Privy Council that the time has arrived when the number of Direct Representatives for England, Scotland, and Ireland should be increased to the maximum number permitted by the Medical Act of 1886.

He said that if the powers given by Parliament were to be exercised with any effect the motion must be adopted at the present session. Twenty years ago the ratio of the number of Direct Representatives to those of corporate bodies was 1 to 5, but the number of the latter had since been raised to 29. The ratio of Direct Representatives to corporate representatives was now 1 to 6. This was a reason why the Council should approach the Privy Council for an increased number of Direct Representatives. In 1885 the number of practitioners on the *Register* in England and Wales was 16,224. Last year it was 24,351, showing an increase of nearly 50 per cent. In 1886 there was one representative to every 5,000 practitioners, at the present time there was one to 8,000. In Scotland in 1885 there were 2,299 on the *Register*, and last year there were 3,773, an increase of about 50 per cent., and in Ireland there were 2,458 in 1885 and 2,602 in 1905. The total on the *Register* in 1885 was 25,998, and in 1906 39,060, or 14,000 more practitioners, which he thought warranted an application for increased Direct Representation.

Sir VICTOR HORSLEY seconded the motion purely as a matter of justice. The Act of 1886, carried to its maximum extent, would not completely restore the balance but it would do something towards it. The Council had had an opportunity previously of passing the resolution, and he hoped that on this occasion it would rise to the proper sense of the proportionate representation that ought to exist in the Council,

Mr. JACKSON supported the motion as he seconded it last year.

Dr. LITTLE thought it impossible to add to the numbers of the Council as it would greatly increase the expense and greatly diminish its efficiency. The great duty of the Council was to take such steps as would enable the public to distinguish between qualified and unqualified practitioners, and the secondary part of the Council's duty was to look after the interests and the honour of the profession. That was a duty which was far more efficiently discharged by voluntary associations such as the British Medical Association, and was no part of the duty of the Council. The representatives of the corporations and universities were just as alive to the wants of the profession and as anxious to secure them as the Direct Representatives, and therefore there was no need for further Direct Representatives to look after the interests of the profession.

Sir JOHN MOORE observed that of the constituents one-third did not think it worth while to record their vote. In 1896, 40 per cent. of the voting papers sent out in England were not sent back, in 1897, 36 per cent., and the most startling fact of all, and one which to his mind settled the question effectually, at least for him, was that in 1901 57.27 per cent. of the papers sent out never returned. Therefore the profession did not want more direct representation than it at present had.

Sir JOHN BATTY TUKE supported the motion. He was prepared to advocate, here and elsewhere, an increase of direct representation, but he was not prepared to advocate indirect representation. He wished to explain. A question had been raised before the Council that day by Mr. Brown as to the manner in which the British Medical Association intended to lay out a plan of campaign. They were to select a certain number of gentlemen, from whom were to be selected three candidates, and each had signed the undertaking referred to previously. He objected to the scheme in three capacities: He objected to it at first as a member of the Council; secondly, as a registered practitioner; and thirdly, as a member of the British Medical Association. Gentlemen so elected would be the delegates of the Association. He had been on the Council very nearly twenty years, and during the whole of that time he could not recollect any member of Council who had accepted such a position. It was perfectly true that on certain occasions members of Council had to advocate the policy adopted by the body they represented; but no man ever came into the Council chamber bound hand and foot.

Sir VICTOR HORSLEY: Yes, bound hand and foot.

Sir JOHN B. TUKE held that it would be inimical to the freedom and independence of discussion which characterized the Council if any one came there pledged, as a condition of his nomination, to obey the instructions of an external organization. The President had drawn attention to the effect it might have on their judicial work. Sir John Batty Tuke held that, in view of the existing decisions of courts of law, the presence of men so pledged would have the effect of invalidating the judgement of the Council as a judicial tribunal.

The PRESIDENT, in reply to Sir Victor Horsley, ruled that the reference to the British Medical Association came within the terms of the resolution.

Sir JOHN B. TUKE, continuing, said it was within his knowledge that on several occasions the British Medical Association had acted as informers, and direct representatives were elected on this system. The fact that the Association was promoting a prosecution would invalidate the action of the Council. As a registered practitioner he objected to the disfranchisement of all those who were not members of the British Medical Association, and further, as a member of the British Medical Association, he objected to it on grounds that delegates so appointed would have no views except the views put forward by the British Medical Association. It would, he believed, destroy the *libertas arbitrii* which was at the bottom of the history of the Association. For these reasons he asked Mr. Brown to withdraw his motion until such time as it could be seen whether this plan was carried into effect. It was a very dangerous position to stand in, and if the Council were to vote in favour of this motion it would be adding, or might probably be adding, four instead of three Direct Representatives.

Dr. SAUNDBY thought Mr. Brown had made out a very good case for adding one additional Representative for England, but not for Scotland and Ireland; therefore he moved as an amendment:

> That it is expedient to confer upon the registered medical practitioners residing in England and Wales the power of returning an additional member to the Council.

He did not think anything had been put forward to show that the general practitioners in Scotland or Ireland were not adequately represented by one member each. With regard to Sir John B. Tuke's observations, he was sure the British Medical Association would never ask any gentleman to come there elected by the members of the organization to do any public or professional wrong in their work.

Sir THOMAS MYLES seconded the amendment. He thought the immense numerical increase of practitioners in England called for increased representation. He sympathized with Sir John Batty Tuke and Mr. George Brown, but he failed to see how a large body of 20,000 or 30,000 gentlemen could give expression to their views except through their Representatives, and he was sure their Representatives would not be any less independent than the present members of the Council.

Dr. BRUCE as a Direct Representative, thought the argument of territorial representation had very great force. He believed that some better system of administration would have to be considered on lines of granting larger powers to the Executive Committee. It was true that there was apathy in the profession; but there was great difficulty in canvassing a large constituency, and that had a great deal to do with the fact that many of those who had a vote did not choose to record it. If the Council did not go to the Privy Council, in his opinion it would be quite within the power of the Direct Representatives to approach it.

Dr. FINLAY would vote both against the resolution and the amendment. What was wanted in the Council was men who were engaged chiefly in teaching. The argument that because there was an increased number of corporate and university representatives therefore there should be an increase in the Direct Representatives, seemed to him to cut the other way.

The amendment was then put and declared lost.

At the request of Dr. SAUNDBY the names and numbers were taken down, when 14 voted against, 7 for, 9 did not vote, and 4 were absent.

Mr. BROWN, in reply, acknowledged the kindness of the Council in discussing the motion so tersely and fairly. He would like to state, with regard to the British Medical Association, that it only represented one half of the profession. If he thought that the British Medical Association could dictate who should sit on the Council he would not vote for his own motion; but he thought the action of the Association would be this, that every member would exercise his own judgement, and vote only for whom they thought best to represent them on the Council. He was fortified in that view by the fact that not more than five Divisions of the British Medical Association had taken any action with regard to the nomination of candidates. Many had passed a resolution to the effect that it would be undesirable for the British Medical Association to nominate candidates or determine who should come forward for election, and therefore they could leave the election of representatives to the good sense of the members of the British Medical Association.

The motion was then put and lost.

At the request of Mr. GEORGE BROWN the names and numbers were taken down, when 18 voted against, 6 for, 8 did not vote, and 5 were absent.

Dental Education and Registration Committee.

Dr. Norman Moore moved, Mr. Morris seconded, and it was resolved:

> That the following be the members of the Dental Education and Examination Committee: Mr. Tomes (Chairman), Mr. Morris, Dr. Finlay, Mr. Brown, Sir Thomas Myles, Dr. Lindsay Steven, Dr. Bennett.

Students' Registration Committee.

Sir Hugh Beevor moved, Dr. Norman Moore seconded, and it was resolved:

> That the following be the members of the Students' Registration Committee: Sir Hugh Beevor (Chairman), The President, Sir John Batty Tuke, Dr. Mackay, Dr. Norman Moore, Sir Christopher Nixon, Dr. Adye-Curran.

Vote of Thanks to Chairman.

On the motion of Dr. Norman Moore, seconded by Dr. Bennett, a hearty vote of thanks was accorded the Chairman for his conduct in the chair; and the President having expressed his acknowledgement, the proceedings terminated.

Meetings of Branches & Divisions.

[The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the Journal.]

EDINBURGH BRANCH:

North-East Edinburgh Division.

The annual meeting of the Division was held in the Royal College of Physicians on Thursday, May 17th, at 8.15 p.m. Dr. James Carmichael presided.

Election of Officers.—The following were elected office-bearers for this year:—*Chairman:* Dr. James Carmichael. *Vice-Chairman:* Dr. W. Leslie McKenzie. *Secretary:* Dr. G. Keppie Paterson. *Representative to Representative Meeting:* The Chairman. *Representative on Branch Council:* Dr. Andrew Balfour. *Executive Committee:* Dr. G. Fyfe, Dr. J. Cormack Smith, Dr. H. L. Calder, Dr. G. M. Johnston, Dr. James Cameron, and Dr. James Smith.

New Rule.—The following rule was adopted: "In cases of urgency the Chairman and Secretary shall have power to convene a special meeting, with not less than two clear days' notice."

Annual Representative Meeting.—The proposed Charter and the Provisional Agenda of the Representative Meeting were considered, and the Representative instructed on them.

Branch and Division Finance.—The inquiry on the system of Division and Branch finance was also discussed.

LANCASHIRE AND CHESHIRE BRANCH:

Blackburn Division.

The annual meeting of the Blackburn Division was held at the Old Bull Hotel, Blackburn, on Friday, May 25th, Dr. Ballantyne, who was voted to the Chair in the absence of Dr. Cunliffe, presiding.

Report of the Representatives.—Resolved: That at each annual meeting of this Division the representatives give an account of their work, attendances, etc., during the past year.

Secretary's Report.—The Secretary read his annual report.

Election of Officers.—The following officers were elected for the ensuing year:—*President:* Dr. Ballantyne. *Vice-President:* Dr. Wallers. *Secretary:* Dr. Greenwood. *Representative for Representative Meetings:* Dr. R. C. Holt. *Members of Branch Council:* Drs. Prebble and A. B. Craig. *Members of Executive Committee:* Drs. Macklin, Moir, Nash, Aitken.

Representative at Annual Meeting.—Resolved: That Dr. Prebble represent the Blackburn Division at the annual meeting of the Association in Toronto next August.

Resolutions of Lancashire and Cheshire Branch.—Resolved: That this Division instruct its Representatives on the Branch Council to the utmost of their power to oppose the resolutions put forward by order of the Council at the last meeting of the Lancashire and Cheshire Branch at Manchester.

Vote of Thanks.—It was resolved that a hearty vote of thanks be accorded to the officers for their services during the past year.

MALAYA BRANCH:

Singapore Division.

The Honorary Secretary of the Malaya Branch, under date of May 1st, has intimated to the General Secretary of the Association that the Singapore Division has voted in favour of the motion against out-patient departments given in the Supplement to the British Medical Journal of February 17th. The motion was carried by the casting vote of the President, the voting being even. The Division unanimously approved of the Royal Charter Scheme given in the Supplement of March 24th, and had no amendments to offer to the Draft Charter.

METROPOLITAN COUNTIES BRANCH:

City Division.

The fourth annual general meeting was held on Thursday, May 24th, at the Great Eastern Hotel, Liverpool Street, E.C. The Chairman of the Division, Dr. J. W. Hunt, presided.

Annual Report of Executive Committee.—This was read and adopted.

Election of Officers.—The following members were elected:—*Chairman:* Dr. Major Greenwood; *Vice-Chairman:* Mr. A. G. Southcombe; *Representatives on Branch Council:* Mr. H. E. Powell and Mr. Frederick Wallace; *Honorary Secretary and Treasurer:* Dr. E. W. Goodall; *Assistant Honorary Secretary:* Mr. C. R. Salisbury; *Other Members of Executive Committee:* Dr. J. O. Adams, Dr. G. P. Bate, Mr. J. Beddow, Mr. H. Bird, Mr. T. L. Brown, Mr. Hope Grant, Mr. A. Withers Green, Dr. J. W. Hunt, Dr. E. A. Lermitte, Dr. J. W. Oliver, Mr. J. Scott Sequeira, Dr. F. H. Spooner, Dr. W. Whitelaw, and Mr. H. Chisholm Will; *Representative at Representative Meetings:* Mr. Frederick Wallace; *Ethical Committee:* Dr. A. T. Davies, Mr. A. R. F. Evershed, Mr. Hope Grant, Dr. A. Hirst, Mr. H. E. Powell, Mr. Frederick Wallace, with the Chairman and Secretary.

Report of Delegates to Conference re Representation of the Branch on the Central Council.—The delegates, Mr. F. Wallace and Dr. Goodall reported that a meeting of delegates from the Stratford, Walthamstow, and City Divisions had been held; the delegates from the Tottenham Division had been prevented from attending. At this meeting it was resolved that Dr. St. Clair B. Shadwell be nominated by the eastern group of Divisions to represent the Branch on the Central Council.

Nomination of Representative of Branch on Central Council.—It was proposed by Dr. Major Greenwood, seconded by Mr. Chisholm Will, and unanimously resolved, that Dr. St. Clair B. Shadwell be nominated by the City Division to represent the Branch on the Council.

Notices of Motion, etc., for Representative Meeting.—The remainder of the provisional agenda paper was discussed, part having been considered at a previous meeting. While on several matters the wishes of the Division were expressed, generally it was left to the Representative to vote at the Representative Meeting as he thinks fit.

The meeting was then adjourned till 7 p.m. on Thursday, June 7th, at the Gaiety Restaurant. The adjourned meeting will be followed by the annual dinner at 7.30.

Marylebone Division.

A general meeting of the Marylebone Division was held at the rooms of the Medical Society, 11, Chandos Street, W., on Tuesday, May 22nd, at 5 p.m.

Confirmation of Minutes.—The minutes were signed as correct.

Nominations for Branch Council.—Dr. de Havilland Hall was nominated for Vice-President of the Branch Council, Mr. Betham Robinson for the Treasurership, and Mr. D'Arcy Power as Secretary.

Meeting of Representatives of Metropolitan Divisions.—The report of the Representatives appointed to attend a meeting of Representatives from the other Divisions of the Metropolitan Counties Branch to discuss the nomination of candidates for the Council of Association was received and approved of, and the Representatives were thanked for their services.

Nomination for Central Council.—Sir Victor Horsley was nominated as the candidate of the Marylebone Division for the Central Council.

Registration of Nurses.—(*a*) The Division approved in general of the method of registration of nurses proposed by the Select Committee of the House of Commons; (*b*) The Division approved of the separate registration of midwifery nurses.

Notices of Motion referred to the Division.—C. 4, 5; K. 15, 16, 17, 18, 19, 20, 21, 22, 25; M. 27, 28, 29, 30, 31, 32, 33, 34, 37, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59. The Representative of the Division was empowered to act as he thought best with regard to these resolutions.

THE annual meeting of the Division was held at the Rooms of the Royal Medical and Chirurgical Society, 20, Hanover Square, W., on Tuesday, May 29th, at 5 p.m., Dr. RADCLIFFE CROCKER in the chair.

Confirmation of Minutes.—The minutes of the previous general meeting were signed as correct.

Election of Officers.—The following officers were elected: *Chairman*, Dr. Lauriston Shaw; *Vice-Chairman*, Dr. Dutton; *Honorary Secretary and Treasurer*, Dr. Comyns Berkeley. The following Representatives of the Division on the Branch Council were elected: Dr. Dutton, Dr. Hawthorne, Dr. Lauriston Shaw, Dr. Lennard Williams, Dr. Atwood Thorne, Dr. Comyns Berkeley, Mr. Armour. Sir Victor Horsley was elected as the Representative of the Division at the Representative Meetings of the Association.

Report of Executive Committee.—The annual report of the Executive Committee was received and adopted.

Votes of Thanks.—Votes of thanks were passed to the Chairman and Honorary Secretary for their services during the past year.

RICHMOND DIVISION.

THE annual meeting of the Richmond Division of the Metropolitan Counties Branch was held on May 16th.

Nomination for Central Council.—Dr. F. G. Crookshank, of D'Antraigues, The Terrace, Barnes, S.W., was nominated for election to the Central Council of the Association.

Annual Representative Meeting.—Dr. R. Langdon-Down, of Normansfield, Hampton Wick, Middlesex, was re-elected Representative of the Richmond Division at the Annual Meeting of Representatives.

Representative on Branch Council.—Dr. Wilson, The Moorings, Kew Gardens, Surrey, was elected the Representative of the Division on the Branch Council.

Election of Honorary Secretary.—Dr. Charles S. Blair, of Richmond, was elected Honorary Secretary.

ST. PANCRAS AND ISLINGTON DIVISION.

THE annual meeting was held on May 25th at the St. Mary Islington Infirmary, Highgate Hill; Dr. FRANCIS J. BUCKELL in the chair.

Election of Officers.—The officers for the ensuing year were elected as follows: *Chairman*, Dr. Walter Smith of St. Pancras; *Vice-Chairman*, Dr. F. Greaves of Islington; *Secretary*, Dr. W. H. Yeld, of 15, Gloucester Road, Regent's Park, N.W.; *Representative for the Annual Meeting*, Dr. Walter Smith; *Representatives on the Branch Council*, Drs. Buckell, Walter Smith, and W. H. Yeld; and *Members of the Executive Committee*, Drs. Theobalds, Hearne, Crabb, Ladell, Berton, Buckell, and Wynn Westcott.

Annual Report and Balance Sheet.—The SECRETARY read the annual report and balance sheet, which were received and adopted and ordered to be entered on the minutes. The expenditure for the year was £16 12s.; eight meetings had been held; at six meetings lectures were given and some political matter discussed; two meetings were entirely devoted to medico-political discussions.

Annual Representative Meeting.—The provisional agenda for the Annual Representative Meeting to be held in July was considered seriatim, and the Representative was instructed to propose amendments as follows: on page 233, No. 35, to alter consulting the Divisions to taking the opinion of a Representative Meeting; No. 48, as to the supply of vaccine to add the word "free"; No. 49, to read "every registered medical practitioner to have the privileges of a public vaccinator"; No. 55, to omit the words "whose staff are general practitioners," and the word "specially."

Resolution as to Meetings.—It was resolved to hold no further meeting until October, unless required to discuss some medico-political business.

TOTTENHAM DIVISION.

THE annual meeting of the Division was held at the Tottenham Hospital on Friday, May 25th, at 4 p.m. Dr. E. HOOPER MAY presided.

Nominations for Central Council.—Dr. St. Clair Shadwell, of Walthamstow, was selected and nominated by the Division as the Representative of the Metropolitan Counties Branch on the Central Council of the Association.

Election of Officers.—The following officers were elected for the next session: *Chairman*, Dr. Leonard Grant; *Vice-Chairman*, Dr. C. E. Hutt; *Committee*, Drs. Hooper, Major Greenwood, Gogarty, R. E. Foott, and Tresilian. Dr. H. F. Staunton, 88, High Road, Wood Green, N., was elected Honorary Secretary and Treasurer.

Annual Representative Meeting.—The Division decided to leave it in the hands of Dr. Fuller to vote as he judged best for the interest of the members at the meeting of the Representatives of Divisions and Branches to be held in London at the end of next July in connexion with the annual meeting of the Association.

The late Dr. Tomlin.—A vote of condolence was passed to the widow and family of the late Dr. R. F. Tomlin, of 49, Lordship Lane, Wood Green, expressing their sympathy in their bereavement; and the Secretary was directed to write to Mrs. Tomlin expressing the sympathy of the members of the Division.

WANDSWORTH DIVISION.

THE annual meeting was held on Friday, May 25th, at 6.30 p.m., in the Battersea Town Hall, H. R. KER, F.R.C.S., Chairman, presiding.

Minutes.—It was resolved that the minutes should be read at the next meeting.

Correspondence.—Several communications were read and dealt with. A lengthy correspondence with reference to the proposed children's hospital in Wandsworth was deferred for consideration at a special meeting to be called for June 5th at the Wandsworth Town Hall.

Representative at Annual Representative Meeting.—Dr. L. S. McManus was duly elected for the year 1906-7.

Election of Officers and Committee.—The CHAIRMAN reported that the following had been duly elected to act for the year 1906-7: *Chairman*, Llewellyn Williams, L.R.C.S.; *Vice-Chairman*, Malcolm Mackintosh, M.D.; *Chairman-Elect*, Gilbert Richardson, M.R.C.P.; *Hon. Secretary and Treasurer*, E. Rowland Fothergill, M.B.; *Hon. Assistant Secretaries*, D. R. Powell Evans, M.R.C.S., Charles J. Martin, M.B., Allan J. Swallow, M.B.; *Representatives on the Metropolitan Branch Council*, M. G. Biggs, M.D., George Walker, M.R.C.S.; *Ordinary Members of the Committee*, (Balham) Hugh R. Ker, F.R.C.S., (Battersea) W. G. Gyton, M.R.C.S., (Clapham) F. Stocks, M.R.C.S., (Putney) J. Gay, M.R.C.S., (Tooting) H. T. Barron, M.D., (Wandsworth) E. J. Pritchard, M.R.C.S., (Wimbledon) P. B. Spurgin, M.R.C.S.

Elections to Ethical, Hospital, and Science Committees.—These were deferred to the special meeting to be held on June 5th.

Annual Report.—The following is the text of the annual report presented: Your Executive Committee submit the annual report of the Division to its members. They consider that, on perusing the same, the members will say that during the past twelve months the Association in their district has not been inactive, but has done good work toward advancing science and the honour and interests of the medical profession. The membership in May last was 151, and now is 175. There have been sixteen ordinary meetings held in various districts, at three of which science papers have been read, and at four clinical demonstrations have been given; various matters of medico-political interest have been discussed at thirteen meetings. The average attendance has been nineteen. During the past twelve months several meetings of special interest have been held. A public meeting was held in February under the auspices of this Division to bring before the profession and members of the laity the aims and objects of the National League for Physical Education and Development; but owing to various other important meetings being held on that date, the attendance, although over sixty in number, was not as large as it would otherwise have been. There appears to be no reason why this Division should not annually have under its auspices a public meeting for the prominent members of the laity resident within its area, at which a popular lecture on some scientific topic could be given. There have also been three conjoint meetings held. Two have been with the Chelsea and Richmond Divisions to consider the questions of the proposed general hospital at Putney and the Wandsworth Children's Cottage Hospital on West Hill. Steps are now being taken to make these hospitals a benefit and not a source of abuse in the district, while at the same time safeguarding the interests of the medical profession. The third conjoint meeting was held on April 19th with the neighbouring Divisions (Chelsea, Westminster, Richmond, Lambeth, Norwood, and Croydon) to consider the proposed Royal Charter, at which the general principles were discussed, and explanations of important points were made by Dr. Verrall, Chairman of the Organization Committee, and the Medical Secretary. Other conjoint meetings could be held with great advantage as occasion offers, as they result in diffusing interest, and aid towards the union of the profession. A meeting of the whole of the local profession was held in December to consider contract practice. Three clinical meetings have been held at the Bolingbroke Hospital, and one at the Wandsworth Infirmary. Your Committee feel sure the local profession have greatly appreciated these facilities, and are indebted to those who have kindly offered them. Scientific meetings have been held at Clapham Common, Balham, and Wimbledon. Your Committee will shortly consider what may be done to extend these opportunities, more especially by holding meetings for the reading of papers and the demonstration of pathological specimens at two or more places in the wide area the Division covers on the same evenings. The Division had at its meeting, in December, at Clapham, the opportunity of hearing able addresses by Sir W. Broadbent and Dr. West, who placed before the members the claims of the British Medical Benevolent Fund. This resulted in a large collection being made, and several new annual subscribers being obtained. In Division meetings the following subjects have been considered and dealt with: Contract practice, ambulance lectures and examinations, co-ordination of science work, election to the General Medical Council in November, 1906, the pathologists to the London County Council, the desirability of the representation of the London members on the Central Council of the Association being more widely distributed, nurse registration, parliamentary elections, audit of Coroner Troutbeck's accounts, subscribers' letters at the Incurable Hospital, Putney, etc. Your Executive Committee have also had under consideration the following, among other matters: Advertising with reference to a laundry in Wimbledon, improvement of the BRITISH MEDICAL JOURNAL, scheduled poisons, ambulances for transference of sick poor to the hospitals, out-patient cards at the Bolingbroke Hospital, the actions of local midwives, licences required for doctors' boys, local advertising by dentists and sellers of abortives, etc. Subcommittees have been formed, and have dealt with the following subjects: Contract practice, conferences with L.C.C. pathologists, registration of nurses, parliamentary candidates in January last, science work of the Division. On the Branch Council the following subjects have been brought forward by your Representatives: The payment of medical men called in by midwives, revision of the rules of the Midwives Board, the formation of a Medico-Political Committee of the Branch, a *conversazione* of the Branch to be held in July next. At the Annual Representative Meeting held in Leicester last July, your Representative brought forward, among others, the following subjects for consideration: Increased metropolitan representation on the Central Council, representation of the Association on outside bodies, amendments in death certificates and coroners' law, the recent reference to the late Prime Minister with regard to Coroner Troutbeck, etc. At the Annual Representative Meeting to be held in London in July next the following subjects, among others, will be brought forward by your Representative: Capitation grants to Divisions, due representation of the profession on the Nurses' Educational Council, and the questions of obtaining new Association offices and the engaging of District Medical Organizing Secretaries, etc. There has happily been no need to call together the Ethical Committee. The conjoint South London Hospital Committee, which came into existence as a result of the initiative of your Division, and on which you are represented, is still negotiating with King's College Hospital; and the prospects of a satisfactory scheme being elaborated to prevent this hospital when at Camberwell being injurious to the profession practising within its vicinity are hopeful. The Troutbeck controversy, your Committee regrets, has not as yet been satisfactorily completed, in spite of the Association objecting to the needless expenses incurred by that coroner in carrying out his duties. But it is some gratification to the profession to know that the list of eighteen special pathologists has, through the efforts of your Committee, been reduced to two, neither of whom are members of the Association. Were the profession united, even these two would find it to their own personal interest to cease to act in a way that can only be characterized as detrimental to the honour and interests of the profession. Correspondence has taken place with Mr. Coroner Troutbeck with reference to some recent public statements of his, and it is proposed shortly to publish this. The above numerous and important undertakings cannot be carried out without some expense. The total amount expended during the past year was £69 3s. 3d., or 8s. 3d. per member. Your Committee feel that the members will agree that this is not to be considered in any way extravagant. As the result of numerous expressions by the members that something of the sort should be attempted, representatives have been elected to serve on a Conjoint Committee formed by this Division, the S.W. London Medical Society, and the Wimbledon and District Medical Society, in order to investigate and report what steps it might be thought desirable to take in order to combine the scientific and ethical work of these three societies. Greater interest has been shown during the past year by the local members, and your Committee hope that still further efforts will be made to develop the Association in your midst for the benefit of the medical profession. They are gratified to see several new members coming forward to help on your Executive Committee. They take this opportunity of thanking all those members who during the past twelve months have aided by work on Committees and Deputations in furthering in your midst the development of science and the maintenance of the honour and interests of the medical profession. Increased membership is most desirable. Many in your district are still unattached. Your Committee would again appeal to each member to obtain at least one new member during the coming year. The report was discussed, members expressing their appreciation of the work undertaken by their Committee and representatives. The report was adopted.

Annual Dinner.—At 7.15 p.m. Mr. Hugh R. Ker, F.R.C.S., Chairman, received the guests of the Division, and the members and their friends. At 7.30 the company, numbering 82, adjourned to the large Banqueting Hall, which presented a brilliant appearance, having been tastefully decorated with flowers by the wife of the Chairman. Among the guests were Mr. Percy Thornton, M.P., Surgeon-General Keogh, C.B., the Mayors of Battersea, Wandsworth and Wimbledon, the late candidates for the four parliamentary districts within the Division area, the local members of the London County Council, the Chairman of the Wandsworth Board of Guardians, Sir Cooper Perry, the Chairman of the Central Council, the President of the Metropolitan Branch, the Chairman of the Organization Committee, most of the visiting staff of the Bolingbroke Hospital, the Editor of the JOURNAL, Dr. Ernest Jones (Harley Street), as well as members of the Association from various districts in London. Letters of regret were received from Sir Henry Kimber, Bart., M.P., absent through illness, and Sir Batty Tuke, M.P., and Sir Victor Horsley, F.R.S., who were prevented from attending owing to the excessive work of the General Medical Council. After the dinner there was a lengthy toast list to be dealt with, which was interspersed with glees by the Lyston Glee Singers (kindly provided by the Chairman). Surgeon-General KEOGH, replying for "The Army, Navy, and

Reserve Forces," gave a most important exposition of the present intentions of the War Office with regard to the training of the civilian medical practitioner in war requirements during times of peace. The company separated at a late hour, after a most enjoyable evening. This annual event bids fair to become the great function of the medical profession in this district, and is used as the means of bringing the laity into touch with the Association and its objects.

SOUTHERN BRANCH:
Salisbury Division.

The annual meeting was held on May 16th at the Infirmary, Salisbury, at 8.30 p.m., preceded by dinner at the County Hotel, Dr. Harris (Chairman) presiding.

Confirmation of Minutes.—The minutes of the last meeting were read and approved.

Letters.—Letters were read by the Secretary from Dr. Tubb Thomas, from the Clerk to the Wilts County Council, and from Mr. George Harris, Clerk to the Salisbury Education Committee.

Balance Sheet.—The Treasurer's account and balance sheet, showing a balance in hand of £13 9s. 3d., were approved by the meeting.

Election of Officers.—Dr. E. T. Fison was elected Chairman for the ensuing year, and thereupon took the chair resigned by Dr. Harris. The following officers were then elected:—*Vice-Chairman:* Dr. E. Farr (Andover). *Honorary Secretary and Treasurer:* J. E. Gordon. *Representative for Representative Meetings:* Mr. C. R. Straton. *Representatives on Branch Council:* Dr. Fison, Mr. L. S. Luckham. *Executive Committee:* Dr. Blackmore, Dr. Kempe, Mr. Luckham, Mr. March, Mr. Richmond, Mr. Willcox.

Vote of Thanks to Retiring Chairman.—Mr. Luckham proposed that a vote of thanks be given to the retiring chairman (Dr. Harris of Shaftesbury) for his services as chairman during the past year. This was seconded by Dr. Fison and carried unanimously.

Vote of Thanks to Honorary Secretary.—It was proposed by Mr. Manning and seconded by Mr. Willcox that a vote of thanks be accorded by this Division to the Honorary Secretary for his services, and this should be entered on the minutes. This was carried unanimously.

Annual Representative Meeting.—The business of the Annual Representative Meeting was considered by the meeting, and an instruction given to the Representative with regard to the fees for life assurance examinations as follows:

> That the fee for examinations in cases of ordinary life assurance should be at least 10s. 6d. for policies up to and including £100, and 21s. for policies over £100.

Proposed Royal Charter.—The proposed application for a Charter for the Association was considered, and the scheme met with the approval of this Division.

Division and Branch Finance.—The present system of Division and Branch finance was considered and replies forwarded to the questions submitted by the Organization Committee.

Rules of the Central Midwives Board.—These were considered. No suggestions were made. It was decided to send a copy of the following resolutions, passed at the last meeting, to the Secretary of the Central Midwives Board:

> That the forms sent by midwives when attending labour cases are misleading as regards the payment to medical men called in to assist midwives.
>
> That the midwives should be instructed that the sending of such a form does not entail the compulsory attendance of any medical men.
>
> That on each form this should be specified; also that the patient in question should be responsible for the medical fee.

Fees for Life Assurance Examinations.—The report of the Executive Committee on Fees for Examination of Cases for Life Assurance was presented. After consideration of the subject, the Committee recommended that concerted action with regard to payment for these examinations should be taken by individual members of the Division, and that this might be done in two ways: (*a*) By fixing the fee according to the amount of information to be obtained irrespective of the sum to be assured; (*b*) by fixing the fee according to the sum assured, that is, 10s. 6d. for £100, and amounts under that sum; 21s. for amounts over £100. It was stated by Mr. Straton that in 1907 this matter would be referred to the Divisions, and it would be inadvisable to take any active steps in the matter at present. This was agreed to by the meeting, and a resolution by Dr. Harris embodying suggestion (*b*) of the Executive Committee was carried unanimously, as an instruction to the Representative of the Division.

Direct Representation on General Medical Council.—A letter was read from the Secretary of the Wandsworth Division advocating the claims of Dr. McManus as a candidate for election on the General Medical Council.

Paper.—Mr. L. S. Luckham read a paper on a case of infantile melaena.

Vote of Thanks to Infirmary Committee.—It was proposed that a vote of thanks be given to the Committee of the Salisbury Infirmary for allowing the Division the use of their room for the meeting. This was carried unanimously. The meeting then terminated.

SOUTH-EASTERN BRANCH:
Folkestone Division.

The annual meeting of the Folkestone Division was held at Hotel Wampach on Tuesday, May 22nd, at 7.15 p.m. Dr. P. Lewis occupied the chair.

Confirmation of Minutes.—The minutes of the last annual meeting were read and confirmed.

Election of Officers.—The following officers were elected: *Chairman*, Mr. W. P. Barrett; *Vice-Chairman*, Mr. A. R. Davis; *Representative on Branch Council*, Dr. J. A. Menzies; *Executive Committee*, Dr. E. G. Sworder, Dr. E. J. G. Calverley, and Mr. M. Dobbs; *Honorary Secretary*, Dr. P. Vernon Dodd.

Report of Executive Committee.—The annual report of the Executive Committee was received and adopted.

Average Attendance.—The average attendance during the year was eighteen.

Dinner.—Fifteen members were present at the dinner.

Annual Meeting of Folkestone, Ashford, and Dover Constituency.

The annual meeting of the Folkestone, Ashford, and Dover constituency was held on the same day.

Election of Officers.—The following officers were elected: *Representative at Representative Meetings*, Mr. R. W. Ord. *Deputy Representative at Representative Meetings*, Dr. P. Vernon Dodd.

Annual Representative Meeting.—Some discussion took place concerning the business of the Annual Representative Meeting.

SOUTH MIDLAND BRANCH:
Northamptonshire Division.

A largely-attended meeting of the Division was held in the Library of the Northampton General Hospital on May 22nd, under the chairmanship of Dr. Clement Dukes.

Election of Officers, etc.—Mr. S. E. Basseter (Wollaston) was elected Representative of this Division and the Aylesbury Division. Mr. H. Cropley (Northampton) was elected Chairman for the ensuing year. The election of the other officers at the last meeting was confirmed.

South Northamptonshire Nursing Club.—Mr. J. Terry (Daventry) introduced a discussion on The South Northamptonshire Nursing Club—its merits and demerits: Is the British Medical Association to support it? While acknowledging that nursing clubs are of great benefit to the poor, Mr. Terry formulated the following indictment against the club under discussion: (1) The non-representation of medical men on the Committee. (2) Inefficient control of nurses, because of head No. 1. (3) That, though the club professes to be self-supporting, it is not so in the proper sense of the term—that is, the scheme could not be carried out without the aid of honorary subscribers. (4) The midwife question. No one, he said, objects to the service of a nurse in really poor cases, but even then there are objections—for example, the question of covering an unqualified assistant. The great objection, however, is that patients who can afford £1 10s., now need pay only 5s. for confinements. (5) Without medical control abuses easily creep in. An animated discussion ensued, in which it was generally agreed that the nurses were useful and helpful, and a boon to the poor, but that it was essential that they should be under proper medical control, and not act as unqualified medical practitioners, thereby injuring not only the medical practitioners but their patients also. Dr. **Clement Dukes** pointed out that these nursing associations were rising in every direction, and that a time was coming when the British Medical Association should formulate a code of rules which it should invite them to accept. On the motion of Mr. **Baxter**, seconded by Mr. **Linnell**, the following two propositions were submitted to the meeting, and carried unanimously:

> (1) That all the medical men practising in the nursing area of the South Northamptonshire Nursing Club should be members of the Committee.
>
> (2) That the nurse should only attend a case with the sanction of a medical man.

It was hoped that if these rules are accepted by the Nursing Association all difficulties will be able to be arranged. The Secretary was requested to communicate them to the Nursing Association.

Registration of Nurses.—The State registration of nurses was then briefly discussed, but no proposal was voted on by the Division.

SOUTH WALES AND MONMOUTHSHIRE BRANCH:

Monmouthshire Division.

The annual meeting of this Division was held in the Newport and Monmouthshire Hospital on Friday, May 25th, Dr. J. **Glendinning** in the chair.

Confirmation of Minutes.—The minutes of special meetings held on March 16th and on April 23rd were read and confirmed.

Apologies for Non-attendance.—Letters of regret for inability to attend from Drs. Redwood and Brown were read.

Installation of New Chairman.—Dr. S. Butler Mason having been elected Chairman for the ensuing year, Dr. Glendinning vacated the chair in his favour.

Vote of Thanks to Retiring Chairman.—A vote of thanks to Dr. Glendinning for the able manner in which he had conducted the business of the Division during his year of office was proposed by Dr. **Gratte**, seconded by Mr. **Greer**, and carried by acclamation. Dr. **Glendinning** briefly acknowledged the vote and thanked the members of the Division for the support they had given him.

Election of Officers and Council.—Dr. **Mulligan** proposed that Dr. W. D. Steel be elected Vice-Chairman for the ensuing year, and in doing so voiced the opinion of the meeting in expressing the sincere thanks of the Division to Dr. Steel for his services as Representative and its regret for his inability to continue the duties. The motion was seconded by Dr. **Essex**, and carried unanimously. Dr. **Steel** briefly returned thanks. On the proposition of Dr. T. M. **Thomas**, seconded by Dr. T. **McGinn**, the Honorary Secretaries, W. J. Greer and R. J. Coulter, were unanimously re-elected, and returned thanks for the expression of the continued confidence of the members of the Division. On the proposition of Dr. **Glendinning**, seconded by Mr. **Greer**, Dr. Essex was unanimously elected Representative of the Division at the Representative Meeting. The following were unanimously elected members of the Branch Council: Drs. Glendinning, Gamble, Gratte, and Marsh. A ballot having been taken, the following were elected on the Executive Committee: Drs. Griffiths, Haslett, Mulligan, and T. Morrell Thomas.

Report of Executive Committee.—The report of the Executive Committee was read. The Committee recommended the Division to approve of the Draft Royal Charter. The Committee expressed its opinion that there ought to be no curtailment of the work of the Medical Secretary's Department, but that in the interests of the Association and the profession it ought to be encouraged and extended. The report was adopted.

Annual Representative Meeting.—The Representative was given full power to act in relation to the business of the Representative Meeting.

Future Meetings of the Division.—It was decided to hold meetings of the Division quarterly as before, the annual meeting at Newport on the last Friday of May, a meeting at Pontypool on the first Friday of September, and the other meetings on the last Fridays of November and February at Newport and Abergavenny respectively. Authority was given to the Executive Committee to alter these dates if circumstances demand it.

SOUTH-WESTERN BRANCH:

Torquay Division.

The annual meeting of the Torquay Division was held on May 18th at the Torbay Hospital at 4.30 p.m.

Annual Report.—The **Honorary Secretary** read the following report on the work of the past year:

Mr. Chairman and Gentlemen,—In submitting to you my annual report I beg to point out the fact that the meetings of this Division being purely business ones, it is impossible to look for a large attendance or for an attendance in the least representative of the strength of the Division. That during the past year every meeting called has had a quorum is, I think, extremely creditable. The present membership of the Division is 87. There have been five meetings of the Division and one meeting of the Executive Committee. The average attendance at the Division at meetings has been $6\frac{4}{5}$. The Division appointed a Subcommittee to interview the candidates for Parliament to ascertain their views with regard to the Public Health Bill. The candidates' replies were circulated through the Division. The rules of the Central Midwives Board were referred to the Executive Committee. This Committee met on March 10th, and, after shortly discussing the rules, found them as satisfactory as possible. Dr. Eales brought up the question of the payment of doctors for certifying children unfit to attend school. The Secretary was instructed to write to the Education Department of Torquay on the matter. This Department, after considering the question, offered to pay 1s. for each certificate. This was accepted, and the Education Department has sent books of certificate forms to each doctor in Torquay. The proposed Charter for the Association was discussed at a meeting held on April 5th. It was thought that more time was required to carefully consider this matter, and that under no circumstances should the subscription to the Association ever exceed 30s.

Dr. **Odell** moved that the report be adopted. This was carried.

General Medical Council Election.—A letter from the Wandsworth Division *re* nominations by the Representative Meeting for the General Medical Council election, urging the claims of Dr. McManus, was read.

Election of Officers.—The election of officers for the ensuing year then took place. Dr. Odell was re-elected Chairman; Dr. Young Eales was elected Vice-Chairman; Mr. Wilkin was re-elected Honorary Secretary; Dr. Odell was re-elected Representative to the Representative Meeting; Dr. Eales was elected substitute; the following were elected Representatives on the Branch Council: Drs. J. H. Gough, A. E. Hayward, C. W. Vickers, G. C. Wilkin; Executive Committee, Drs. Carver, Culross, Dunlop, McKenzie, and Powell.

An Ambulance for Torquay.—Dr. **Carver** brought up the fact that there was no ambulance in Torquay. After the matter had been discussed, Dr. Carver moved the following resolution, which was seconded by Dr. **Tidswell**:

> That a suitable ambulance should be provided by the Borough of Torquay.

This was put to the meeting and carried unanimously.

YORKSHIRE BRANCH:

Bradford Division.

A special meeting of this Division was held at the Eye and Ear Hospital, Bradford, on Tuesday, May 22nd, at 8.30 p.m. Dr. **Mitchell** (Chairman) presided.

Confirmation of Minutes.—Dr. **Metcalfe** (Honorary Secretary) read the minutes of three meetings held in connexion with the Division, which were adopted unanimously.

Nomination of Officers.—The office-bearers for the session 1906-7 were nominated.

The Annual Meeting of the Association in 1907.—The following gentlemen, approved by the Executive Committee to act as a deputation to the Council for the purpose of inviting the Association to hold its annual general meeting in Bradford in 1907, were on the proposition of Dr. **Crowley**, seconded by Dr. J. H. **Bell**, unanimously elected: Sir George Robertson, K.C.S.I., M.P.; the President of the Yorkshire Branch; and Drs. and Messrs. Bronner, Basil Hall, Handcock, Goyder, Horrocks, Campbell, Evans, Bampton, Perry, Althorp, Little, and Metcalfe.

Voluntary Notification of Phthisis.—Dr. EVANS moved the following resolution:

> That this Division approves of a system of voluntary notification of phthisis in Bradford.

Dr. Evans, in moving his resolution, said he was anxious to obtain the views of the medical profession in Bradford on this subject. The function of the sanitary authority is to prevent, but not to cure, disease. He thought that voluntary notification would be of great assistance to his department in this way. Dr. CAMPBELL seconded the resolution. Drs. J. H. BELL, GOYDER, CROWLEY, BATESON, SHARP, and NEECH (Medical Officer of Health for Halifax) supported. Dr. HIME was antagonistic to the proposal. He showed a series of charts to demonstrate that notification had not reduced the incidence of any of the infectious diseases. Dr. MANKNELL was also opposed to the resolution, which was, however, on being put to the meeting, carried by a considerable majority.

Inquiry as to Public Vaccination.—Dr. HIME moved the following resolution:

> That in the opinion of the Bradford Division it is very important that the Council of the Association should take early steps to secure that witnesses representing the views of general practitioners, who are not public vaccinators, should be heard at the inquiry about to be held on the subject of public vaccination.

Dr. Hime's chief objection to the present method of carrying out public vaccination was the domiciliary visit. Mr. BECKTON seconded. Dr. J. H. BELL considered the resolution unnecessary. Mr. WHERRY WILLSON considered that public vaccination should be transferred to the department of the medical officer of health. Dr. DRURY (Halifax), who had been invited by Dr. Hime to be present, was against the resolution, although he considered it practically harmless. On being put to the vote the resolution was declared carried.

☞ *To ensure the insertion of notices in this column, they must be received at the Central Offices of the Association not later than the first post on Tuesday.*

Association Notices.

1906 ANNUAL GENERAL MEETING.

The Annual General Meeting of the British Medical Association will be held in the Caxton Hall, Caxton Street, Victoria Street, London, S.W., on Tuesday, July 24th at 10 o'clock in the forenoon.

ANNUAL REPRESENTATIVE MEETING.

The Annual Representative Meeting will take place in the Caxton Hall, Caxton Street, Victoria Street, London, S.W., on Tuesday, July 24th, immediately after the Annual General Meeting, which will be held at 10 o'clock in the forenoon; on Wednesday, July 25th, at 10 a.m.; on Thursday, July 26th, at 10 a.m. if required; also on Friday, July 27th, at 10 a.m. if required.

BY ORDER OF THE COUNCIL,
GUY ELLISTON, *General Secretary.*

LIBRARY OF THE BRITISH MEDICAL ASSOCIATION.

MEMBERS are reminded that the Library and Writing Rooms of the Association are fitted up for the accommodation of the members in commodious apartments, at the office of the Association, 429, Strand. The rooms are open from 10 a.m. to 5 p.m., except on Saturdays, when they close at 2 p.m. Members can have their letters addressed to them at the office.

BRANCH AND DIVISION MEETINGS TO BE HELD.

ABERDEEN BRANCH.—Election of Member of Council.—Nominations are requested to be sent to Dr. J. F. Christie, Honorary Secretary, 7, Alford Place, Aberdeen, on or before June 2nd. Each candidate must be nominated by not less than three members.

BIRMINGHAM BRANCH.—The annual meeting of the Birmingham Branch will be held at the Medical Institute on Thursday, June 14th, at 3.30 p.m.—T. SYDNEY SHORT, Honorary Secretary, 85, Edmund Street, Birmingham.

BIRMINGHAM BRANCH: CENTRAL DIVISION.—The annual meeting will be held at the Medical Institute on Wednesday, June 6th, at 4 p.m. Business: (1) Election of officers, members of Branch Council, and of Executive Committee. (2) To receive the annual report. (3) To instruct the Representative (SUPPLEMENT, BRITISH MEDICAL JOURNAL, May 5th). (4) Vote of thanks to retiring officers. (5) Any other business.—E. D. KIRBY, Honorary Secretary.

BIRMINGHAM BRANCH: COVENTRY DIVISION.—The annual meeting of this Division will be held at the Coventry and Warwickshire Hospital on Wednesday, June 13th, at 8.30 p.m. Agenda: (1) To elect officers and the Executive Committee for the year. (2) To receive the annual report of the Executive Committee. (3) The Committee will recommend the adoption of the following resolution: "That no member of the profession in the area of the Division shall take over the medical officership of one of the Friendly Societies connected with the dispensary in the event of such society seceding from that institution before the satisfactory termination of the present dispute." (4) Dr. Milner Moore will move that the Division approve the proposed application by the Association for a Royal Charter. (5) To thank the Committee of the Coventry and Warwickshire Hospital for the continued use of their Board Room for the meetings of the Division.—E. H. SNELL, Honorary Secretary.

BIRMINGHAM BRANCH: TAMWORTH AND NUNEATON DIVISION.—A combined meeting of the Tamworth and Nuneaton Division with the Coventry Division will be held at the Coventry and Warwickshire Hospital, Coventry, on Tuesday, June 19th, at 3.30 p.m., for the purpose of electing a Joint Representative to represent them at the Annual Representative Meeting, and to instruct him in regard to matters arising at that meeting (see SUPPLEMENT, BRITISH MEDICAL JOURNAL, May 5th).—E. H. SNELL, Secretary of the Constituency.

BORDER COUNTIES BRANCH.—The annual meeting of this Branch will take place in the County Hotel, Carlisle, on Friday, June 29th, and not as previously announced.—F. R. HILL, Honorary Secretary.

CAMBRIDGE AND HUNTINGDON BRANCH.—The annual meeting of the Branch will be held at Peterborough on Thursday, June 14th. Any member having communications to make should apply to the Honorary Secretary, F. E. APTHORPE WEBB, Grafton House, Cambridge.

CAMBRIDGE AND HUNTINGDON BRANCH.—Notice of Election of a Member of Council.—Nominations for a Member of the Council, which must be signed by three members of the Branch, should be sent to the Honorary Secretary on or before Saturday, June 2nd.—F. E. APTHORPE WEBB, Grafton House, Cambridge, Honorary Secretary.

DORSET AND WEST HANTS BRANCH: WEST DORSET DIVISION.—The annual meeting of the Division will be held on Wednesday, June 13th, at the County Hospital, Dorchester, at 3 p.m. Agenda: (1) Minutes. (2) To elect officers, namely—Chairman, Vice-Chairman, and Honorary Secretary. (3) To elect the Executive Committee of the Division. (4) To elect Representatives of the Division on the Branch Council. (5) To elect the Representative of the Division at Representative Meetings of the Association. (6) To consider the question of altering the date of the annual meeting of the Division from June to May. (7) To consider matters referred to Divisions. (8) Any other business. Afternoon tea.—J. COMYNS LEACH, Sturminster Newton, Honorary Secretary.

DUNDEE BRANCH.—The annual meeting of this Branch will be held in the Students' Union, Dundee, on Friday, June 8th, at 4 o'clock. Business: Election of office bearers. Proposed adoption of the "Bradford Rules," etc.—R. C. BUIST and A. P. LOW, Honorary Secretaries.

EAST ANGLIAN BRANCH.—The annual meeting of the East Anglian Branch will be held at the Palace Hotel, Southend-on-Sea, on Tuesday, June 26th. Programme of Proceedings: 12.30, Council meeting. 12.45, General meeting. Agenda: (1) Minutes of last meeting. (2) Report of the Council.

(3) Report of election of officers. 1.54, Luncheon, by kind invitation of the President-elect, Dr. Clough Waters, at the Palace Hotel. 2.30, Resumed general meeting. Introduction of Dr. Clough Waters as President of the Branch, by Dr. Barton. (4) President's address. (5) Address by Sir Frederick Treves, Bart.. G.C.V.O., C.B., LL.D., Serjeant-Surgeon to His Majesty the King. 4 to 6, Garden party in the Shrubbery, by kind invitation of the Chairman and Members of the South Essex Division. By the kind courtesy of the Commodore and Committee of the Alexandra Yacht Club, members attending are considered to be members for the day.—B. H. Nicholson, H. A. Ballance, and J. Gutch, Honorary Secretaries.

East Anglian Branch: West Norfolk Division.—The Annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. Gardiner, King's Lynn, Honorary Secretary.

East York and North Lincoln Branch.—The annual meeting will be held at the Grimsby and District Hospital on Thursday, June 7th, at 4.30 p.m., and will be followed by the annual dinner.—E. M. Hainworth, Honorary Secretary, Hull.

Edinburgh Branch: South-Eastern Counties Division—The annual meeting of this Division will be held in the King's Arms Hotel, Melrose, on the afternoon of Friday, June 22nd, Dr. Cullen, Chairman, presiding. Business: (1) Election of office-bearers. (2) Instructions to Representative.—W. Hall Calvert, Honorary Secretary.

Edinburgh Branch: Southern Division.—The annual meeting of the Division will be held in the Oddfellows' Hall, Forrest Road, on Friday, June 8th, at 8.15 p.m. Business: (1) Minutes. (2) Annual report. (3) Secretary's statement. (4) Election of officers. (5) Election of Representative to Representative Meetings. (6) Election of Representatives on Branch Council. (7) Election of Executive Committee. (8) Instructions to Representative to Representative Meetings. (9) Alteration of Rule 11. (10) Any other competent business.—Michael Dewar, Honorary Secretary, 24, Lauriston Place, Edinburgh.

Edinburgh and Fife (Combined) Branches.—Nominations for two Members of Council will be received by Dr. Logan Turner, 23, Walker Street, Edinburgh, on or before June 2nd. Nominations must be signed by two members.—Norman Walker, Honorary Secretary.

Glasgow and West of Scotland Branch.—Election of Representatives on Central Council. In accordance with By-law 24, nominations, each signed by three members of the Branch, must reach the Honorary Secretary on or before Monday, June 4th.—Dr. James H. Nicoll, 4, Woodside Place, Glasgow, Honorary Secretary.

Leinster and South-East of Ireland Branch.—Nominations of candidates for election as members of Central Council must be received by the undersigned on or before June 12th.—Arthur H. White, Honorary Secretary Leinster Branch, Malvern, Terenure Road, Dublin.

Metropolitan Counties Branch.—Notice is hereby given that voting papers for electing the Metropolitan Counties Branch Representatives on the Central Council will be sent out on or before June 16th, and must be returned by June 20th. Notice is also given that the annual meeting of the Branch for the declaration of the poll of officers and for amending the ethical and financial rules, and other business, will be held on Tuesday, June 26th.—Frederick J. Smith and Ernest Clarke, Honorary Secretaries.

Midland Branch.—The annual meeting of this Branch will be held at the County Hospital, Lincoln, on Thursday, June 7th, at 2.15. Agenda: Minutes. Report of Council. Election of two Representatives of Branch on General Council (the only nominations received are Dr. Pope and Dr. Carline, who will therefore be elected). Election of Branch officers. Election of Honorary Secretary of the Branch (Dr. Astley Clarke does not seek re-election). Election of President-elect for 1907-8. Suggested re-combination of Divisions in Lincolnshire. Any other business. Address by the new President. The President and Mrs. Mansel Sympson will be "at home" to the members of the Branch in the Castle grounds from 4 to 6 p.m. Luncheon: The President will be glad to entertain members to lunch at his house, Deloraine Court, James Street from 1 to 2 p.m. The annual dinner will be held at the White Hart Hotel at 6 p.m. Tickets, 7s. 6d. each, exclusive of wine. Members desiring to dine are requested to notify the fact to Dr. E. Mausel Sympson, Lincoln, before Monday, June 4th.—Astley V. Clarke, M.D., Honorary Secretary and Treasurer.

Munster Branch.—Nominations will be received by me up to June 16th for Elective Member of Central Council, British Medical Association, in accordance with By-law 24.—Philip G. Lee, Honorary Secretary, 26, Patrick's Hill, Cork.

Southern Branch: Southampton Division.—The annual meeting of the Division will be held on Friday, June 8th, in the Lesser Philharmonic Hall, Southampton, at 3 30 p.m. Business: (1) Minutes. (2) Communications. (3) (*a*) To elect officers, the Representative of the Division on the Branch Council, and the ordinary members of the Executive Committee; (*b*) in conjunction with the Channel Islands Division—1. to elect the Representative of the Constituency in Representative Meetings of the Association; 2. to consider the business of the Annual Representative Meeting and to instruct the Representative as to how the members of the constituency desire him to vote thereat; (*c*) to receive the annual report of the Executive Committee. (4) To consider (*a*) the report of the committee on the formation of sections, postponed from the last annual meeting; (*b*) matters postponed from last two ordinary meetings; (*c*) hospital out-patient department (vide Supplement, British Medical Journal, February 17th); (*d*) nurses' registration (vide Supplement, British Medical Journal, March 3rd); (*e*) application for Royal Charter (vide Supplement, British Medical Journal, March 24th); (*f*) annual report of Council (vide Supplement, British Medical Journal, April 28th). The reports and the various notices of motion received for discussion by the Representative Meeting at the next Annual Meeting of the Association will be found in the Supplements of the British Medical Journal.—A. B. Wade and A. A. Mackeith, Honorary Secretaries.

South-Eastern Branch.—The sixty-second annual meeting will be held at the Crystal Palace on Wednesday, June 27th, at 2.15 p.m. Dr. Hetley (President-elect) kindly invites members to lunch at the Crystal Palace from 1 to 2 p.m. Agenda: In addition to the business of an ordinary meeting: (1) To receive the report of the election of new officers, who shall thereupon take office. (2) To receive the report of the Council on the affairs of the Branch and the annual financial statement. After the meeting, entertainments will be provided in the Crystal Palace, and expeditions will be arranged to the Norwood Cottage Hospital, the Norwood Sanatorium for the Treatment of Alcohol and Drug Inebriety, and the Dulwich Gallery. Dinner at the Crystal Palace at 6.15 p.m. (for 6.30 p.m.); charge 7s. Wine will be provided by local members. Those who propose to be present at lunch or dinner are requested to signify their intention to Dr. Prangley, 197, Anerley Road, S.E., not later than Saturday, June 23rd.—H. M. Stewart, Honorary Secretary.

South-Eastern Branch: Canterbury and Faversham Division.—The annual meeting of this Division will be held in the Library of the Canterbury Hospital on June 7th, at 3 p.m., Dr. T. Whitehead Reid presiding. Agenda: (1) Minutes. (2) Time, place, and Chairman of next meeting. (3) Election of officers for ensuing year. (4) Other business. At 4 o'clock members and friends will be driven to the Cathedral, the Dean of Canterbury having kindly consented to show them over it, after which a visit will be paid to the Canterbury Wateworks, where the various processes will be explained. Dinner will be served at the County Hotel at 6.15 p.m., charge 5s. Members who intend to be present at the dinner are requested to send a notification, not later than June 6th, to A. R. Henchley, Honorary Secretary and Treasurer, Canterbury.

A combined meeting of the Isle of Thanet, Canterbury, and Faversham Divisions will be held in the Hospital Library at Canterbury on June 7th, at 2.45 p.m., for the purpose of electing a Representative of the above Divisions for the annual meeting of Representatives.—Hugh M. Raven, Honorary Secretary, Isle of Thanet Division, Broadstairs.

South-Eastern Branch: Guildford Division.—The annual meeting will be held at the Royal Surrey County Hospital, Guildford, on Wednesday, June 20th, at 4 30 p.m. Agenda: (1) Minutes. (2) Election of officers, Representatives on Branch Council and in Representative Meetings, and members of Executive Committee. (3) To receive annual report. (4) Business of the Annual Representative Meeting. (5) Any other business. (6) Paper by Mr. G. Sichel, F.R.C.S.: Some remarks on radiotherapy. Tea will be provided at 4.15. The Honorary Secretary will be glad to receive any nominations for the above offices, and to hear from any members wishing to show cases or specimens.—E. J. Smyth, Maythorne, Epsom Road, Guildford, Honorary Secretary.

South-Eastern Branch: Norwood Division.—The annual meeting of the Division will take place at the Art Club, Blackheath, on Thursday, June 14th, at 4 p.m., Ralph Gooding, M.D., of Blackheath, in the chair. Dinner at 6 p.m.; charge 7s., exclusive of wine. Agenda: (1) Minutes of last meeting. (2) To decide where the next meeting shall be held, and to nominate a member of the Division to take the chair thereat. (3) To elect officers, the Representatives of the Division on the Branch Council, and ordinary members of Executive Committee. (4) To elect the Representative of the Division in Representative meetings of the Association. (5) To receive the annual report of the Executive Committee. (6) To consider business of Annual Representative Meeting. (7) To consider existing rules and discuss whether any alterations are necessary. (8) Any other business. The following papers will be read: Dr. C. R. Box, Bronchiectasis in Children (with lantern slides); W. Arbuthnot Lane, M.S., Defective Intestinal Drainage; Dr. Walter W. H. Tate, Indications for the Surgical Treatment of Uterine Fibroids. Exhibition of instruments, etc., by Messrs. Burroughs and Wellcome and Messrs. Arnold and Son. Members desirous of exhibiting specimens or reading notes of cases are invited to communicate at once with the Honorary Secretary. All members of the South-Eastern Branch are invited to attend and to introduce professional friends, but will be unable to vote on Divisional questions. The Art Club is at the end of Bennett Park, three minutes from Blackheath Station, S.E.R. The Honorary Secretary would be much obliged if members would kindly inform him by postcard, to reach him by the first post on Tuesday before the meeting, whether they intend, if possible, to be present at the meeting, and if likely to remain to dinner.—Henry J. Prangley, Honorary Secretary, Arthur W. Soper, Assistant Honorary Secretary, Anerley.

South-Eastern of Ireland Branch.—An ordinary meeting and meeting of the Council will be held at the Town Hall, Clonmel, on June 13th, at 11 o'clock. Agenda: (1) Minutes. (2) To impress on Divisions the expediency of adopting Ethical Rules and of appointing Ethical or Executive Committees respectively. (3) To elect Ethical Committee for Branch. (4) To investigate ethical case. (3 and 4 by Branch Council only.) —J. Quirke, Piltown, co. Kilkenny, Honorary Secretary.

South Midland Branch: Aylesbury Division.—A meeting of the above will be held in the Board Room of the Royal Bucks Hospital on Tuesday, June 26th, at 2.30 p.m.: Agenda: (1) The minutes of the last meeting. (2) To consider whether or not it is advisable to continue the Aylesbury Division as a separate Division of the British Medical Association.—Horace Rose, Honorary Secretary, Melrose, Aylesbury.

South Midland Branch: Bedfordshire and Hertfordshire Division.—The annual meeting of this Division will be held at the Bedford County Hospital on Friday, June 8th, at 2.45 p.m. Agenda: (1) The minutes of the last annual meeting. (2) The annual report of the Executive Committee. (3) The election of officers for the ensuing year. (4) Letters and communications and any other business. (5) W. Hale White, M.D., Physician to Guy's Hospital, will read a paper on "Some Common Cases of Haematemesis which are frequently misunderstood."—H. Savory, Honorary Secretary, Bedford.

South Wales and Monmouthshire Branch.—The annual meeting will be held on Thursday, June 14th, at the Hospital, Swansea, at 4.30 p.m. Council meeting at 3.30 p.m. The annual dinner will take place at the Hotel Metropole at 6.30 p.m.

South-Western Branch.—The sixty-seventh annual meeting will be held on June 14th at the Royal Devon and Exeter Hospital, Exeter, at 3 p.m., when Mr. G. Jackson will resign the chair to Mr. E. J. Domville, who will deliver his inaugural address. The report of the Branch Council and annual financial statement for the year 1905-6 will be presented to the meeting, and the officers of the Branch will be elected for the year 1906-7. Luncheon, by kind invitation of the President-Elect, will take place from 12.30 p.m. to 2.30 p.m. at Northernhay House. The annual dinner will be held at 7 p.m. at the London (Pople's) Hotel. Tickets (exclusive of wine) 6s. each, which can be had from Dr. Solly, 40, Southernhay, the Honorary Treasurer of the Dinner Committee. Arrangements have been made for members who desire it to play either golf or croquet, and to visit the Cathedral, Chapter House, Library, Guildhall, etc.; and by the Exeter members, members are nvited to a Garden Party to be held by permission of the Lord Bishop of Exeter and Mrs. Robertson at the Palace from 4.30 o 6 p.m. Members wishing to play golf are requested to send heir names to Dr. Raglan Thomas, 13, West Southernhay, Exeter; and for croquet to Mr. A. C. Roper, The Shrubbery, Exeter, before June 10th. Members who attend the Garden Party are invited to bring their wives or lady friends, limited o two. It is particularly requested that members requiring inner tickets send their names with P.O. for 6s. to Dr. Solly, 0, Southernhay, Exeter, before June 10th. Members wishing o be accommodated with bed and breakfast are invited to end their names to Dr. Miller, 14, East Southernhay, Exeter, who will endeavour to arrange matters. The Honorary Secretary takes this opportunity of informing members that he does not desire to offer himself for re-election.—G. Young Eales Torquay, Honorary Secretary.

Ulster and Connaught Branches.—The annual meeting will be held on Thursday, June 21st, when the following officers will be elected:—President, Secretary, Treasurer, two Members of the Central Council to represent the Ulster and Connaught Branches, and a member of the Irish Committee (who shall not be resident in Belfast). Nominations for these posts must be sent to the Honorary Secretary not later than Saturday, June 2nd, signed by two members in the case of each except for Members of Central Council, in which case the nomination must be signed by three members. Members having business or scientific communications to make to the meeting will please send the Honorary Secretary notice of the same not later than June 12th.—Cecil E. Shaw, Honorary Secretary, Belfast.

West Somerset Branch.—The sixty-third annual meeting of this Branch will be held at the London Hotel, Taunton, at 12.15 p.m., on Friday, June 22nd, when the new President, Dr. R. Liddon Meade-King will take the chair. Agenda: Minutes of last meeting; annual report of Council; treasurer's accounts; election of officers; President's address (notes on a seventeenth century textbook of medicine); consideration of agenda of Representative Meeting on July 24th. This, as appearing in the Supplement to the British Medical Journal of May 5th, will be considered so far as time will permit. Members are requested to acquaint themselves with any particular item on that agenda which they wish to bring to the notice of the Branch. Luncheon will be served at 1.30 p.m. This will be paid for out of the Branch funds in the case of members signifying to the Honorary Secretary their intention of being present by June 19th. For others, and guests, a charge of 3s. per head will be made, in all cases exclusive of wine, etc. After lunch those present will become the guests of the President, and will be driven to Pickeridge Hill, where a golf match will be played between the medical members of the Pickeridge Club and the rest of the Branch. They will also be entertained there to tea. The return journey will be made in time to suit the convenience of those having to catch trains from Taunton station. In the event of the day proving wet an alternative programme will be arranged.—W. B. Winckworth, Honorary Secretary.

Yorkshire Branch.—The annual meeting of this Branch will be held at the Eye and Ear Hospital, Bradford, on Wednesday, June 13th, at 3.30. Members intending to read papers, make any communication, propose new members, etc., are requested to communicate with me at once. The annual dinner will take place at the Midland Hotel at 6.30.—Adolph Bronner, Honorary Secretary, 33, Manor Row, Bradford.

CENTRAL MIDWIVES BOARD.

A meeting of the Central Midwives Board was held on May 24th at 6, Suffolk Street, Pall Mall, with Dr. F. H. Champneys in the chair.

Proposed Examinations in Dublin.

A letter was read from the Privy Council enclosing a copy of a resolution passed by the Board of the National Maternity Hospital, Dublin, in favour of examinations being held by the Central Midwives Board in Dublin. A letter from the Secretary of the Rotunda Hospital, Dublin, was also read to the same effect. A further letter from the Privy Council, dated May 23rd, was read, enclosing a copy of a memorandum given to the Lord President of the Council during a recent visit to Dublin. In the course of the discussion on this subject the Board was reminded that on April 10th, 1906, a resolution was passed that the Board was not prepared to hold examinations outside the area of the Act. The Board decided that the question should be referred to the Standing Committee for consideration and report, and the Secretary of the Board was instructed to reply to the Clerk of the Privy Council, stating that the Central Midwives Board would give its best attention to the matter and reply in due course.

Certified Midwives acting as Monthly Nurses.

A communication from Dr. F. E. Fremantle, Medical Officer of Health, Hertfordshire, raised the point whether a certified midwife acting under a qualified medical practitioner was bound to keep a register. The Board decided that a certified midwife when acting as a monthly nurse need not keep a register. The following words were subsequently added to this ruling: "In cases of doubt, reference should be made to the medical practitioner in charge of the case."

New Offices for the Board.

It was reported that the Board after June 24th, 1906, will move its offices to Caxton House, Westminster.

Three Midwives Cautioned.

The Penal Cases Committee reported that it had considered a letter from Dr. Niven, Medical Officer of Health, Manchester, reporting the finding by the local supervising authority of a prima facie case of negligence against Ada Fisher, a certified midwife, together with her defence and the report of the solicitor thereon. The Board adopted the recommendation of the Committee that the midwife be warned to be more careful in the future as to antiseptic washing before examination of patients.

The Penal Cases Committee also reported that it had considered a letter from the Clerk of the London County Council reporting Mary Cecilia Lillie, certified midwife, and Ada Mary Roodhouse, certified midwife, as guilty of persistent disobedience to Rule E 19 (*b*), and as having announced their intention of not complying with the rule, together with their defence to the charges. The Board adopted the recommendation of the Committee that the two midwives concerned be cautioned as to the necessity of strict compliance with the rules, and warned that any future report for disobedience from the local supervising authority would probably entail serious consequences. The local supervising authority was asked to report further in three months' time.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE

FLEET SURGEON J. DUDLEY, M.B., has been placed on the retired list, with the rank of Deputy Inspector-General, May 13th. He was appointed Surgeon, March 31st. 1875; Staff Surgeon, March 31st, 1887; and Fleet Surgeon, January 29th, 1892.

ROYAL ARMY MEDICAL CORPS (VOLUNTEERS).

ERNEST A. WRAITH to be Lieutenant in the Sherwood Foresters Bearer Company, May 26th.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

IN seventy-six of the largest English towns, including London, 8,549 births and 4,293 deaths were registered during the week ending Saturday last, May 26th. The annual rate of mortality in these towns, which had been 16.3, 15.5, and 14.5 per 1,000 in the three preceding weeks, further declined last week to 14.2 per 1,000. The rates in the several towns ranged from 5.4 in Willesden, 6.2 in Leyton, 6.8 in East Ham, 7.7 in Walthamstow, 7.8 in Hornsey, 8.4 in Newport (Mon.), 8.6 in Devonport, and 8.9 in Wallasey, to 19.4 in St. Helen's, 19.6 in Warrington, 19.8 in Bootle and in Burnley, 20.3 in Middlesbrough, 20.7 in Salford, and 24.8 in Great Yarmouth. In London the rate of mortality was 12.8 per 1,000, while it averaged 14.7 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.5 per 1,000 in the seventy-six towns; in London this death-rate was equal to 1.3 per 1,000, while among the seventy-five large provincial towns the rates ranged upwards to 3.1 in Manchester and in Middlesbrough, 3.2 in Bootle, 3.5 in Liverpool, 4.3 in Rotherham, 5.0 in Great Yarmouth, and 5.1 in Burnley. Measles caused a death-rate of 1.1 in Salford, 1.5 in Leeds, 1.6 in Bootle, 1.8 in Liverpool, 2.0 in Manchester, 4.0 in Great Yarmouth, and 4.6 in Burnley; scarlet fever of 1.2 in Hornsey and in Rochdale; diphtheria of 1.4 in King's Norton; whooping-cough of 1.3 in Derby, 1.4 in King's Norton and in Merthyr Tydfil, and 2.0 in Reading; "fever" of 1.7 in Rotherham; and diarrhoea of 1.1 in St. Helen's and 1.6 in Middlesbrough. No fatal case of small-pox was registered in any of the seventy-six large towns. The Metropolitan Asylums Hospitals contained 2 small-pox patients on Saturday, May 26th, against 2 on the preceding Saturday; no new cases were admitted during the week, against 2 in the preceding week. The number of scarlet-fever patients in these hospitals and in the London Fever Hospital, which had been 2,337, 2,378, and 2,396 at the end of the three preceding weeks, had further risen to 2,453 at the end of last week: 338 new cases were admitted during the week, against 357, 338, and 301 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

DURING the week ending Saturday, May 19th, 1,010 births and 603 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 18.4, 18.0, and 18.8 per 1,000 in the three preceding weeks, declined again to 17.6 per 1,000 in the week under notice, but was 3.1 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 11.9 in Aberdeen and 12.6 in Leith to 19.0 in Glasgow and 21.0 in Paisley. The death-rate from the principal infectious diseases averaged 1.7 per 1,000, the highest rates being recorded in Glasgow and Dundee. The 305 deaths recorded in Glasgow included 8 which were referred to measles, 2 to diphtheria, 10 to whooping-cough, and 12 to diarrhoea. Five deaths from measles and 2 from whooping-cough were recorded in Edinburgh: 5 from diarrhoea in Dundee, and 2 from measles in Leith.

During the week ending Saturday last, May 26th, 885 births and 592 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 18.0, 18.8, and 17.6 per 1,000 in the three preceding weeks, further fell to 17.3 per 1,000 last week, but was 3.1 per 1,000 above the mean rate during the same period in the seventy-six large English towns. The rates in the eight Scotch towns ranged from 12.1 in Perth and 12.8 in Aberdeen to 17.4 in Paisley and 19.0 in Glasgow. The death-rate from the principal infectious diseases averaged 1.3 per 1,000, the highest rates being recorded in Glasgow and Edinburgh. The 304 deaths registered in Glasgow included 9 which were referred to measles, 8 to whooping-cough, and 7 to diarrhoea. Two fatal cases of measles, 4 of scarlet fever, 2 of whooping-cough, and 3 of diarrhoea were recorded in Edinburgh; and 2 of diarrhoea in Dundee.

HEALTH OF IRISH TOWNS.

DURING the week ending Saturday, May 26th, 541 births and 385 deaths were registered in six of the principal Irish towns, as against 520 births and 381 deaths in the preceding period. The annual death-rate in these towns, which had been 22.7, 23.5, and 23.1 per 1,000 in the three preceding weeks, fell to 20.4 per 1,000 in the week under notice, this figure being 6.2 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 9.6 in Limerick and 21.1 in Londonderry to 23.4 in Waterford and 24.0 in Cork. The zymotic death-rate in the same six Irish towns averaged 0.9 per 1,000, or 0.1 per 1,000 higher than during the preceding period, the highest figure—2.5—being recorded in Cork, while no deaths under this heading were registered in Londonderry, Limerick, and Waterford.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

THE British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the BRITISH MEDICAL JOURNAL is supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the BRITISH MEDICAL JOURNAL for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429 Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

Meetings of Branches & Divisions.

[*The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the* JOURNAL.]

GLASGOW AND WEST OF SCOTLAND BRANCH:
CENTRAL DIVISION.

THE annual meeting of this Division was held in the Faculty Hall, 242, St. Vincent Street, Glasgow, on May 31st, Dr. J. W. ALLAN, President, in the chair.

Confirmation of Minutes.—The minutes of the last meeting were read, approved, and signed by the Chairman.

Reports from the Secretary.—Reports from the Secretary were presented as (*a*) representative and (*b*) meetings of the Executive Committee. These were approved.

Election of Officers.—The office-bearers remain the same as last year: *President*, Dr. J. W. Allan; *Vice-President*, Professor Ralph Stockman; *Secretary*, Mr. James Grant Andrew; *Members of the Executive Committee*, Drs. John Adams, P. N. Grant, W. H. Hunter, Robert Jardine, A. W. Russell, William Wallace; *Representatives on Branch Council*, Professor Stockman and the Secretary; *Representative to Annual Meeting*, Mr. James Grant Andrew, 12, Woodside Terrace, Glasgow.

Matters Referred to Divisions.—The following matters referred to the Divisions were considered: (*a*) Hospital abuse (SUPPLEMENT, February 17th, 1906). The Division did not express any opinion on this question. (*b*) State registration of nurses (SUPPLEMENT, March 3rd, 1906). The following questions were submitted: "Does the Division approve in general of the method of registration for nurses proposed by the Select Committee of the House of Commons? Does the Division approve of the separate registration of midwifery nurses?" The objections stated by the Central Hospital Council for London against the State registration of nurses were read by the SECRETARY, and after discussion it became the finding of the meeting with one dissentient, "that the method proposed by the Select Committee of the House of Commons be not approved." (*c*) Proposed application for Royal Charter (SUPPLEMENT, March 24th, 1906). The application for Royal Charter was approved, provided that the cost would be as near as possible to that stated. (*d*) Provisional agenda for Annual Representative Meeting (SUPPLEMENT, May 5th, 1906). The agenda was briefly considered. This was all the business.

LANCASHIRE AND CHESHIRE BRANCH:
ALTRINCHAM DIVISION.

A GENERAL meeting of this Division was held on May 23rd at Sale Hall, on the invitation of Sir William Bailey, who gave a garden party. The proceedings were somewhat spoiled by the unsettled weather, but there was a large muster of members, most of whom were accompanied by ladies. The meeting took place in the library, Dr. E. L. LUCKMAN, Chairman, presided.

Confirmation of Minutes.—Dr. T. W. H. GARSTANG (Honorary Secretary) read the minutes of the previous general meeting and several intervening Committee meetings, which were unanimously confirmed.

The Division and a Local Medical Officer of Health.—A draft letter to the Central Council was considered in answer to inquiry as to evidence to be given in explanation of the attitude of the Division in not supporting a local medical officer of health who differed with his urban council. After a long discussion, it was unanimously decided that the meeting considered that the position taken up in the matter by the Executive Committee and the Division was inevitable under the circumstances, and the draft letter, with one unimportant alteration, was unanimously adopted.

Resignation of Representative on Branch Council.—Dr. CHARLES RENSHAW explained his reasons for resigning, and regretted that he did not see his way to withdraw his resignation; at the same time he thanked the meeting for their expression of confidence.

Vote of Thanks to Sir William Bailey.—A short meeting terminated with a vote of thanks to Sir William Bailey for his hospitality, proposed by the CHAIRMAN and seconded by Dr. HERBERT RENSHAW, to which Sir WILLIAM BAILEY made a characteristic reply.

LIVERPOOL (NORTHERN) DIVISION.

THE annual meeting of the Liverpool (Northern) Division was held at the Medical Institution on May 23rd, Dr. J. J. TISDALL, Chairman, in the chair.

Confirmation of Minutes.—The minutes of the last annual meeting were taken as read and confirmed. The minutes of the last ordinary meeting were read and confirmed.

Report of Executive Committee.—The annual report of the Executive Committee was read and adopted.

Election of Office-bearers.—The following members were elected office-bearers: *Chairman*, J. A. Cooke; *Vice-Chairman*, R. S. Archer, M.D.; *Secretary*, A. W. German; *Representative on Branch Council*, A. W. German; *Representative in Annual Representative Meeting*, E. T. Davies, M.D., or if unable to attend, S. Matthews, M.D.; *Executive Committee*, H. Adcock, S. H. House, M.B., S. Matthews, M.D., A. Ivor Thomas, and J. J. Tisdall.

Proposed Royal Charter.—The proposed application for a Royal Charter (see Supplement, British Medical Journal, March 24th) was considered. The scheme in general was approved of, subject to the following suggestions: Page 115, Subsection VIII, that the words "or the medical profession" be deleted. Page 117, Subsection (*g*), that line 3 be altered to read, "the Representative Body or of the Council or of any Branch Council." Page 125, Section IX, that first-class travelling expenses be altered to third-class, and that these be also allowed to members attending meetings of any Branch Council.

Notices of Motion.—By the Wandsworth Division (see Supplement, March 3rd, 1906): Election of Representatives not approved of; officers of Divisions not approved of. By the City Division: Management of Library, no opinion expressed; facilities for social intercourse at head office approved of. By the North Manchester Division (see Supplement, March 31st, 1906): Standing Committees, election strongly approved of; attendance approved of; date of issue of *Year Book* not approved of, as it is considered the *Year Book* should be abolished on the ground of unnecessary expense; central officials, regulation and co-ordination of duties approved of, subject to Committee being appointed by Annual Representative Meeting. By Council of the Association (see Supplement, April 21st, 1906): Representation of the Representative Meeting on the Council approved of; supplementary grants to Divisions and Branches approved of; tenure of office of members of Council selected by the Representative Meeting approved of; Standing Committees, addition to approved of. By the Hampstead Division: Representatives on Central Council disapproved of; constitution of Central Council of Association, addition of dental surgeon disapproved of. By the Dundee Branch: Standing Committees A., B., and C.—these were all left to the discretion of the Representative at the Annual Representative Meeting. By the Wandsworth Division: Expenses of Representatives—opinion already expressed at last meeting; capitation grants: this matter is dealt with by the proposed new by-laws, notice of which has been given by the Council; district organizing secretaries not approved of. By the Bournemouth Division: Capitation grant, local control not approved of. By the Hampstead Division: Coroners' law, medical witnesses, approved of but impracticable; payment of medical men called in in complicated midwives' cases approved of; vaccination approved of; supply of Government lymph to all practitioners approved of; office of public vaccinator considered impracticable; contract practice: medical organization approved of. By the Wandsworth Division: Nurses' registration: representation of medical profession on Central Board, 1 and 2 left to discretion of Representative. By the Exeter Division: Relation of the medical profession to the State; income and property tax—considered to be impracticable. By the Hampstead Division: Position of consultants; proposed separate class—considered impracticable. Constitution and management of hospitals—left to discretion of Representative. Hospital administration—left to discretion of Representative. By the Dundee Branch: Amendment of Standing Orders of Representative Meetings—approved of. By the Gateshead Division (see Supplement, April 28th, 1906): Circulating medical library—not approved of. Nurses' Registration Report (see Supplement, March 3rd, 1906). To the questions submitted, the meeting decided to answer: (1) Yes, but that the minimum period of training should not be less than three years; (2) No.

Medical Officers recognized under the Elementary School Teachers (Superannuation) Act, 1898.—Dr. Davies brought this matter forward, stating that whilst formerly school teachers about to present themselves for examination could obtain a medical certificate from any registered practitioner, they were now compelled to obtain one at their own expense from the medical officers of the Post Office, whose names appear in an official list published by the Board of Education. He complained of the unfairness of confining this privilege to a few medical men; and after some discussion, Dr. Davies proposed, Dr. Matthews seconded, and it was unanimously decided:

> That the Honorary Secretary be instructed to write to the Medical Secretary and ask if he can obtain the conditions and terms of appointment of medical officers recognized under the Elementary School Teachers (Superannuation) Act, 1898, and appointed by the Board of Education.

Illness of Dr. Adcock.—It was proposed by the Chairman, seconded by Dr. A. Ivor Thomas, and unanimously resolved:

> That the Honorary Secretary be instructed to convey to Dr. Adcock the sympathy of the members of the Division with him in his serious illness, and to express their hope for his speedy recovery.

Votes of Thanks.—Votes of thanks to the retiring Chairman and the Honorary Secretaries for their services during the past year terminated the proceedings.

METROPOLITAN COUNTIES BRANCH:

Richmond Division.

The annual meeting of the Division was held in the Talbot Hotel, Richmond, on May 16th, at 6.30 p.m. Dr. R. W. Wilson presided.

Election of Officers.—The following were elected for the ensuing year: *Chairman*, Dr. F. G. Crookshank; *Vice-Chairman*, Dr. R. W. Wilson; ***Representative at the Representative Meeting***, Dr. R. Langdon-Down; ***Representative on Branch Council***, Dr. R. W. Wilson; ***Members of the Executive Committee***, Drs. W. A. Bateman, Fletcher Beach, J. R. Johnson, G. J. Maguire, G. H. Rodman, C. C. Scott, G. E. Shuttleworth, and G. C. Still; ***Honorary Secretary and Treasurer***, Dr. C. Blair; ***Honorary Assistant Secretary***, Dr. A. E. Evans.

Nomination for Central Council.—Dr. F. G. Crookshank was nominated for election to the Central Council of the Association.

NORTH WALES BRANCH:

Denbigh and Flint Division.

The annual meeting of the Division was held at the Infirmary, Wrexham, on Friday, May 25th.

Election of Officers.—The following were elected officers for the ensuing year: *Chairman*, Dr. A. Eyton-Lloyd, Rhyl; *Vice-Chairman*, Dr. F. S. Manisty; ***Secretary***, Mr. E. D. Evans; ***Representative for Annual Representative Meetings of the Association***, the Secretary; *Executive Committee*, Dr. H. Drinkwater, Dr. H. V. Palin, Dr. J. Medwyn Hughes, and Dr. David Lloyd, Denbigh.

Nomination for Central Council.—The nomination of the present Representative (Dr. H. Jones-Roberts, Penygroes) was unanimously approved of.

Annual Report.—The annual report of the Executive Committee was received and adopted.

Matters Referred to the Divisions.—On several of the questions the Division members expressed their approval, the remainder being left to the discretion of the Representative when they come up for discussion at the Annual Representative Meeting.

Autumn Meeting.—It was decided to hold the autumn meeting at Rhyl.

Address.—An address was delivered by Mr. Frank T. Paul, F.R.C.S., Liverpool, on the value of the microscope as an aid to the early diagnosis of tumours. The address was illustrated by a series of excellent lantern slides of microscopic specimens. A very cordial vote of thanks was accorded Mr. Paul for his valuable and interesting paper.

North Carnarvonshire and Anglesea Division.

The annual meeting of the Division was held at the British Hotel, Bangor, on Wednesday, May 30th, Dr. J. Lloyd Roberts, Colwyn Bay, in the chair.

Confirmation of Minutes.—The minutes of the last regular meeting and of the special meeting were read, confirmed, and signed.

Midwives' Registration Act.—The replies received from the Clerks of the Carnarvonshire and Anglesea County Councils as to the working of the Act in the respective counties were read, and referred to the subcommittee appointed to deal with the matter.

Anglesea Coroner.—A letter was read from the Coroner stating that the press report of an inquest recently held by him containing certain strictures upon the medical profession in that county was incorrect.

Bangor Workhouse Dispute.—The satisfactory termination of the dispute which had arisen over the salary offered for the Medical Officership of the Bangor Workhouse, and which had resulted in a complete victory for the profession, was reported. It was resolved—

> That the Division greatly appreciates the initiative action and the zeal displayed by Dr. H. Grey Edwards in securing an adequate salary for the Workhouse Medical Officer; and also the loyalty shown by the neighbouring practitioners in refusing to become candidates for the appointment in opposition to the local practitioners, thereby greatly strengthening the position of their professional brethren in Bangor.

It was further resolved—

> That the best thanks of the Division be tendered to Mr. J. Smith Whitaker, the Medical Secretary, for the ready and valuable assistance which he rendered in the matter.

Report of Executive Committee.—The annual report of the Executive Committee was read and adopted.

Election of Officers for 1906-7.—The HONORARY SECRETARY (Mr. H. Jones Roberts) asked to be released from the secretarial work of the Division, inasmuch as he was also Secretary of the Branch. The request was granted, and it was resolved:

> That the best thanks of the Division be given to the Honorary Secretary for his services during the past three years.

The following officers were then elected: *Chairman:* Dr. G. R. Griffith, Carnarvon. *Vice-Chairman:* Dr. H. Grey Edwards, Bangor. *Honorary Secretary:* Dr. John Evans, Carnarvon. *Representative to Representative Meeting:* Dr. Emyr O. Price, Bangor (re-elected). *Representatives on Branch Council:* Drs. J. Lloyd Roberts (Colwyn Bay), R. Arthur Prichard (Conway), R. Parry (Carnarvon), J. R. Prytherch (Llangefni). *Executive Committee:* Drs. Corbet W. Owen (Bangor), G. W. Kendall (Holyhead), J. R. Williams (Penmaenmawr), R. Lumley Roberts (Bethesda).

Nomination of Representative of the North Wales Branch on Central Council.—It was resolved that Mr. H. Jones Roberts be nominated by the Division for re-election on the Central Council.

Proposed Royal Charter.—It was resolved that the Division approves of the proposed application for a Royal Charter.

Agenda of Annual Representative Meeting.—The agenda was considered, and instructions given to the Representative, including the selection of three Direct Representatives on the General Medical Council.

Ethical Rules re *Contract Practice and Appointments.*—The "Bradford rules" were discussed, approved of, and adopted, subject to the sanction of the Central Council.

SOUTH-EASTERN BRANCH:

CROYDON DIVISION.

A MEETING was held at the Croydon General Hospital on May 17th, Dr. ROSSER, Chairman, presiding.

Confirmation of Minutes.—The minutes of the previous meeting were read and confirmed.

Report of Committee.—The report of the Committee was adopted.

Next Meeting.—It was decided to hold the next meeting at Sutton. Dr Partridge was elected Chairman.

Election of Officers.—The following officers were elected for the coming year: *Chairman*, Dr. S. Parsons Smith; *Vice-Chairman*, Dr. Rosser; *Branch Council Representatives*, Dr. Parsons Smith and Dr. Fowler; *Direct Representative*, Dr. Macan; *Honorary Secretary*, Mr. Willock; *Committee*, Dr. Fowler, Mr. Newby, Mr. S. G. Reid, Dr. Redfern, Dr. Duncan, Mr. Wray, Dr. Carpenter, Dr. Wayte, Dr. Gripper, Mr. Cressy, Dr. Hugo, Mr. Horsley, Dr. Bower, and Dr. Meredith Richards.—It was proposed by Dr. MACAN, seconded by Dr. FOWLER, and carried unanimously, that at least three members of the Committee shall retire annually and shall not be eligible for re-election for a period of one year.

CLINICAL MEETING.

A clinical meeting was then held, Mr. C. WRAY in the chair.

Cases.—The following cases were shown:—Dr. W. J. PASSMORE: Aortic aneurysm in a female. Dr. REDFERN: Semi-solid oedema. Heart of case shown last year. Mr. CRESSY: Notes upon two cases of haemorrhage into the knee-joint. Mr. WRAY: Tobacco amblyopia after fourteen days' treatment. Inveterate follicular conjunctivitis cured by argyrol-adrenalin treatment. Acromegaly. Acromegaly incipiens. Dr. MALE: Congenital dislocation of the hip, with skiagraphs. Dr. WAYTE: Aneurysm (ileo-femoral) treated by ligature. Gumma of femur. Mr. NEWBY: Notes upon three cases of abdominal section: (1) Hysterectomy for menorrhagia in a patient with tuberculous peritonitis; (2) ovariotomy for tuberculous disease of adnexa in a patient with tuberculous peritonitis; (3) a case of perforating gastric ulcer situated in a position which precluded removal.

Dinner.—Eleven members remained to dinner.

MAIDSTONE DIVISION.

A MEETING was held at the West Kent General Hospital on May 10th, at 3.15, Dr. JOYCE in the chair.

Proposed Royal Charter.—The meeting was held to consider the proposed incorporation under a Royal Charter. It was proposed by Dr. DOUGLAS, and seconded by Dr. HOAR:

> That there be an application for a Royal Charter.

Proposed Pathological Department.—It was proposed by Dr. JOYCE, seconded by Dr. HOAR:

> That the Association be requested to form a department to which members can send pathological specimens for reports and analyses.

Name of Representative Body.—It was proposed by Dr. DOUGLAS, seconded by Dr. OLIVER:

> That (1) the representative body be called the Representative Council; (2) and that the Council of the Association be called the Central Council.

Proposed Life Membership of Association.—It was proposed by Dr. DOUGLAS and seconded by Dr. OLIVER:

> That the Council of the Association be requested to consider and submit to the next Representative Meeting a scheme whereby members of the Association may without injury to the finances of the Association become life members by making one payment.

The Association Finances.—Dr. DOUGLAS proposed:

> That, seeing the large present expenditure of the Association necessitated by the Charter and other expenditures, the Branch Councils be asked to forego a proportion of the amounts which would ordinarily be allotted to them for the year 1906, seeing that they now have an unexpended balance of over £4,000.

—This was seconded by Dr. OLIVER.

All these resolutions, after discussion, were duly passed *nem. con.*

STIRLING BRANCH.

THE annual general meeting for 1906 was held in the Falkirk Infirmary, on Wednesday, May 30th, at 4.15 p.m., Dr. GRIFFITHS, President, in the chair.

Confirmation of Minutes.—The PRESIDENT signed the minutes of the last general meeting.

Election of Office-bearers.—The following office-bearers were elected for the ensuing year: *President*, Dr. Alexander (Denny), *Vice-President*, Dr. McGowan (Grangemouth), *Representative*, Dr. Griffiths (Falkirk); *Secretaries*, Dr. Moorhouse (Stirling), Dr. Stewart (Falkirk), *Council*, Drs. Currie, Ferguson, Gardner, and Strachan.

Report of Council.—The report of Council was read by the SECRETARY.

President's Address.—The PRESIDENT (Dr. Griffiths) gave an account of the surgical technique in use in the Falkirk Infirmary; and at the close of the address, which was listened to with great interest, he was awarded a hearty vote of thanks.

Cases.—The PRESIDENT, and Drs. CLARKSON, MITCHELL, and WATT showed some cases of great clinical interest, on which remarks were made by several of the members.

Visit to Wards of Infirmary.—The members thereafter had the opportunity of inspecting the new operating theatre, and some cases of interest were shown in the wards.

Vote of Thanks to Matron.—A hearty vote of thanks was awarded to Miss Glendinning, the matron of the hospital, for her trouble and attention in connexion with the afternoon tea served to the members previous to the meeting.

Association Notices.

BRANCH AND DIVISION MEETINGS TO BE HELD.

Birmingham Branch.—The annual meeting of the Birmingham Branch will be held at the Medical Institute on Thursday, June 14th, at 3.30 p.m.—T. Sydney Short, Honorary Secretary, 85, Edmund Street, Birmingham.

Birmingham Branch: Central Division.—The annual meeting will be held at the Medical Institute on Tuesday, June 26th, at 4 p.m. Business: (1) Election of officers, members of Branch Council, and of Executive Committee. (2) To receive the annual report. (3) To instruct the Representative (Supplement, British Medical Journal, May 5th). (4) Vote of thanks to retiring officers. (5) Any other business.—E. D. Kirby, Honorary Secretary.

Birmingham Branch: Coventry Division.—The annual meeting of this Division will be held at the Coventry and Warwickshire Hospital on Wednesday, June 13th, at 8.30 p.m. Agenda: (1) To elect officers and the Executive Committee for the year. (2) To receive the annual report of the Executive Committee. (3) The Committee will recommend the adoption of the following resolution: "That no member of the profession in the area of the Division shall take over the medical officership of one of the Friendly Societies connected with the dispensary in the event of such society seceding from that institution before the satisfactory termination of the present dispute." (4) Dr. Milner Moore will move that the Division approve the proposed application by the Association for a Royal Charter. (5) To thank the Committee of the Coventry and Warwickshire Hospital for the continued use of their Board Room for the meetings of the Division.—E. H. Snell, Honorary Secretary.

Birmingham Branch: Tamworth and Nuneaton Division.—A combined meeting of the Tamworth and Nuneaton Division with the Coventry Division will be held at the Coventry and Warwickshire Hospital, Coventry, on Tuesday, June 19th, at 4 p.m., for the purpose of electing a Joint Representative to represent them at the Annual Representative Meeting, and to instruct him in regard to matters arising at that meeting (see Supplement, British Medical Journal, May 5th).—E. H. Snell, Secretary of the Constituency.

Border Counties Branch.—The annual meeting of this Branch will take place in the County Hotel, Carlisle, on Friday, June 29th, and not as previously announced.—F. R. Hill, Honorary Secretary.

Cambridge and Huntingdon Branch.—The annual meeting of the Branch will be held at Peterborough on Thursday, June 14th. Any member having communications to make should apply to the Honorary Secretary, F. E. Apthorpe Webb, Grafton House, Cambridge.

Dorset and West Hants Branch: West Dorset Division.—The annual meeting of the Division will be held on Wednesday, June 13th, at the County Hospital, Dorchester, at 3 p.m. Agenda: (1) Minutes. (2) To elect officers, namely—Chairman, Vice-Chairman, and Honorary Secretary. (3) To elect the Executive Committee of the Division. (4) To elect Representatives of the Division on the Branch Council. (5) To elect the Representative of the Division at Representative Meetings of the Association. (6) To consider the question of altering the date of the annual meeting of the Division from June to May. (7) To consider matters referred to Divisions. (8) Any other business. Afternoon tea.—J. Comyns Leach, Sturminster Newton, Honorary Secretary.

East Anglian Branch.—The annual meeting of the East Anglian Branch will be held at the Palace Hotel, Southend-on-Sea, on Tuesday, June 26th. Programme of Proceedings: 12.30, Council meeting. 12.45, General meeting. Agenda: (1) Minutes of last meeting. (2) Report of the Council. (3) Report of election of officers. 1.54, Luncheon, by kind invitation of the President-elect, Dr. Clough Waters, at the Palace Hotel. 2.30, Resumed general meeting. Introduction of Dr. Clough Waters as President of the Branch, by Dr. Barton. (4) President's address. (5) Address by Sir Frederick Treves, Bart., G.C.V.O., C.B., LL.D., Serjeant-Surgeon to His Majesty the King. 4 to 6, Garden party in the Shrubbery, by kind invitation of the Chairman and Members of the South Essex Division. By the kind courtesy of the Commodore and Committee of the Alexandra Yacht Club, members attending are considered to be members for the day.—B. H. Nicholson, H. A. Ballance, and J. Gutch, Honorary Secretaries.

East Anglian Branch: West Norfolk Division.—The Annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. Gardiner, King's Lynn, Honorary Secretary.

Edinburgh Branch.—The annual meeting of the Edinburgh Branch will be held in the Hall of the Royal College of Physicians on Friday, June 29th, at 4.15 p.m.—Norman Walker.

Edinburgh Branch: South-Eastern Counties Division.—The annual meeting of this Division will be held in the King's Arms Hotel, Melrose, on the afternoon of Friday, June 22nd, Dr. Cullen, Chairman, presiding. Business: (1) Election of office-bearers. (2) Instructions to Representative.—W. Hall Calvert, Honorary Secretary.

Leinster and South-East of Ireland Branch.—Nominations of candidates for election as members of Central Council must be received by the undersigned on or before June 12th.—Arthur H. White, Honorary Secretary Leinster Branch, Malvern, Terenure Road, Dublin.

Metropolitan Counties Branch.—Notice is hereby given that voting papers for electing the Metropolitan Counties Branch Representatives on the Central Council will be sent out on or before June 16th, and must be returned by June 20th. Notice is also given that the annual meeting of the Branch for the declaration of the poll of officers and for amending the ethical and financial rules, and other business. will be held on Tuesday, June 26th.—Frederick J. Smith and Ernest Clarke, Honorary Secretaries.

Metropolitan Counties Branch: Hampstead Division.—The fourth annual meeting of this Division will be held at St. Peter's Hall. Belsize Square, on Friday, June 8th, at 5 p.m., Mr. F. R. Humphreys in the chair. Agenda: (1) Minutes. (2) Correspondence. (3) Questions. (4) To receive the annual report of the Committee. (5) Election of officers and ordinary members of the Committee for the session 1906-7. (6) To instruct the Representative to the Representative Meeting. (7) To consider reports of Subcommittees—(*a*) on Contract Practice within the Division; (*b*) on the proposed Divisional Library. (8) Other business.—R. A. Yeld, M.D., Honorary Secretary, Hampstead, N.W.

Munster Branch.—Nominations will be received by me up to June 16th for Elective Member of Central Council. British Medical Association, in accordance with By-law 24.—Philip G. Lee, Honorary Secretary, 26, Patrick's Hill, Cork.

Northern Counties of Scotland Branch.—The annual meeting of this Branch will be held at the Railway Hotel, Tain, on Thursday, June 21st, at 12 noon. Agenda: (1) Minutes. (2) Election of office-bearers for the ensuing year and a Representative of the Branch in Representative Meetings of the Association. (3) To consider business at the Representative Meeting. (4) To consider communications from the Medical Secretary. (5) To arrange place for autumn meeting, and also for the next annual meeting. (6) Any other competent business. Luncheon will be served at the Railway Hotel, Tain, at 1 p.m. Tickets 3s., exclusive of wines. Through the courtesy of the Tain Golf Club members wishing to play golf will have an opportunity of doing so. Golfers kindly communicate with Dr. Gillies, Tain, who will make the necessary arrangements. In accordance with By-law 24 of the constitution, the election of a Representative of the Branch on the Central Council must be made by voting papers sent to each member, and the candidates' names must be sent to me on or before June 30th, and the nomination signed by three members.—J. Munro Moir, M.D., Honorary Secretary, 4, Ardross Terrace, Inverness.

North of England Branch: North Northumberland Division.—The annual meeting of the above will be held at the Infirmary, Berwick-upon-Tweed, on Wednesday, June 20th, at 2.30 p.m. Business: To elect officers as per Rule 11. To consider matters referred to Divisions since last meeting. Consultations between general medical practitioners and the question of fees (introduced by Dr. Burnand). Any other business.—R. B. Robson, M.B., Honorary Secretary, Alnwick.

South-Eastern Branch.—The sixty-second annual meeting will be held at the Crystal Palace on Wednesday, June 27th, at 2.15 p.m. Dr. Hetley (President-elect) kindly invites members to lunch at the Crystal Palace from 1 to 2 p.m. Agenda: In addition to the business of an ordinary meeting: (1) To receive the report of the election of new officers, who shall thereupon take office. (2) To receive the report of the Council on the affairs of the Branch and the annual financial statement. After the meeting, entertainments will be provided in the Crystal Palace, and expeditions will be arranged to the Norwood Cottage Hospital, the Norwood Sanatorium for the Treatment of Alcohol and Drug Inebriety, and the Dulwich Gallery. Dinner at the Crystal Palace at 6 15 p.m. (for 6.30 p.m.); charge 7s. Wine will be provided by local members. Those who propose to be present at lunch or dinner are requested to signify their intention to Dr. Prangley, 197, Anerley Road, S.E., not later than Saturday, June 23rd.—H. M. **Stewart**, Honorary Secretary.

Liddon Meade-King will take the chair Agenda: Minutes of last meeting; annual report of Council; treasurer's accounts; election of officers; President's address (notes on a seventeenth century textbook of medicine); consideration of agenda of Representative Meeting on July 24th. This, as appearing in the Supplement to the British Medical Journal of May 5th, will be considered so far as time will permit. Members are requested to acquaint themselves with any particular item on that agenda which they wish to bring to the notice of the Branch. Luncheon will be served at 1.30 p m. This will be paid for out of the Branch funds in the case of members signifying to the Honorary Secretary their intention of being present by June 19th. For others, and guests, a charge of 3s. per head will be made, in all cases exclusive of wine, etc. After lunch those present will become the guests of the President, and will be driven to Pickeridge Hill, where a golf match will be played between the medical members of the Pickeridge Club and the rest of the Branch. They will also be entertained there to tea. The return journey will be made in time to suit the convenience of those having to catch trains from Taunton station. In the event of the day proving wet an alternative programme will be arranged.—W. B. **Winckworth**, Honorary Secretary.

Yorkshire Branch.—The annual meeting of this Branch will be held at the Eye and Ear Hospital, Bradford, on Wednesday, June 13th, at 3.30. Agenda: Minutes. Report of Council. Election of two Representatives of the Branch on the General Council (the only nominations received are Dr. Sinclair White (Sheffield) and Dr. Goyder (Bradford), who will therefore be elected). Election of Branch Officers. Dr. Mossop (President-elect) will deliver an address. Dr. Little will read notes on a case of Parrinaud's Conjunctivitis. Dr. Ray: Case of Obstructed Labour due to Pelvic Neoplasm (specimen). Mr. Basil Hall: Cases of Excision of the Gasserian Ganglion; Carcinoma of Caecum, of Transverse Colon, of Sigmoid removed by Operation; Case of Intussusception. Dr. Tregellis Fox: Plea for Habitual Performance of *Post-mortem* Examinations in General Practice. Dr. Bronner will show Cases of Cerebellar Abscess, Extradural Abscess, Thrombosis of Lateral Sinus of Aural Origin, some cases of Operation for Deviation of the Nasal Septum, Disease of the Frontal Sinus, etc. The annual dinner will be held at the Midland Hotel at 6.30. Members desiring to dine are requested to communicate with Dr. **Bronner**, Honorary Secretary, 33, Manor Row, Bradford, at once, so that the necessary arrangements can be made.

Yorkshire Branch: Bradford Division.—The annual meeting of the Division will be held at the Eye and Ear Hospital, Bradford, on Tuesday, June 12th, at 8 30 p.m. Agenda:—(1) The office-bearers for the session 1906-7, nominated at the last meeting of the Division, will be elected: Chairman, Mr. Basil Hall; Vice-Chairman, Dr. J. H Campbell; Honorary Secretaries, Drs. J. Metcalfe and A. Little (Treasurer); Representatives on the Branch Council, Drs. Brampton, Campbell, Hall, and Little: Executive Committee, Drs. and Messrs. Althorp, Berry (Keighley), Bronner, Clow, Craig (Bingley), Crowley, Eames, Goyder, Hunter (Pudsey), Mercer, Mitchell, Peck (Queensbury), Shaw (Liversedge), Sykes (Cleckheaton), Tunstall, Waugh (Skipton); Ethical Committee, the President and Secretaries and Drs. and Messrs. Althorp, Horrocks, Manknell, H. E. Taylor, Shackleton, J. W. Wilson. (2) The election of the Representative of the Division in Representative Meetings of the Association, Mr. Horrocks, nominated at the last meeting of the Division, will take place. (3) To receive the annual report of the Executive Committee. (4) The nomination and election of a proposed President-elect of the Association, if the invitation of the Bradford Division to the Council to hold the annual general meeting in Bradford in 1907 be accepted, will take place. (5) Dr. Metcalfe will move the following resolution: "That the Bradford Division of the British Medical Association, whilst noting with satisfaction the decision of the Baths Committee of the Bradford Corporation that the various forms of medicinal bath treatment should only be carried out from medical prescription, trusts that it will be an order to the bath attendants to carefully fulfil the instructions given; and respectfully suggests to the Committee the desirability of limiting the electrical appliances for the treatment of disease strictly to the method at present undertaken at the Central Baths. (6) The opinion of the Division will be taken on the proposed application for a Royal Charter. (7) Any question of importance on which the opinion of the Division has not yet been taken, and contained in the Provisional Agenda in the SUPPLEMENT of the BRITISH MEDICAL JOURNAL for May 5th, will be considered.—JAMES METCALFE and ANDREW LITTLE, Honorary Secretaries.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

IN seventy-six of the largest English towns, including London, 8,601 births and 4,176 deaths were registered during the week ending Saturday last, June 2nd. The annual rate of mortality in these towns, which had been 15.5, 14.5, and 14.2 per 1,000 in the three preceding weeks, further declined last week to 13.8 per 1,000. The rates in the several towns ranged from 4.8 in Hornsey, 5.3 in Devonport, 5.7 in Handsworth (Staffs.) and in King's Norton, 6.4 in Walthamstow, 6.8 in East Ham, and 7.8 in Hastings, to 18.0 in Manchester and in Salford, 18.1 in Huddersfield, 18.6 in Bury, 19.7 in Preston, 19.8 in Stockton-on-Tees, and 19.9 in Stockport and in Swansea. In London the rate of mortality was 13.7 per 1,000, while it averaged 13.8 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.4 per 1,000 in the seventy six towns: in London also this death-rate was equal to 1.4 per 1,000, while among the seventy-five large provincial towns the rates ranged upwards to 2.3 in Bournemouth and in Liverpool, 2.5 in Burnley, 2.7 in Plymouth, 3.1 in Manchester and in Salford, 3.2 in Aston Manor, and 3.3 in Huddersfield. Measles caused a death-rate of 1.1 in Bradford, 1.2 in Wigan and in Newcastle-on-Tyne, 1.3 in Salford, 1.5 in Bournemouth, 1.9 in Tynemouth, 2.0 in Burnley, and 2.5 in Manchester; and whooping-cough of 1.3 in Aston Manor, 1.4 in Coventry, and 1.6 in Bootle and in Huddersfield. The mortality from scarlet fever, diphtheria, and enteric fever showed no marked excess in any of the large towns, and no fatal case of small-pox was registered during the week. The number of small-pox patients remaining under treatment in the Metropolitan Asylums Hospitals which had been 2 on each of the two preceding Saturdays, had increased to 5 on Saturday last, the 2nd inst.; 3 new cases were admitted during the week, against 2 and none in the two preceding weeks. The number of scarlet fever cases in these hospitals and in the London Fever Hospital, which had been 2,378, 2,396, and 2,453 at the end of the three preceding weeks, had further risen to 2,516 at the end of last week; 313 new cases were admitted during the week, against 338, 301, and 338 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

DURING the week ending Saturday last, June 2nd, 1,026 births and 600 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 18.8, 17.6, and 17.3 per 1,000 in the three preceding weeks, rose again to 17.5 per 1,000 last week, and was 3.7 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death rates ranged from 15.1 in Perth and 15.2 in Dundee to 18.2 in Glasgow and 24.3 in Greenock. The death rate from the principal infectious diseases averaged 1.8 per 1,000 in these towns, the highest rates being recorded in Leith and Perth. The 292 deaths registered in Glasgow included 6 which were referred to measles, 4 to diphtheria, 13 to whooping-cough, 2 to "fever," and 8 to diarrhoea. Four fatal cases of measles and 3 of diarrhoea were recorded in Edinburgh, 2 of scarlet fever and 3 of whooping-cough in Dundee, and 3 of whooping-cough in Aberdeen and 2 in Greenock

Naval and Military Appointments.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

THE British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the BRITISH MEDICAL JOURNAL supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the BRITISH MEDICAL JOURNAL for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429 Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

Meetings of Branches & Divisions.

***[The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the* JOURNAL.]**

DORSET AND WEST HANTS BRANCH.

THE annual meeting of this Branch was held in the Hotel Mont Doré, Bournemouth, on Thursday, May 24th, the President, Dr. E. HYLA GREVES, in the chair. Before the meeting the President entertained the party to a buffet luncheon in the hotel. The chair was taken at 3.30 p.m.

Confirmation of Minutes.—The minutes of the last annual meeting were read and confirmed.

Apologies for Non-Attendance.—Letters of apology for non-attendance were read from Dr. J. Roberts Thomson, of Bournemouth, and Dr. S. P. Snook, of Weymouth.

Financial Statement.—Mr. PARKINSON, the retiring Honorary Secretary, presented his financial statement for the past year, which was accepted.

Election of Honorary Secretary.—Dr. James Davison, of Bournemouth, took over the duties of Honorary Secretary and Treasurer.

Vote of Thanks to Mr. Parkinson.—On the motion of Dr. MOORHEAD, seconded by Dr. SNOW, a cordial vote of thanks was awarded to Mr. Parkinson for the manner in which he had executed the duties of Secretary and Treasurer of the Branch. Mr. PARKINSON suitably acknowledged the vote.

Installation of New President.—The PRESIDENT vacated the chair and introduced his successor, Mr. W. Hawkins, of Broadway, Dorchester. Mr. HAWKINS, on taking the chair, thanked the Branch for the honour they had done him by electing him President. As his first duty, he proposed that a hearty vote of thanks be given to Dr. E. Hyla Greves for the able manner in which he had fulfilled the duties of President for the past year. This was seconded by Dr. MACPHERSON LAWRIE of Weymouth and carried by acclamation. Dr. GREVES replied.

Apportionment of Old Balance.—It was unanimously agreed, on the motion of Mr. PARKINSON, that the old balance belonging to the Branch should be divided, practically, between the British Medical Benevolent Fund and the Epsom College.

Associate Members.—Mr. H. J. Manning (Salisbury), Dr. J. Groves (Carisbrooke), and Mr. W. B. Winckworth (Taunton) were unanimously elected associate members.

Representative on Central Council.—Mr. C. H. Watts Parkinson (Wimborne Minster) was re-elected the Representative of the Branch in the Council of the Association.

Summer Meeting.—It was proposed by Mr. BOVEY, seconded by Dr. COMYNS LEACH, and carried, that the summer meeting be held at Abbotsbury, Dorset.

Paper.—Mr. BERNARD SCOTT read a concise and able paper on prostatectomy, which was commented on at considerable length by Mr. VERNON, Dr. COMYNS LEACH, Dr. HYLA GREVES, Mr. H. SIMMONS, and Mr. HAWKINS. Mr. BERNARD SCOTT suitably replied.

Discussion.—Mr. SIMMONS, Vice-President, opened a discussion on the necessity of early abdominal section as a means of diagnosis. An excellent debate followed the reading of the Vice-President's introductory paper, and was joined in by Dr. E. HYLA GREVES, Dr. T. FRED GARDNER, Mr. VERNON, Dr. SNOW, Dr. MCCULLOCH, Mr. BERNARD SCOTT, and Mr. HAWKINS. Mr. SIMMONS replied.

Dinner.—After the meeting the members and friends dined together in the Winter Gardens of the Hotel Mont Doré.

EDINBURGH BRANCH:

SOUTHERN DIVISION.

THE annual meeting of the Division was held in the Oddfellows' Hall, Forrest Road, on Friday, June 8th, at 8.15 p.m., Dr. MATHESON, Vice-Chairman, in the chair. Dr. Caverhill, Chairman of the North-West Division, was present as a visitor.

Confirmation of Minutes.—The minutes of the last meeting were read and approved.

Annual Report.—The annual report and financial statement were submitted and approved.

Secretary's Report.—The SECRETARY read his annual statement of the work done during the year, dealing with the work of the Representative on the Branch Council and the secretarial work, including his co-operation in the furthering of hospital reform with the secretaries of the other Divisions.

Election of Officers.—The following gentlemen were elected officers of the Division:—*Chairman*, Dr. Matheson; *Vice-Chairman*, Dr. Cullen; *Secretary and Treasurer*, Dr. Dewar; *Representative to the Representative Meetings*, Dr. Simla Paterson; *Executive Committee*, the Chairman and Secretary, Representative on Branch Council, and Drs. Salt, Kennedy, Lundie, Proudfoot, Webster, Johnston, Boyd Jamieson, Scott, and Gordon Price.

Income Tax.—Dr. DEWAR moved:

> That the question of income tax be remitted to the Executive Committee, with power to add to their number, in order to consider the advisability of pro-

viding information to the members of the Division as to the making up of the annual return.

Dr. MATHESON seconded, and after discussion, joined in by Dr. CAVERHILL and PATERSON, the motion was adopted unanimously.

Collection of Medical Fees.—Dr. DEWAR moved:

> That the subject of collecting medical fees be remitted to the Executive, with power to add to their number, for consideration and report.

—Dr. MATHESON seconded.—Dr. CAVERHILL, by invitation, joined in the discussion, explained the Montreal system of collection of medical fees, and suggested that the Division should co-opt one or two of the members visiting Canada at the meeting of the British Medical Association to gather all the information they could from the profession in Canada.—The motion was unanimously adopted.

Vote of Thanks to Chairman.—The meeting was closed with a vote of thanks to the Chairman.

BRITISH GUIANA BRANCH.

A MEETING of this Branch was held at Georgetown on April 26th.

New Member.—Dr. Kenrick Stanton Wise, of the Public Hospital, Georgetown, was elected a member.

Election of Officers.—Dr. K. S. Wise was elected Honorary Secretary. Dr. J. E. Godfrey was chosen to represent the Branch at the annual meeting at Toronto.

Discussion.—A discussion on Malarial Fever in Infants was opened by Dr. C. P. KENNARD.

Specimens.—A number of microscopic specimens were exhibited by Dr. WISE.

GLASGOW AND WEST OF SCOTLAND BRANCH:

GLASGOW SOUTHERN DIVISION.

THE annual meeting of this Division was held in the Library of the Medical Club, 22, Carlton Place, on May 22nd; Dr. MILLER presided.

Confirmation of Minutes.—The minutes were read and approved of.

Annual Report.—The annual report was read, and showed that three general and seven committee meetings were held during the year, at which questions of medico-political importance were discussed. At the close of the year the membership of the Division was 95, and the expenses incurred £7 17s. 6d.

Election of Officers.—The following were elected office-bearers and members of Committee:—*Chairman*, John Brown, M.D.; *Vice-Chairman*, James Weir, M.B.; *Secretary and Treasurer*, John Stewart, M.D. *Representative to Annual Representative Meeting*, C. E. Robertson, M.D.; *Representatives on Branch Council*, John Stewart, M.D., Andrew Wauchope, M.B.; *Members of Committee*, Drs. Miller, Hamilton, Rankine, Leask, Hugh Kelly, Yuill Anderson, Burges, Hansen, Campbell Highet, Forrester, Arch. McCrorie, J. M. McLachlan, Paton, and Richards.

Annual Representative Meeting.—The provisional agenda of the Annual Representative Meeting to be held in London was considered.

LANCASHIRE AND CHESHIRE BRANCH:

BURNLEY DIVISION.

THE annual meeting of this Division was held at the Bull Hotel, Burnley, on May 29th.

Election of Officers.—The following officers were elected for the ensuing year:—*Chairman:* F. W. Marsden, Esq. *Vice-Chairman:* S. M. Giffen, Esq. *Honorary Secretary:* James Haworth, M.B., Wilfield House, Burnley. *Committee:* A. M. Sinclair, M.B.; J. Gardner, M.B.; W. Bird, M.B.; W. Wright, Esq. *Representative on Branch Council:* J. M. Ferguson, Esq. *Representative for Representative Meeting:* R. C. Holt, M.D.

LIVERPOOL (SOUTHERN) DIVISION.

THE annual meeting of the Division was held on June 5th, at the Liverpool Medical Institution, Dr. WESTBY in the chair.

Confirmation of Minutes.—The minutes of the last meeting were read and confirmed.

Accounts for the Year.—The accounts for the past year were presented and passed.

Election of Officers.—The following officers were elected: *Vice-Chairman:* Dr. Harvey. *Honorary Secretary and Treasurer:* Dr. Given. *Representatives on Branch Council:* Drs. Given and C. Lee. *Representative at Annual Representative Meeting:* Dr. Westby. *Members of Executive Committee:* Drs. Macfie-Campbell, C. Lee, Logan, Steeves, and Bennett.

Annual Representative Meeting.—The agenda of the Annual Representative Meeting was then considered; also the proposed Charter of the Association; the nomination of candidates by the Annual Representative Meeting for the General Medical Council, and the financial position of the Association with special references to the resolutions passed on this subject by the special meeting of the Lancashire and Cheshire Branch. The Representative of the Division was instructed how to act in these matters at the forthcoming Representative Meeting.

MANCHESTER (CENTRAL) DIVISION.

THE annual meeting of the Manchester (Central) Division was held at the Queen's Hotel on May 31st.

Election of Officers.—Officers were elected for the ensuing year as follows: *Chairman*, Dr. Donald (St. Peter's Square, Manchester); *Vice-Chairman*, J. H. Ray (St. John Street, Manchester); *Secretary and Treasurer*, Dr. Harold Clifford (15, St. John Street, Manchester); *Representatives on Branch Council*, Dr. Booth, Dr. Milligan; *Other Members of Executive*, Mr. Burgess, Dr. Ferguson, Dr. Helme, Dr. Heywood, Dr. Walls. Dr. Booth (Swan Street, Manchester) was elected the Representative of the Division in Representive Meetings.

Annual Report.—The annual report was received and adopted.

Annual Representative Meeting.—The business of the annual meeting was considered, and instructions given the Representative (Dr. Booth) as follows: (*a*) In regard to nominations for the General Medical Council, to support Drs. Helme, George Jackson, and Rhodes (in that order); but, in the event of Dr. Helme's withdrawal, the name of Mr. Andrew Clark was placed third. (*b*) To support the formation of a committee of inquiry into the financial standing of the Association; and to make all endeavours to safeguard Branch funds to the Branches. (*c*) To oppose the application for a Royal Charter at the present time.

ROCHDALE DIVISION.

THE annual meeting was held at the Wellington Hotel, Rochdale, on Thursday, May 31st. In the absence of the President and Vice-President Dr. HENRY was voted to the chair.

Confirmation of Minutes.—The minutes of the last meeting were read and passed.

Annual Report.—The SECRETARY read the annual report, of which the following is a summary: Members on December 31st, 1904, 52; members on December 31st, 1905, 50. The loss was due to changes of address.

Balance-Sheet.—The balance-sheet showed a balance of £2 12s. 5d.

Election of Officers.—The following officers were unanimously elected for the ensuing year:—*President:* C. W. Thorp, Todmorden. *Vice-President:* R. B. Sellers, Rochdale. *Secretary:* Dr. Melvin, Rochdale. On the proposition of Dr. HENRY, seconded by Dr. HITCHIN, the following were elected to the Committee: Dr. Hitchin (Heywood), Dr. Brown (Bacup), and Drs. Kerr and Bateman (Rochdale). Dr. Thorp (Todmorden) was re-elected as Representative on the Branch Council.

Association Funds and Benevolent Purposes.—Dr. BROWN (Bacup) moved and Dr. MILLS seconded the following resolution:

> That this Division is strongly of opinion that the British Medical Association should devote a portion of its income to benevolent and charitable purposes, the first claim being that of needy past and present members of the Association, their widows and orphans.

This was carried unanimously with very little discussion, the feeling of the meeting being very strongly in its favour.

The "Year Book."—Dr. BROWN moved and Dr. MILLS seconded:

> That this Division is of the opinion that the *Year Book* is absolutely useless, and suggests that it be discontinued,

and that the money thus saved be ear-marked for benevolent and charitable uses.

Dr. Henry moved, and Dr. Sellers seconded, an amendment to leave out all the words after discontinued. The amendment was carried, and the resolution thus amended carried unanimously. Dr. Brown moved, and Dr. Bateman seconded, the following proposition:

> As the *Year Book* costs about £1,000 a year, the Division is of the opinion that if it is discontinued this sum should be set apart as the nucleus of a fund to be devoted to the purposes of the first resolution.

This was carried.

Darnell Fund.—Dr. Brown moved and Dr. Melvin seconded a resolution:

> That the Division requests the Branch to subscribe to the Darnell Fund.

This was carried unanimously.

The Expenditure of the Association.—Dr. Brown moved, and Dr. Henry seconded:

> That this Division views with alarm the expenditure of the British Medical Association as revealed in the balance sheet, and requests the Annual Representative Meeting to appoint a committee of inquiry into the financial position of the Association with a view to a considerable reduction in the expenditure.

This was carried unanimously, there being a very strong feeling that the financial arrangements demand some drastic revision.

Vote of Thanks to Chairman.—A vote of thanks to the Chairman closed the meeting.

METROPOLITAN COUNTIES BRANCH:

Lambeth Division.

A meeting of this Division was held at Bethlem Royal Hospital on May 31st at 4 p.m.

Confirmation of Minutes.—The minutes of the previous meeting were read and confirmed.

Candidature for Central Council.—A letter was read from the Secretary of the Wandsworth Division asking the Lambeth Division to support the candidature of Dr. Crookshank for the Central Council.

Election of Officers.—The following gentlemen were elected to serve on the Committee for the ensuing year: *Chairman*, Dr. Capes; *Vice-Chairman*, Mr. H. Taylor; *Representative at Representative Meeting*, Dr. Esler; *Secretary*, Dr. Atkinson; *Representatives on Branch Council*, Dr. Atkinson (*ex officio*) and Mr. Sangster; *Committee*, Mr. Denning, Mr. H. Norton, Dr. Oswald, Mr. Hickley, Mr. W. B. Taylor, and Dr. Stoddart.

Dr. Capes thanked the Division for his re-election.

Vote of Thanks to Retiring Secretary.—A vote of thanks was accorded to the retiring Secretary, who briefly replied.

Paper.—Dr. Savage read an interesting paper on the natural history of delusions. He showed how delusions might arise from loss of memory, abnormal sensations, physical disorders, abnormal pride or suspicion, that they varied with age, sex, heredity and environment. Dr. Savage gave several examples of delusion. The paper was discussed by Dr. Hyslop, Mr. Leftwich, Mr. Duke, and Dr. Stoddart. A hearty vote of thanks was accorded to Dr. Savage, who briefly replied.

Visit to Hospital.—Dr. Hyslop took members round the hospital after the meeting.

MIDLAND BRANCH:

Boston and Spalding Division.

The fourth annual meeting was held at the Red Lion Hotel, Boston, on May 22nd, Dr. Smith in the chair.

Confirmation of Minutes.—The minutes of the last meeting were read and confirmed.

Secretary's Report.—The Secretary's report was then read, showing an increase of two in membership. Two ordinary meetings were held during the year, eight and fourteen members attending respectively.

Treasurer's Report.—The Treasurer's report showed a balance of £1 1s. 9d.

Election of Officers.—The following were elected officers for the ensuing year:—*Chairman*, Dr. W. H. Smith; *Vice-Chairman*, Dr. Miller; *Representative in Representative Meetings*, Dr. H. G. White; *Representative on Branch Council*, Dr. Wilson; *Secretary and Treasurer*, Dr. Wilson; *Executive Committee*, Drs. Allan, Mann, Mason, Miller, Moxham, Pilcher, Slocock, Spilsbury, Taylor, White, Williams, and Wrinch.

Associate Member.—Dr. H. G. White, of Swineshead.

Programme for the Year.—It was decided that meetings should be held on October 2nd, 1906, and the last Tuesday in March, 1907.

Luncheon.—Ten members lunched in the hotel afterwards.

PERTH BRANCH.

The summer meeting was held in the Golf Club House, Moncrieff Island, on Friday, June 1st, at 3.15, Dr. MacEwen, Vice-President, in the chair.

Apologies for Non-Attendance.—Apologies were intimated from Drs. Temple and Borrowman, and Colonel Moffett.

Confirmation of Minutes.—The minutes of last meetings were read, approved, and signed.

Re-election of Council.—On the motion of Dr. Urquhart, seconded by Dr. Trotter, the Branch elected the present Council to continue in office till June, 1907.

Representative.—Dr. Alexander Trotter was unanimously elected Branch Representative to the Annual Meeting in London, on the motion of the Vice-President, seconded by Dr. Burnett.

School Certificates.—Some discussion arose in regard to the granting of medical certificates to children absent from school through ilness. Finally, Dr. Urquhart agreed to bring forward a motion in regard to this subject at the next meeting.

Golf Match.—A golf match then took place against golfing members from the Dundee Branch by the courtesy of the King James VI Golf Club, and resulted as follows:

Dundee.		*Perth.*	
Dr. Anderson...	1	Dr. Govan	0
Dr. Rogers	0	Dr. Alcock	1
Dr. P. Campbell	1	Dr. R. Stirling	0
Dr. Johnstone	1	Dr. Haig	0
Dr. Gowans	0	Dr. Taylor	1
Drs. Kynoch and MacEwan	0	Dr. Paton	1
Dr. Neave	1	Dr. Stewart	0
Dr. Thornton...	1	Dr. MacEwen	0
Dr. Whyte	1	Dr. Burnett	0
Dr. McKenzie	0	Dr. Mitchell	1
Dr. McNeill	0	Dr. Mackay	1
	6		5

Dundee winning by 1 match.

NORTH WALES BRANCH:

South Carnarvon and Merioneth Division.

The annual meeting of the Division was held at the Gorsygedol Hotel, Barmouth, on Thursday, May 31st. In the unavoidable absence of the Chairman, Dr. Rowlands (Towyn), Dr. Hamilton (Dolgelly) was voted to the Chair.

Confirmation of Minutes.—The minutes of the last meeting were read, approved, and signed by the Chairman.

Correspondence.—Letters of apology were read from Dr. Rowlands (Towyn), Dr. H. Briggs (Liverpool), and Dr. Walter Williams (Portmadoc).

Election of Officers, 1906-7.—The following were elected for the ensuing year:—*Chairman*, Dr. O. Wynn Griffith (Pwllheli); *Vice-Chairman*, Dr. Hugh Jones (Dolgelly); *Honorary Secretary*, Dr. Gladstone Jones (re-elected); *Representative to Representative Meeting*, Dr. O. Wynne Griffith. *Representatives on Branch Council*, Dr. Williams (Machynlleth), Dr. Hamilton (Dolgelly), and the Secretary; *Executive Committee*, Dr. J. O. Williams (Barmouth), Dr. W. Thomas (Nevin).

Nomination of Representative of the North Wales Branch on the Central Council.—The present representative (Dr. H. Jones Roberts, Penygroes) was unanimously approved of.

Report of Executive Committee.—The annual report of the Executive Committee was read and adopted.

Annual Representative Meeting.—The matters contained in the agenda of the Annual Representative Meeting were discussed, and, on the Executive Committee's recommendation, it was resolved that the Representative have full power to act.

Contract Practice Appointments.—The Bradford rules were discussed and the principles adopted; the matter was further referred to the Executive Committee to bring up a report to the next meeting.

Autumn Meeting.—It was decided to hold the autumn meeting at Blaenau Festiniog.

Discussion.—Dr. J. W. Rowlands (Llanaelhaiarn) opened a discussion on the use of the forceps in general practice. (Dr. H. Briggs, Rodney Street, Liverpool, had signified his intention of taking part in it, but was unable to attend, much to the regret of members present). A most interesting paper was read, all the members present, without exception, taking part in the discussion, and a very cordial vote of thanks was accorded Dr. Rowlands for his paper.

SHROPSHIRE AND MID-WALES BRANCH.

A special general meeting of this Branch was held at the Salop Infirmary on Tuesday, June 5th, at 3.45 p.m., Dr. Charles Gwynn, President, being in the chair.

Proposed Royal Charter.—The meeting was called to consider the question of the application of the Association for a Royal Charter. After some discussion the following resolution was proposed by Dr. Packer, seconded by Dr. Gardner, and carried unanimously:

> That this Branch approves of the application for a Royal Charter, but reserves itself the right to criticize details thereof through its Representative at the annual meeting.

SOUTH-EASTERN BRANCH:

Canterbury and Faversham Division.

The annual meeting of this Division was held at the Kent and Canterbury Hospital on Thursday, June 7th, Dr. Whitehead Reid in the chair.

Next Meeting.—Whitstable was agreed on, at Dr. Hayward's house on October 4th.

Election of Officers.—The following were elected officers for the ensuing year: *Chairman*, Dr. Whitehead Reid (proposed by Dr. Gosse, seconded by Dr. Evers); *Vice-Chairman*, Dr. Alexander (proposed by Dr. Hayward, seconded by Dr. Gowlland); *Representative on Branch Council*, Dr. Evers (proposed by Dr. Gosse, seconded by Dr. Hayward); *Executive Committee*, Drs. Bowes, Etheridge, Gowlland, Mr. Flint, Hayward, B. Rigden. *Honorary Secretary and Treasurer*, Dr. A. R. Henchley, 1, London Road, Canterbury; *Representative at Representative Meeting* (with Isle of Thanet), Dr. Gosse (proposed by Dr. Reid, seconded by Dr. Raven); Deputy, Dr. Street.

Proposed Royal Charter.—The proposed application for a Royal Charter was discussed, but this and other matters referred to in the provisional agenda of the Representative Meeting were left to the discretion of the Representative for action.

Association Candidates for the General Medical Council.—Attention was drawn by the Honorary Secretary to the opinion expressed by the President of the General Medical Council that if the Association candidates were elected as such in matters where the British Medical Association was taking any action in penal or similar cases, they would not be able to take any part in the deliberations of the Council on them.

Votes of Thanks.—Votes of thanks were passed to the Chairman for presiding, to the Hospital Board for the use of the library, to the Dean of Canterbury, to the Chairman of Canterbury East Waterworks, and to the officers of the Division for their services during the past year.

Excursion.—Subsequently the members and friends were shown round the Cathedral by the Dean of Canterbury, and a visit was afterwards paid to the Canterbury Waterworks, where the Directors were present to conduct the party round.

Dinner.—The members dined at the County Hotel, Dr. Whitehead Reid being in the chair.

Annual Report.—The annual report of the Division is as follows: The membership last June was 42 and now is 50. Several members have left the Division, and the Committee regret the loss through death of Dr. Gogarty, the first chairman of the Canterbury Division under the new régime. There have been 4 Divisional meetings in different parts of the Division, and 2 Committee meetings, the latter having to deal principally with ethical cases, most of which have terminated satisfactorily to all the parties concerned. All the meetings have been medico-political, clinical, and social in character. The most successful Divisional meeting in point of numbers was held at Sittingbourne, when 21 members were present. The average attendance is 16, as compared with 13 last year. The annual meeting of the South-Eastern Branch was held in Canterbury last June, and in every way was a success, Dr. Reid being President and Mr. F. Wacher, jun., Vice-President. The general election which took place in the early part of this year afforded the first real opportunity to the Association to bring before the prospective members of Parliament matters of real importance to the State as well as the medical profession. Your Honorary Secretary received satisfactory replies to the questions put to them (which have already appeared in the British Medical Journal Supplement) from Mr. Henniker Heaton, M.P. for Canterbury, Mr. L. Hardy, M.P. for Ashford, and Dr. Napier, M.P. for Faversham. An endeavour has been made to amalgamate with East Kent and Canterbury Medical Society, but without success. The expenditure since the last annual meeting is £8 19s. 3d., a fraction over 3s. 6d. a member, which, considering the expenses connected with the Branch meeting and the general work done by the Division, is somewhat small.

SOUTH-WESTERN BRANCH:

Truro Division.

A meeting of this Division was held at Penzance on Friday, May 11th.

Papers.—The following papers were read:—Dr. Ratcliffe-Gaylard: Rare cases of dermatitis. Dr. Hugh Montgomerie: Certain symptoms in pneumonia: crisis, lysis, sputum, herpes. Dr. H. Shore: Ichthyol. Dr. Edwards: Notes (with photographs) of a case of an anencephalous infant. Mr. M. R. Taylor: A case of multiple venous thrombosis. Dr. H. Shore: The effect of cycling in heart disease and phthisis. A general discussion followed each paper.

School Children.—Dr. Nesbit brought up the question of giving certificates to children unable to attend school. The Chairman and Honorary Secretary were asked to obtain certain information before the next meeting.

Annual Meeting.—The annual meeting will be held in the beginning of July at Newquay, when the election of officers for the ensuing year will take place.

Association Notices.

BRANCH AND DIVISION MEETINGS TO BE HELD.

Bath and Bristol Branch.—A combined meeting of the Bath and Trowbridge Divisions will be held at the Royal United Hospital, on Monday, July 2nd, at 6 p.m. Business: To elect Representative for the Bath and Trowbridge Divisions. —D. Leslie Beath, Honorary Secretary.

Birmingham Branch: Central Division.—The annual meeting will be held at the Medical Institute on Tuesday, June 26th, at 4 p.m. Business: (1) Election of officers, members of Branch Council, and of Executive Committee. (2) To receive the annual report. (3) To instruct the Representative (Supplement, British Medical Journal, May 5th). (4) Vote of thanks to retiring officers. (5) Any other business.—E. D. Kirby, Honorary Secretary.

Birmingham Branch: Tamworth and Nuneaton Division.—A combined meeting of the Tamworth and Nuneaton Division with the Coventry Division will be held at the Coventry and Warwickshire Hospital, Coventry, on Tuesday, June 19th, at 4 p.m., for the purpose of electing a Joint Representative to represent them at the Annual Representative Meeting, and to instruct him in regard to matters arising at that meeting (see Supplement, British Medical Journal, May 5th).—E. H. Snell, Secretary of the Constituency.

Border Counties Branch.—The annual meeting of this Branch will be held on Friday, June 29th, at the County Hotel, Carlisle, at 3 30 p.m. Business: Election of office-bearers; Presidential address by Dr. J. E. Bowser of Penrith. If any members of the Branch have got material that they wish to communicate to the meeting they will facilitate matters by informing the Secretary of their intention at their earliest convenience. In all probability there will be a joint meeting of the North and West Cumberland Divisions of the Branch immediately before the general meeting, at which the election of the Representative of these two Divisions to the Representatives' Meeting will be elected.—Francis R. Hill, Honorary Secretary.

East Anglian Branch.—The annual meeting of the East Anglian Branch will be held at the Palace Hotel, Southend-on-Sea, on Tuesday, June 26th. Programme of Proceedings: 12.30, Council meeting. 12.45, General meeting. Agenda: (1) Minutes of last meeting. (2) Report of the Council. (3) Report of election of officers. 1.54, Luncheon, by kind invitation of the President-elect, Dr. Clough Waters, at the Palace Hotel. 2.30, Resumed general meeting. Introduction of Dr. Clough Waters as President of the Branch, by Dr. Barton. (4) President's address. (5) Address by Sir Frederick Treves, Bart., G.C.V.O., C.B., LL.D., Serjeant-Surgeon to His Majesty the King. 4 to 6, Garden party in the Shrubbery, by kind invitation of the Chairman and Members of the South Essex Division. By the kind courtesy of the Commodore and Committee of the Alexandra Yacht Club, members attending are considered to be members for the day.—B. H. Nicholson, H. A. Ballance, and J. Gutch, Honorary Secretaries.

East Anglian Branch: West Norfolk Division.—The Annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. Gardiner, King's Lynn, Honorary Secretary.

Edinburgh Branch.—The annual meeting of the Edinburgh Branch will be held in the Hall of the Royal College of Physicians on Friday, June 29th, at 4.15 p.m.—Norman Walker and A. Logan Turner, Honorary Secretaries.

Edinburgh Branch: South-Eastern Counties Division.—The annual meeting of this Division will be held in the King's Arms Hotel, Melrose, on the afternoon of Friday, June 22nd, Dr. Cullen, Chairman, presiding. Business: (1) Election of office-bearers. (2) Instructions to Representative.—W. Hall Calvert, Honorary Secretary.

Glasgow and West of Scotland Branch.—The statutory meeting of the Branch will, by courtesy of the Glasgow Parish Council, be held in the Eastern District Hospital, 253, Duke Street (opposite Cattle Market), on the afternoon of Friday, June 22nd, at 3 o'clock. Programme: 3 p.m., annual business meeting. Agenda: (1) Minutes; (2) Secretaries' annual report; (3) Treasurer's annual report; (4) Report of Medico-Ethical Committee; (5) election of office-bearers. 3.30 p.m., afternoon tea. 4 p.m., Visit to wards of new hospital, under the guidance of the Medical Superintendent (Dr. John McCubbin Johnston). 4.30 p.m., Dr. Carswell will show some cases, and make some remarks bearing on the early diagnosis and treatment of mental affections.—James H. Nicoll, James Hamilton, Honorary Secretaries.

Lancashire and Cheshire Branch.—The annual meeting of this Branch will be held in Blackpool on Saturday, June 30th. Members wishing to bring any business before the meeting are requested to communicate at once with the Honorary Secretary, Dr. T. Arthur Helme, Mayfield, Victoria Park, Manchester.

Metropolitan Counties Branch.—Notice is hereby given that voting papers for electing the Metropolitan Counties Branch Representatives on the Central Council will be sent out on or before June 16th, and must be returned by June 20th. Notice is also given that the annual meeting of the Branch for the declaration of the poll of officers and for amending the ethical and financial rules, and other business, will be held on Tuesday, June 26th.—Frederick J. Smith and Ernest Clarke, Honorary Secretaries.

Metropolitan Counties Branch: Westminster Division.—The annual meeting will be held at 20, Hanover Square, on Wednesday, June 20th, at 9 p.m., Mr. J. Bland-Sutton in the chair. Agenda: (1) Minutes. (2) Correspondence. (3) Questions. (4) (*a*) To elect the officers, the Representatives of the Division on the Branch Council, and the ordinary members of the Executive Committee; (*b*) to elect the Representative of the Division—Representative Meeting of the Association; (*c*) to consider the annual report of the Executive Committee; (*d*) To consider the business of the Annual Representative Meeting. (5) To discuss the question of the Royal Charter. (6) Any other business.—W. Knowsley Sibley, Honorary Secretary.

Northern Counties of Scotland Branch.—The annual meeting of this Branch will be held at the Railway Hotel, Tain, on Thursday, June 21st, at 12 noon. Agenda: (1) Minutes. (2) Election of office-bearers for the ensuing year and a Representative of the Branch in Representative Meetings of the Association. (3) To consider business at the Representative Meeting. (4) To consider communications from the Medical Secretary. (5) To arrange place for autumn meeting, and also for the next annual meeting. (6) Any other competent business. Luncheon will be served at the Railway Hotel, Tain, at 1 p.m. Tickets 3s., exclusive of wines. Through the courtesy of the Tain Golf Club members wishing to play golf will have an opportunity of doing so. Golfers kindly communicate with Dr. Gillies, Tain, who will make the necessary arrangements. In accordance with By-law 24 of the constitution, the election of a Representative of the Branch on the Central Council must be made by voting papers sent to each member, and the candidates' names must be sent to me on or before June 30th, and the nomination signed by three members.—J. Munro Moir, M.D., Honorary Secretary, 4, Ardross Terrace, Inverness.

North Lancashire and South Westmorland Branch.—The annual meeting will be held at the Friends' Hall, Lancaster, on Wednesday, June 27th, at 3.45 p.m. Members willing to show slide specimens and patients are requested to send particulars to A. S. Barling, Honorary Secretary, Lancaster.

North of England Branch: North Northumberland Division.—The annual meeting of the above will be held at the Infirmary, Berwick-upon-Tweed, on Wednesday, June 20th, at 2.30 p.m. Business: To elect officers as per Rule 11. To consider matters referred to Divisions since last meeting. Consultations between general medical practitioners and the question of fees (introduced by Dr. Burnaud). Any other business.—R. B. Robson, M.B., Honorary Secretary, Alnwick.

Oxford and Reading Branch.—The annual meeting of this Branch will take place at the library of the Royal Berkshire Hospital, at 5 p.m., on Saturday, July 7th. Dr. W. Osler, F.R.S., Regius Professor of Medicine at Oxford, will give a lantern demonstration of the General Morphology of Abdominal Tumours. Dr. E. L. Bevers, Dr. Mallam, Mr. Arthur Roberts, the President (Mr. H. G. Armstrong), and probably others, will exhibit patients or specimens. The dinner will be held at the Queen's Hotel, Reading, at 7 p.m., when members have the privilege of bringing guests.—W. T. Freeman, 30, Portland Place London Road Reading Honorary Secretary

South-Eastern Branch.—The sixty-second annual meeting will be held at the Crystal Palace on Wednesday, June 27th, at 2.15 p.m. Dr. Hetley (President-elect) kindly invites members to lunch at the Crystal Palace from 1 to 2 p.m. Agenda: In addition to the business of an ordinary meeting: (1) To receive the report of the election of new officers, who shall thereupon take office. (2) To receive the report of the Council on the affairs of the Branch and the annual financial statement. After the meeting, entertainments will be provided in the Crystal Palace, and expeditions will be arranged to the Norwood Cottage Hospital, the Norwood Sanatorium for the Treatment of Alcohol and Drug Inebriety, and the Dulwich Gallery. Dinner at the Crystal Palace at 6.15 p.m. (for 6.30 p.m.); charge 7s. Wine will be provided by local members. Those who propose to be present at lunch or dinner are requested to signify their intention to Dr. Prangley, 197, Anerley Road, S.E., not later than Saturday, June 23rd.—H. M. Stewart, Honorary Secretary.

South-Eastern Branch: Chichester and Worthing Division.—The annual meeting of the above will be held at the Infirmary, Chichester, on Wednesday, June 20th, at 3.30 p.m. Mr. W. S. Simpson (Chairman of the Division) will preside. Agenda: (1) Minutes of the last meeting. (2) To appoint the place of next meeting. (3) Election of officers—Chairman, Vice-Chairman, Secretary, Representative on Branch Council, Representative at Representative Meeting, and members of the Executive Committee. (4) To discuss the proposed application for Royal Charter. (5) Dr. Ewart will show cases in the wards.—H. C. L. Morris, Honorary Secretary.

South-Eastern Branch: Guildford Division.—The annual meeting will be held at the Royal Surrey County Hospital, Guildford, on Wednesday, June 20th, at 4.30 p.m. Agenda: (1) Minutes. (2) Election of officers, Representatives on Branch Council and in Representative Meetings, and members of Executive Committee. (3) To receive annual report. (4) Business of the Annual Representative Meeting. (5) Any other business. (6) Paper by Mr. G. Sichel, F.R.C.S.: Some remarks on radiotherapy. Tea will be provided at 4.15. The Honorary Secretary will be glad to receive any nominations for the above offices, and to hear from any members wishing to show cases or specimens.—E. J. Smyth, Maythorne, Epsom Road, Guildford, Honorary Secretary.

South-Eastern Branch: Isle of Thanet Division.—The annual meeting of the Division will be held at the Victoria Hotel, Hardres Street, Ramsgate (opposite Sanger's Amphitheatre), on Tuesday, June 19th, at 4.15 p.m., F. Tyrell, M.R.C.S. in the chair. Tea will be served before the meeting. Agenda: (1) Election of officers—Chairman, Honorary Secretary and Treasurer, Members of Executive Committee. (2) To receive the report of the Executive Committee (3) To consider the business of the Annual Representative Meeting (vide Supplement of the British Medical Journal, May 5th.) (4) Dr. Watts will introduce a discussion on the Recommendations of the Medico-Political Committee on the subject of Contract Practice (See Supplement of the British Medical Journal, July 22nd, 1905, p. 29). (5) To consider the question of Registration of Nurses (see Supplement of the British Medical Journal, March 3rd). (6) Any other business. All members of the South-Eastern Branch are invited to attend these meetings and to introduce professional friends, but they are not entitled to vote on Divisional questions.—Hugh M. Raven, Honorary Divisional Secretary, Broadstairs.

Southern Branch.—The thirty-third annual meeting will be held at the Town Hall, Portsmouth (by kind permission of the Mayor, Sir George Couzens), on Friday, June 22nd. The general meeting will be held at 1.15 in the Grand Jury Room. At this meeting a communication from the Organization Committee of the Association will be considered. After the business is concluded the President will deliver an address. The President kindly invites the members to luncheon in the Mayor's banqueting room at 2 o'clock. Other arrangements for the afternoon are: (1) A visit to H.M.S. *Vernon*, by the kind permission of Sir Archibald Douglas, Commander-in-Chief; (2) a visit to Porchester Castle, where tea will be provided. Members intending to be present at luncheon are earnestly requested to communicate with C. P. Childe, Esq., Honorary Secretary of the Portsmouth Division, Kent Road, Southsea, as soon as possible; but in any case not later than June 18th.—H. J. **Manning**, Honorary Secretary and Treasurer, Laverstock House, Salisbury.

South Midland Branch.—The annual meeting of this Branch will be held at the Board Room, General Hospital. Northampton, on Thursday, June 21st, at 2.30 p.m., under the presidency of H. Cropley, F.R.C.S., Northampton. Agenda: (1) Minutes of last meeting. (2) Letters and communications. (3) Announcement of names of new members elected by Branch Council. (4) President's address. (5) Address on Gastric Surgery, by Mr. Mansell Moullin, F.R.C.S., Surgeon, London Hospital. There will be a demonstration of medical and surgical cases by the hospital staff after the meeting. This year being the jubilee of the Branch, it is hoped that all members will make a special effort to be present. The President invites the members to luncheon at the Masonic Hall, Princes Street, Northampton, at 1 p.m. sharp. Members intending to be present at the luncheon are requested to communicate with the Honorary Secretary on or before Monday, June 18th.—E. **Harries Jones**, Honorary Secretary.

South Midland Branch: Aylesbury Division.—A meeting of the above will be held in the Board Room of the Royal Bucks Hospital on Tuesday, June 26th, at 2.30 p.m.: Agenda: (1) The minutes of the last meeting. (2) To consider whether or not it is advisable to continue the Aylesbury Division as a separate Division of the British Medical Association.—**Horace Rose**, Honorary Secretary, Melrose, Aylesbury.

Staffordshire Branch.—The thirty-third annual meeting of the Branch will be held at the North-Western Hotel, Stafford, on Thursday, June 28th, at 5 15 p.m, when an address will be delivered by the President-elect, Charles Reid, Esq., M.B. Agenda: (1) Introduction of the new President. (2) Minutes of the last annual meeting. (3) Correspondence. (4) Address by the President (5) Report of the Council. (6) The financial statement. (7) To decide the place of holding the next annual meeting. (8) Election of officers for the ensuing year—President-elect, Secretary and Treasurer. The following gentlemen are nominated for the undermentioned offices: President-elect, J. T. Hartill, Willenhall; General Secretary, Dr. Petgrave Johnson, Stoke; Treasurer, Mr. J. Clare, Hanley. (9) Report on the election of the Representative of the Branch on the Council of the Association. Members have the privilege of introducing friends. Dinner at 7 p.m., charge 5s.—G. **Petgrave Johnson**, Honorary General Secretary, Stoke-on-Trent.

The first general meeting of the session will be held at Stoke on Thursday, November 29th. Members desiring to read papers are requested to communicate the titles to the General Secretary as soon as possible.

Ulster and Connaught Branches.—The annual meeting will be held on Thursday, June 21st, when the following officers will be elected:—President, Secretary, Treasurer, two Members of the Central Council to represent the Ulster and Connaught Branches, and a member of the Irish Committee (who shall not be resident in Belfast). Members having business or scientific communications to make to the meeting will please send the Honorary Secretary notice of the same not later than June 12th.—**Cecil E. Shaw**, Honorary Secretary, Belfast.

West Somerset Branch.—The sixty-third annual meeting of this Branch will be held at the London Hotel, Taunton, at 12.15 p.m., on Friday, June 22nd, when the new President, Dr. R. Liddon Meade-King will take the chair. Agenda: Minutes of last meeting; annual report of Council; treasurer's accounts; election of officers; President's address (notes on a seventeenth century textbook of medicine); consideration of agenda of Representative Meeting on July 24th. This, as appearing in the Supplement to the British Medical Journal of May 5th, will be considered so far as time will permit. Members are requested to acquaint themselves with any particular item on that agenda which they wish to bring to the notice of the Branch. Luncheon will be served at 1.30 p m. This will be paid for out of the Branch funds in the case of members signifying to the Honorary Secretary their intention of being present by June 19th. For others, and guests, a charge of 3s. per head will be made, in all cases exclusive of wine, etc. After lunch those present will become the guests of the President, and will be driven to Pickeridge Hill, where a golf match will be played between the medical members of the Pickeridge Club and the rest of the Branch. They will also be entertained there to tea. The return journey will be made in time to suit the convenience of those having to catch trains from Taunton station. In the event of the day proving wet an alternative programme will be arranged.—W. B. **Winckworth**, Honorary Secretary.

Worcestershire and Herefordshire Branch: Worcester Division.—The annual meeting of this Division will be held on Monday, June 18th, at 5 p.m., at the Worcester Infirmary. Business, etc.: To elect officers for the ensuing year (the present Secretary does not seek re-election) To elect Representative of the Division in the Representative Meeting of the Association. Matters referred to Divisions: (1) Hospital Out-patient Departments (Supplement, February 17th); (2) State Registration of Nurses (Supplement, March 3rd); (3) the Royal Charter (Supplement, March 24th). To adopt ethical rules for the Division. Any other business.—**Geo. W. Crowe**, Honorary Secretary.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE.

In accordance with the Order in Council of May 13th. 1901, a commission, dated November 26th, 1902, has been restored to Surgeon H. C. Ross, formerly in His Majesty's Navy, who has been placed on the list of volunteers for service in the event of war or emergency.

The following appointments have been made at the Admiralty: **Percy T. Sutcliffe**, M.B., Surgeon, lent to the *Sirius*, for manœuvres, June 5th; **Duncan G. Addison Scott**, M.B., Surgeon, lent to the *Hussar*, temporary, while on fishery duties, June 6th; **Reginald T. A. Levinge**, Fleet Surgeon, lent to the *Russell*, June 9th.

ARMY MEDICAL SERVICE.

Lieutenant-Colonel J. M. Irwin, M.B., R.A.M C., to be Assistant Director-General, vice Lieutenant-Colonel W. Babtie, V.C., C.M.G., M.B., R.A.M.C., whose tenure of that appointment has expired, June 1st.

Correction.—In the correction of Mr. Wilson Ranson's christian name published last week, p. 330, his surname was in error printed Ransom.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

In seventy-six of the largest English towns, including London, 7,242 births and 3,907 deaths were registered during the week ending Saturday last, June 9th. The annual rate of mortality in these towns, which had been 14.5, 14.2, and 13.8 per 1,000 in the three preceding weeks, further declined last week to 12.9 per 1,000. The rates in the several towns ranged from 4.2 in Hornsey, 4.7 in Walthamstow, 5.7 in Handsworth (Staffs), 6.7 in Devonport, 7.0 in Hastings, 7 2 in East Ham, 7.6 in Aston Manor, and 7.7 in Walsall and in Barrow-in-Furness to 16.7 in Middlesbrough, 16.9 in Bury, 17.8 in Manchester, 17.9 in Wigan and in Rochdale, 18.3 in Burnley, 19.6 in Birkenhead, and 23.1 in Bournemouth. In London the rate of mortality was 12.7 per 1,000, while it averaged 12.9 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.2 per 1,000 in the seventy-six large towns; in London this death-rate was equal to 1.1 per 1,000, while among the large provincial towns the rates ranged upwards to 2.3 in Warrington, 2.4 in Halifax, 2.7 in Birkenhead, 2.8 in Manchester, 3 2. in Bootle, 3.4 in Rotherham, and 4.1 in Burnley. Measles caused a death-rate of 1.1 in Swansea, 1.3 in Salford, 1.4 in Bradford, 1.6 in Manchester, 1.7 in Rotherham, 1.8 in Bury, and 2.5 in Burnley; scarlet fever of 1 3 in Birkenhead; diphtheria of 1.1 in Northampton and 1 4 in Halifax; and whooping-cough of 1 1 in Swansea, 1.6 in Bootle, 2.2 in Walsall, and 2.3 in Warrington. The mortality from enteric fever and from diarrhoea showed no marked excess in any of the large towns, and no fatal case of small-pox was registered during the week. The number of small-pox patients remaining under treatment in the Metropolitan Asylums Hospitals, which had been 2, 2, and 5 on the three preceding Saturdays, had further risen to 6 on Saturday last, June 9th; one new case was admitted during the week, against 2, 0, and 3 in the three preceding weeks. The number of scarlet fever cases in these hospitals and in the London Fever Hospital, which had been 2,396, 2,453, and 2,516 at the end of the three preceding weeks, had further increased to 2,603 at the end of last week; 344 new cases were admitted during the week, against 301, 338, and 312 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

During the week ending Saturday last, June 9th, 1,037 births and 535 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 17.6, 17.3, and 17.5 per 1,000 in the three preceding weeks, declined again to 15.6 per 1,000 last week, but was 2.7 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 9.1 in Perth and 11.4 in Paisley to 16.2 in Greenock and 17.5 in Glasgow. The death-rate from the principal infectious diseases averaged 2 0 per 1,000, the highest rates being recorded in Glasgow and Dundee. The 281 deaths registered in Glasgow included 10 which were referred to measles, 4 to diphtheria, 12 to whooping-cough, and 12 to diarrhoea. Four fatal cases of measles and 2 of diarrhoea were recorded in Edinburgh. Two deaths from diphtheria, 3 from whooping-cough, 2 from "fever," and 4 from diarrhoea occurred in Dundee, and 4 from diarrhoea in Aberdeen.

HEALTH OF IRISH TOWNS.

During the week ending Saturday, June 2nd, 579 births and 356 deaths were registered in six of the principal Irish towns, as against 541 births and 385 deaths in the preceding period. The annual death-rate in these towns, which had been 23.5, 23.1, and 20 4 per 1,000 in the three preceding weeks, fell to 18 1 per 1,000 in the week under notice, this figure being 4.3 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 13 6 in Londonderry and Waterford and 16.4 in Cork to 21 8 in Belfast and 23.2 in Limerick. The zymotic death-rate in the same six Irish towns averaged 1 0 per 1,000, or 0.1 per 1,000 higher than during the preceding period, the highest figure—2.6—being recorded in Belfast, while no deaths under this heading were recorded in Cork, Limerick, and Waterford.

During the week ending Saturday, June 9th, 477 births and 333 deaths were registered in six of the principal Irish towns, as against 579 births and 356 deaths in the preceding period. The annual death-rate in these towns, which had been 23.1, 20.4, and 18.1 per 1,000 in the three preceding weeks, fell to 17 8 per 1,000 in the week under notice, this figure being 4 9 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 9.6 in Limerick and 13.6 in Waterford to 19 8 in Belfast and 27.3 in Londonderry. The zymotic death-rate in the same six Irish towns averaged 1.3 per 1,000, or 0.3 per 1,000 higher than during the preceding period, the highest figure—3.8—being recorded in Belfast, while no deaths under this heading were recorded in Cork, Limerick, and Waterford.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

The British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the British Medical Journal supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the British Medical Journal for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429 Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

Meetings of Branches & Divisions.

[*The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the* JOURNAL.]

BIRMINGHAM BRANCH:
COVENTRY DIVISION.

THE annual meeting of this Division was held at the Coventry and Warwickshire Hospital on June 13th, Dr. DAVIDSON being in the chair.

Election of Officers.—The following officers for the ensuing year were unanimously elected: *Chairman,* Mr. Faulder White; *Vice-Chairman,* Dr. Pickup; *Representative on Branch Council,* Dr. Milner Moore; *Secretary,* Dr. Snell. The following were elected members of the Committee: Drs. Callaghan, J. Orton, Fenton, McGlashan, Davidson, and Hawley.

Report of Executive Committee.—The report of the Executive Committee was presented. (1) Membership: Membership on December 31st, 1904, 40; membership on December 31st, 1905, 43. (2) Financial Statement:—*Dr.:* Grant received from Branch Council, 43 members at 1s. per head, £2 3s.; deficit, December 31st, 1905, £3 0s. 6d.; total, £5 3s. 6d. *Cr.:* Deficit, December 31st, 1904, £1 5s.; printing, 18s. 6d.; stationery, £1 8s. 9d.; postage, £1 11s. 3d.; total, £5 3s. 6d. (3) Report of proceedings: (*a*) Meetings: Division meetings held during the year, 8; meetings at which scientific matters were discussed, 5; meetings at which medico-political, ethical or kindred matters were discussed, 6; occasions on which members dined together, 1; average attendance at meetings, 24.1; Division Executive Committee meetings, 11; also one joint meeting with Tamworth and Nuneaton, and Leamington and Warwick Divisions. (*b*) Notes of any special question of local interest dealt with (for example, local medical appointments, matters of public health, contract practice, etc.): The most noteworthy movement in the Division during the year in relation to contract practice has been the unanimous adoption of 4s. per member per annum as the minimum charge for medical attendance on members of Friendly Societies. In this connexion two deputations from members of Friendly Societies have been received by the Committee. The Division also decided that no member of the profession in the area of the Division should apply for the medical officership of a Friendly Society. Several papers on medical subjects have been read, and numerous specimens shown. Dr. Bateman, of the Medical Defence Union, gave a very interesting paper on Medical Defence, and the Laws relating to the Medical Profession. A joint meeting of the Division with the Tamworth and Nuneaton, and Warwick and Leamington Divisions, was held for the purpose of electing a Representative, and instructing him in relation to the Annual Representative Meeting. A very successful annual dinner was held. The Voluntary Book Section with sixteen members has been continued during the year. (*c*) Remarks: The Committee of the Division desire again to direct attention to the unsatisfactory arrangements existing in relation to the finances of the Division; this is shown by reference to the accompanying balance sheet. The Committee submit that neither the spirit nor the letter of By-law 17 of the Association is carried out by the Branch Council. It may be suggested that it is reasonable that a Division with such scanty expenses should be financed by the Association funds if the Division is to be a unit of the Association and not a separate local medical society.—Dr. DAVIDSON proposed, and Dr. PICKUP seconded, the receipt and adoption of the annual report of the Committee. This was spoken to by Drs. MILNER MOORE and RICE, and carried unanimously.

Proposed Royal Charter.—Dr. MILNER MOORE explained the position of the Association in regard to the proposed application for a Royal Charter, and gave the reasons for the application. He then moved:

> That this Division approve the proposed application for a Royal Charter.

This was seconded by Dr. DAVIDSON, and carried unanimously.

Vote of Thanks.—The CHAIRMAN proposed, and Dr. M. MOORE seconded, that a cordial vote of thanks be given to the Committee of the Coventry and Warwickshire Hospital for the continued use of their Board Room for the meetings of the Division.

DORSET AND WEST HANTS BRANCH:
BOURNEMOUTH DIVISION.

A MEETING was held at Bournemouth on June 6th at 3.45 p.m.

Confirmation of Minutes.—The minutes of the last meeting were read and confirmed.

Election of Officers.—The following officers were elected: *Chairman,* Dr. James Davison; *Vice-Chairman,* Mr. Parkinson; *Representative,* Dr. Johnson Smyth; *Honorary Secretary,* Dr. E. K. Le Fleming. *Representatives on Branch Council,* Dr. W. V. Snow, Dr. E. Hyla Greves, Dr. W. Johnson Smyth, Dr. E. K. Le Fleming, Dr. G. H. Batterbury, Dr. A. Purkiss, Dr. Eleanor C. Bond.

Proposed Royal Charter.—A vote in favour of the general principle having been taken, the draft Charter was considered in detail, and the following amendments carried:—Draft Charter: Paragraph 2, Clause (2), Subdivision (v), referring to candidature of a member for Parliament, was objected to *in toto.* Paragraph 12, referring to Supplemental Charter: That the words "and voting" be omitted.

Draft Ordinances.—Section II, Paragraph 10, Clause (*b*), referring to expulsion of member: That the number "twenty-eight" be substituted for "fourteen" (days). Section IV, Paragraph 15, "Voting Power": That members of the Council be also entitled to vote. Section IV, Paragraph 16, Subsection (6), "Election of Representatives": That the words "more than three months" be omitted. Section IV, Paragraph 17, Subsection (3), Clauses (*a*) and (*e*): The words "three calendar months" be substituted for "twenty-eight days."

Draft By-laws.—Section II, Paragraph 5, "Election by a Branch Council": That "Branch" be substituted for "Association" in the last sentence. Section V, Paragraph 27, Subsection (1), "Special Representative Meetings": In place of the final words, "three constituencies," add "three Branches representing at least five hundred members." Section IX, Paragraph 54, "Committees": That the Committee for (1) Finance and (2) Journal be combined.

Discussion.—A discussion on The Management of Midwifery Cases under Insanitary Conditions was introduced by the HONORARY SECRETARY, in which many of those present joined.

DUNDEE BRANCH.

THE annual meeting of this Branch was held in the Students' Union, Dundee, on Friday, 8th June, at four o'clock, Dr. MACKIE WHYTE in the chair.

Confirmation of Minutes—The minutes of the last meeting were read, approved, and signed.

Election of Office-bearers.—The following were elected: *President*, G. C. Dickson, Carnoustie; *President-elect*, C. R. Marshall, Dundee; *Past-President*, J. Mackie Whyte, Dundee; *Vice-Presidents*, G. Peterkin, Forfar; M. F. Anderson, Dundee; *Treasurer*, D. M. Greig, Dundee; *Secretaries*, R. Cochrane Buist, Dundee, and A. P. Low, Dundee; *Council*, D. Lennox, Dundee (elected 1904), J. D. Gilruth, Arbroath (elected 1904), J. S. Y. Rogers, Dundee (elected 1904), J. Broom, Kirriemuir, R. Soutar, Montrose, A. J. Duncan, Dundee; *Representative for Representative Meeting*, A. P. Low; *Deputy*, C. R. Marshall; *Representative on Central Council*, R. C. Buist.

Bradford Rules.—Subject to their sanction by the Central Council, the "Bradford Rules" were adopted.

Proposed Medical Officer for Dundee School Board.—The Branch Council submitted the draft scheme prepared by the Board with a memorandum by the Council. After a long discussion, it was resolved:

> That the Branch declare that it would be improper for the profession to undertake the duties under the present draft scheme.

Thereupon it was resolved:

> That the Dundee members be empowered to take further action on this matter, and that the Dundee members of Council be appointed a Subcommittee.

Insusceptibility to Vaccination.—It was resolved:

> That the attention of the Scottish Local Government Board be drawn to the Registrar-General's Report on Vaccination of Children born in 1904, where on p. 25 it appears that in Dundee 1 in 90 was certified as constitutionally insusceptible of vaccination, and that it be represented that this does not correspond to the facts of the case, and that the Board should make inquiry as to the source of the lymph which gave such bad results; and also that the Branch urge upon the Board the desirability of the issue to all practitioners of standardized calf lymph, similar to that issued to public vaccinators in England.

Statement as to Abuse of Dundee Outdoor Maternity Department.—Dr. R. C. BUIST reported that the medical officer attending outdoor cases in connexion with the Royal Infirmary Maternity Department did not consider that there was any abuse of this charity. A form is required to be signed by the husband or other responsible person that they are unable to afford the services of a medical practitioner.

Annual Representative Meeting.—The Representative was given power to vote as he considered most advisable.

EDINBURGH BRANCH:

NORTH-WEST DIVISION.

THE annual meeting of this Division was held on Tuesday, June 5th, in the Hall of the Royal College of Physicians, Edinburgh, Dr. CAVERHILL in the chair.

Confirmation of Minutes.—The minutes of the previous meeting were confirmed.

Election of Officers and Executive Committee.—The following were re-elected:—*Chairman:* Dr. Caverhill. *Vice-Chairman:* Mr. Hodsdon. *Honorary Secretary and Treasurer:* Dr. Dingwall Fordyce. *Executive Committee:* The following were elected: Professor Harvey Littlejohn, Dr. Fowler, Dr. Russell, Dr. Elder, Mr. Scott Carmichael, Dr. Oliphant Nicholson. Mr. Hodsdon and Dr. Dingwall Fordyce were elected Representatives of the Division to the Branch Council. Dr. Caverhill was elected Representative of the Division at Representative Meetings of the Association.

Report of Executive Committee.—The annual report of the Executive Committee was presented.

Annual Representative Meeting.—The business of the Annual Representative Meeting at London was considered.

Matters Referred to Divisions.—The Representative of the Division at the annual meeting at Leicester, 1905, presented a statement, and such subjects referred to the Division from (*a*) the Central Council, (*b*) the Representative Meeting at Leicester, as members brought up for discussion, were considered. In this connexion it was unanimously agreed by the meeting:

> That general approval be given to the obtaining of a Royal Charter, and that it be remitted to the Representative of the Division at the Representative Meeting of the Association to move that in Clause 13 of the Charter, in the second line after the word "specially" there be inserted the words "elected and."

Other Business.—Under this heading two motions brought forward by Dr. CAVERHILL were agreed to.

LANCASHIRE AND CHESHIRE BRANCH:

MANCHESTER (WEST) DIVISION.

THE annual meeting of this Division was held on Wednesday, May 30th, Dr. F. H. WORSWICK presiding.

Election of Officers.—The following gentlemen were elected officers for the ensuing year: *Chairman*, Dr. C. Stennett Redmond; *Vice-Chairman*, Mr. Wallace Eales; *Honorary Secretary*, J. Skardon Prowse, B.A., M.B., Willow Bank, Moss Lane East, Manchester (Telephone, 83 Rusholme); *Executive Committee*, Dr. John Broadbent, Dr. J. Brassey Brierley, Dr. E. W. Floyd, Dr. Worswick, Dr. Oswald Woodcock; *Representatives in the Branch Council*, Dr. Brassey Brierley, Dr. J. Skardon Prowse; *Representative in the Annual Representative Meeting*, Dr. J. Brassey Brierley; *Deputy Representative*, Dr. F. H. Worswick.

Vote of Thanks.—A cordial vote of thanks was accorded to Dr. Worswick for his services during the year as Chairman.

Annual Report.—The consideration of the annual report was deferred until the next meeting.

Annual Representative Meeting.—In regard to the subjects for discussion at the Annual Representative Meeting, it was decided to give Dr. Brassey Brierley a free hand to vote as he shall judge best for the interests of the Association and in view of his knowledge of the opinions of the Division.

Nominations for the General Medical Council Election.—In March last the Division nominated Dr. T. Arthur Helme and Dr. C. J. Renshaw as candidates. It was understood that at least two of the other Divisions of this Branch had adopted the same gentlemen as their nominees. The HONORARY SECRETARY said he had received a communication from Dr. Helme intimating that he wished to withdraw from the contest. The subject was fully discussed, and the meeting unanimously resolved that Dr. Helme be requested to continue to stand for election. In consideration of the fact that conditions have totally changed since the date of nomination, the meeting agreed *nemine dissentiente* to the following resolution:

> That this Division hereby withdraws its nomination of Dr. C. J. Renshaw as candidate for election to the General Medical Council.

The Honorary Secretary was instructed to inform the Manchester (Central) and the Altrincham Divisions of this decision, and to send a letter for publication in the BRITISH MEDICAL JOURNAL stating the action taken by the Division.

Payment of Representatives.—Dr. STENNETT REDMOND proposed:

> That the Manchester (West) Division is of opinion that the Representatives of Divisions in the Representative Meeting ought to be paid a sum sufficient to meet the expense which they necessarily incur in attending that meeting; and suggests that a portion of the surplus funds of the Branch, not exceeding £5 for each Representative, might with propriety be set aside for this purpose.

—Dr. NICHOL seconded, and the meeting unanimously agreed to the resolution.—The Representatives of the Division in the Branch Council were requested to bring the matter to the notice of that body.

Proposed Royal Charter.—The members present (with one dissentient) were in favour of the application for a Royal Charter.

MIDLAND BRANCH:

LEICESTER DIVISION.

THE annual meeting of this Division was held on May 30th.

Election of Officers.—The following were elected officers for the ensuing year:—*Chairman of the Division:* Dr. J. C. Burkitt. *Vice-Chairman:* Dr. A. V. Clarke. *Representatives on Branch Council:* Drs. Blakesley, Burkitt, Clarke, Lewitt, Gibbons. *Vice-President of the Branch:* Dr. J. T. Tibbles. *Executive Committee:* Drs. Ballard, Lewitt, Stamford, Henry, Harris, M. Williams, Vice. *Representative at Representative Meetings:* Dr. R. Sevestre. *Honorary Secretaries of the Division:* Dr. R. Sevestre, 119, London Road, Leicester; Dr. W. E. Gibbons, 1, Charles Street, Leicester. A small Committee was appointed to nominate another Representative in case the elected Representative was unable to attend the Representative Meeting.

Annual Representative Meeting.—The following resolution was carried:

> That this Division is of opinion that if under the proposed charter the Representative Meeting is to be the governing body of the Association, its meetings must be either more frequent, or as an alternative the Council must be given more discretion in dealing with the decisions of the Representative Meeting.

METROPOLITAN COUNTIES BRANCH:

CITY DIVISION.

THE first annual dinner was held at the Gaiety Restaurant, Strand, on Thursday evening, June 7th. The outgoing Chairman, Dr. J. W. HUNT, presided. Some fifty members and guests were present, amongst the latter being Mr. Albert Spicer (M.P. for Central Hackney), Dr. Langley Browne (Chairman of the Council of the Association), Mr. Andrew Clark (President of the Metropolitan Counties Branch), Dr. Walter Smith (St. Pancras Division), Dr. F. J. Smith, Dr. Risien Russell, Mr. W. D. Harmer, Dr. St. Clair Shadwell, and Dr. C. J Stocker (Chairman of the Stratford Division). The Executive Committee had invited the attendance of ladies, and several were present. After dinner several toasts were proposed and replied to, and all the speeches were of commendable point and brevity. An excellent programme of music was rendered by Mr. Charles Capper's quartette, and the evening was spent so enjoyably that the dinner will probably become an annual function.

HAMPSTEAD DIVISION.

THE fourth annual meeting of this Division was held at St. Peter's Hall, Belsize Square, on Friday, June 8th, at 5 p.m., Mr. F. R. HUMPHREYS in the chair.

Confirmation of Minutes.—The minutes of the previous meeting were taken as read.

Letters.—A letter was received from Dr. Ford Anderson regretting inability to be present.

Questions.—Dr. C. W. COOKE complained that he and other members had not received agenda for the meeting. The HON. SECRETARY promised to make inquiry of the printers, by whom these notices were sent out.

Deputation.—The HON. SECRETARY stated that a deputation of members of the Joint Committee appointed on May 5th would shortly be received by the Council of the Hampstead Hospital.

Medical Charities Committee.—The HON. SECRETARY informed the meeting that the resolution of the Hampstead Division in favour of a Medical Charities Committee of the Branch Council had been accepted by the Branch on May 30th.

Annual Report.—The CHAIRMAN called upon the Hon. Secretary to read the annual report, which stated that the number of medical men in the area was 427, of whom 191 were now members, as against 183 last June. The number of meetings had been increased from 8 to 10, the average attendance from 14 to 20. The increase in the average attendance was to a great extent due to the interest taken in the Hampstead Hospital question. Out of 191 members only 78 attended meetings, and of these 39 only attended one meeting each. The Committee had been very active, and had held 12 meetings with an average attendance of 9 out of 14 members, as against an average attendance of 8 out of 14 last session. Mr. R. Henslowe Wellington, Vice-Chairman, who would in the ordinary course have become Chairman for the ensuing session, had been obliged to resign his post owing to pressure of work. The Committee, while accepting his resignation with great regret, desired to congratulate him on his important appointment to the Chair of Medical Jurisprudence at the Westminster Hospital. The chief points of interest in the work of the session had been:—(1) The deputation to Parliamentary candidates in September, 1905 (see BRITISH MEDICAL JOURNAL, SUPPLEMENT, September 30th, 1905). (2) The first annual dinner of the Division on October 31st, 1905 (see BRITISH MEDICAL JOURNAL, SUPPLEMENT, November 11th, 1905). (3) The Hampstead Hospital question, which had been dealt with at two large meetings—(*a*) on April 6th, when only members of the Division were invited; (*b*) on May 5th, when the whole local profession were invited (invitations issued to 388 medical men). A total number of 91 medical men attended the two meetings. (4) Divisional meetings had been held for the first time in out-lying parts of the Division, namely, Finchley and Hendon. (5) A Subcommittee had been appointed to inquire into Local Contract Practice. (6) A Subcommittee had been appointed to inquire into the best means for starting a Divisional Medical Library.

Finance.—Owing to the Hospital question, the increased number of meetings, and the Contract Practice inquiry, expenses for the year would be much heavier than last year. For the year 1906, expenses up-to-date had been £32 18s. 8d., and the balance was £7 15s. 10d. Dr. MACEVOY proposed and Dr. CLAUDE TAYLOR seconded "That the annual report be approved." Carried unanimously.

Contract Practice Subcommittee.—Mr. ARMIT regretted that owing to pressure of work and the fact that replies were still coming in, he had been unable to prepare a written report. Inquiry forms had been issued to all the medical men in the area (427) and reminder cards had been sent to all those who had not replied to the first inquiry. The state of Contract Practice within the area was unsatisfactory, and called for reform.

Library Subcommittee.—The CHAIRMAN explained that a scheme for starting a Divisional Library in connexion with the Hampstead Central Library was under consideration of a Subcommittee.—Dr. TAYLOR said that the proposal of the Central Library Committee to extend the Central Library had been unnecessarily deferred. In the meantime accommodation at the Central Library was limited. He would urge members to press the importance of the extension scheme upon the Borough Council so that their recent decision might be altered.—Mr. HUMPHREYS remarked on the necessity for excluding the public from the use of these books.—Mr. CUNNINGTON thought that this could be managed at the present stage by keeping a separate catalogue for the use of medical men only.

Election of Officers and Committee.—Dr. C. W. COOKE proposed, and Dr. SANSOM seconded,

> That in future nominations for the Committee be printed and circulated to all members in the agenda for the annual meeting. This was carried.

Election of Chairman.—Mr. Wellington's letter of resignation was read. The HON. SECRETARY said that the Committee had nominated Mr. Humphreys for re-election. This would involve an alteration of Divisional Rule (6), but in accordance with Divisional Rule (13) rules could be altered at the annual meeting. Any alteration made, however, would be subject to the approval of the Central Council in accordance with By-law 12 of the Association. (See *Year Book*, 1906, p. 51.) —Mr. ARMIT then proposed, and Dr. OPPENHEIMER seconded,

> That Mr. Humphreys be re-elected Chairman for the 1906-1907 session subject to the approval of the Central Council.

Dr. HALL opposed strongly on the ground that notice of such suggested alteration of rule should have been duly given in the agenda issued to members. Time enough had elapsed since the meeting of the Committee for this to have been done. Other members agreed with Dr. Hall.—Mr. ARMIT then begged to move as an amendment of his original resolution,

> That the portion of this meeting dealing with the election of the Chairman be adjourned in order to allow of notice being given to all members of a proposal to suspend Divisional Rule (6).

This was seconded by Dr. OPPENHEIMER, and lost by a large majority.—The meeting then proceeded to the election of a Chairman. Dr. Macevoy, Dr. Pidcock, and Mr. Nelson Hardy were duly proposed and seconded, and Dr. Macevoy was eventually elected on a show of hands. Mr. Humphreys (who had temporarily left the chair, which was taken by Mr. Nelson Hardy during his absence), now resumed the chair. He referred briefly to the events of the past session and to the valuable aid he had received from the Hon. Secretary, Dr. Yeld. He was personally averse to re-election. In the action he had taken throughout his year of office he had had the honour and interests of the profession at heart. He welcomed the new Chairman (Dr. Macevoy) and wished him a successful year of office.

Vote of Thanks.—Dr. OPPENHEIMER, in proposing a hearty vote of thanks to the retiring Chairman, congratulated him on the immense amount of valuable work he had done during a difficult session. Dr. GLOVER cordially seconded the vote of thanks, which was carried with acclamation. Other elections were then proceeded with.

Vice-Chairman.—Dr. Pidcock was elected.

Representatives on the Branch Council.—Dr. Oppenheimer was re-elected. Dr. Sharman was elected.

Representative to the Representative Meeting.—Mr. Armit was nominated by the Committee. Dr. HALL proposed, and Dr. GLOVER seconded, the nomination of Mr. Cunnington.—Dr. YELD supported the re-election of Mr. Armit, and referred to his valuable work on the subject of the Royal Charter, the inquiry into local Contract Practice, his appointment to the Medico-Political Committee of the Association, and as special correspondent for the JOURNAL to the International Congress at Lisbon. Mr. Armit was then re-elected.

Hon. Secretary.—Dr. Yeld was unanimously re-elected.

Ordinary Members of Committee.—A proposal by the Committee to increase the number of ordinary members from 7 to 12 was rejected on the same grounds as the previous proposal to re-elect the retiring Chairman, and the matter will be referred to a special meeting. The following seven members were elected: Dr. Ford Anderson, Miss Ada Browne, Mr. Cunnington, Mr. Humphreys, Dr. Heath Strange, and Dr. Clark Wilson were re-elected, and Dr. Glover was elected as a new member.

Subcommittees.—The Subcommittees on local Contract Practice (Dr. Macevoy, Mr. Humphreys, and Mr. Armit) and on the Divisional Library scheme (Mr. Humphreys, Mr. Cunnington, and Dr. Yeld) were reappointed.

Instructions to Representative.—Dr. Anderson wrote to say that the resolution by the Hampstead Division on "consultants" might be subject to some modification, of which he would furnish information to Mr. Armit.

NORTH OF ENGLAND BRANCH:

GATESHEAD AND CONSETT DIVISIONS.

A MEETING of the Gateshead and Consett Divisions was held at Gateshead on June 12th. Dr. W. MEARNS was voted to the chair, and there was a very good attendance.

Representative at Annual Representative Meeting.—Dr. Alfred Cox of Gateshead was elected as Representative for the Annual Representative Meeting and was given his instructions.

GATESHEAD DIVISION.

The annual meeting was held on June 12th. In the absence of the Chairman (Dr. T. M. Kimpster), Dr. MEARNS took the chair.

Division Picnic.—It was resolved to hold this function in the first week in July if a sufficient number of members signified their willingness to go.

Election of Officers.—Dr. J. W. MacKay of Pelaw was elected *Chairman of the Division;* Dr. Cox was re-elected *Honorary Secretary;* Drs. Mearns, Blacklock, and Speirs were re-elected as *Representatives on the Branch Council.* The above, with Dr. W. Jaques of Washington, form the *Executive* of the Division.

SOUTH WALES AND MONMOUTHSHIRE BRANCH:

NORTH GLAMORGAN AND BRECKNOCK DIVISION.

THE annual meeting of the Division was held at the Castle Hotel, Merthyr, on Thursday, May 31st, at 5 p.m., Dr. T. W. PARRY in the chair.

Confirmation of Minutes.—The minutes of the last regular meeting were read, confirmed, and signed.

Election of Officers.—The following were elected for the ensuing year:—*Chairman*, Dr. J. S. Lyttle; *Vice-Chairman*, Dr. R. W. Jones; *Secretary and Treasurer*, Mr. C. J. Weichert; *Representative for Representative Meeting*, Dr. W. E. Thomas; *Representatives on Branch Council*, Messrs. J. L. W. Ward, B. M. Lewis and D. N. Morgan; *Executive Committee*, Messrs. C. Biddle, C. E. Cochrane, T. Finney, Ll. Jones, R. W. Jones, R. C. Joyce, W. Ll. Rhys, W. E. Thomas, and Glanville Morris.

Report of Executive Committee.—The annual report of the Executive Committee was read and adopted.

Agenda of Annual Representative Meeting.—The following were appointed a special Committee to consider the agenda for the Annual Representative Meeting and to instruct the Representative thereon: Messrs. Evan Jones, C. Biddle, W. E. Thomas, T. W. Parry, J. S. Lyttle and E. N. Davies.

Proposed Royal Charter.—It was resolved that the Division approve of the proposed application for a Royal Charter.

Chairman's Address.—Dr. LYTTLE gave an address on recent actions for negligence against medical men, with special reference to the Judge's charge in the case of Tughan *v.* Darnell. At its close a hearty vote of thanks was accorded Dr. Lyttle.

☞ ***To ensure the insertion of notices in this column, they must be received at the Central Offices of the Association not later than the first post on Tuesday.***

Association Notices.

LIBRARY OF THE BRITISH MEDICAL ASSOCIATION.

MEMBERS are reminded that the Library and Writing Rooms of the Association are fitted up for the accommodation of the members in commodious apartments, at the office of the Association, 429, Strand. The rooms are open from 10 a.m. to 5 p.m., except on Saturdays, when they close at 2 p.m. Members can have their letters addressed to them at the office.

BRANCH AND DIVISION MEETINGS TO BE HELD.

BATH AND BRISTOL BRANCH.—A combined meeting of the Bath and Trowbridge Divisions will be held at the Royal United Hospital, on Monday, July 2nd, at 6 p.m. Business: To elect Representative for the Bath and Trowbridge Divisions. —D. LESLIE BEATH, Honorary Secretary.

BIRMINGHAM BRANCH: CENTRAL DIVISION.—The annual meeting will be held at the Medical Institute on Tuesday, June 26th, at 4 p.m. Business: (1) Election of officers, members of Branch Council, and of Executive Committee. (2) To receive the annual report. (3) To instruct the Representative (SUPPLEMENT, BRITISH MEDICAL JOURNAL, May 5th). (4) Vote of thanks to retiring officers. (5) Any other business.—E. D. KIRBY, Honorary Secretary.

BIRMINGHAM BRANCH: WEST BROMWICH DIVISION.—The conjoint meeting of this Division with the Dudley and Bromsgrove Divisions will take place on July 2nd, at the Medical Institute, Birmingham, for the election of Representative. This meeting will be followed by the annual meeting of the West Bromwich Division.—H. W. B. PLUMMER, Honorary Secretary, West Bromwich Division.

Border Counties Branch.—The annual meeting of this Branch will be held on Friday, June 29th, at the County Hotel, Carlisle, at 3.30 p.m. Business: Election of office-bearers; Presidential address by Dr. J. E. Bowser of Penrith. If any members of the Branch have got material that they wish to communicate to the meeting they will facilitate matters by informing the Secretary of their intention at their earliest convenience. In all probability there will be a joint meeting of the North and West Cumberland Divisions of the Branch immediately before the general meeting, at which the election of the Representative of these two Divisions to the Representatives' Meeting will be elected.—Francis R. Hill, Honorary Secretary.

Dorset and West Hants Branch.—The summer meeting will be held at Abbotsbury, Wednesday, July 11th. Members desirous of reading papers or exhiting cases are requested to communicate, on or before June 30th, with the Honorary Secretary, Dr. James Davison, Streateplace, Bournemouth.

East Anglian Branch.—The annual meeting of the East Anglian Branch will be held at the Palace Hotel, Southend-on-Sea, on Tuesday, June 26th. Programme of Proceedings: 12.30, Council meeting. 12.45, General meeting. Agenda: (1) Minutes of last meeting. (2) Report of the Council. (3) Report of election of officers. 1.54, Luncheon, by kind invitation of the President-elect, Dr. Clough Waters, at the Palace Hotel. 2.30, Resumed general meeting. Introduction of Dr. Clough Waters as President of the Branch, by Dr. Barton. (4) President's address. (5) Address by Sir Frederick Treves, Bart., G.C.V.O., C.B., LL.D., Serjeant-Surgeon to His Majesty the King. 4 to 6, Garden party in the Shrubbery, by kind invitation of the Chairman and Members of the South Essex Division. By the kind courtesy of the Commodore and Committee of the Alexandra Yacht Club, members attending are considered to be members for the day.—B. H. Nicholson, H. A. Ballance, and J. Gutch, Honorary Secretaries.

East Anglian Branch: West Norfolk Division.—The Annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. Gardiner, King's Lynn, Honorary Secretary.

Edinburgh Branch.—The annual meeting of the Edinburgh Branch will be held in the Hall of the Royal College of Physicians on Friday, June 29th, at 4.15 p.m. — Norman Walker and A. Logan Turner, Honorary Secretaries.

Lancashire and Cheshire Branch.—The annual meeting of this Branch will be held in Blackpool on Saturday, June 30th. Members wishing to bring any business before the meeting are requested to communicate at once with the Honorary Secretary, Dr. T. Arthur Helme, Mayfield, Victoria Park, Manchester.

Lancashire and Cheshire Branch: St. Helen's Division.—A meeting of the members of the above Division will be held on Wednesday, June 27th, at the Y.M.C.A. Buildings, North Road, St. Helen's, at 8.15 p.m. Agenda: Annual meeting. Election of office-bearers, etc. Financial statement. Report of meeting with Warrington Division.—John J. Buchan, Honorary Secretary.

Leinster Branch: East Leinster Division.—The annual meeting of the Division will be held at the Royal College of Physicians, Dublin, on Wednesday, June 27th, at 5 o'clock.—Reginald Peacocke, Honorary Secretary.

Metropolitan Counties Branch: Kensington Division.—The annual general meeting will be held at the Kensington Town Hall, on Wednesday, June 27th, at 5 p.m. Agenda: Annual report of the Executive Committee. Election of Representative for the meeting in July. Consideration of the business of the Annual Representative Meeting. Election of officers for 1906-7. Any other business.—Charles Buttar, Honorary Secretary, 10 Kensington Gardens Square, W.

Northern Counties of Scotland Branch.—In accordance with By-law 24 of the constitution, the election of a Representative of the Branch on the Central Council must be made by voting papers sent to each member, and the candidates' names must be sent to me on or before June 30th, and the nomination signed by three members.—J. Munro Moir, M.D., Honorary Secretary, 4, Ardross Terrace, Inverness.

North Lancashire and South Westmorland Branch.—The annual meeting will be held at the Friends' Hall, Lancaster, on Wednesday, June 27th, at 3.45 p.m. Members willing to show slide specimens and patients are requested to send particulars to A. S. Barling, Honorary Secretary, Lancaster.

Oxford and Reading Branch.—The annual meeting of this Branch will take place at the library of the Royal Berkshire Hospital, at 5 p.m., on Saturday, July 7th. Dr. W. Osler, F.R.S., Regius Professor of Medicine at Oxford, will give a lantern demonstration of the General Morphology of Abdominal Tumours. Dr. E. L. Bevers, Dr. Mallam, Mr. Arthur Roberts, the President (Mr. H. G. Armstrong), and probably others, will exhibit patients or specimens. The dinner will be held at the Queen's Hotel, Reading, at 7 p.m., when members have the privilege of bringing guests.—W. T. Freeman, 30, Portland Place London Road, Reading Honorary Secretary

South-Eastern Branch.—The sixty-second annual meeting will be held at the Crystal Palace on Wednesday, June 27th, at 2.15 p.m. Dr. Hetley (President-elect) kindly invites members to lunch at the Crystal Palace from 1 to 2 p.m. Agenda: In addition to the business of an ordinary meeting: (1) To receive the report of the election of new officers, who shall thereupon take office. (2) To receive the report of the Council on the affairs of the Branch and the annual financial statement. After the meeting, entertainments will be provided in the Crystal Palace, and expeditions will be arranged to the Norwood Cottage Hospital, the Norwood Sanatorium for the Treatment of Alcohol and Drug Inebriety, and the Dulwich Gallery. Dinner at the Crystal Palace at 6.15 p.m. (for 6.30 p.m.); charge 7s. Wine will be provided by local members. Those who propose to be present at lunch or dinner are requested to signify their intention to Dr. Prangley, 197, Anerley Road, S.E., not later than Saturday, June 23rd.—H. M. Stewart, Honorary Secretary.

South-Eastern Branch: Dover Division.—The annual meeting of this Division will be held at the Grand Hotel, Dover, on Friday, the 29th inst., at 8.30. Agenda: (1) Reading of minutes; (2) election of officers; (3) business of the Representative Meeting (application for Royal Charter); (4) other business, if any.—F. A. Osborn, Honorary Secretary.

South Midland Branch: Aylesbury Division.—A meeting of the above will be held in the Board Room of the Royal Bucks Hospital on Tuesday, June 26th, at 2.30 p.m.: Agenda: (1) The minutes of the last meeting. (2) To consider whether or not it is advisable to continue the Aylesbury Division as a separate Division of the British Medical Association.—Horace Rose, Honorary Secretary, Melrose, Aylesbury.

Staffordshire Branch.—The thirty-third annual meeting of the Branch will be held at the North-Western Hotel, Stafford, on Thursday, June 28th, at 5.15 p.m., when an address will be delivered by the President-elect, Charles Reid, Esq., M.B. Agenda: (1) Introduction of the new President. (2) Minutes of the last annual meeting. (3) Correspondence. (4) Address by the President. (5) Report of the Council. (6) The financial statement. (7) To decide the place of holding the next annual meeting. (8) Election of officers for the ensuing year—President-elect, Secretary and Treasurer. The following gentlemen are nominated for the undermentioned offices: President-elect, J. T. Hartill, Willenhall; General Secretary, Dr. Petgrave Johnson, Stoke; Treasurer, Mr. J. Clare, Hanley. (9) Report on the election of the Representative of the Branch on the Council of the Association. Members have the privilege of introducing friends. Dinner at 7 p.m., charge 5s.—G. Petgrave Johnson, Honorary General Secretary, Stoke-on-Trent.

The first general meeting of the session will be held at Stoke on Thursday, November 29th. Members desiring to read papers are requested to communicate the titles to the General Secretary as soon as possible.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

In seventy-six of the largest English towns, including London, 9,100 births and 3,924 deaths were registered during the week ending Saturday last, June 16th. The annual rate of mortality in these towns, which had been 14.2, 13.8, and 12.9 per 1,000 in the three preceding weeks, was again 12.9 per 1,000 last week. The rates in the several towns ranged from 5.1 in Willesden, 5.2 in East Ham, 5.4 in Hornsey, 6.9 in Bournemouth, 7.2 in King's Norton, 7.3 in Reading, 7.7 in Barrow-in-Furness, 7.8 in Northampton, and 7.9 in Croydon, to 17.6 in Huddersfield, 17.7 in Bradford, 17.8 in Burnley, 18 3 in Manchester, 18.8 in Warrington, 19.4 in Liverpool, 20.6 in St. Helens and in West Hartlepool, and 21.4 in Middlesbrough. In London the rate of mortality was 12.2 per thousand, while it averaged 13.2 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.2 per 1,000 in the seventy-six large towns; in London this death-rate was equal to 1.1 per 1,000, while among the large provincial towns the rates ranged upwards to 2.6 in Rotherham and in Middlesbrough, 2.9 in Liverpool and in Manchester, 3.1 in Salford, 3.3 in Halifax, and 4.1 in Burnley. Measles caused a death-rate of 1.0 in Birmingham, 1.3 in Tottenham, 1.4 in Halifax, 1.6 in Huddersfield and in Bradford, 1.8 in Manchester, 2.2 in Salford, and 3.0 in Burnley; scarlet fever of 1.6 in Hastings; diphtheria of 1.0 in

Halifax and in Middlesbrough; and whooping-cough of 1.0 in Liverpool, 1.1 in Walsall and in Swansea, 1.3 in Reading, and 1.5 in Warrington. The mortality from enteric fever and from diarrhoea showed no marked excess in any of the large towns, and no fatal case of small-pox was registered during the week. The number of small-pox patients remaining under treatment in the Metropolitan Asylums Hospitals, which had been 2, 5, and 6 on the three preceding Saturdays, had further risen to 7 on Saturday last, June 16th; 1 new case was admitted during the week, against 0, 3, and 1 in the three preceding weeks. The number of scarlet fever cases in these hospitals and in the London Fever Hospital, which had been 2,453, 2,516, and 2,603 at the end of the three preceding weeks, had further increased to 2.677 at the end of last week; 355 new cases were admitted during the week, against 338, 312, and 344 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

During the week ending Saturday last, June 16th, 1,005 births and 542 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 17.3, 17.5, and 15.6 per 1,000 in the three preceding weeks, rose to 15.8 per 1,000 last week, and was 2.9 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 12.0 in Leith and 14.3 in Aberdeen, to 16.9 in Glasgow and 17.4 in Dundee. The death-rate from the principal infectious diseases averaged 1.7 per 1,000, the highest rates being recorded in Edinburgh and Glasgow. The 271 deaths registered in Glasgow included 14 which were referred to measles, 4 to diphtheria, 4 to whooping-cough, and 9 to diarrhoea. Five fatal cases of measles and 4 of diarrhoea were recorded in Edinburgh. Three deaths from measles and 2 from diarrhoea occurred in Aberdeen; and 2 from diarrhoea in Dundee.

HEALTH OF IRISH TOWNS.

During the week ending Saturday, June 16th, 565 births and 323 deaths were registered in six of the principal Irish towns, as against 477 births and 333 deaths in the preceding period. The annual death-rate in these towns, which had been 20.4, 18.1, and 17.8 per 1,000 in the three preceding weeks, rose to 19.9 per 1,000 in the week under notice, this figure being 7.0 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 16.4 in Dublin and Cork, to 21.4 in Waterford and 24.8 in Londonderry. The zymotic death-rate in the same six Irish towns averaged 1.4 per 1,000, or 0.1 per 1,000 higher than during the preceding period, the highest figure—5.0—being recorded in Londonderry, while Cork, Limerick, and Waterford registered no deaths under this heading at all.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE.

Fleet Surgeon D'Arcy Harvey, M.B., has been appointed to the *President*, lent to Deptford Yard, temporary, July 9th.

An examination for the rank of Staff Surgeon will be held at Haslar Hospital on July 16th.

ROYAL ARMY MEDICAL CORPS.

Major F. A. Saw, M.B., retires on retired pay, June 20th. He was appointed Surgeon, January 30th, 1886, and made Surgeon-Major twelve years thereafter. He served in South Africa in 1896 in medical charge of the Mashonaland Field Force (medal), and in Cape Colony during the war in 1899-1901. He is not, however, credited in the Army Lists with either medal or clasp for this latter service.

Colonel O. E. P. Lloyd, V.C., is appointed Principal Medical Officer, Jubbulpore and Jhansi Brigades, Western Command, India.

Colonel R. H. Forman, M.B., is appointed Principal Medical Officer, Bombay Brigade, Western Command, India.

Major J. R. McMunn has been appointed Staff Officer to the Principal Medical Officer, South Africa.

Captains W. A. Ward, G. J. S. Archer, M.B., E. McDonnell, M.B., P. J. Bodington, M.B., T. J. Crean, V.C., W. J. P. Adye-Curran, E. W. Siberry, N. J. C. Rutherford, M.B., and G. G. Delap, D.S.O., have been selected for the course of study at the Royal Army Medical College, commencing on August 1st.

Lieutenant C. G. Browne, from the Seconded List, to be Lieutenant, June 10th.

ARMY MEDICAL RESERVE.

Surgeon-Captain J. K. Tomory, M.D., having resigned his commission in the Volunteers, ceases to belong to the Army Medical Reserve, June 8th.

INDIAN MEDICAL SERVICE.

Lieutenant-Colonel J. W. T. Anderson, Bombay Establishment, is permitted to retire from the service from April 15th. He was appointed Assistant Surgeon, October 2nd, 1880, and was made Lieutenant-Colonel, October 2nd, 1900. He was with the Burmese expedition in 1886-7.

Lieutenant A. D. White, 8th (Lucknow) Division, has been appointed a Specialist in Operative Surgery.

Surgeon-General W. L. Gubbins, M.B., C.B., M.V.O., Army Medical Staff, now Principal Medical Officer, Eastern Command, India, will succeed Surgeon-General Sir T. J. Gallwey, M.D., K.C.M.G., C.B., as Principal Medical Officer in India Sir Thomas having been appointed Principal Medical Officer, Aldershot Army Corps.

Lieutenant-Colonel P. A. Weir, M.B., Bengal Establishment, has been promoted to be Colonel from October 26th, 1905. He entered the service as Assistant Surgeon, September 30th, 1875, and became Surgeon-Lieutenant-Colonel September 30th, 1895. He was in the Afghan war in 1879-80, receiving the medal for the campaign.

The undermentioned promotions, all of Bengal, and which have already been announced in the British Medical Journal, have received the approval of the King: Majors to be Lieutenant-Colonels: P. Hehir, M.D., L. J. Pisani, F.R.C.S., W. R. Edwards, C.M.G., M.D., C. MacTaggart, M.B., G. J. H. Bell, M.B., J. T. Daly, M.B., H. Fooks, E. Hudson, F.R.C.S., A. W. Dawson, M.D., W. H. B. Robinson, all dated April 1st, 1906. Captains to be Majors: G. Lamb, M.B., H. Burden, F.R.C.S., and C. H. Bowle-Evans, dated July 29th, 1905; J. Fisher, D.S.O., M.B., E. S. Peck, M.B., S. A. Harriss, M.B., E. C. MacLeod, C. Thomson, M.B., D. W. Sutherland, M.D., and W. Selby, F.R.C.S., dated January 29th, 1906. Particulars of their commissions and war services are to be found in the British Medical Journal of May 26th.

Lieutenant-Colonel K. A. Dalal, M.B., Bombay Establishment, has retired from the service, from January 3rd, 1906. He joined the department as an Assistant-Surgeon, March 31st, 1876, and was made Surgeon-Lieutenant-Colonel, March 31st, 1896.

Lieutenant-Colonel H. C. Banerji, Bengal Establishment, has also retired from the service, dated February 1st, 1906. His first commission bears date October 2nd, 1880; that of Lieutenant-Colonel, October 2nd, 1900. He was with the Burmese expedition in 1886-7 (medal with clasp), and with the Manipore expedition in 1891 (mentioned in dispatches, clasp).

Major J. O Pinto, Madras Establishment, has likewise retired, March 31st, 1906. He entered the service as Assistant-Surgeon, October 1st, 1887, becoming Major, October 1st, 1899. He served in the campaign on the North-West Frontier of India in 1897-8, including the operations on the Samana and in the Kurram Valley (medal with two clasps), and with the Tirah Expeditionary Force, being present at the actions of Chagra Kotal and Dargai (clasp).

ROYAL ARMY MEDICAL CORPS (MILITIA).

Captain (Honorary Captain in the Army) T. W. G. Kelly, M.D., resigns his commission, June 8th.

IMPERIAL YEOMANRY.

Surgeon-Major D. Harrison, Lancashire Hussars, is granted the honorary rank of Surgeon-Lieutenant-Colonel, June 8th.

VOLUNTEER RIFLES.

Seymour G. Barling to be Surgeon-Lieutenant in the 1st Volunteer Battalion the Royal Warwickshire Regiment, June 8th.

Surgeon-Lieutenant G. B. Robinson, M.D., 1st Volunteer Battalion the King's (Liverpool Regiment), to be Surgeon-Captain, June 8th.

Surgeon-Captain G. F. Morley, 3rd (Duke of Connaught's Own) Volunteer Battalion the Hampshire Regiment, resigns his commission, June 8th.

Surgeon-Captain R. E. Beveridge, M.B., 3rd (Sunderland) Volunteer Battalion the Durham Light Infantry, to be Surgeon-Major, June 8th.

Supernumerary-Surgeon-Captain (Honorary Lieutenant in the Army, Surgeon-Captain Army Medical Reserve) J. K. Tomory, M.D., 1st Sutherland (the Sutherland Highland) Volunteer Rifle Corps, resigns his commission, June 8th.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

THE British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the BRITISH MEDICAL JOURNAL supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the BRITISH MEDICAL JOURNAL for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.

Printed and published by the British Medical Association at their Office, No. 429 Strand in the Parish of St Martin-in-the-Fields, in the County of Middlesex.

ASSOCIATION INTELLIGENCE.

PROCEEDINGS OF COUNCIL.

At a special meeting of the Council held, by kind permission of the Metropolitan Asylums Board, London, in their Board Room, on Wednesday, June 20th, 1906, at 2 o'clock in the afternoon.

Present:

Dr. H. W. Langley Browne, Chairman of Council, in the Chair.

G. C. Franklin, F.R.C.S., Leicester, President.

Dr. H. Radcliffe Crocker, Treasurer.

Dr. John Ford Anderson, London.
Dr. J. Brassey Brierley, Old Trafford.
Colonel David Bruce, C.B., F.R.S. (Cape of Good Hope Eastern and Western Provinces Branches), London.
Dr. W. A. Carline, Lincoln.
Mr. Andrew Clark, London.
Mr. E. J. Domville, Exeter.
Mr. George Eastes, M.B., London.
Dr. E. Lawrence Fox, Plymouth.
Dr. Bruce Goff, Bothwell.
Dr. David Goyder, Bradford.
Dr. T. D. Griffiths, Swansea.
Dr. J. Groves, Carisbrooke.
Dr. James Hamilton, Glasgow.
Dr. T. Arthur Helme, Manchester.
Dr. R. McKenzie Johnston, Edinburgh.
Mr. R. H. Kinsey, Bedford.
Dr. C. H. Milburn, Hull.
Mr. Edmund Owen, F.R.C.S., London.
Mr. C. H. W. Parkinson, Wimborne Minster.
Dr. Frank M. Pope, Leicester.
Dr. Edwin Rayner, Stockport.
Dr. J. Maxwell Ross, Dumfries.
Dr. Cecil E. Shaw, Belfast.
Dr. E. Markham Skerritt, Clifton, Bristol.
Mr. C. R. Straton, Salisbury.
Mr. J. Lynn Thomas, C.B., Cardiff.
Mr. T. Jenner Verrall, Brighton.

Read letters of apology for non-attendance from the Chairman of Representative Meetings, Dr. Edgar Barnes, Dr. R. C. Buist, Dr. James Craig, Professor Finlay, Dr. J. H. Galton, Dr. J. J. Giusani, Dr. C. G. Gooding, Dr. C. G. D. Morier, Dr. James Murray, Professor Saundby, Dr. Norman Walker, Dr. A. T. Wear, Lieutenant-Colonel E. M. Wilson, C.B., C.M.G.

The Chairman of Council reported the resignation of Fleet Surgeon J. Lloyd Thomas, R.N., the representative of the Royal Navy Medical Service.

Resolved: That the resignation be received with regret.

Resolved: That the question of appointing a representative of the Royal Navy Medical Service, under By-law 22, be considered at a subsequent meeting of the Council.

The Council then proceeded to a general discussion as to the provisions of the Charter.

The Council decided that a prefatory note should be inserted to the effect that the report prepared by the Organization Committee is the Report of that Committee, and not a report of the Council.

On the motion of the Chairman of Council, seconded by Mr. Verrall, it was

Resolved: That the Council go into Committee for the purpose of considering the draft Charter.

The draft Charter was then considered clause by clause (*vide* Supplement, March 24th, 1906).

The Chairman reported that all resolutions would become amendments to the Charter, and, as such, presented to the Representative Meeting.

Charter—*Clause* 1.

Moved by Mr. Verrall, seconded by Mr. Straton, and

Resolved: That in Clause 1, after the words "Our United Kingdom of Great Britain and Ireland," the following words be inserted, "or in any part of our Dominions."

Moved by Mr. Parkinson, seconded by Dr. Groves,

That the Association be designated the "Royal British Medical Association."

After discussion, and with the consent of the meeting, the amendment was withdrawn.

Clause 2.

Moved by Dr. Helme, seconded by Dr. Bruce Goff, and

Resolved: That in Clause 2 (2) (v) the following words be deleted: "and may promote the candidature of any member of the Association for Parliament or for any British Legislative Assembly."

Moved by Dr. Helme, seconded by Dr. Groves,

That Clause 2 (2) (vi) be deleted.

After discussion, and with the consent of the meeting, the amendment was withdrawn.

Moved by Dr. Pope, seconded by Mr. Eastes:

That Clause 2 (2) (vii) be deleted.

The amendment having been put from the Chair was declared to be lost.

In regard to Clause 2 (2) (viii), the Solicitor was instructed to extend its verbiage to include families of deceased members of the Association and the Office Staff Superannuation Fund.

Resolved: That in Clause 2 (2) (ix), after the words "interests of the," the following words be inserted, "Association or of the."

Clause 7.

Moved by Dr. Pope, seconded by Dr. Carline,

That in Clause 7, first line, the words "and affairs" be deleted.

The amendment having been put from the Chair was declared carried, 18—7.

Moved by Dr. Helme, seconded by Dr. Brassey Brierley, and

Resolved: That where reference is made to "Representative Body" it be altered to "Representative Meeting" throughout the whole Charter.

Moved by Dr. Pope, seconded by Dr. Helme,

That the latter part of Clause 7 be amended to read: "The Representative Meeting shall meet not less than four times a year."

The amendment having been put from the Chair was declared to be lost.

Clause 8.

Moved by Mr. Straton, seconded by Mr. Parkinson,

That in Clause 8, line 2, after the words "which shall," the following words be inserted: "at their discretion."

The amendment having been put from the Chair was declared to be carried, on a show of hands, by 15—9.

Upon a demand for the names For and Against being taken, the following names were recorded as taking part in the division:

For—	*Against—*
The President	The Treasurer
Dr. J. Brassey Brierley	Dr. J. Ford Anderson
Dr. W. A. Carline	Colonel David Bruce
Dr. E. Lawrence Fox	Mr. Andrew Clark
Dr. Bruce Goff	Mr. E. J. Domville
Dr. D. Goyder	Mr. George Eastes
Dr. T. D. Griffiths	Mr. R. H. Kinsey
Dr. J. Groves	Dr. Cecil E. Shaw
Dr. James Hamilton	Dr. E. Markham Skerritt
Dr. T. Arthur Helme	Mr. John Lynn Thomas
Dr. R. McKenzie Johnston	Mr. T. Jenner Verrall
Mr. C. H. W. Parkinson	
Dr. F. M. Pope	
Dr. J. Maxwell Ross	
Mr. C. R. Straton	

Resolved: That in Clause 8, line 4, after the word "and," the following be inserted: "generally conduct and administer."

Clause 9.

Moved by Mr. Parkinson, seconded by Dr. Groves,

That in Clause 9 (1) (i) the words "Subject or not subject to the consent of the Council or other restrictions" be omitted.

After discussion, and with the consent of the meeting, the amendment was withdrawn.

Clause 12.

Moved by Dr. Brassey Brierley, seconded by Mr. Parkinson,

That in Clause 12 the word "three-fourths" be substituted for "two-thirds."

The amendment having been put from the Chair was declared to be carried, 14—10.

The Council then proceded to the consideration of the Ordinances (*vide* Supplement, March 24th, 1906).

Ordinances.—*Clause* 5.

Moved by Dr. Milburn, seconded by the President,

That under Subscription in Clause 5 the words "1½ guineas" be substituted for the words "sixty shillings."

The amendment having been put from the Chair was declared to be lost.

Moved by Dr. Markham Skerritt, seconded by Dr. Fox,

That the words "not exceeding sixty shillings per annum" be deleted.

The amendment having been put from the Chair was declared to be lost, 10—11.

Moved by Dr. Brassey Brierley, seconded by Mr. Eastes,

That the words "two guineas" be substituted for the words "sixty shillings."

The amendment having been put from the Chair was declared to be lost, 9—10.

Moved by Dr. Helme, seconded by Dr. Milburn,

That the amount of subscription be limited to the same figure as that provided for in Article VII under the existing regulations, namely, 30s., instead of the "sixty shillings" specified in Clause 5 of the Ordinance.

The amendment having been put from the Chair was declared to be lost, 8—14.

Clause 9.

Moved by Dr. Ford Anderson, seconded by Mr. Eastes,

That in Clause 9 (*c*) the word "British" be inserted before the words "Court of Justice."

The amendment having been put from the Chair was declared to be lost, 8—9.

Clause 10.

Moved by Mr. Eastes, seconded by Mr. Domville, and

Resolved: That in Clause 10 (*b*), line 5, the word "twenty-eight" be substituted for the word "fourteen."

Clause 14.

Moved by Mr. Domville, seconded by Dr. Brassey Brierley,

That in Clause 14, last line, after the words "to take part," be inserted the words "and vote."

The amendment having been put from the Chair was declared to be carried, 12—5.

Clause 15.

Moved by Mr. Domville, seconded by Dr. Brassey Brierley,

That in Clause 15, after the word "Divisions," the following words be inserted: "and members of Council."

The amendment having been put from the Chair, the same was declared to be carried, 8—5.

Clause 16.

In regard to Clause 16 (6), upon an explanation by the Chairman of the Organization Committee that separate legislation would be subsequently given to the Colonial Branches, an amendment was moved by Mr. Parkinson and carried, 10—4, that the Subclause read as follows:

> "In the case of a constituency formed within the United Kingdom, the Representative shall be elected by a general meeting of the members of the constituency, held not more than three months, nor less than three weeks, before the Annual Representative Meeting, or by voting papers sent to each member of the constituency, as the said constituency may decide."

Clause 17.

Moved by Dr. Pope, seconded by Dr. Carline,

That Clause 17 be amended by the deletion of the words "affects the funds of the Association or" and the addition of the following words:

> "but no resolution involving the expenditure of money shall be binding on the Council unless it has been presented by the Council or by the Finance Committee."

The amendment having been put from the Chair was declared to be carried, 13—2.

An amendment was moved, seconded, and carried,

That in Clause 17 (2), line 6, after the word "Council" the following words be substituted, "by a Branch."

An amendment was moved, seconded, and carried,

That in Clause 17 (3), Subclauses (*a*) and (*e*), the words "three calendar months," be substituted for the words "twenty-eight days."

Clause 19.

Moved by Dr. Milburn, seconded by Dr. Helme,

That in Section vi, Clause 19, provision be made to add a Representative of the Volunteer Medical Service on the Central Council.

The amendment having been put from the Chair was declared to be lost.

An amendment was moved, seconded, and carried:

> That in Clause 19, in the last line but one, after the words "Medical Officer," the following words be inserted: "shall be a member of the Association and."

Clause 21.

Resolved: That Clause 21, last line but three, be amended by the insertion of the words "for that period" between the words "and any."

Clause 22.

Resolved: That a fresh clause be inserted after Clause 21, and numbered Clause 22, to read as follows:

> "There shall be an Editor, a General Secretary and Manager, a Medical Secretary, and such other officers as the Council may from time to time appoint."

Resolved: That existing Clause 22 be renumbered 23.

Notice of Motion.

Dr. HELME gave notice that he would move at the next meeting of the Council:

> That while not expressing any opinion unfavourable to the application for a Royal Charter, this Council is of opinion that further and fuller consideration of the whole question is requested, and strongly recommends the Representative Meeting to delay the application so as to give the Association as a whole longer time to appreciate and consider the many important matters involved in drafting a thoroughly comprehensive and permanent form of Charter.

The CHAIRMAN OF COUNCIL undertook that this notice of motion should take precedence over the Reports of Committees on the Agenda Paper for July 4th.

Meetings of Branches & Divisions.

[*The proceedings of the Divisions and Branches of the Association relating to Scientific and Clinical Medicine, when reported by the Honorary Secretaries, are published in the body of the* JOURNAL.]

LANCASHIRE AND CHESHIRE BRANCH:

ALTRINCHAM DIVISION.

THE annual meeting was held at Altrincham on Thursday, June 21st, Dr. LUCKMAN, and afterwards Dr. COOPER, presiding. There was a large and representative attendance, including visitors from two other Divisions.

Confirmation of Minutes.—The minutes of the previous meeting were read and confirmed.

Election of Officers.—The following gentlemen were elected officers for the ensuing year:—*Chairman*, Dr. P. R. Cooper. *Vice-Chairman*, Dr. G. H. Smith; *Representative at Representative Meeting*, Dr. Charles J. Renshaw; *Representatives on Branch Council*, Drs. Garstang and Luckman; *Honorary Secretary and Treasurer*, Dr. Garstang; *Assistant Secretary*, Dr. Adolphe Renshaw; *Additional Members of Executive Committee*, Drs. R. J. Browne, Cox, Owen Jones, Ransome, Basil Rhodes, and Surridge.

Branch Council Memorandum on Association Finances.—The following resolution was unanimously passed:

> That this Division instructs its Representatives to oppose the financial policy of the Branch Council as expressed in the memorandum recently issued; and authorizes the Committee to approach other Divisions with a view to joint action.

The memorandum was characterized by one speaker as "a campaign of unreason carried on by methods of misrepresentation," and this appeared to be the general opinion of the meeting.

Alteration of Rules.—Several small amendments in the rules were agreed to, and ordered to be submitted for confirmation to the Central Council.

Associate Members.—The following were elected: Drs. Coutts (Blackpool), Greenwood (Blackburn), Nash Accrington), and Wynne (Leigh).

Sanatorium Treatment of Phthisis.—Dr. BRIAN MELLAND resumed the reading of his paper on the Sanatorium Treatment of Phthisis, which had been interrupted at a former meeting. He showed that the disease was not peculiar to any particular climate, and in an exhaustive description of the methods of treatment adopted in sanatoriums, specified six headings for consideration: (1) Open air life, (2) removal from home, relations, etc., (3) nutrition, (4) antifebrile treatment, (5) convalescence, (6) precautions against infection.—Dr. HUTTON, in course of the discussion, gave an eloquent and interesting address, drawing attention to the value of drugs as adjuvants (though not cures); to the remarkable cessation of night sweats on adopting open-air treatment; to the great value of sanatoriums, if only from the training they give the individual patients, teaching them *inter alia* that they can live without alcohol; the value of rest; the nature of food to be taken; and the importance of dealing with their sputum.—Dr. BASIL RHODES advocated the provision of hospitals, more in number and simpler in design, and smaller and less costly than the recently-erected sanatoriums.—Drs. COOPER and LUCKMAN also spoke; and Drs. MELLAND and HUTTON replied.

Hospital.—A visit of inspection was then paid to the Altrincham Hospital.

Dinner.—Subsequent to the meeting a number of the members and guests dined together.

LIVERPOOL (BOOTLE) DIVISION.

THE annual meeting of this Division was held at the Masonic Hall, Bootle, on Wednesday, May 30th.

Balance Sheet.—The balance sheet was submitted by the SECRETARY, and considered satisfactory.

Office-bearers.—The following changes among the office-bearers have been made: *Chairman*, B. Sumner, M.D.; *Vice-Chairman*, J. Dunn, Esq. H. Waters, M.B., was elected a member of the *Executive Committee*, *vice* M. Dickson, M.D., now in the Northern Division. *Representative at the Annual Meeting*, Joseph Walker.

Candidates for General Medical Council.—It was resolved to support, as far as possible, local candidates for the General Medical Council.

Members and the Work of the Division.—A feeling was expressed by several members that many absentees might take a little more interest in the work of the Division, and thereby help the interests of the profession in general. Several members who take a great interest in local politics and devote much time to other public business, would no doubt be welcomed to take part in the work that falls upon a very few regular attenders.

LIVERPOOL (CENTRAL) DIVISION.

THE annual meeting of this Division was held on June 21st, Dr. T. DRAKE LEIGH, Chairman, presiding.

Election of Officers.—The following officers were elected: *Chairman*, Mr. George P. Newbolt; *Vice-Chairman*, Dr. A. Gordon Gullan; *Secretary*, Dr. Frank H. Barendt; *Members of the Executive Committee*, Drs. Hubert Armstrong, Francis W. Bailey, William Fingland, T. Drake Leigh, and William E. Livsey; *Representatives on the Branch Council*, Mr. George P. Newbolt and Dr. Frank H. Barendt; *Representative of the Division in Representative Meetings*, Dr. Francis W. Bailey.

Annual Report.—The annual report, which alluded *inter alia* to the success of the dinner of the United Liverpool and District Divisions, at which the Medical Secretary, Mr. J. Smith Whitaker, delivered an instructive address, was unanimously adopted.

Financial Position of the Association.—The financial position of the Association was discussed, chiefly as regards the increased expenditure. It was resolved that the publication of the *Year Book* should be recommended to be discontinued, and that, as the SUPPLEMENTS contained a full record of the proceedings of the Representative Meeting, the volume of the minutes published separately was unnecessary and therefore a needless expense.

Vote of Thanks.—A vote of thanks was passed to the retiring Chairman, Dr. T. Drake Leigh, for his services, and also to the Secretary, whose labours were thoroughly appreciated.

St. Helen's and Warrington Divisions.

A joint meeting of the St. Helen's and Warrington Divisions was held in the Infirmary, Warrington, on May 29th.

Representative on Branch Council.—Dr. Bowden (Warrington) was again unanimously elected representative on the Branch Council for the two Divisions of Warrington and St. Helen's. Dr. Bowden had previously written the Secretary regretting his inability to be present owing to a previous engagement.

Annual Representative Meeting.—The business of the general meeting was thoroughly discussed, and instructions noted by the Secretary for Dr. Bowden.

Warrington Division.

Afterwards the annual meeting of the Warrington Division was held.

Election of Officers.—Dr. Burrowes was elected President for the ensuing year, Dr. Joseph Vice-President, Mr. O. H. Edwards again consenting to be Secretary, but very much deploring the poor response to the quarterly circulars in the matter of attendance. There was not a single representative of the profession present at the annual meeting from Warrington.

METROPOLITAN COUNTIES BRANCH:

Stratford Division.

The annual meeting of this Division was held in the Alexandra Hotel, High Street, Stratford, on Thursday, June 14th, Dr. Stocker in the chair.

Meetings.—On the motion of Dr. Black, it was decided that two of the meetings of the Division should be held each year in the Tower Hamlets district.

Election of Office-bearers.—The meeting proceeded to elect office-bearers for the year, with the following result: *Chairman*, Dr. E. B. Hastings; *Vice-Chairman*, Dr. C. J. Stocker; *Honorary Secretary*, Dr. P. J. S. Nicoll; *Honorary Assistant Secretary*, Dr. G. A. Troup, 2, Romford Road, Stratford; *Representative at Annual Representative Meeting*, Dr. Percy Rose; *Representative on Branch Council*, Dr. W. A. Grogono; *Members of Executive Committee*, Dr. Beadles, Dr. Black, Dr. R. H. Collins, Dr. A. Corner, Dr. A. J. Couzens, Dr. Dale, Dr. Frederick, Dr. Hay.

Westminster Division.

The annual meeting of this Division was held at 20, Hanover Square, on Wednesday, June 20th, at 9 p.m. Mr. J. Bland-Sutton occupied the chair.

Confirmation of Minutes.—The minutes of the previous meeting were read and confirmed.

Election of Officers.—The meeting then proceeded to elect the officers for the coming year, with the following result: *Chairman:* Dr. Haslip. *Vice-Chairman:* Dr. Knowsley Sibley. *Honorary Secretary and Treasurer:* Dr. McCann. *Representatives on the Branch Council:* Dr. Ewart, Dr. Haslip, Dr. McCann, and Dr. Sibley. *Members of the Executive Committee:* Dr. Baynes, Mr. Bland-Sutton, Dr. Cautley, Dr. Dauber, Dr. de Castro, Dr. des Voeux, Mr. Durham, Dr. Ewart, Mr. Hilliard, Mr. E. Lloyd-Williams, Dr. Longhurst, Dr. O'Connor, Dr. Bruce Porter, and Dr. Hugh Woods. *Representative for the Representative Meeting of the Association:* Dr. William Ewart.

Report of Executive Committee.—The annual report of the Executive Committee was read and adopted, and the business of the Annual Representative Meeting was considered in detail.

Annual Representative Meeting.—The Division gave definite instructions on most of the points which were to be brought forward at the meeting. Some were, however, left to the discretion of their Representative.

Proposed Royal Charter.—A general discussion then took place as to the proposed application for a Royal Charter, in which most of the members present took part. The following resolution was eventually proposed by Dr. Dauber and seconded by Dr. Cautley:

> That a Royal Charter would be detrimental to the best interests of the British Medical Association, and this Division opposes the application.

This was put to the meeting and carried with one dissentient.

Vote of Thanks to Retiring Chairman.—Dr. Dauber proposed, and Dr. Longhurst seconded, a very hearty vote of thanks to the retiring Chairman, which was carried by acclamation. There being no other business, the meeting then adjourned.

SOUTHERN BRANCH:

Southampton Division.

The annual meeting of the Southampton Division was held on Friday, June 8th, at 3.30 p.m., at the Lesser Philharmonic Hall. Colonel MacLeod was voted to the chair.

Letter.—Dr. Gwillim sent an apology for absence.

Confirmation of Minutes.—The minutes of the last annual meeting were read and signed as correct. The resignation by Dr. Wade of the position of Honorary Secretary was received with regret. He was accorded a hearty vote of thanks for his past services, and this resolution was ordered to be entered in the minutes.

Election of Officers.—Drs. Purvis and May were appointed scrutineers. On the votes being counted, the following were unanimously elected:—*Chairman:* Dr. Simmonds. *Vice-Chairman:* Dr. Aldridge. *Honorary Secretary:* Dr. MacKeith. The following were elected as representatives on the Branch Council: Dr. Bullar, Colonel MacLeod, and Dr. Wade. The following were elected as members of the Executive Committee: Drs. Chinery, Gwillim, E. S. Hall, May, and Rogers. Dr. Simmonds, having been elected, now took the chair. In conjunction with the two Channel Island Divisions, Dr. Easton was elected as Representative to the Representative Meeting, Dr. Hughes as deputy Representative.

Annual Representative Meeting.—The Representative was instructed to vote for Dr. Bullar as one of the Direct Representatives to the General Medical Council. He was instructed to vote against the reform of the income tax being taken up by the British Medical Association, as it was felt that the Association had already enough work in hand to occupy all its energies. In reference to other matters the Representative was left with a free hand.

Report of Executive Committee.—The annual report of the Executive Committee was received and adopted. On the report of the Committee on the formation of sections being presented the matter was postponed for twelve months.

Provident Dispensaries.—With regard to provident dispensaries and provident medical services, the Division at its meeting last October agreed to support the recommendations of the Medico-Political Committee.

Matters Referred to Divisions.—The Division had no suggestions to offer on the following: Report of the Science Co-ordination Committee, ambulance work, formation of Division libraries, formation of sections for clinical and pathological work.

Division and Branch Finance.—The inquiry as to the present system of Division and Branch finance was referred to the Executive Committee for consideration and report.

Out-patient Departments.—It was resolved with regard to the hospital out-patient department:

> That in the opinion of this Division there should be no out-patient department in hospitals except for consultation and casualties.

Registration of Nurses.—On this subject it was resolved:

> (1) That this Division approves in general of the method of registration of nurses proposed by the Select Committee of the House of Commons, and (2) that this Division approves of the separate registration of midwifery nurses.

Proposed Royal Charter.—The application for a Royal Charter and the annual report of the Council were considered, but these matters were left to the Representative.

Winchester Division.

The annual meeting of this Division was held at the Royal Hants County Hospital, Winchester, on Thursday, May 31st, at 3.30 p.m.

Confirmation of Minutes.—The minutes of the last meeting and of the special meeting were read and confirmed.

Election of Officers.—The following officers were elected for the ensuing year: *Chairman of the Division*, F. W. Jollye, M.D., F.R.C.S. (Alresford); *Vice-Chairman*, W. A. S. Royds (Andover); *Honorary Secretary and Treasurer*, H. J. Godwin, M.B., F.R.C.S., 35, Southgate Street, Winchester; *Representative at Representative Meetings*, H. J. Godwin, M.B., F.R.C.S.; *Representatives on Branch Council*, W. A. S. Royds, J. L. Livingstone, M.D., J. C. Hoyle, M.B.; *Six*

Members of the Executive Committee, F. J. Child, M.D. (Winchester), G. F. A. England, M.D. (Winchester), W. M. Harman, M.D. (Winchester), H. A. Ahrens (Basingstoke), J. F. Briscoe (Alton), Thomas Wright, M.B. (Aldershot).

Annual Meeting of Branch in 1907.—The following resolution from the Executive Committee was passed unanimously:

> That this Division has great pleasure in inviting the Southern Branch of the British Medical Association to hold the annual meeting of the Branch for 1907 in Winchester, and that Dr. Fuller England be nominated for the post of President-elect.

Proposed Alteration of Rule.—Mr. Godwin (Winchester) moved that an alteration be made in Rule 9:

> That the other members of the Executive Committee shall be six in number.

This was seconded by Dr. Hoyle, and carried unanimously.

Matters referred to Divisions.—Matters referred to Divisions were discussed and voted on as follows: (Supplement, February 10th) "Title Dr.," negatived; "declaration" deemed unnecessary; "alterations," resolved that we have every confidence in the judgement of the Central Council. (Supplement, February 17th) Hospital outpatient departments, all in favour of "the question." (Supplement, February 24th) Grants to Divisions: (1) amendment of by-law, and (2) expenses of Representatives, negatived. (Supplement, March 3rd) Notices of motion: (1) Election of representatives, and (2) officers of Divisions, negatived; management of library, we recommend that the library be kept open to a later hour; (3) facilities for social intercourse at head office, all in favour; Nurses' registration: (1) All agreed, provided that the period of training be not less than three years; (2) negatived. (Supplement, March 24th) Proposed application for Royal Charter, all in favour. (Supplement, March 31st) Notices of motion: (1) Standing Committee's election, negatived; (2) attendance, negatived; (3) date of issue, negatived; (4) regulation and co-ordination of duties, negatived. (Supplement, April 21st) Notices of motion: (1) Representation of the Representative Meeting on the Council, all in favour; (2) supplementary grants to Divisions and Branches, all in favour; (3) tenure of office of members of Council elected by the Representative Meeting, all in favour.

Scale of Fees.—A scale of fees for guidance of members, drawn up by the Executive Committee, was presented. It was resolved that a printed copy be sent to every member.

Demonstration.—Captain Douglas, I.M.S. (St. Mary's Hospital, London), introduced by the Secretary, gave a very interesting demonstration on opsonins.

Epidemic Diarrhoea.—Dr. J. E. Sandilands (M.O.H., Winchester) read a paper on epidemic diarrhoea. Attention was directed to the fact that breast-fed and artificially-fed infants alike conveyed dirt to their mouths from the pavements of the streets and the floors of rooms on their hands and on rubber teats, and yet that the artificially-fed suffered from diarrhoea out of all proportion to the breast-fed. Under the circumstances, it was not probable that the essential cause of diarrhoea resided n street dirt. The incidence of diarrhoea fell in the late summer months, and great heat in the early months was requently accompanied by less diarrhoea than cooler weather in the later months. This peculiar incidence admitted of two explanations—one, an enhanced virulence n the third quarter of the year expressing a phase in the natural history of the causative micro-organisms; and the other the prevalence of carrying agents in the third quarter of the year, which were absent during the first quarter. It was suggested that flies, which had been held to be the carrying agents of diarrhoea infection by Newsholme and Nash, reached their maximum prevalence ate in the year, and that the incidence of diarrhoea oincided with and resulted from the seasonal prevalence of flies. By the end of the year Dr. Sandilands hoped to have established the seasonal prevalence of flies by direct xperiments. An interesting discussion followed, in which the following members took part: Drs. Briscoe Hoyle, Browne, Scott, Godwin. Dr. Sandilands eplied.

Vote of Thanks.—A vote of thanks was proposed by the Chairman to Captain Douglas for so kindly coming to give such an interesting demonstration. This was carried unanimously.

Poor-law Appointment at Alresford.—Dr. Hoyle proposed that the Poor-law appointment at Alresford be discussed at the next meeting of the Executive Committee. This was seconded by Dr. Browne, and carried.

Association Notices.

BRANCH AND DIVISION MEETINGS TO BE HELD.

Bath and Bristol Branch.—A combined meeting of the Bath and Trowbridge Divisions will be held at the Royal United Hospital, on Monday, July 2nd, at 6 p.m. Business: To elect Representative for the Bath and Trowbridge Divisions. —D. Leslie Beath, Honorary Secretary.

Birmingham Branch: West Bromwich Division.—The conjoint meeting of this Division with the Dudley and Bromsgrove Divisions will take place on July 2nd, at the Medical Institute, Birmingham, for the election of Representative. This meeting will be followed by the annual meeting of the West Bromwich Division.—H. W. B. Plummer, Honorary Secretary, West Bromwich Division.

Dorset and West Hants Branch.—The summer meeting will be held at Abbotsbury, Wednesday, July 11th. Members desirous of reading papers or exhibiting cases are requested to communicate, on or before June 30th, with the Honorary Secretary, Dr. James Davison, Streateplace, Bournemouth.

East Anglian Branch: West Norfolk Division.—The annual meeting of this Division will be held on Wednesday, July 4th, at the residence of the Chairman (Dr. Thomas), Swaffham. Lunch at 1.30 by invitation of the Chairman. Meeting at 3 p.m. The agenda, besides containing the usual business of the annual meeting, contains for consideration the proposed application for a Royal Charter. The Chairman will also move the following alteration and addition to the rules: "That Rule 11 shall read, 'ordinary meetings of the Division shall be held *half-yearly*, etc.'" Addition to Rule 9: "That the Honorary Secretary of the Scientific Committee be *ipso facto* a member of the Executive Committee."—A. Gardiner, King's Lynn, Honorary Secretary.

Northern Counties of Scotland Branch.—In accordance with By-law 24 of the constitution, the election of a Representative of the Branch on the Central Council must be made by voting papers sent to each member, and the candidates' names must be sent to me on or before June 30th, and the nomination signed by three members.—J. Munro Moir, M.D., Honorary Secretary, 4, Ardross Terrace, Inverness.

North Wales Branch.—The annual meeting will be held at Llandudno on Wednesday, July 11th. Members having papers to read, cases to communicate, or specimens to show, are requested to notify the Honorary Secretary on or before Saturday, June 30th.—H. Jones Roberts, Honorary Secretary, Penygroes.

Oxford and Reading Branch.—The annual meeting of this Branch will take place at the library of the Royal Berkshire Hospital, at 5 p.m., on Saturday, July 7th. Dr. W. Osler, F.R.S., Regius Professor of Medicine at Oxford, will give a lantern demonstration of the General Morphology of Abdominal Tumours. Dr. E. L. Bevers, Dr. Mallam, Mr. Arthur Roberts, the President (Mr. H. G. Armstrong), and probably others, will exhibit patients or specimens. The dinner will be held at the Queen's Hotel, Reading, at 7 p.m., when members have the privilege of bringing guests.—W. T. Freeman, 30, Portland Place, London Road. Reading, Honorary Secretary.

South-Eastern Branch of Ireland.—A meeting of the Branch will be held at the Club House, Carlow, on July 4th, at 5.30 p.m. (1) Minutes of Branch Meeting. (2) Minutes of Branch Council. (3) To discuss questions of vital interest, etc., to Branches, especially with reference to financial position of the Association, as commented on in circular.—J. Quirke, Honorary Secretary, Piltown, co. Kilkenny.

Worcestershire and Herefordshire Branch.—The annual meeting will be held at the Worcester Infirmary on Monday next, July 2nd, at 5 p.m. Business, etc.: To elect officers for the ensuing year. The Branch will be represented on the Council of the Association for the next three years by a member of the Gloucestershire Branch. The present Honorary Secretary, who has acted since the foundation of the Branch, does not seek re-election. Mr. Edgar Morris will read Some Notes on High Frequency Treatment. Clinical cases will be shown. There will be a Meeting of the Council of the Branch at 4.45 p.m. to elect members.—Geo. W. Crowe, Honorary Secretary.

Naval and Military Appointments.

ROYAL NAVY MEDICAL SERVICE.

The following appointments have been made at the Admiralty: Edward T P. Eames, Staff Surgeon, to the *Donegal*, on commissioning, June 23rd: George Ross, M B., Surgeon, to Chatham Hospital, undated; Edward R. D. Fasken, Fleet Surgeon, and Alfred T. Gailleton, M.B., Surgeon, to the *Implacable*, on recommissioning, July 10th; Frederick C. Lumley, Staff Surgeon, to the *Nile*, on recommissioning, July 10th; Herbert H. Gill, M.B., Surgeon, to the *Highflyer*. on recommissioning, July 14th; William E. Marshall, Surgeon, to the *Andromeda*, on recommissioning, July 14th.

ROYAL ARMY MEDICAL CORPS.

With reference to a paragraph in the Supplement to the British Medical Journal of June 23rd. p. 346, respecting the retirement from the service of Major F. A. Saw. M.B., we are informed that he has received the South African medal with two clasps for his services in 1899-1901, in addition to the Rhodesia medal for 1896.

Lieutenant-Colonel W. W. Pike, D.S.O., is appointed Officiating Principal Medical Officer Burmah Division, in addition to, and without prejudice to, his other duties, from May 16th.

INDIAN MEDICAL SERVICE.

Cadwallader E. Palmer, M.B., to be Lieutenant, September 1st, 1905.

The retirement from the service of Colonel A. F. Dobson, M.B., Colonel T. S. Weir, and Lieutenant-Colonel J. Maitland, M D., which has been already announced in the British Medical Journal, has received the approval of the King.

Lieutenant-Colonel J. Smyth, M.D., Madras Establishment, Officiating Senior Surgeon and Sanitary Commissioner with the Government of Mysore, is confirmed in that appointment from November 8th, 1904.

Colonel T. J. Hackett-Wilkins, Madras Establishment, Principal Medical Officer Burmah Division, is posted as Principal Medical Officer 9th (Secunderabad) Division.

ROYAL ARMY MEDICAL CORPS (MILITIA).

The appointment to a Lieutenancy of Robert J. Sterling bears date April 1st, 1906, and not April 11th, as stated in the *London Gazette* of April 20th.

Vital Statistics.

HEALTH OF ENGLISH TOWNS.

In seventy-six of the largest English towns, including London, 8,854 births and 4,015 deaths were registered during the week ending Saturday last, June 23rd. The annual rate of mortality in these towns, which had been 13.8, 12.9, and 12.9 per 1,000 in the three preceding weeks, rose last week to 13.2 per 1,000. The rates in the several towns ranged from 5.7 in Leyton and in Handsworth, 6.5 in Smethwick, 6.9 in Willesden, 7.0 in Aston Manor, 7.2 in Hornsey, 7.6 in East Ham, and 7.7 in Walthamstow and in Rotherham, to 17.3 in Birkenhead and in Manchester, 17.6 in Sunderland, 18.1 in Warrington, 18.2 in Middlesbrough, 18 3 in Bradford, 19.5 in Merthyr Tydfil, 19.8 in Burnley, and 22.8 in Hanley. In London the rate of mortality was 13 3 per 1,000, while it averaged 13.2 per 1,000 in the seventy-five other large towns. The death-rate from the principal infectious diseases averaged 1.3 per 1,000 in the seventy-six large towns, agreeing with the rate in London; while among the large provincial towns the rates ranged upwards to 2.6 in Manchester, 2.8 in Merthyr Tydfil, 3.0 in West Bromwich, 3.1 in Salford, 3.3 in Halifax, 3.6 in Burnley, and 5.0 in Great Yarmouth. Measles caused a death-rate of 1.4 in Bradford, 1.6 in Wallasey, 2.2 in Manchester and in Salford, 2.9 in Halifax, and 3.0 in Burnley; diphtheria of 1.2 in Hornsey and 1 6 in Wolverhampton; whooping-cough of 1.1 in Swansea, 1.3 in Tottenham, 1.4 in Coventry, and 1.5 in West Bromwich; and diarrhoea of 1.1 in Walsall and in Oldham, 1.3 in Walthamstow, 1.4 in Merthyr Tydfil, and 3.0 in Great Yarmouth. The mortality from scarlet fever and from enteric fever showed no marked excess in any of the large towns, and no fatal case of small-pox was registered during the week. The number of small-pox patients remaining under treatment in the Metropolitan Asylums Hospitals, which had been 5, 6, and 7 on the three preceding Saturdays, had further risen to 13 on Saturday last, June 23rd; 7 new cases were admitted during the week, against 3, 1, and 1 in the three preceding weeks. The number of scarlet fever cases in these hospitals and in the London Fever Hospital, which had been 2,516, 2,603, and 2,677 at the end of the three preceding weeks, had further increased to 2,692 at the end of last week; 380 new cases were admitted during the week, against 312, 344, and 3[illegible]5 in the three preceding weeks.

HEALTH OF SCOTCH TOWNS.

During the week ending Saturday last, June 23rd, 1,020 births and 547 deaths were registered in eight of the principal Scotch towns. The annual rate of mortality in these towns, which had been 17.5, 15.6, and 15.8 per 1.000 in the three preceding weeks, further rose to 16 0 per 1,000 last week, and was 2.8 per 1,000 above the mean rate during the same period in the seventy-six large English towns. Among these Scotch towns the death-rates ranged from 9.5 in Leith and 10.2 in Paisley, to 19.6 in Dundee and in Perth. The death-rate from the principal infectious diseases averaged 2.0 per 1,000, the highest rates being recorded in Greenock and Glasgow. The 274 deaths registered in Glasgow included nine which were referred to measles. 10 to whooping-cough. 11 from fever (including 8 from cerebro-spinal fever), and 12 from diarrhoea. Five fatal cases of measles, and 4 of diarrhoea were recorded in Edinburgh. Two deaths from whooping-cough occurred in Aberdeen and 3 from diarrhoea in Dundee.

HEALTH OF IRISH TOWNS.

During the week ending Saturday, June 23rd, 511 births and 326 deaths were registered in six of the principal Irish towns, as against 565 births and 232 deaths in the preceding period. The annual death-rate in these towns, which had been 18.1, 17.8, and 19.9 per 1,000 in the three preceding weeks, fell to 15.1 per 1,000 in the week under notice, this figure being 1.9 per 1,000 higher than the mean annual rate in the seventy-six English towns for the corresponding period. The figures ranged from 7.8 in Waterford and 10.9 in Limerick, to 19.0 in Belfast and 20.2 in Dublin. The zymotic death-rate during the same period and in the same six Irish towns averaged 0.9 per 1,000, or 0.5 per 1,000 higher than during the preceding period, the highest figure—2.5—being recorded in Londonderry, while Limerick and Waterford registered no deaths under this heading at all.

Vacancies and Appointments.

This list of vacancies is compiled from our advertisement columns, where full particulars will be found. To ensure notice in this column, advertisements must be received not later than the first post on Wednesday morning.

MEMBERSHIP OF THE BRITISH MEDICAL ASSOCIATION.

The British Medical Association exists for the promotion of medical and the allied sciences, and the maintenance of the honour and the interests of the medical profession.

The Annual Subscription to the British Medical Association is £1 5s. 0d., and the British Medical Journal supplied weekly, post free, to every member of the British Medical Association wherever he may reside.

Forms of application for membership can be obtained from the General Secretary, 429, Strand, London, W.C.

The principal rules governing the election of a medical practitioner to be a member of the British Medical Association are as follow:

Article III.—Any Medical Practitioner registered in the United Kingdom under the Medical Acts and any Medical Practitioner residing within the area of any Branch of the Association situate in any part of the British Empire other than the United Kingdom, who is so registered or possesses such medical qualifications as shall, subject to the Regulations, be prescribed by the Rules of the said Branch, shall be eligible as a Member of the Association. The mode and conditions of election to Membership shall from time to time be determined by or in accordance with the By-laws. Every Member, whether one of the existing Members or a subsequently-elected Member, shall remain a Member until he ceases to be a Member in accordance with the provisions hereof.

By-law 1.—Every Candidate for Membership of the Association shall apply for election in writing, addressed to the Association, and stating his agreement, if elected, to abide by the Regulations and By-laws of the Association, and the Rules of such Division and Branch to which he may at any time belong, and to pay his subscription for the current year.

By-law 2.—Every candidate who resides within the area of a Branch shall forward his application to the Secretary of such Branch. Notice of the proposed election shall be sent by the Branch Secretary to the General Secretary of the Association, and to every Member of the Branch Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a member of the Association by the Branch Council at any meeting thereof held not less than seven days (or such longer period as the Branch may by its Rules prescribe) after the date of the said Notice. A Branch may by special Resolution require that each candidate for election to the Association shall furnish a certificate from two Members of the Association to whom he is personally known. Officers of the Navy, Army, and Indian Medical Services on the Active List are eligible for election through the Council or a Branch without approving signatures as laid down in By-law 3.

By-law 3.—Every candidate whose place of residence is not included in the area of any Branch shall forward his Application to the General Secretary of the Association, together with a statement signed by three members of the Association, that from personal knowledge they consider him a suitable person for election. Notice of the proposed election shall be sent by the General Secretary to every Member of the Council, and the candidate, if not disqualified by any Regulation of the Association, may be elected a Member of the Association by the Council at any meeting thereof held not less than one month after the date of the said notice.

The annual subscription to the British Medical Journal for non-members is £1 8s. 0d. for the United Kingdom and £1 12s. 6d. for abroad.
